

SCV VALVE
Innovative Valve Solutions®

[281] 482-4728 • www.scvvalve.com

1-Piece Flanged Floating Ball Valves - B16.34 - Reduced Port

2-Piece Flanged Floating Ball Valves - B16.34 - Full Port

Class: 150 - 1500

Sizes: 1/2" - 12"

SCV VALVE

SCV VALVE manufactures some of the most dependable cast and forged steel Ball Valves in the industry. Our products are manufactured and tested in accordance with respective API, ASME, and ANSI standards. With features such as double block and bleed capabilities, secondary sealant injections, and spring energized self relieving seats, the SCV design offers many features and options beneficial for oil, gas, and liquid applications making it one of the most preferred ball valves on the market.

Innovative Valve Solutions.®

For more information call us @ [281] 482-4728 or visit our website @ www.scvvalve.com

1-Piece Flanged Floating Ball Valves - Reduced Port - B16.34

- Basic Design: ANSI/ASME B16.34, conforms to API 6D
- Face-to-Face Dimension: ANSI/ASME B16.10
- Flange End Dimension: ANSI/ASME B16.5
- Inspection & Testing: API 598
- Fire Safe Design: API 607/BS 6755

2-Piece Flanged Floating Ball Valves - Full & Reduced Por - B16.34

- Basic Design: ANSI/ASME B16.34, conforms to API 6D
- Face-to-Face Dimension: ANSI/ASME B16.10
- Flange End Dimension: ANSI/ASME B16.5
- Inspection & Testing: API 598
- Fire Safe Design: API 607/BS 6755

Note: Not recommended for throttling applications.

Note: SCV reserves the right to change any technical design and dimensional data without prior notice. Please contact SCV to confirm all Dimensions and Data offered in this catalog.

BOLTED BONNET OS&Y WEDGE GATES

Carbon & Stainless

Sizes: 2" - 48"
Class: 150 - 2500
Design: API 600

BOLTED COVER FULL PORT SWING CHECKS

Carbon & Stainless

Sizes: 2" - 36"
Class: 150 - 2500
Design: API 6D

Exterior Coating: Epoxy

FLOATING BALL VALVES -

1-PIECE REDUCED PORT & 2-PIECE FULL PORT

Carbon & Stainless
Sizes: 1/2" - 12"
Class: 150 - 1500
Design: B16.34

THRU CONDUIT GATES -

SLAB & EXPANDING

Carbon Steel

Sizes: 2" - 42"
Class: 150 - 1500
Design: API 6D

COVER PISTON CHECKS

Carbon Steel

Sizes: 2" - 24"
Class: 150 - 2500
Design: API 6D

3-PIECE TRUNNION BALLS

Carbon & Stainless

Sizes: 2-1/16" - 13-5/8"
Pressure: 2000, 3000 & 5000
Design: API 6A

DUAL PLATE CHECKS - WAFER & LUG

Carbon & Stainless

Wafer Sizes: 1.5" - 36"
Wafer Class: 150 - 2500
Lug Sizes: 2" - 36"
Lug Class: 150 - 900
Design: API 594

