PERFORMANCE INDEX

ADVANCED

ALL PURPOSE

55

PRO

Brunswick's most advanced technology. The strongest core and cover combinations we offer.

HIGH

Top performing balls offering great hook potential on a wide range of conditions.

ADVANCED

Performance features with a wide range of reactions for bowlers of all skill levels.

AFFORDABLE

Great performance with lower hook potential. Perfect for drier conditions and especially newer bowlers looking for a great value.

POLYESTER

Great for first time ball purchasers or picking up spares.

FLIP

Balls that skid through the front part of the lane with the strongest change of direction down lane. Balls with higher numbers will have a stronger change of direction.

TRACTION

Balls that hook earlier on the lane providing more hook on oilier conditions or for bowlers with lower rev rates. Balls with higher numbers will have more overall hook.

ALL PURPOSE

Versatile ball motion that is useful across various lane conditions, usually a continuous and strong arcing ball. Balls with higher numbers will have stronger overall reactions.

CONTROL

Predictable, typically a smooth ball motion throughout the lane. Balls with higher numbers will have more overall reaction.

ACCURATE

Low hook potential, typically a spare ball or useful on extremely dry conditions. Balls with higher numbers will be the straightest.

REACTION SHAPE STRENGTH

The higher the number the stronger the reaction shape – with 1 being the least and 100 the most.

LEADING TECHNOLOGY

**DURABILITY
OPTIMIZATION
TECHNOLOGY**

Brunswick's patent-pending Durability Optimization Technology (DOT) represents a revolutionary change in the way bowling balls are manufactured. Developed by Brunswick engineers with one goal in mind – to significantly reduce cracking in performance bowling balls.

Brunswick's latest innovation in outer core technology is called Dynamicores. This leap in bowling ball technology is a more durable outer material that yields less compression upon impact increasing hitting power and creating an undeniable difference in sound and pin carry. Dynamicores is blue and will be noticeable when drilling into the ball.
