

# Medicine 2008

Postgraduate, Professional and Reference

**HODDER  
ARNOLD**

**W**elcome to the 2008 Medicine Postgraduate, Professional and Reference catalogue. If you would like place an order, please turn to the order form pull out in the centre of the catalogue.

A full listing of our agents and distributors can be found on the inside back cover, and some other useful details below. If you have a question that is not answered anywhere in the catalogue, please contact [healthsci.marketing@hodder.co.uk](mailto:healthsci.marketing@hodder.co.uk).

#### PRICE

We aim wherever possible, to ensure that the prices shown in this catalogue will be maintained until the end of December 2008. However, we do reserve the right to alter prices and/or specifications without notice. To get the most up to date pricing information for a particular title please go to our website [www.hoddereducation.com](http://www.hoddereducation.com).

#### VAT

**UK** – Books are not subject to VAT in the UK, but VAT at standard rate is payable on CD-ROMs and software.  
**Europe** – Books are subject to VAT in Europe. Please ensure that you quote your European VAT number on all orders.

#### The Health Sciences Marketing Team

##### RIGHTS AND PERMISSIONS

Translation rights are available for most of our titles. For further information please contact:  
Jenny Davis, International Rights Manager,  
Hodder Education, 338 Euston Road,  
London, NW1 3BH  
Tel + 44 (0) 20 7873 6286  
Fax + 44 (0) 20 7873 6298

##### PROPOSALS FOR NEW BOOKS

Hodder Arnold is dedicated to building an innovative and excellent list of books in Postgraduate, Professional and Reference Medicine. If you are working on a manuscript at the moment, or have an idea for a book please contact:  
Joanna Koster, Editorial Director,  
Health Sciences Publishing  
Hodder Education, 338 Euston Road,  
London, NW1 3BH  
[joanna.koster@hodder.co.uk](mailto:joanna.koster@hodder.co.uk)

Printed by Pureprint Group, a carbon neutral company, using pureprint® environmental print technology. The environmental data for the production of this document is as follows:  
Electricity: 100% renewable  
Ink: 100% made from vegetable oil  
Dry waste: 90% recycled  
IPA used: 0%  
Press solvents: 95% cleaned and reused  
Paper: 50% post consumer waste and 50% virgin fibre certified by The Forest Stewardship Council. All production systems are accredited with ISO 14001:2004 and ISO 9001:2000 management systems and Pureprint is registered to EMAS (Eco Management and Audit Scheme).

## HODDER ARNOLD MEDICAL PUBLISHING IS RENOWNED FOR...

- Covering the latest findings and the most current procedures
- Working with leading and global authorities in their respective fields
- Producing outstanding quality materials

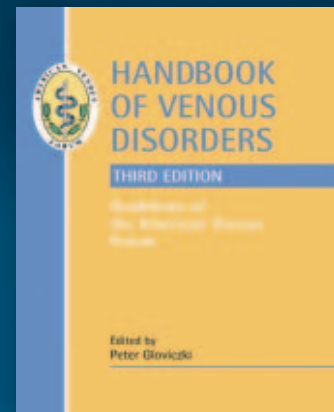

Our diverse, established and highly-acclaimed selection of titles is ever-expanding...

**SEE OVERLEAF FOR OUR NEW TITLES IN 2008**

## ANAESTHESIA, INTENSIVE CARE & PAIN MANAGEMENT

- Clinical Pain Management, Second Edition  
4-volume set & CD-ROM
- Acute Pain
- Cancer Pain
- Chronic Pain
- Practice & Procedures

See pages 2 - 3

## ANGIOLOGY & VASCULAR MEDICINE

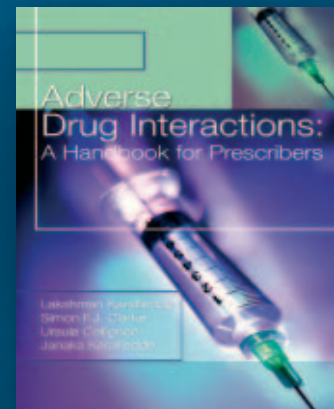

- Handbook of Venous Disorders, Third Edition

See page 6

## CARDIOLOGY

- Making Sense of the ECG, Third Edition

See page 8

## FORENSIC MEDICINE

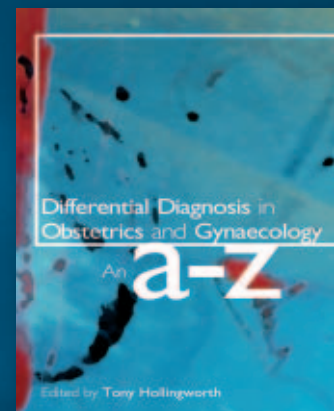

- Forensic Medicine, Second Edition
- Paediatric Forensic Medicine & Pathology

See pages 10 - 11

## GENERAL MEDICINE INCLUDING MRCP

- Adverse Drug Interactions

See page 12

## OBSTETRICS & GYNAECOLOGY

- Differential Diagnosis in Obstetrics and Gynaecology: an A-Z
- EMQs for MRCOG Part 2
- SAQs, MCQs, EMQs and OSCEs for MRCOG Part 2, Second Edition