BOLTED BONNET GLOBES

Carbon & Stainless

Sizes: 2" - 24"
Class: 150 - 2500
Design: API 623

PRESSURE BALANCED

LUBRICATED PLUGS

Carbon Steel

Sizes: 2" - 36"
Class: 150 - 2500
Design: API 6D

3-PIECE TRUNNION BALLS

BOLTED & WELDED BODY

Carbon & Stainless

Sizes: 2" - 42"
Class: 150 - 2500
Design: API 6D

Bore Coating: Scotchkote™ 134

Technical Data for Optional Seal & Seat Selections

Optional Seal Selections

Code	Material	Description
B	BUNA	Also called Buna N or Nitrile, this sealing material is widely used because of its compatibility with most hydraulic fluid media, including petroleum oils, water, water glycol, Di-Ester based fluids, air, and inactive gases. The temperature of this material ranges from -54C to +135C [-65F to +275F].
N	NEOPRENE	This sealing material is excellent for refrigerants, ammonia, and freon. Its temperature range is from -37C to +107C [-35F to +225F].
E	EPDM	Also called Ethylene-Propylene, this sealing material is recommended for low pressure steam, hot water, phosphate ester base fluid, weak alkalines, and acids. This material is not recommended for petroleum service, hydrocarbons, alcohol, and radiation. Its temperature range is -54C to 149C [-65F to +250F].
V	VITON	Also called Fluorocarbon Rubber (FKM), this material is known for being excellent in condition up to +204C [+400F]. Viton offers excellent resistance to aggressive fuels and chemicals.
T	PTFE	Teflon has excellent resistance to a wide range of chemicals. It is excellent at pressures below 1500 PSI. It can withstand temperatures up to +204C [+400F].
R	NBR	NBR is typically resistant to mineral oil-based lubricants and greases, hydraulic fluids, hydrocarbons, and water. NBR is not resistant to polar solvents or chlorinated hydrocarbons. The material's temperature range is from -30C to +100C [-22F to +212F].
H	HNBR	HNBR is simply hydrogenated NBR. It is typically resistant to mineral oil-based lubricants and greases, hydraulic fluids, hydrocarbons, and water just like NBR. HNBR is more resistant to heat, o-zone, and aging than NBR. The material's temperature range is from -30C to +100C [-22F to +212F].
S	SILICONE	This material is capable of operating in a wide temperature range and has excellent resistance to o-zone, water, weathering, and aging. This material is generally not resistant to fuels, oils, steams, acids, or high pressures. This material's temperature range is from -65C to +250C [-85F to +482F].
F	FLUROSILICONE	This material is far more resistant to oils and fuels than other silicones. The temperature range, however, is limited from -73C to +177C [-100F to +350F].
G	GRAPHOIL	Grafoil is chemically resistant to attack from nearly all organic and inorganic fluids with exception of highly oxidizing chemicals and highly concentrated oxidizing mineral acids. The material is good up to +538C [+1000F] as well as at cryogenic temperatures.
U	FLUORSINT	This material contains a mica filler and offers superb mechanical properties such as resistance to abrasion, wear, and extrusion. It is ideal for high pressure applications and offers low co-efficient of friction. Its temperature range is from -46C to +343C [-50F to +650F].

