MARİNE OTOMASYON SİSTEMLERİ

About Us

We are proud of introducing our company "Marine Otomasyon Sistemleri" also known very well as MOS.

It has been founded in 2009 with previous service / agency experience in excess of 10 years. We were also part of the team belong to a local service of several brands since 2013 and have remarkable expertise of electric driven Deep well Cargo Pumps, Nitrogen Generators, ODME systems, Cargo & Service & Ballast Tank Level Gauging Systems. Our finger print could be found over hundreds of commercial ships. We have carried out more than 3000 commissioning in Turkey since 2002. The experience of commissioning is being followed with hundreds of overhaul services for Svanehoj and Marflex pumps with our own spare kits inland and worl wide.

Right now we are submitting this expertise to the ship-owners and have fruitful cooperation with several local and foreign world's largest companies over 18 years. The fact that over %85 of our revenue is repeat business, and this success have created a solid reputation in the market.

The results motivated and forced us to improve our selves first, then to developpe the system to be faster to supply the demand of our customers in terms of quality&reliability. The another key word to achive this goals is also to be accountable to them. That is why we, MOS, invested to B2B system. Soon, all activities and the procedures of service and products will be front of our customers with the help of today's online technologies.

These are all MOS products which are economical, high quality and available in stock. we hope cooperate with more customers for mutual development and benefits. We also welcome potential buyers to contact us for our OEM products. You may see the web site to see the list of the OEM items and easily send the orders via B2B online system.

The services we gave carried us to today. Now, we move on with the our own range of OEM spare parts as well including;

- Wartsila Svanehoj electric driven deep well pump head and shaft spare kit (including mechanical seals, wear rings, ball bearings etc.)
 - Marflex electric driven deep well pump head spare kit
 - Honeywell Marine Solutions pressure sensors (Cargo Tank inert gas, manifold, vapour return pressure etc.)
 - Kongsberg & Ariston pressure sensors
- and the others...

Moreover we are Turkish agent of 2 France Marine who has the global sales right of Thales Group's TA840 tank level measuring radar. They have also state of the art refit / retrofit solutions for Honeywell Enraf system which removes several problems that the ship-owners are encountering frequently. We can also supply PSA type N2 generator from our principal company Erredue SPA. Our new brand RONGDED is ready to supply the new buildings and we are ready to give the requested services for its systems.

Briefly, our team at MOS understands your needs like no others can and have a technical savvy and well motivation to sort out.

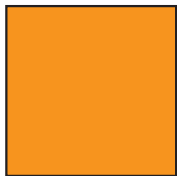

Best wishes,

MOS TEAM