See pages 19 - 20

## ONCOLOGY

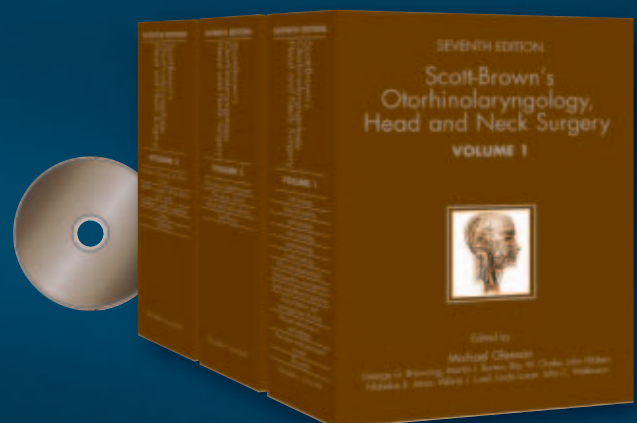

- Basic Clinical Radiobiology, Fourth Edition
- The Lymphoid Neoplasms, Third Edition
- Treatment of Cancer, Fifth Edition

See pages 22 - 24

## OTORHINOLARYNGOLOGY

- Scott-Brown's Otorhinolaryngology, Head and Neck Surgery, Seventh Edition  
3-volume set & CD-ROM

See page 25/45

## PAEDIATRICS

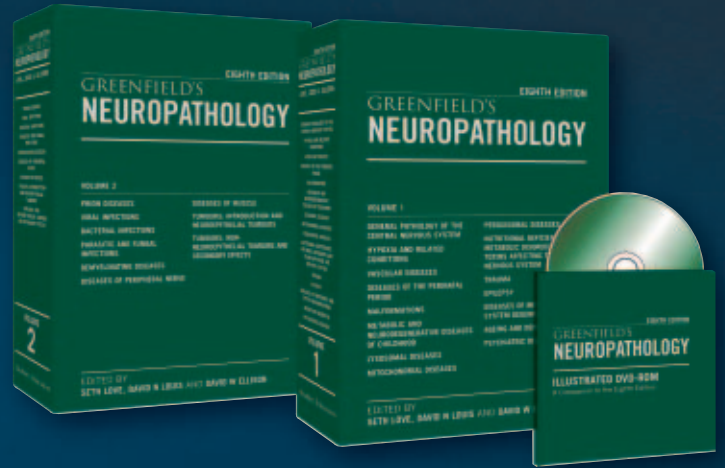

- A Manual of Neonatal Intensive Care, Fifth Edition
  - Practical Paediatric Procedures
- See pages 26 - 27

## PALLIATIVE MEDICINE

- Textbook of Palliative Medicine
- See page 28

## PATHOLOGY

- Greenfield's Neuropathology, Eighth Edition  
2-volume set & DVD-ROM
  - Mui's Textbook of Pathology, Fourteenth Edition
- See pages 29 - 30

## PSYCHIATRY

- Overcoming Postnatal Depression
  - Overcoming Teenage Low Mood and Depression
  - Textbook of Clinical Neuropsychiatry, Second Edition
- See pages 33 - 34

## RADIOLOGY

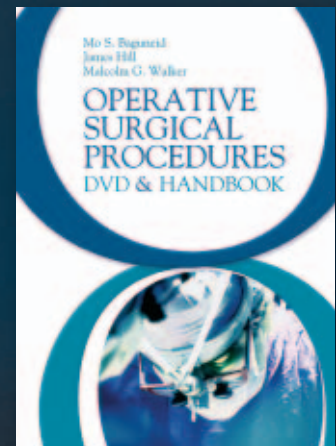

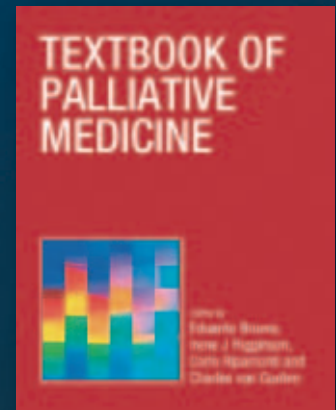

- Atlas of Clinical Pediatric Nuclear Medicine
  - Musculoskeletal MRI
- See pages 35 - 36

## RESPIRATORY MEDICINE

- Clinical Tests of Respiratory Function, Third Edition
  - Clinical Tuberculosis, Fourth Edition
  - Drug-induced & Iatrogenic Lung Disease
  - Textbook of Pleural Diseases, Second Edition
- See pages 38 - 41

## SURGERY

- Clinical Surgery
  - Operative Surgical Procedures
  - Paediatric Orthopaedics
  - Scott-Brown's Otorhinolaryngology, Head and Neck Surgery, Seventh Edition  
3-volume set & CD-ROM
  - Trauma Care Manual, Second Edition
- See pages 42 - 46

# Anaesthesia, Intensive Care & Pain Management

## Recently Published & New

### Clinical Pain Management

4-volume set + CD-ROM

Second Edition

Lead Editor: **Andrew Rice**, Reader in Pain Research, Imperial College, London, UK

Series Editors: **Richard Howard**, Consultant Anaesthetist, Great Ormond Street Hospital and the Institute for Child Health, London, UK

**Douglas Justins**, Consultant Anaesthetist, St Thomas' Hospital, London, UK

**Christine Miaskowski**, Professor and Associate Dean, UCSF School of Nursing, San Francisco, USA

This comprehensive clinical reference work, comprising four volumes, presents readers with all they need to know to provide a successful pain management service. Three clinical volumes deal with all aspects of pain: *Acute*, *Chronic* and *Cancer*; from the basic mechanisms underlying the development of pain, to the various treatments that can be applied in different clinical situations. The fourth volume, *Practice and Procedures*, complements these by providing helpful advice on practical aspects of clinical management and research.

