## **PURPOSE AND SCOPE OF REPORT:**

### **PURPOSE**

The purpose of this document is to report to the customer the appraiser's opinion of the overall condition of the subject vehicle.

### **MINIMUM DIMINISHED VALUE**

The Minimum Diminished Value of the vehicle is described as the minimum amount of money that an automobile is estimated to have depreciated in value, due to a particular accident, mishap, event or circumstance and is based on wholesale market pricing and the standard sliding scale established by the International Society of Automotive Appraisers or a fair market offer to purchase after the date of loss.

### **FAIR MARKET VALUE**

The Fair Market Value of the vehicle is the highest price on the date of valuation that would be agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available.

### **REPLACEMENT VALUE**

The replacement value of a vehicle is defined as the actual total cost of exactly duplicating the vehicle if it were subject to a total loss. In the case of a customized or modified vehicle this must also include the cost of obtaining an identical type of 'donor' or 'base' vehicle, the cost of obtaining all of the additional aftermarket and specialty components along with all labor costs incurred to replicate the loss vehicle.

### **FAIR MARKET VALUE PRIOR TO LOSS**

The Fair Market Value of the vehicle Prior To Loss is the highest price on that prior noted date of valuation that would have been agreed to by a seller, being willing to sell, and a buyer, being willing to buy, and under no particular necessity for so doing, each dealing with the others full knowledge of all the uses and purposes for which the property is reasonable, adaptable and available immediately prior to the known loss date of that vehicle.

### **METHOD OF VALUATION**

The value is estimated by current market data comparison, supplemented by cost information. The vehicle is compared when possible, with others for sale and that have sold in the general time period. Adjustments are made for differences in equipment, mileage, cosmetics, conversions, originality, condition as well as sale terms and current economic conditions at time of sale.

## ADDITIONAL COMMENTS

### **MECHANICAL:**

It is at the appraiser and vehicle owner's discretion to test drive the subject vehicle. Test driving the vehicle does not constitute a guarantee of the current or future operational status or functionality of any mechanical, hydraulic, electrical or computer systems featured on the subject vehicle. Auto Appraisal Networks recommends that our customers contact an ASE Certified mechanic to perform such tests as needed. The types of problems encountered in older, classic and customized vehicles can be easily masked or hidden.

### **NOTES:**

On the date appraised, this 1965 Volkswagen Dune Buggy represents an average example of a 55-year old custom Dune Buggy conversion.

This Dune Buggy is built on a '55 Beetle floor pan, with a fiberglass body and features a 1,200cc 4-cylinder Boxer engine, 4-speed manual transaxle, bucket seats and a roll bar.

This custom Dune Buggy has been sitting stored for an extended period evidenced by oxidation and dry rotted tires. It's assumed a full service including new tires and fluids would make this Dune Buggy once again operable, but at this moment it is not safe to be driven and has not been registered for street use since 1990.

The fair market value of this 1965 Volkswagen Dune Buggy is based on the average asking price of similar Dune Buggy's in the market place. Allowances have been made for the noted condition and operability. The fair market value does not include tax, title or registration fees.

## For Sale: 1975 Volkswagen Dune Buggy in Garfield, Kansas

**\$9,000**

### Vehicle Description

The dune buggy is based on a shortened VW frame and 1.2 liter engine 1975 , with 4 speed manual transmission. The fiberglass body is in excellent original condition, as well as the paint which is a dark bronze with multicolored metal flake. The manufacturer was Fiber Jet Enos "500" 1976 which less than 1000 were manufactured, and with optional running boards. Also included is the bolt on 2 point roll bar that can be bolted to the existing 2 point roll bar for complete rollover protection, and a rear engine bolt on cage with hitch. It has a 12v electrical system with tow hitch, and wiring

package. I have many records from the previous owners. The engine is in good condition with recent updates including a bosch high performance ignition system, and dual high performance Kadron carburetors, with header type exhaust system. It runs sweet down the road. Definitely a good investment.
