## Introduction

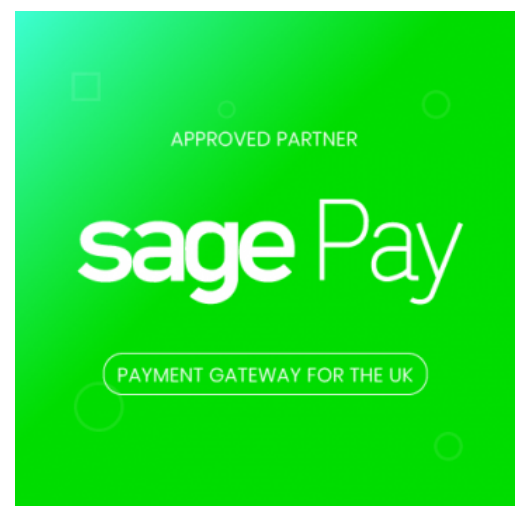

Magento 2 Opayo Payment extension is the most secured payment gateway in the UK.

### Highlight Features

- Allow admins to integrate their Opayo account to their Magento stores.
- Allow customers to checkout using credit card payment
- Enable or disable the gateway.
- Specify allowed credit card types and countries.
- Specify the minimum and maximum order amount.
- Add a layer of security with 3D Secure Checkout.
- Support multiple stores.
- Integrate Save Card Function.
- Customer can capture invoice up to quantity product that they desired.
- Admins can easily check transaction history.
- Admins can easily manage profiles in the backend.
- Customers can also manage their profiles and cancel them if desired.
- Admin can create a credit memo for refunding.
- Easily perform Gift Aid enabled in Opayo.
- **3D Secure version 2 available in Opayo Direct Method** (Learn more about 3D secure ver 2 in [here](#)).

### System Requirements

Your store should be running on Magento 2 version **2.1.x; 2.2.x, 2.3.x**

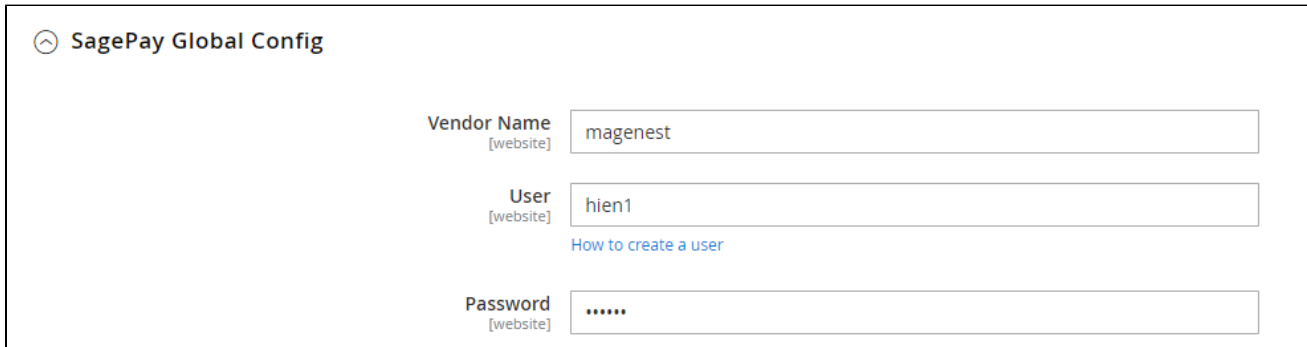

## Tutorial Video

# Configuration

Firstly, you have to configure the Opayo Payment Extension at Magento back end by going to **Stores > Configuration > Sales > Payment Methods > Opayo Payment Gateway**.