### Clinical Pain Management: Acute Pain

Second Edition

**Pamela Macintyre**, Director, Acute Pain Service, Royal Adelaide Hospital, Australia

**David Rowbotham**, Professor of Anaesthesia and Pain Management, University of Leicester, UK

**Suellen Walker**, Senior Lecturer in Paediatric Anaesthesia & Pain Medicine, Institute of Child Health, London, UK

*Acute Pain* brings coverage of this diverse area together in a single comprehensive clinical reference, from the basic mechanisms underlying the development of acute pain, to the various treatments that can be applied to control it in different clinical settings. Much expanded in this second edition, the volume reflects the huge advances that continue to be made in acute pain management.

**Part One** examines the basic aspects of acute pain and its management, including applied physiology and development neurobiology, the drugs commonly used in therapy, assessment, measurement and history-taking, post-operative pain management and its relationship to outcome, and preventive analgesia.

**Part Two** reviews the techniques used for the management of acute pain. Methods of drug delivery and non-pharmacological treatments including psychological therapies in adults and children and transcutaneous electrical nerve stimulation are considered here.

**Part Three** looks at the many clinical situations in which acute pain can arise, and the methods of treatment that may be suitable in each circumstance, whether the patient is young or old, has pain due to surgery, trauma, medical illness or childbirth, or is undergoing rehabilitation. Issues specific to the management of acute pain in the developing world are also covered here.

**Contents:** Part 1: General Considerations / Part 2: Management - Techniques / Part 3: Management - Clinical Situations

978 0 340 94009 9 • September 2008 • 656 pp • HB • 80 illus • £99.00

### Clinical Pain Management: Cancer Pain

Second Edition

Volume Editors: **Nigel Sykes**, Medical Director and Consultant in Palliative Medicine, St Christopher's Hospice, London, UK

**Michael Bennett**, Professor, International Observatory on End of Life Care, Lancaster University, Lancaster, UK

**Chun-Su Yuan**, Associate Professor of Anesthesia and Critical Care, University of Chicago Medical Center, Chicago, USA

Now divided into four parts, the second edition of *Cancer Pain* delivers broad coverage of the issues that arise in the management of malignancy-related pain, from basic science, through end of life care and associated ethical issues, to therapies, both medical and complementary.

**Part One** reviews basic considerations in cancer pain management, including epidemiology, pharmacology, history-taking and patient evaluation and teamworking.

**Part Two** brings together the drug therapies for cancer pain, their underlying basis, and potential side-effects.

**Part Three** covers the non-drug therapies, including nerve blocks, stimulation-induced analgesia, radiotherapy, complementary therapies and psychological interventions. The control of symptoms other than pain, so critical to cancer patients, is also considered here.

**Part Four** describes special situations. Cancer pain management in children and older patients, and in the community setting, and pain in the dying patient and the cancer survivor are all covered here.

**Contents:** Part 1: General Considerations / Part 2: Drug Therapies for Cancer Pain / Part 3: Non-Drug Therapies for Cancer Pain / Part 4: Clinical Management of Pain in Special Situations.

978 0 340 94007 5 • September 2008 • 624 pp • HB • 65 illus • £99.00

# Anaesthesia, Intensive Care & Pain Management

## Key features

- An all-encompassing clinical guide to pain management
- Written and edited by the world's leading experts making this an authoritative and international reference
- Based on the Curriculum of the International Association for the Study of Pain, ensuring worldwide applicability
- Innovative features such as evidence scoring and reference annotation are incorporated for ease of reference
- CD-ROM with text, illustrations and references linked to PubMed allows the user to supplement their reading as required

## Contents

Acute Pain / Chronic Pain / Cancer Pain / Practice and Procedures

See individual volumes below for more details

**Readership:** Anaesthetists in training and in practice and all specialists in pain management.

*Also of interest to:* palliative care physicians, neurologists, rheumatologists, oncologists, psychologists.

978 0 340 93992 5 • September 2008 • 2912 pp  
HB • 4-volume set & CD-ROM • 490 illus • £299.00

CD-ROM

Available as 4-volume set + CD-ROM or individual volumes

## Clinical Pain Management: Chronic Pain

Second Edition

Volume Editors: **Peter Wilson**, Consultant in Anaesthesiology and Pain Medicine, Mayo Medical Center, Rochester, USA

**Troels Jensen**, Professor, Experimental & Clinical Pain Research, Aarhus University Hospital, Aarhus, Denmark

**Paul Watson**, Senior Lecturer, Pain Management & Rehabilitation, University of Leicester, Leicester, UK

**Jennifer A Haythornthwaite**, Professor & Director of the Behavioral Medicine Clinic, The Johns Hopkins Hospital, Baltimore, USA

The second edition of *Chronic Pain* now covers a vast scientific and clinical arena, with the scientific background and therapeutic options much expanded. In common with the other titles comprising Clinical Pain Management, the volume gathers together the available evidence-based information in a reader-friendly format without unnecessary detail, and is divided into three parts.

The broad coverage under **Part One** encompasses basic science, including applied physiology, genetics and epidemiology, through societal aspects of chronic pain and disability, to patient assessment, diagnostic procedures and outcome measures.

**Part Two** considers the different therapies available, including pharmacological, psychological, behavioural, interventional and alternative.

In **Part Three** specific and non-specific pain syndromes and their management are described, including pain in neurological disease, in HIV and AIDS patients, and after surgery or spinal cord injury, regional pain in the head, face, neck, back, joints, chest, abdomen and pelvis, and issues related to pain in children, the elderly and in association with substance misuse.

