

1969 Dodge Charger

Factory Power Sunroof Cars - Option Code M51

Total 1969 Dodge Charger sunroof cars shipped to the USA market: **391** units.

- Base Charger (XP29) – **260**.
- Charger R/T (XS29) – **131**.
- Charger R/T SE (XS29) – Around **60** (Included in R/T total).

Total 1969 Dodge Charger sunroof cars shipped to Canada: **1 known**.

American Sunroof Corporation (ASC) established a facility in the Detroit area in the late 60's to install Golde style power sunroofs in a select few cars models coming out of the Detroit assembly plants. This caught the attention of Chrysler, and a deal was struck with ASC to install their power sunroof in Dodge Chargers for the 1969 model year.

Cars that were ordered or designated to have an ASC power sunroof were initially started down the assembly line, then pulled off the line at a certain point to be shipped off to ASC's facility. After ASC installed the power sunroof, the cars were shipped back to the factory where final assembly was completed.

Vinyl tops were required on all of these sunroof cars. This was a time saving measure for ASC, and a cost saving measure for Chrysler. ASC didn't have to be super careful with the metal and paint around the sunroof area during the installation. Once the sunroof assembly was installed, they just covered up any scratches and dings with a little filler and primer, and then installed the vinyl roof.

With all the extra logistics involved in offering a sunroof, you might think that this option was an expensive one. You would be correct! The price tag for this factory option was a whopping \$461.45! To put this in perspective, a base 318 Charger sold for \$3109. Heck, the only option more expensive than the sunroof was checking off the box that said "Hemi" (\$648.20).

The option code for the power sunroof is M51, but this code does not appear on the fender tag. What does appear on the fender tag to identify "factory" power sunroof cars is a special six digit order number. The first three digits of this number will be 928 for "factory" sunroof cars.

On the following pages are all the surviving 1969 Dodge Charger sunroof cars that I have run across since I started documenting this rare option. Many thanks to all that have helped me track down these cars - esp. Chris G, Shawn B, Dan P, Jake B, Sean M, and Tan Top.

1969 Charger R/T SE