Note: Additional options available upon request

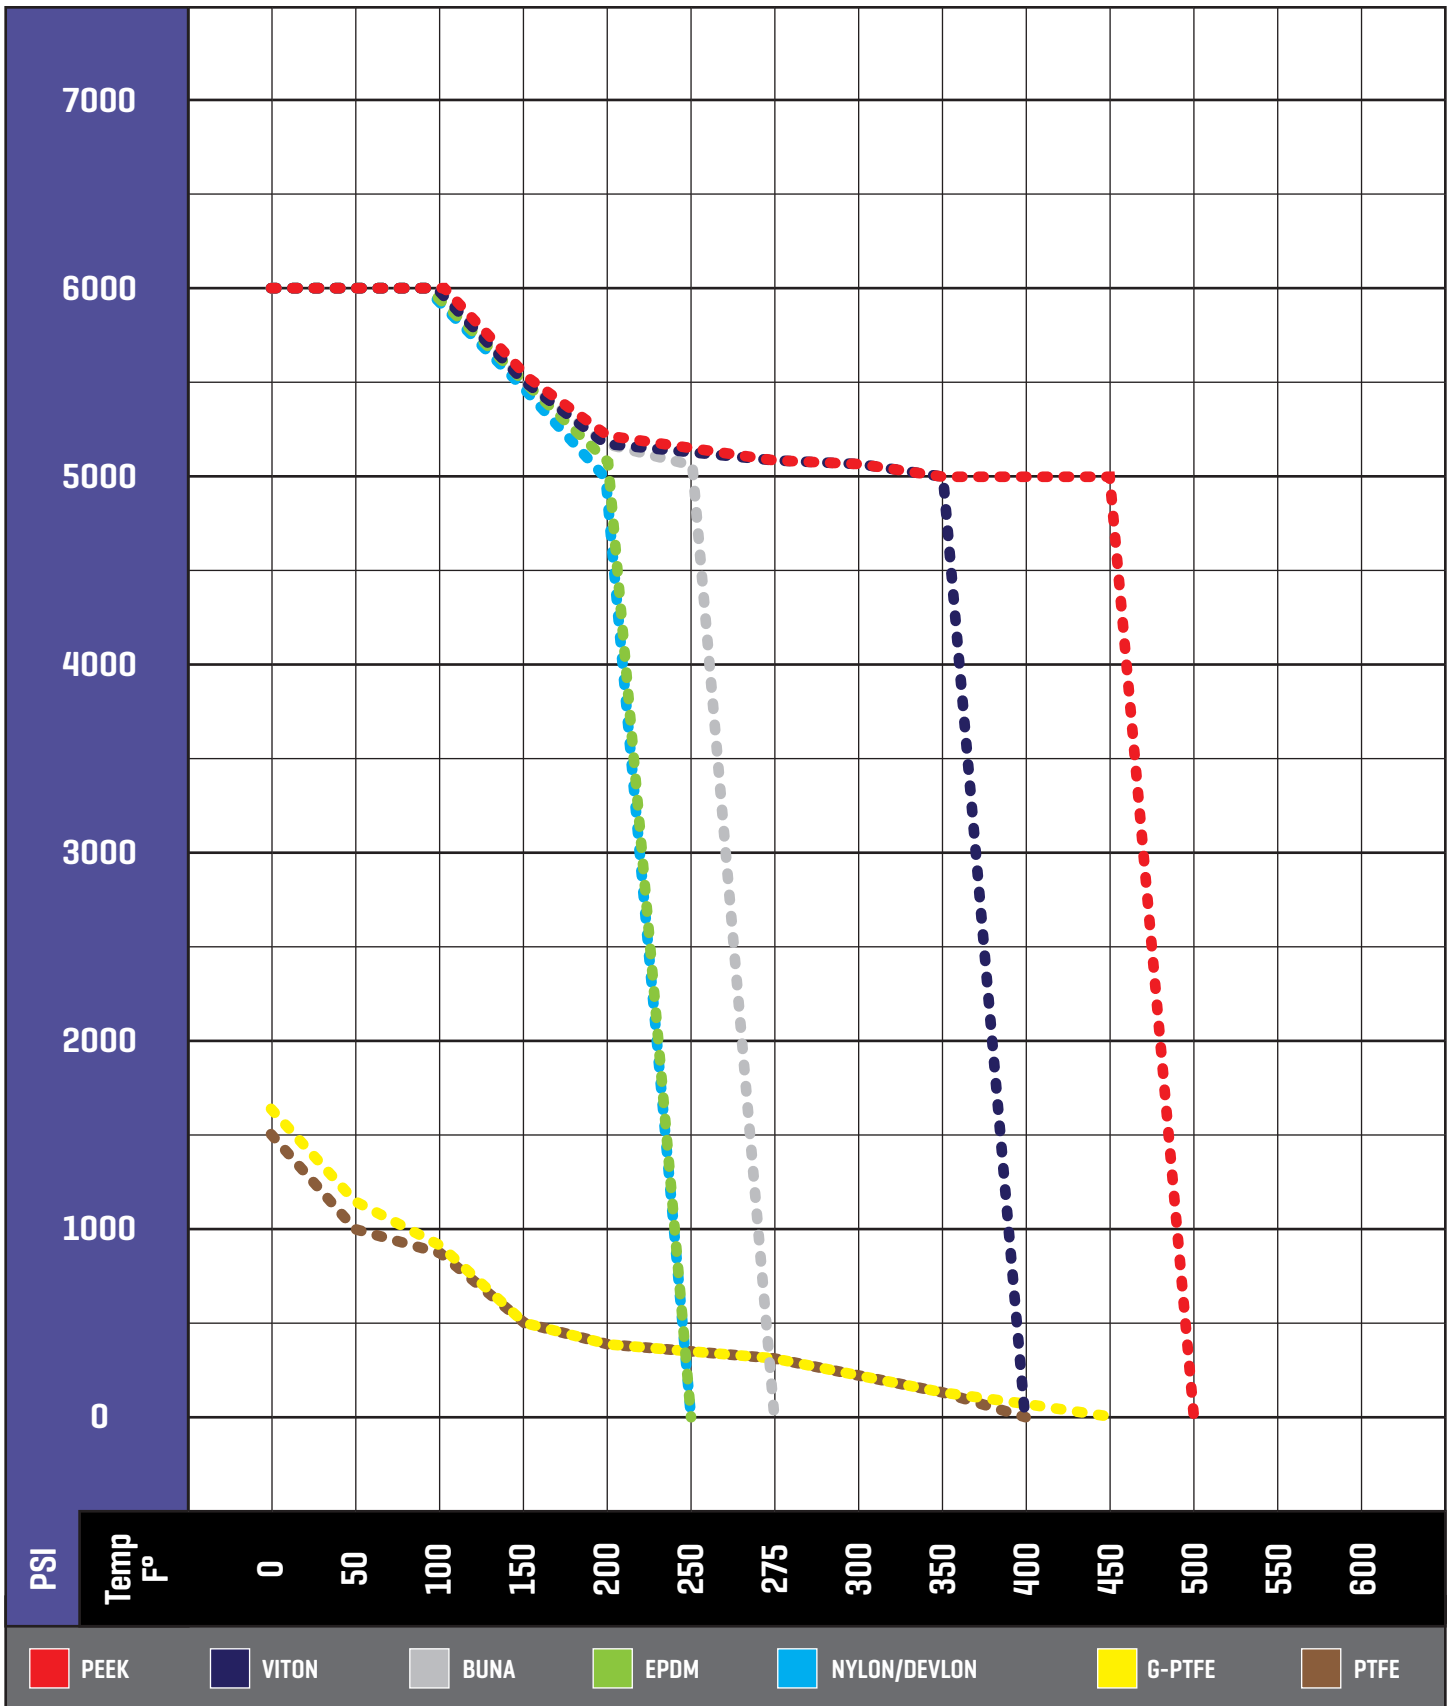

Optional Seat Selections

Code	Material	Description
D	DEVLON	Devlon is a polyamide with additives which allow it to perform at -46C to +121C [-50F to +250F]. This material covers a wide range of applications while having excellent wear properties, low friction, and improved impact strength.
M-S	METAL (STELLITE)	Metal seats hardfaced with Stellite 6 are recommended for use in high temperature fluid and gas applications. The temperature range of the material allows it to get up to the maximum temperature of the valve body material.
M-TC	METAL (TUNGSTEN CARBIDE)	Metal seats hardfaced with Tungsten Carbide are recommended for use in high temperature fluid and gas applications. The temperature range of the material allows it to get up to the maximum temperature of the valve body material.
N	NYLON	Nylon is offered for high pressure applications. The material is ideal for use in high pressure air, oil, and other gas media but is not suitable for strong oxidizing agents. The temperature range of this material is -34C to +121C [-29F to +250F].
O	NOVA	This Teflon based product is filled with glass amorphous carbon powder and graphite. It has a lower thermal contraction-expansion than PTFE and is ideal for steam or thermal fluid applications up to +288C [+550F].
P	PEEK	PEEK offers a unique combination of chemical, mechanical, and thermal properties. This material is excellent for high temperatures up to +260C [+500F].
T	TEFLON (VIRGIN PTFE)	PTFE is a fluorocarbon-based polymer. This material has excellent chemical resistance and co-efficient of friction. The material is not recommended for liquid alkalis and fluorine. Its temperature range is good from -34C to +204C [-30F to +400F].
K	PCTFE	Kel-F is a fluorocarbon based polymer offering a unique combination of physical and mechanical characteristics such as non-flamability, chemical resistance, and near zero moisture absorption. The temperature range of this material is from -240C to +204C [-400F to +400F].
R	RPTFE	PTFE's mechanical properties are enhanced by adding a percentage of filler material to provide improved strength, stability, and wear resistance. The temperature range of this material is -46C to +232C [-50F to +450F].