**Contents:** Part 1: General Considerations / Part 2: Management - Therapies / Part 3: Management - Clinical Situations

978 0 340 94008 2 • September 2008 • 752 pp • HB • 55 illus • £110.00

## Clinical Pain Management: Practice & Procedures

Second Edition

Volume Editors: **William Campbell**, Consultant in Anaesthesia & Pain Management, The Ulster Hospital, Belfast, UK

**Michael Nicholas**, Director, ADAPT Pain Management Programme, University of Sydney at Royal North Shore Hospital, Australia

**Harald Breivik**, Professor of Anaesthesiology, Rikshospitalet University Clinic, Oslo, Norway

**Toby Newton-John**, Consultant Clinical Psychologist and Program Director, Hunter Pain Clinic, Broadmeadow, Australia

Largely reorganised and much expanded in this second edition, *Practice and Procedures* brings together in a single volume general methods of pain assessment and presents the wide range of therapies that can be provided by a range of health care disciplines. Authored by a multidisciplinary team of experts, chapters can stand alone for readers looking for a general overview of the methods of techniques for pain management available to them or work to complement chapters in the preceding three volumes, providing practical procedures and applications in the management of acute, chronic and cancer pain. The book is divided into three parts.

**Part One** covers the principles of measurement and diagnosis, including history taking and examination, the selection of pain measures, diagnostic tests and novel imaging techniques.

**Part Two** discusses the full range of therapeutic protocols available, from pharmacological therapies, through psychological techniques, physical therapy and interventional procedures, to techniques specific to pain assessment and management in paediatric patients.

**Part Three** provides information on planning, conducting, analysing and publishing clinical trials, with invaluable guidance on the techniques of systematic review and meta-analysis in pain research.

**Part Four** considers the role of multidisciplinary pain management teams, their organization, their place within different health care systems, and how best to manage change when implementing such a service.

**Part Five** concludes the volume, investigating the use of guidelines, standards and quality improvement initiatives in the management of post-operative pain, and discussing the expert medicolegal report.

**Contents:** Part 1: Principles of Measurement and Diagnosis / Part 2: Therapeutic Protocols / Part 3: Clinical Trials / Part 4: Organization of Multidisciplinary Pain Management Teams / Part 5: Other Issues

978 0 340 94006 8 • September 2008 • 880 pp • HB • 290 illus • £110.00

## Hatch & Sumner's Textbook of Paediatric Anaesthesia

Third Edition

**Robert Bingham**, Consultant Paediatric Anaesthetist, GOSH

**Adrian Lloyd Thomas**, Consultant Anaesthetist, GOSH

**Mike Sury**, Consultant Anaesthetist, GOSH

**'A 'must-have' for every trainee in anaesthesia ... should be a core text for every department delivering anaesthesia services to children'**

*British Journal of Anaesthesia, about the previous edition*

A thorough revision of the extremely popular Paediatric Anaesthesia by Hatch and Sumner, this book has been fully updated in the light of advances in this area.

Written by an extensive and entirely global contributor list of experts in the field, the text has been carefully revised and developed into a concise textbook that provides all the information that a trainee or practising paediatric anaesthetist should know.

Thoroughly comprehensive, yet concise and manageable, this book is entirely practical and relevant, presenting all the newest information on the conditions and potential problems seen in every day practice.

### Key features:

- Comprehensive: covers all the conditions encountered in day-to-day practice in a single volume
- Accessible: useful diagrams and tables aid understanding
- Updated: includes information on recent developments in the field

**Contents:** Part 1: Scientific basis of paediatric anaesthesia / Part 2: Basic techniques / Part 3: Special techniques / Part 4: Specialised anaesthesia / Part 5: Organisation and philosophy

**Readership:** Trainees in paediatric anaesthesia.

*Also of interest to:* consultant anaesthetists.

978 0 340 91220 1 • 2008 • 808 pp • HB • 130 illus • £110.00

### BESTSELLER

## Making Sense of the ECG

Third Edition

**Andrew Houghton, David Gray**

978 0 340 94688 6 • May 2008 • 304 pp • PB • 220 illus • £17.99

► For more details see page 8

## A Manual of Neonatal Intensive Care

Fifth Edition

**Janet M Rennie**

978 0 340 92771 7 • November 2008 • 400 pp • PB • 100 illus • £21.99

► For more details see page 26

## Non-Invasive Respiratory Support

A Practical Handbook

Third Edition

**Anita K Simonds**

978 0 340 92560 7 • 2007 • 280 pp • PB • £34.99

► For more details see page 40

## Principles of Physiology for the Anaesthetist

Second Edition

**Ian Power**, Professor of Anaesthesia and Critical Care, University of Edinburgh, UK

**Peter Kam**, Clinical Associate Professor, Royal North Shore Hospital, St Leonards, NSW, Australia

The second edition of this well-received textbook continues to provide candidates with a 'tailor-made' alternative to more general physiology textbooks, delivering information designed and written specifically with the trainee anaesthetist in mind.

The authors bring their extensive experience of teaching physiology to the book in order to improve the understanding of the fundamentals of human physiology in relation to the work of the anaesthetist. The content covers the physiology of all the major organ systems, with specific emphasis on the nervous, respiratory and cardiovascular systems. In addition, there are special sections on the physiology of pain, the physiology of ageing and the physiological effects of specific environments, all highly relevant to anaesthetic practice.

