Plays "Coltrane  
Changes"**

*transcribed by Masaya Yamaguchi*

*Artist Transcriptions*

In the late 1950s, John Coltrane composed or arranged a series of tunes that used chord progressions

based upon a series of key center movements by thirds, rather than the usual fourths and fifths of standard progressions. Its sound is so aurally identifiable and has received so much attention from jazz musicians that it has become known as "Coltrane's Changes." This book presents an exploration of his changes by studying 13 of his arrangements. It includes complete solo transcriptions with performance notes for each. Titles include: Body and Soul • But Not for Me • Countdown • Fifth House • Giant Steps • and more.

# The Best Selling Jazz Book of All Time Is Now Legal!

The Real Books are the most popular jazz books of all time. Since the 1970s, musicians have trusted these volumes to get them through every gig, night after night. The problem is that the books were illegally produced and distributed, without any regard to copyright law, or royalties paid to the composers who created these musical masterpieces.

We are very proud to offer the first legitimate and legal editions of these books ever produced. You won't even notice the difference, other than all the notorious errors being fixed: the covers and typeface look the same, the song lists are nearly identical, and the price for our edition is even cheaper than the originals!

Every conscientious musician will appreciate that these books are now produced accurately and ethically, benefitting the songwriters that we owe for some of the greatest tunes of all time!

Playing tips, introductions and endings appear in conjunction with many songs throughout the books. The music is presented in melody line/lyrics/chords format with chord substitutions printed above the original chords in red.