Note: Additional options available upon request

No.	Figure Number Code	Description
1	Serial Number	Identifies certified manufacturers serial number
2	Figure Number	Identifies the detailed valve configuration (valve type, bore size, pressure class, materials, etc.)
3	MOP/Max. Temp.	Identifies the maximum operating pressure in PSI and maximum operating temperature in Fahrenheit
4	Size	Identifies bore size
5	Pressure Class	Identifies pressure classifications per API requirements
6	Body Material	Identifies body metal material composition (A105, WCB, F51, CF8M, etc.)
7	Stem Material	Identifies stem material composition (A105, 410SS, 17-4pH, etc.)
8	Ball/Disc Material	Identifies ball/disc material composition (A105, 316SS, ENP, etc.)
9	Seat Material	Identifies seat material composition (PEEK, Teflon, Nylon, etc.)
10	MOP/Min. Temp.	Identifies the maximum operating pressure in PSI and minimum operating temperature in Fahrenheit
11	Manufacturing Date	Identifies the date the valve manufacturing completion date
12	API Conformance	Identifies API conformance (600, 6D, 6A, etc.)
13	O Ring	Identifies the O Ring material composition (Viton, Viton GLT, etc.)
14	NACE MR 01 75	Identifies corrosion resistance

1-Piece Flanged Floating Ball Valves Reduced Port Class: 150 - 300/Sizes: 1-1/2" - 12"

Design and Manufacturing Standards	
Basic Design	ANSI/ASME B16.34, conforms to API 6D
Face-to-Face Dimension	ANSI/ASME B16.10
Flange End Dimension	ANSI/ASME B16.5
Inspection & Testing	API 598
Fire Safe Design	API 607/BS 6755

15	Seat	PTFE
16	O-Ring	VITON
17	Gasket	316 SS + Graphite
18	Cap	ASTM A216 - WCB

Note: Additional materials available upon request

Features

1-piece body design with flanged ends for fast installation
Solid ball construction provides structural integrity and minimizes flow turbulence
Mounting pad complies with ISO 5211 for ease and interchangeability of actuation
Anti-static devices
Basic design complies with ASME/ANSI B16.34
Flanged ends comply with ASME/ANSI B16.5
Face-to-face dimensions comply with ASME/ANSI B16.10
Fire Safe Design: API 607/BS 6755
NACE MR 01-75
Hydrostatic and pneumatic test are conducted per standard, API 6D
The finishes of contact face of end flanges are machined 125 - 250 AARH with serrated spiral finish

Features

Split body design with flanged ends for fast installation, in-line maintenance and rebuilding
Solid ball construction provides structural integrity and minimizes flow turbulence
Mounting pad complies with ISO 5211 for ease and interchangeability of actuation
Bottom-loaded blow-out proof stem
Investment cast body & end cap on sizes 1/2" to 4". Sand cast body & end cap on sizes 5" to 10"
Body joint is designed to prevent excessive compression of valve internals, resulting in a consistent and low operating torque
Basic design complies with ASME/ANSI B16.34
Flanged ends comply with ASME/ANSI B16.5
Face-to-face dimensions comply with ASME/ANSI B16.10
Tested according to ANSI/ASME B16.34 & API 598
Fire Tested to API 607/BS 6577

1 & 2-Piece Flanged Floating Ball Valves Full & Reduced Port

Flow Coefficients Cv Values and Opening Torques for Soft Seats

Flow Coefficients Cv Values

The Flow Coefficiency (Cv) of a valve is the rate of gallons per minute of water at 60° F through a fully opened valve at a pressure drop of 1 PSI across the valve.

Size	150		300		600		1500

Opening Torques for Soft Seats

The operating torques are in foot pounds and are calculated based on soft seats, normal temperatures, and clean media.

Size	ISO 5211	150		300		600		1500
		Full Port	Reduced Port	Full Port	Reduced Port	Full Port	Reduced Port	Full Port

12		2089	2089	/	/	/	/	/

Notes

1	Torques may change with different mediums and trim materials.
2	All valves are at normal temperature with PTFE seats for Class 150 and 300 lbs. Nylon seats for class 600 through 1500.
3	All torques are at maximum differential. Safety factor not included.