### Key features:

- Tailored specifically to the needs of the anaesthetist in training
- Written by two highly experienced authors
- Adopts a highly readable style with well broken text to facilitate revision
- Explanatory diagrams throughout to support the text and to aid understanding of difficult concepts
- New features for this edition: 'learning objectives', 'areas for reflection' and a handy summary of physiological equations - provide helpful directions for study and revision

**Contents:** Physiology of excitable cells / Physiology of the nervous system / Respiratory physiology / Cardiovascular physiology / Gastrointestinal physiology / Liver physiology / Renal physiology / Acid-base physiology / Physiology of blood / Physiology of the immune system / Endocrine physiology / Metabolism, nutrition, exercise and temperature regulation / Physiology of pain / Maternal and neonatal physiology / Physiology of ageing / Special environments

**Readership:** Anaesthetists in training for postgraduate exams.

978 0 340 88799 8 • 2008 • 472 pp • PB • 380 illus • £39.99

### BESTSELLER

## Textbook of Palliative Medicine

**Eduardo Bruera, Irene J Higginson, Carla Ripamonti, Charles von Gunten**

978 0 340 96624 2 • April 2008 • 1136 pp • PB • 100 illus • £59.95

Also available in HB - 978 0 340 81018 7 • 2006 • £129.00

► For more details see page 28

## Backlist

978 0 340 73130 7 • 2003 • £195.00

## Angiology & Vascular Medicine

### Handbook of Venous Disorders

Third Edition

Peter Gloviczki, Professor of Surgery, Division of Vascular Surgery, Mayo Clinic, MN, USA

*"... thoughtful and well-constructed ... a comprehensive book that provides information about every aspect of venous disease"*

*The New England Journal of Medicine, about the previous edition*

Written and edited by several international authors, and leaders and founding members of the American Venous Forum, this handbook has been fully revised, updated and expanded, taking into account all of the recent developments in this area.

The third edition of *Handbook of Venous Disorders* continues to provide a comprehensive and up-to-date guide on acute and chronic venous and lymphatic diseases and malformations. It also discusses the latest knowledge on epidemiology, pathophysiology, clinical evaluation, diagnostic imaging, medical, endovascular and surgical management. New to this edition is a companion website containing all the images from the book. New chapters, diagnostic and treatment algorithms, as well as clinical guidelines are provided in each chapter, together with evidence scores to help the reader assess the recommendations.

#### Key features:

- Written by leaders and members of the American Venous Forum ensuring this remains the international and authoritative reference in the field
- Increased focus on endovenous procedures, to reflect recent advances in this area
- Thoroughly revised to bring the content in line with recent developments: 15 new chapters, clinical guidelines, and useful diagnostic and treatment algorithms, plus a chapter on the future of venous disease
- Illustrated with clear line diagrams corresponding to each photograph for easier interpretation

**Contents:** Part 1: Basic considerations of venous disorders / Part 2: Diagnostic evaluations and venous imaging studies / Part 3: Management of acute venous thrombosis / Part 4: Management of chronic venous disorders / Part 5: Special venous problems / Part 6: Lymphedema / Part 7: Issues in venous disease

**Readership:** Trainees and qualified practitioners in vascular surgery, interventional radiology, vascular and internal medicine, and cardiology.

*Also of interest to:* all physicians, surgeons, vascular laboratory technologists and vascular nurses who are involved in the investigation, evaluation or management of venous and lymphatic diseases or malformations.

978 0 340 93880 5 • September 2008 • 624 pp • HB  
550 illus • £120.00

### Backlist

### Emergency Vascular and Endovascular Surgical Practice

Second Edition

Aires A B Barros D'Sa, Anthony D B Chant

978 0 340 81012 5 • 2005 • £162.50

★ Highly commended in the Surgery category of the 2006 BMA Medical Book Competition

### Leg Ulcers

Diagnosis and management

Third Edition

David Negus, Philip D Coleridge-Smith, John J Bergan

978 0 340 81013 2 • 2005 • £105.00

### Making Sense of Vascular Ultrasound

A hands-on guide

Kenneth A Myers, Amy Clough

978 0 340 81009 5 • 2004 • £33.99

### McDonald's Blood Flow in Arteries

Theoretical, experimental and clinical principles

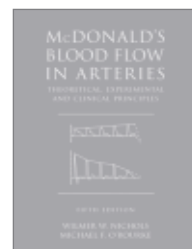

Fifth Edition

Wilmer W Nichols, Michael F O'Rourke

This classic text provides a theoretical basis to understanding blood flow in normal and disease conditions. It examines the relationship between pulsatile pressure and flow in the arteries using a mathematical model of fluid flow principles.

- Expanded to encompass all recent developments in the field including new technologies
- Focuses on practical applications with a sound scientific base making this difficult subject relevant for the practising clinician
- Outlines new therapies for disease of the heart and arteries and new measuring and monitoring techniques
- Provides a challenge to existing practice to encourage debate of controversial issues as a tool to improve future understanding and practice

978 0 340 80941 9 • 2005 • £155.00

### Pulmonary Circulation

Diseases and their treatment

Second Edition

Andrew J Peacock, Lewis J Rubin

978 0 340 80782 8 • 2004 • £139.00

★ Highly commended at the 2005 BMA Medical Book Competition

## Women's Vascular Health

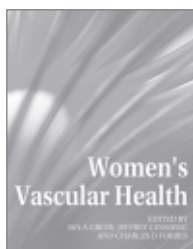

Ian A Greer, Jeff Ginsberg, Charles D Forbes

*'Written and edited by a unique combination of experts ... Women's Vascular Health presents a view of vascular disease in women that is much more holistic than is often acknowledged ... the book does a remarkable job of assembling and incorporating even very recent pivotal clinical trial data that focus on women ... It correctly identifies the unique characteristics of women and their vascular health, making for a book that will help obstetricians, cardiologists, and primary care physicians alike offer a higher level of care to their female patients.'*

*The New England Journal of Medicine, 2007*

This book gathers specialist authors from a variety of medical disciplines, to provide comprehensive coverage of the whole spectrum of women's vascular health in a single readable volume. It is a user-friendly resource ideal for all disciplines involved in women's health and encourages a more holistic view of such issues. Comprehensive, this book is divided into three broad sections: an overview, reproductive problems and hormone therapy in women.

