The Illustrated Encyclopedia of Weaponry

by Chuck Wills

When did hunting weapons begin to be used against humans instead of animals? What is the difference between the Plains Indian War Club and the Fijian War Club? What weapon is common to cultures in every part of the world? *The Illustrated Encyclopedia of Weaponry* is a comprehensive guide to arms and armaments throughout history. Beginning in the Stone Age, travel through the Bronze Age to the present day, learning about tools humans have used to defend themselves all around the globe. There's the Japanese tanto, or dagger, which has become identified with gangs known as yakuza. There's the flaming arrow used when Swiss and Austrian forces clashed in the 14th century. And there's the revolver that Samuel Colt made practical for both military and civilian use. *The Illustrated Encyclopedia of Weaponry* will help readers better understand how—and why—the battles of history were fought.