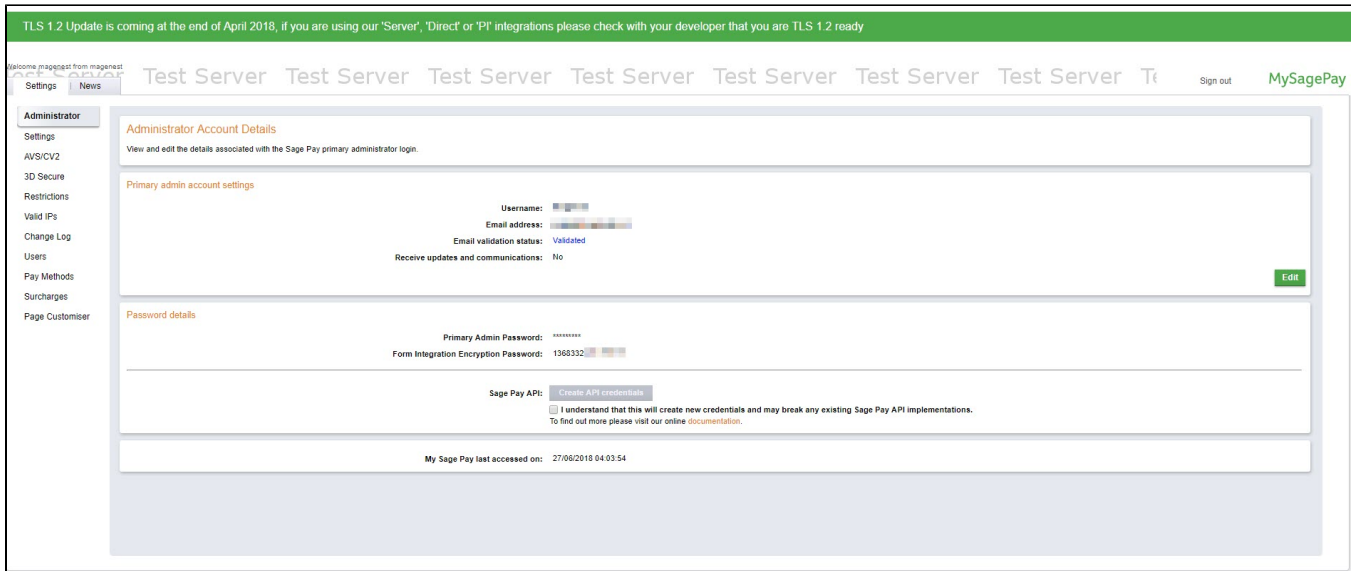

## Opayo Global Config

+ Fill in **Vendor Name, Integration Key, Integration Password** obtained from your Opayo credentials.

The screenshot shows the 'SagePay Global Config' form in a Magento admin interface. It contains three input fields: 'Vendor Name [website]' with the value 'magenest', 'User [website]' with the value 'hien1', and 'Password [website]' with masked characters '.....'. A blue link 'How to create a user' is located below the User field.

+ In our example, we use account and API of Opayo to implement transaction in **test mode**. You can obtain this by going to <https://test.sagepay.com/mysagepay/transactions.msp>

The screenshot displays the 'Administrator Account Details' page in the SagePay admin interface. The page includes a green header with a TLS 1.2 update notice. The main content area is divided into sections: 'Administrator Account Details' (with a sub-section 'Primary admin account settings' containing fields for Username, Email address, and Email validation status), 'Password details' (with fields for Primary Admin Password and Form Integration Encryption Password), and 'Sage Pay API' (with a 'Create API credentials' button and a checkbox for understanding the implications). A footer shows 'My Sage Pay last accessed on: 27/06/2018 04:03:54'.

3D SECURE VER 2

! **Note:** 3D secure version 2 is available in Opayo Direct method only.

Enable 3D Secure V2 <small>[website]</small>	Yes	▼
Browser Javascript Enabled <small>[website]</small>	Yes	▼

Boolean that represents the ability of the cardholder browser to execute JavaScript.

- **Enable 3D Secure Ver 2:** choose Yes to enable 3D Secure version 2, which contains many improvements to make it easier to achieve SCA on e-commerce transactions.
- **Browser Javascript Enabled:** choose Yes to enable the browser Javascript.

+ Turn on **Test Mode** when you use test credentials. Choose the **Live Mode** when you go live.

You can also turn on **Ignore address check** to skip the address and postcode check in test mode.