978 0 340 80997 6 • 2006 • £99.00

## Hyperlipidaemia

Diagnosis and management  
Third Edition

Paul N Durrington, Professor of Medicine, University of Manchester and Honorary Consultant Physician, Manchester Royal Infirmary, Manchester, UK

*'This [book] provides an excellent introduction to the subject and can be thoroughly recommended'*

*Journal of the Royal College of Physicians of London, about the previous edition*

A comprehensive review of this fast-moving field, *Hyperlipidaemia* provides a state-of-the-art treatise on modern clinical practice, written in a readable style appropriate for the non-specialist.

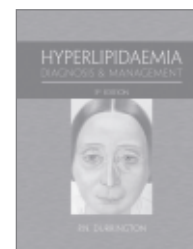

- Strongly case-based and therefore practical
- Includes new guidelines for coronary prevention through cholesterol lowering
- Presents methodology for coronary risk calculation
- Covers all novel pharmacological therapies including those currently under clinical trial

**Contents:** Lipids and their metabolism / Lipoproteins and their metabolism / Serum lipid and lipoprotein concentrations in health and in disease / Familial hypercholesterolaemia / Common hyperlipidaemia: familial combined hyperlipidaemia, hyperapobetalipoproteinaemia and polygenic hypercholesterolaemia / Hypertriglyceridaemia / Type III hyperlipoproteinaemia / Diet / Lipid-modifying therapy / National and international recommendations for the management of hyperlipidaemia / Secondary hyperlipidaemia / Genetics of lipoprotein disorders and coronary atheroma

**Readership:** Cardiologists and lipidologists.

*Also of interest to:* diabetologists and general practitioners.

978 0 340 80781 1 • 2007 • 416 pp • HB • 102 illus • £75.00

## Cardiology

### Recently Published & New

## Essential Cardiac Catheterization

Rob Butler, Mark Gunning, James Nolan - all Consultant Cardiologists at the Department of Cardiology, City General Hospital, University Hospital of North Staffordshire, Stoke-on-Trent, UK

This highly practical pocket reference provides invaluable advice and a thorough grounding on all aspects of cardiac catheterization.

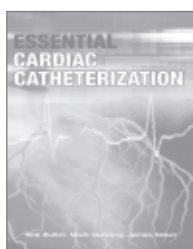

- Designed with the needs of the trainee in mind, starting from the basics in coronary pathology and pathophysiology
- Includes helpful advice on how best to prepare the patient for optimal results
- Illustrates how to deal with potentially fatal complications and emergencies in a calm and efficient manner
- An attractive 2-colour design with diagrams and illustrations to highlight key points and aid understanding

**Contents:** Introduction to the catheter laboratory / Coronary anatomy, physiology and pharmacology / Transradial access / Percutaneous femoral approach / Catheterization: techniques and interpretation / Non coronary angiography / Complications of cardiac catheterization / Emergency Procedures / Catheter lab formula and formulary / Additional angiographic material

**Readership:** Trainee cardiologists and cardiac radiographers.

*Also of interest to:* trainees in coronary radiology.

## Making Sense of the ECG

Third Edition

**Andrew R Houghton**, Consultant Cardiologist at Grantham and District Hospital, Lincolnshire; Visiting Fellow at the University of Lincoln, Lincolnshire, UK

**David Gray**, Reader in Medicine and Honorary Consultant Physician in the Department of Cardiovascular Medicine, University Hospital, Queen's Medical Centre, Nottingham, UK

*Making Sense of the ECG* is an established, best-selling reference title. It provides practical guidance on one of the most common investigations performed by physicians, surgeons, general practitioners, nursing staff and paramedics. This title is suitable for a wide range of healthcare professionals, especially cardiologists and those who read ECGs every day, as well as trainees or non-experts looking for extra reliability interpreting ECGs, and strong clinical guidance.

### Key features:

- Pocket-size - convenient for carrying around wards and other theatres of work
- Provides answers to all the issues confronted by professionals when interpreting an ECG, such as what to do on finding abnormalities and how to measure a QT interval
- Up-to-date information on investigation and treatment guidelines, and an emphasis on 'what to do next'
- Easy to navigate for quick reference with summary and 'tip boxes'
- Includes a new chapter on the history and development of the ECG

**Contents:** PQRST: where the waves come from/2. Heart rate/3. Rhythm/4. The axis/5. The P wave/6. The PR interval/7. The Q wave/8. The QRS complex/9. The ST segment/10. The T wave/11. The QT interval/12. The U wave/13. Artefacts on the ECG/14. Pacemakers and AICDs/15. Ambulatory ECG monitoring/16. Exercise ECG testing/17. Cardiopulmonary resuscitation/18. History of the ECG

**Readership:** Junior doctors and medical students; cardiology specialist nurses, cardiac technicians, GPs with a special interest in echocardiography and adult cardiology, paramedics and nursing practitioners.

*Also of interest to:* medics with an interest in general (internal) medicine, and a wide range of additional groups of healthcare professional.

