# 1MA0 <br> Edexcel GCSE <br> Mathematics (Linear) - 1MA0 <br> Paper 2H (Calculator) Higher Tier <br> Practice Paper 2A (Set N) Time: 1 hour 30 minutes 

Materials required for examination Ruler graduated in centimetres and millimetres, protractor, compasses, pen, HB pencil, eraser.<br>Tracing paper may be used.

## Instructions

In the boxes above, write your centre number, candidate number, your surname, initials and signature.
Check that you have the correct question paper.
Answer ALL the questions. Write your answers in the spaces provided in this question paper.
You must NOT write on the formulae page.
Anything you write on the formulae page will gain NO credit.
If you need more space to complete your answer to any question, use additional answer sheets.

## Information

The marks for individual questions and the parts of questions are shown in round brackets: e.g. (2). There are 14 questions in this question paper. The total mark for this paper is 60 .

## Calculators may be used.

If your calculator does not have a $\pi$ button, take the value of $\pi$ to be 3.142 unless the question instructs otherwise.

## Advice

Show all stages in any calculations.
Work steadily through the paper. Do not spend too long on one question.
If you cannot answer a question, leave it and attempt the next one.
Return at the end to those you have left out.

Formulae: Higher Tier
You must not write on this formulae page.
Anything you write on this formulae page will gain NO credit.

Volume of prism $=$ area of cross section $\times$ length

Volume of sphere $\frac{4}{3} \pi r^{3}$
Surface area of sphere $=4 \pi r^{2}$

In any triangle ABC

Sine Rule $\frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C}$
Cosine Rule $a^{2}=b^{2}+c^{2}-2 b c \cos A$
Area of triangle $=\frac{1}{2} a b \sin C$

Volume of cone $\frac{1}{3} \pi r^{2} h$
Curved surface area of cone $=\pi r l$

The Quadratic Equation
The solutions of $a \times 2+b x+c=0$ where $a \neq 0$, are given by
$x=\frac{-b \pm \sqrt{\left(b^{2}-4 a c\right)}}{2 a}$

## Answer ALL FOURTEEN questions. Write your answers in the spaces provided. You must write down all stages in your working.

1. The frequency table gives information about the times it took some office workers to get to the office one day.

| Time ( $t$ minutes) | Frequency |
| :---: | :---: |
| $0<t \leq 10$ | 4 |
| $10<t \leq 20$ | 8 |
| $20<t \leq 30$ | 14 |
| $30<t \leq 40$ | 16 |
| $40<t \leq 50$ | 6 |
| $50<t \leq 60$ | 2 |

(a) Draw a frequency polygon for this information.

(b) Write down the modal class interval.

One of the office workers is chosen at random.
(c) Work out the probability that this office worker took more than 40 minutes to get to the office.
2. The diagram shows a solid hemisphere of radius 8 cm .

## Diagram NOT accurately drawn

Work out the total surface area of the hemisphere.
Give your answer correct to 3 significant figures.
$\qquad$ $\mathrm{cm}^{2}$
3. Solve $3 x^{2}-4 x-2=0$

Give your solutions correct to 3 significant figures.
(Total 3 marks)
[Full marks on this question was achieved by $9.2 \%$ of students]
4.

$A B C$ is an arc of a circle centre $O$ with radius 80 m .
$A C$ is a chord of the circle.
Angle $A O C=35^{\circ}$.
Calculate the area of the shaded region.
Give your answer correct to 3 significant figures.
5. $A B C D$ is a trapezium.

Diagram NOT accurately drawn

$$
\begin{aligned}
& A D=10 \mathrm{~cm} \\
& A B=9 \mathrm{~cm} \\
& D C=3 \mathrm{~cm} \\
& \text { Angle } A B C=\text { angle } B C D=90^{\circ}
\end{aligned}
$$

Calculate the length of $A C$.
Give your answer correct to 3 significant figures.
6.

Diagram NOT accurately drawn
$O A B$ is a triangle.
$\overrightarrow{O A}=\mathbf{a}$
$\overrightarrow{O B}=\mathbf{b}$
(a) Find $\overrightarrow{A B}$ in terms of $\mathbf{a}$ and $\mathbf{b}$.
$P$ is the point on $A B$ such that $A P: P B=3: 1$
(b) Find $\overrightarrow{O P}$ in terms of $\mathbf{a}$ and $\mathbf{b}$.

Give your answer in its simplest form.
7.

Diagram NOT accurately drawn

$P Q R S$ is a trapezium.
$P Q$ is parallel to $S R$.
Angle $P S R=90^{\circ}$.
Angle $P R S=62^{\circ}$.
$P Q=14 \mathrm{~cm}$.
$P S=8 \mathrm{~cm}$.
(a) Work out the length of $P R$.

Give your answer correct to 3 significant figures.
$\qquad$
(b) Work out the length of $Q R$.

Give your answer correct to 3 significant figures.
8. The diagram shows a cube and a cuboid.

Diagram NOT

All the measurements are in cm .
The volume of the cube is $100 \mathrm{~cm}^{3}$ more than the volume of the cuboid.
(a) Show that $x^{3}-10 x=100$
(b) Use a trial and improvement method to find the value of $x$.

Give your answer correct to 1 decimal place.
You must show all your working.
9. Prove that

$$
(2 n+3)^{2}-(2 n-3)^{2} \text { is a multiple of } 8
$$

for all positive integer values of $n$.
10. Solve $\frac{5(2 x+1)^{2}}{4 x+5}=5 x-1$
11. Find the exact solutions of $x+\frac{3}{x}=7$
[Full marks on this question was achieved by $2.8 \%$ of students]
*12. The diagram shows the triangle $P Q R$.

Diagram NOT
accurately drawn
$P Q=x \mathrm{~cm}$
$P R=2 x \mathrm{~cm}$
Angle $Q P R=30^{\circ}$
The area of triangle $P Q R=A \mathrm{~cm}^{2}$
Show that $x=\sqrt{2 A}$
13. (a) Solve $2 x^{2}+9 x-7=0$

Give your solutions correct to 3 significant figures.
$\qquad$
(b) Solve $\frac{2}{y^{2}}+\frac{9}{y}-7=0$

Give your solutions correct to 3 significant figures.
14. (i) Factorise $2 t^{2}+5 t+2$
$\qquad$
(ii) $t$ is a positive whole number.

The expression $2 t^{2}+5 t+2$ can never have a value that is a prime number. Explain why.
$\qquad$
$\qquad$
$\qquad$
[Full marks on this question was achieved by $0.5 \%$ of students]

## TOTAL FOR PAPER $=60$ MARKS

END

## Practice Paper 2A (Set N)

| Question | Date of original <br> linear paper | Original <br> question number |
| :---: | :--- | :---: |
| $\mathbf{1}$ | November 2012 | $\mathbf{1 2}$ |
| 2 | November 2011 | 24 |
| 3 | June 2012 | 22 |
| 4 | March 2012 | 23 |
| 5 | November 2012 | 15 |
| 6 | June 2012 | 26 |
| 7 | November 2011 | 20 |
| $\mathbf{8}$ | November 2012 | $\mathbf{1 1}$ |
| 9 | June 2012 | 21 |