← SagePay Global Config

Vendor Name [website]

User [store view]  [How to create a user](#)

Password [store view]

Mode [website] Test Mode ▼

Ignore address check [website] Yes ▼  
Ignore address and postcode check in Test mode

Server domain (Test Mode) [store view]   
This field must end with '/' (slash) e.g. https://example.com/magento/

Form Encryption Password (Test Mode) [website]  [How do I get my encryption password?](#)

+ **Server domain:** Fill in your site domain

+ **Form Encryption Password:** Obtained from Opayo. Go to **Settings > Administrators > Password Details**. This field is used for Opayo Form configuration.

+ **Apply 3D Secure** with 4 options: Default, Force, Disable, Force & Ignore.

- **Default:** Use Default My Opayo Settings.
- **Force:** Apply authentication even if the 3D Secure is turned off.
- **Disable:** Disable authentication and rules.
- **Force & Ignore:** Apply authentication but ignore rules.

+ **Apply AVS, CVC Check** with 4 options: Default; Force; Disable; Force & Ignore.

- **Default:** Use Default My Opayo Settings
- **Force:** Apply authentication even if the AVS, CVC Check is turned off
- **Disable:** Disable authentication and rules
- **Force & Ignore:** Apply authentication but ignore rules

+ **Allow Gift Aid:** Allow customers to donate to charity. Note that this function only works if your Sage account is enabled for Gift Aid.

+ **Collect Recipient Details:**

+ **Send transaction email:** This is the setting for Opayo transaction email, which is sent when customers make payment with Opayo Form. There are three options:

- Do not send to either customer or vendor email: Will not send Opayo transactions to customers or vendors via emails.
- Send customer and vendor transaction email: Will send Opayo transactions to both customers and vendors via emails.
- Send vendor email but not customer email: Will send Opayo transactions to vendor's email only.

+ **Vendor Name, User and Password:** The credentials you got from Opayo in the above step.

+ **Payment language:** The language of the payment page (English, French, German, Spanish, Portuguese, Dutch).

+ **Payment Surcharge Fee:** You can add the extra fee for a selected payment type (MasterCard, Visa Credit, Visa Debit, American Express, Diner's Club, Maestro, VISA Electron) . The fee could be defined as fixed price or percentage of the payment.

## Opayo PI Integration

+ **Enabled:** Choose Yes to enable direct checkout for Opayo Payment.

+ **Title:** The title of the payment method displayed on the checkout page.

- + **PI Integration Key & PI Integration Password:** Obtained from your Opayo account. Click on **Check API** button to check whether the API is working or not.
- + **Enable MOTO:** Allow you to make payments in admin panel for customers buying through email or telephone.
- + **User drop-in interface:** Turn this on to show Opayo with drop-in box.
- + **Save Customer CreditCard Token:** Allow customers to save credit card token for future purchases.

**Maximum Order Total**

**+ Payment Action:** You can choose between Authorize Only (Deferred) and Authorize and Capture (Payment).

- **Authorize Only:** check for the card for validity but not charge the account yet until the order is approved and invoiced.
- **Authorize and Capture (Payment):** charge the debit/credit card at the time of the order is placed.

**+ New Order Status:** Processing, Suspected Fraud

- **Processing:** The payment is made successfully and an order invoice is issued.
- **Suspected Fraud:** No invoice is issued.

**Credit Card Types:** You can choose which credit card types you want by choosing one or more items.

**Payment from Applicable Countries:**

- **All allowed countries:** Enable all allowed countries to make payment.
- **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries**.

In addition, you can add/edit the **Instructions** to instruct customers how to do the payment.

**Sort Order:** The order of the payment method that will be displayed on the checkout page.

**Minimum Order in Total:** If the order value is less than this figure, the payment method will not be displayed on the checkout page.