### Forensic Medicine

An illustrated reference

Second Edition

**Stephen Cina**, Visiting Clinical Assoc. Professor of Pathology UCHSC, Denver, USA

**Kim Collins**, Professor in Pathology, Director of Forensic Pathology Section, Medical University of South Carolina, Charleston, SC, USA

Written by a highly respected author team,

*Forensic Medicine* is the most essential, and best quality atlas in the field. The second edition has been thoroughly revised with an impressive selection of images also provided on a companion CD-ROM, whilst retaining the balance of content that was so admired in the first edition. The CD-ROM comprises the best images from the UK and US and is fully searchable. The book covers an extensive number of subjects with both common and rare examples, making it an indispensable guide to trainees, the newly qualified and professionals with years of experience.

#### Key features:

- Fully searchable CD-ROM with an outstanding library of 1000 photographs and illustrations
- Concise, practical text, enhances the illustrations to aid learning
- Comprehensive, covering familiar and unusual examples
- International in approach, and editors brought together by an esteemed team of authors
- Book and CD-ROM can easily be used in the laboratory, office or for teaching purposes and in presentations

**Contents:** Scene investigation / Postmortem changes / Identification / Motor vehicles / Mass disasters / Gunshot wounds / Sharp force injuries / Blunt force trauma / Asphyxia / Thermal injury / Elder abuse / Pediatric deaths / Neuropathology / Sexual assault / Environmental / Toxicology / Histopathology

**Readership:** Forensic pathologists, general pathologists, trainee pathologists, police surgeons, medical examiners, forensic physicians, coroners.

*Also of interest to:* histopathologists, neuropathologists, medico-legal professionals.

978 0 340 88544 4 • 2008 • 224 pp • HB • 54 illus • £150.00

CD-ROM

## Paediatric Forensic Medicine & Pathology

**Anthony Busuttill**, Professor of Forensic Pathology, Forensic Medicine Section, Pathology Department, Edinburgh University Medical School, Edinburgh, UK  
**Jean Keeling**, Consultant Paediatric Pathologist, Royal Hospital for Sick Children, Edinburgh, UK

Compiled by two internationally acclaimed editors, *Paediatric Forensic Medicine & Pathology* brings together an excellent team to provide a detailed and up-to-date reference. The book provides all the necessary background to prepare for court cases and investigations whether in a clinical, laboratory, or legal setting. This unique resource is not aimed solely at doctors, but at all others in the judicial system, criminal investigation and social services that need to deal with such cases.

### Key features:

- Adopts an evidence-based approach to this difficult and sensitive area, wherever possible
- Global and much-admired author team, providing a trusted and international perspective
- Highly illustrated in full colour, aiding and confirming diagnosis of injury
- Comprehensive, including coverage of suspected child abuse, still birth, sudden natural death, childhood accidents, sudden death in hospitals and medico-legal aspects

**Contents:** Clinical assessment in suspected child abuse / Investigation of suspected sexual abuse / Imaging in NAI / Haematological abnormalities that may simulate abuse / Biochemical investigations / Ocular involvement in non-accidental injuries in babies and children / The scene in a sudden death of a child / Autopsy examination of the child / Neuropathological problems or abnormalities in early life / Stillbirth / When is a sudden infant death not SIDS? / Sudden natural death in infants and children / Recent advances in paediatric toxicology / Head and neck injuries / Heat and chemical injury / Deaths from mechanical asphyxia / Childhood accidents both fatal and non-fatal / Drowning and near drowning / Sudden deaths in hospital / Transportation injuries in childhood / Forensic DNA profiling / Paediatric forensic odontology: Injuries in the mouth/bites / Paediatric forensic odontology: Identification / The role of the pathologist in court

**Readership:** Forensic medicine specialists; forensic, paediatric and general pathologists.

*Also of interest to:* paediatricians and lawyers.

### Adverse Drug Interactions

A Handbook for Prescribers

**Lakshman Karaliedde**, Toxicologist, Health Protection Agency and Visiting Senior Lecturer, King's College Medical School, London, UK

**Simon F J Clarke**, Consultant Emergency Physician, Frimley Park NHS Foundation Trust, London, UK

**Ursula Collignon**, Senior Pharmacist, Guy's & St Thomas' NHS Foundation Trust, London, UK

**Janaka Karaliedde**, Lecturer in Endocrinology, Guy's & Thomas' NHS Foundation Trust, London, UK

This pocket-sized handbook provides information on potential adverse effects when prescribing two or more drugs for simultaneous use. Organised by drug class and presented in a user-friendly format, this guide offers invaluable prescribing advice to avoid interactions that are likely to give rise to life-threatening conditions; there is also practical advice on topics such as frequent monitoring and patient guidance for less threatening, but nonetheless important interactions.

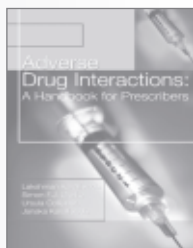

#### Key features:

- **Portable:** small, handy guide covering all major drug groups
- **User-friendly:** at-a-glance tabular format and special icons provides immediate guidance on potential interactions
- **Jargon-free:** use of complex pharmacological terminology minimised for the non-specialist
- **Comprehensive:** includes potential interactions with OTC medications, herbal remedies and dietary supplements and constituents

**Readership:** Physicians, nurse prescribers and pharmacists.

*Also of interest to:* medical students.

### Culture, Health and Illness

Fifth Edition

**Cecil Helman**, Professor of Medical Anthropology, Brunel University; Senior Lecturer, Dept of Primary Care and Population Sciences, UCL, London, UK

*'This book can be thoroughly recommended for its fresh perspective on medical transactions'*

*The Lancet, about an earlier edition*

The fifth edition of this established textbook addresses the complex interactions between health, illness and culture by setting out anthropological theory in a highly readable, jargon-free style.