Terms & Conditions

Quotation Validity

This quotation is valid for 30 days from the date quotation is sent. Validity on special metals, including Stainless Steel, is 14 days from the date the quotation is sent. All products offered from stock are subject to prior sale.

Shipments

All items quoted are EXW our Dock - [Ex Works - SCV Valve Facility Santa Fe, Texas 77510] - unless otherwise noted and agreed to in writing. Shipment may be billed either third party billing to the buyer or freight collect. Shipment dates offered above are forecasted delivery lead times and are estimated from the date payment terms [acceptable to seller] are established, clarification is received on all technical information, and resolution of customer's written approval of drawings is received [when required]. The equipment quoted shall be packed in accordance with seller's standard packing procedure unless otherwise noted and agreed to in writing by the seller.

Force Majeure

If in the case of an act of God, war, riot, fire, explosion, flood, or any other circumstances of whatsoever nature which are beyond the control of the seller and which in any way affect the ability of the seller to fulfill its delivery obligations, the delivery is hindered, impeded, or delayed the seller shall be exonerated from all responsibilities and reserves the right to postpone the delivery beyond the original schedule.

Payment terms

All terms are to be negotiated. Credit cards accepted [Master Card, Visa, American Express].

Purchase Orders

All buyer's purchase orders supplied to the seller are to be written in the English language.

Prices

All prices quoted are in USD as per the preceding pricing schedule. The minimum order value is \$5,000.00 [five thousand dollars], unless otherwise agreed to by seller. If for some reason any items are changed or additions to the order required, seller reserves the right to adjust prices accordingly. All sales are subject to approval of seller's credit department. If buyer fails to meet the agreed upon and established commercial terms of the contract, the seller may with-hold all subsequent deliveries until such time that the original commercial terms of the contract have been met by the buyer [or subsequent commercial terms have been agreed upon by the seller with the buyer].

Intellectual Property

All specifications, illustrations, drawings, certificates, and other particulars supplied by seller remain the intellectual property of the seller and should not be disclosed to any third party without the prior written consent of seller.

Governing Law; Arbitration; Jurisdiction

The terms and conditions of this quotation and any subsequent purchase order shall be construed, interpreted, and performed exclusively according to the laws of the State of Texas, USA. The courts of such state shall have exclusive jurisdiction out of all controversies arising out of or in connection with this agreement. The parties consent that process may be served upon them in any such action by registered mail at the address stated for Buyer on its purchase order, and upon SCV Valve at the address noted above in Santa Fe, Texas, or personally within or without the State of Texas. Any legal action with respect to any agreement must be commenced within one year after the cause of action has accrued. The provisions of the Uniform Commercial Code as adopted by the State of Texas, and not under the United Nations Convention on Contracts for the International Sale of Goods, shall apply.

Warranty

All seller's products are guaranteed against defects in workmanship for a period of twelve [12] months after being placed in service, but not exceeding eighteen [18] months after shipment, when products are properly installed per seller specifications and used within the service and pressure range for which they were manufactured. Full risk of loss shall pass to the buyer upon delivery at FOB point, or destination port in case of CIF. This guarantee is limited to the replacement of any valve parts/components found to be defective either in material or workmanship. This guarantee does not extend to costs of labor, freight, or any other consequential charges. The unauthorized use of third party components and workmanship in seller's products voids this warranty.

Limitation of Liability

The liability of the seller under this agreement or with respect to any products supplied or services performed pursuant to this agreement, whether in contract, in tort, in strict liability or otherwise, shall not exceed the purchase price paid by the buyer with respect thereto. In no event will the seller be liable in contract, in tort, in strict liability or otherwise for any special, indirect, incidental, or consequential damages. This is including but not limited to loss of anticipated profits or revenues, loss of use, non-operation or increased expense of operation of equipment, cost of capital, or claims from customer or buyer for failure or delay in achieving anticipated profits or products.