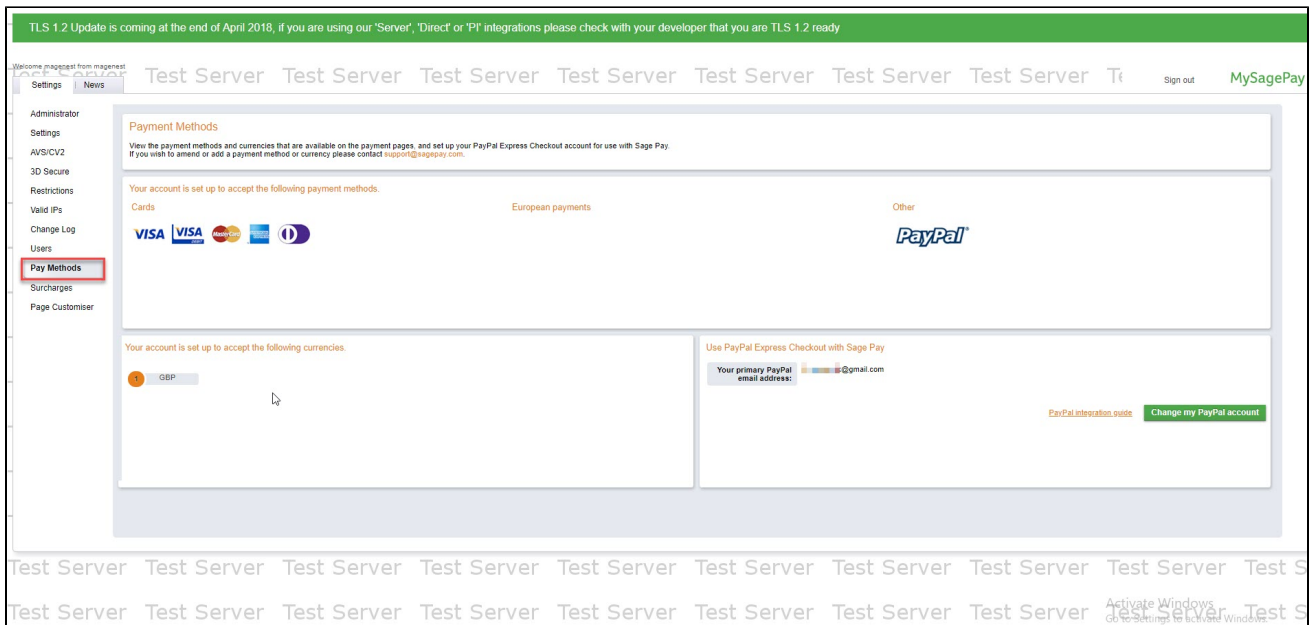

**Maximum Order in Total:** If the order value is bigger than this figure, the payment method will not be displayed on the checkout page.

After finishing, click **Save Configuration**.

## Integrate with Paypal

**+ To integrate Opayo Payment with your Paypal, please navigate to <https://test.sagepay.com/mysagepay/transactions.msp>.**

**+ On the left menu column, choose **Pay methods** then add your Paypal account on the right in the **Use Paypal Express Checkout with Opayo**.**

+ Please read these documents from Opayo for more details:

