It's not just a *policy*, it's a *concept*

Downstream Data Coverage is professional liability indemnification offered to NAID certified members that better protects data-related service providers and their customers.

While competitors may copy the policy, they can't copy the concept.

- By linking coverage to NAID Certification, policyholders are grouped with other safe insurance risks. Over time, this translates to substantially lower premiums.
- With the support of NAID, Downstream Data is an effective marketing differentiator.
- Eventually Downstream Data will be member-owned, captive insurance, giving policyholders more control.
- The policy can be modified individually or across the board to improve coverage.

Learn how
Downstream
Data can give
you more
control of your
business.

Visit www.downstreamdata.com or call
Andrea Walton at 800-876-4044.

Downstream Data Coverage® is sold in the United States as a surplus line, claims-made policy through Association Insurance Management. Downstream Data Coverage and the Downstream Data Coverage logo are registered trademarks of the National Association for Information Destruction, Inc.

Confidence and expertise: The ultimate sales tool

It's much easier to establish rapport with a customer when you're an industry expert. Customers know when they're dealing with a trusted resource. **Be that resource.**

Earn that confidence.

Become an expert by earning your Certified Secure Destruction Specialist® (CSDS) accreditation. The **CSDS webinar training series is Sept. 24 – Oct. 29** with testing dates throughout the winter.

For more information and to register, visit the Upcoming Events on naidonline.org or call 602-788-6243.

All NAID and CSDS logos are registered trademarks of the National Association for Information Destruction, Inc.