Cancellation

No contract may be canceled by the buyer except upon written notice to seller and upon payment to seller of all costs incurred by the contract arising out of, or in connection with, the contract. Export of goods covered hereby is subject to United States Customs Control. Standard stocking items will be subject to a twenty-five percent [25%] restocking and/or cancellation charge. Non-standard stocking items will be subject to a one-hundred percent [100%] restocking and/or cancellation charge.

Cancellation Charge

The following indicates the rates of cancellation charge of contract value for project manufactured items and/or special engineered items at various stages of production:

- | | |
|---|----------------------------------|
| • Time of cancellation: Order Acknowledgement and prior to Engineering engagement. | Cancellation Charge: 10% |
| • Time of cancellation: After start of engineering but prior to release to production. | Cancellation Charge: 30% |
| • Time of cancellation: After release to production but prior to completion of fabrication. | Cancellation Charge: 80% |
| • Time of cancellation: After completion of fabrication. | Cancellation Charge: 100% |

Return of Goods

No product shall be returned to seller without written authorization and shipping instructions having been obtained from seller. Products authorized for returns are to be shipped freight pre-paid to the SCV Valve Facility identified in writing, unless otherwise notified, and are subject to seller's standard re-stocking fees.

Documentation

MTR's are available at no charge upon request. The seller's standard document package is per ISO 10474 3.1B requirements. Additional requested documentation is subject to charge.

Inspection

The customer or his authorized representative may, with four [4] weeks prior notice given to seller, visually inspect products manufactured by seller. Such seller approved inspections will be carried out in accordance with seller's standard or seller approved customer inspection procedures. If any inspection or documentation requested by the customer is over and beyond the scope and criteria initially agreed to by the seller, any costs incurred by conducting such inspection or preparation of special documents shall be paid by the buyer prior to release of the items for shipment.

Witness Hydro-testing

Witness hydro-testing is available at a cost. A scope of buyers inspection request is to be provided to seller at order placement. Late notice of such requested inspection is subject to additional costs. The cost associated with such witness hydro request is to be agreed on prior to any such testing taking place. Payment of this type of testing to be negotiated. Additionally, any costs associated with a third party inspector will not be at the sellers expense.

The SCV valve brand was established in 1972 as a maintenance and modification company with the ability to provide full in-line valve service and repair. In the mid-1970's, after experiencing many shortcomings of other valve products in the industry, the first SCV valve was manufactured. Since that time, the SCV brand has been expanded its manufactured products to cover a broad range of valves. Industries served include the power, paper and pulp, oil and gas, and petro-chemical sectors.

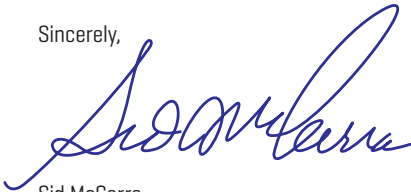

SCV Valve takes sincere pride in our ability to manufacture both commodity and specialty valves that meet and exceed the needs of our customers. All sizes, pressure classes, and metallurgical compositions are managed in house utilizing the strictest quality control measures to ensure the customer's total satisfaction.

SCV Valve products include thru conduit gates, wedge gates, globes, full port swing checks, piston checks, trunnion mounted balls, floating balls, lubricated plugs, and pressure seal gates, globes and checks. Valves utilized throughout the industry must meet rigorous quality and production standards. SCV Valve has earned its API 6A, API 6D, ISO: 9001, CE-PED, and CRN certifications while operating under the API Q1 Quality Management System.

With years of dedication and commitment to quality, design, and service, SCV Valve has grown to be one of the premier valve manufacturers in the industry with the largest inventory of high pressure ball, gate, and check valves. We pride ourselves on our high quality products, timely delivery capabilities, and competitive prices.

On behalf of all of the members at SCV Valve, we thank you for the opportunity to earn your business.

Sincerely,

Sid McCarra

President

SCV Valve, LLC

Since 1972, the SCV brand has been committed to providing quality flow control products to the Power, Paper & Pulp, Oil & Gas, and Petro Chemical industries.

As one of the largest valve manufacturers, SCV Valve's reputation is unparalleled for producing high quality commodity and specialty valves. Products range in sizes 1/2" - 48", in pressure classes from 150# - 2500# and are backed by timely deliveries and competitive prices.