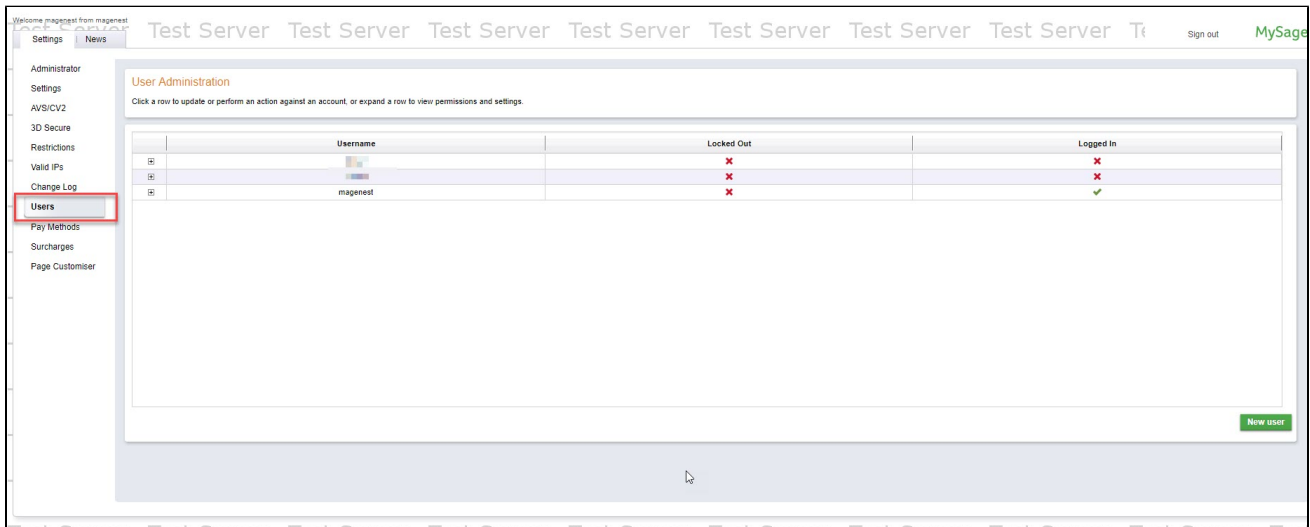

<https://www.sagepay.co.uk/support/12/36/adding-paypal-to-your-test-account>

<https://www.sagepay.co.uk/support/12/36/enabling-sage-pay-on-your-paypal-test-account>

<https://www.sagepay.co.uk/support/16/36/linking-paypal-to-your-live-account>

### Create User in Opayo

In Opayo page, choose Users in the Settings, then create a user by clicking on the **New user** button. You will use this user account to link Paypal with your Opayo.

## Opayo Form Integration/Paypal

+ **Enabled:** Enable Opayo Form with Paypal option.

+ **Title:** The title of the payment method displayed on the checkout page.

+ **Payment Action:** You can choose between Authorize Only (Deferred) and Authorize and Capture (Payment).

- **Authorize Only:** check for the card for validity but not charge the account yet until the order is approved and invoiced.

- **Authorize and Capture (Payment):** charge the debit/credit card at the time of the order is placed.

- **Specific Countries:** Restrict some countries by unselecting them from the **Payment from Specific Countries**.

**Sort Order:** The order of the payment method that will be displayed on the checkout page.

**Minimum Order in Total:** If the order value is less than this figure, the payment method will not be displayed on the checkout page.

**Maximum Order in Total:** If the order value is bigger than this figure, the payment method will not be displayed on the checkout page.

## Main Functions

### Check out with Opayo in an easy way

- Customers can add their desired items to the shopping cart by clicking on **Add to Cart** button.
- Then, the customer can go to the checkout page easily with the Checkout Button in the drop down of the shopping cart icon .
- Next, customer fills in his/her shipping address and selects the payment method.

- At the review and payments section, there are two Opayo payment methods: Opayo Credit Card drop in Payments and Opayo Direct Payment.

## Support 3D Secure

When customers use type of card provided with 3D secure mode. Opayo will turn on automatic mode to check. The operation will redirect to processing page:

**TEST ENVIRONMENT**

**Purchase Authentication**

Please enter your password to verify your identification.

Vendor	<input type="text" value="SagePayDemoAccount"/>
Purchase Amount	<input type="text" value="255.0 GBP"/>
Date	<input type="text" value="Fri Aug 11 02:45:41 BST 2017"/>
Pan	<input type="text" value="xxxxxxxxxx0006"/>
Password	<input type="password" value="....."/>
	<input type="button" value="Submit"/>

Click **Submit** to finalize the payment.

**3D Secure version 2 available in Opayo Direct Method.**

All of what the customer needs to do is filling the card information then click on **Place Order** button. Then there will be an authentication flow – where the customer doesn't even realize that authentication has taken place.

Payment status: 3DAuth
- Aug 11, 2017 1:45:39 AM | Customer **Not Notified**  
Please redirect your customer to the ACSURL to complete the 3DS Transaction

If you set the Payment Action as **Authorize Only**, invoice will not be created. You have to capture invoice in your request. However, the quantity of the products in the new invoice must be smaller than or equal to the pre-order.

 This extension does not support multiple invoices.

On the right side, there are three important buttons: Send email, Credit memo, and Print.

- **Send email:** Allow you to send the current invoice to customer.
- **Credit memo:** Allow you to make the refund.
- **Print:** Print out the current invoice.

## Partial or total refund

Customer can refund partially or totally by clicking **Credit Memo > Refund**.

This plugin does not support multiple invoices.