Fully revised throughout, the fifth edition has expanded its coverage of topics that challenge the reader's understanding of health and illness: genetics, chronic disease, drug resistant infection and medical technology. Migration medicine now receives stronger emphasis and the author has increased coverage of 'the language of distress', a complex topic that is central to the doctor-patient relationship.

#### Key features:

- Addresses current concerns about the multi-cultural context of health care head on
- Combines key themes with contemporary developments
- Extremely well supported by empirical examples and case studies
- Companion website featuring additional material and printable clinical questionnaires: [www.culturehealthandillness.com](http://www.culturehealthandillness.com)

**Contents:** Introduction: the scope of medical anthropology / The body: cultural definitions of anatomy and physiology / Diet and Nutrition / Caring and curing: the sectors of health care / Doctor-patient interactions / Gender and reproduction / Pain and culture / Culture and pharmacology: drugs, alcohol and tobacco / Ritual and the management of misfortune / Cross-cultural psychiatry / Cultural aspects of stress and suffering / Migration, globalization and health / Telemedicine and the Internet / New bodies, new selves: genetics and biotechnology / Cultural factors in epidemiology / The AIDS pandemic / Tropical diseases: malaria and leprosy / Medical anthropology and global health / New research methods in medical anthropology

**Readership:** Medical students and graduates, nursing students, medical anthropology students, practicing healthcare professionals.

### Clinical Tuberculosis

Fourth Edition  
Peter D Davies, Peter Barnes, Stephen B Gordon

*“as an up-to-date, authoritative, comprehensive, and fully referenced account of tuberculosis, this book is unrivalled”*

*The Lancet, about the second edition*

This established, indispensable resource provides a comprehensive account of tuberculosis; fully updated with authoritative information on all aspects of the disease.

Written by a truly international team of editors, the fourth edition of this reference gives practical guidance to health professionals who may be involved in any aspect of patient management or disease control, including chapters on epidemiology, pathology, immunology, disease presentation, diagnosis, treatment and management options.

## Topley and Wilson's Microbiology and Microbial Infections

Tenth Edition

First published in 1929, this highly acclaimed reference work has grown from one to eight volumes, reflecting the ever-increasing breadth and depth of knowledge in each of the areas covered. Authored by a highly respected team of over 400 editors and contributors, the tenth edition draws on best practice from over twenty countries and can be considered as the ultimate global perspective.

Includes an additional web resource:

[www.topleyandwilson.com](http://www.topleyandwilson.com)

**Readership:** Microbiologists working in general, medical, food, environmental and pharmaceutical areas. Specialists include bacteriologists, virologists, parasitologists, immunologists, infectious disease specialists, pathologists, travel and tropical medicine specialists, and public health scientists

## Bacteriology

2-volume set

S Peter Borriello, Patrick R Murray,  
Guido Funke

This two-volume set has been thoroughly restructured and updated to include all new, emerging or re-emerging pathogens, as well as providing the ultimate reference to established organisms.

Providing comprehensive, authoritative coverage of all aspects of bacteriology, both volumes are divided into parts covering the general basic characteristics of bacteria and bacterial infections; their ecosystems; epidemiology, transmission and therapy; organ and system infections and laboratory aspects. These are followed by detailed reviews of the individual organisms and their biology. The chapters distil current knowledge while providing insight into future developments in the field.

978 0 340 88566 6 • 2007 • 2424 pp • HB & CD-ROM  
297 illus • £419.00

CD-ROM

## Immunology

Stefan H E Kaufmann, Michael W Steward

This volume brings together the scientific basis and clinical aspects of the acquisition and progression of the host response to infectious disease, providing comprehensive coverage of this fast-moving field.

Arranged under the topics of innate immunity and inflammation, soluble mediators, acquired immunity, infection and immunity, immunopathology, and immunodeficiency and vaccines, Immunology allows the reader to identify specific topics related to infectious diseases, and also to find information on the basic mechanisms underlying immunity.

CD-ROM

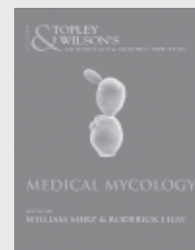

## Medical Mycology

William G Merz, Roderick J Hay

*Medical Mycology* provides comprehensive coverage of the pathogenic fungi and the diseases they cause. The volume covers the history, the biologic and molecular taxonomy of the fungal pathogens, diagnostic techniques, and integration of newer antifungal agents and strategies for the management of fungal pathogens, followed by detailed reviews of the etiological agents grouped by the principal sites that they target and the host response they elicit.

978 0 340 88567 3 • 2007 • 888 pp • HB & CD-ROM

CD-ROM

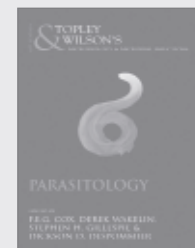

## Parasitology

F E G Cox, Derek Wakelin, Stephen H Gillespie, Dickson D Despommier

*Parasitology* has been thoroughly revised and updated to include all newly identified parasites and emerging diseases. Through discussion of the general aspects of parasitology and detailed reviews of specific organisms, the volume provides an authoritative survey of current knowledge of parasitic organisms and the human diseases to which they give rise, what their effects are and ways in which they can be controlled, not only now, but also in the future.

CD-ROM

## Virology

2-volume set

Brian W J Mahy, Volker ter Meulen

Presented in two volumes, *Virology* presents comprehensive coverage of, both new and emerging, viruses and viral infections in addition to providing an authoritative reference to established pathogens.

Both volumes discuss general and specific characteristics, and also cover the basic sciences, the classification, identification, epidemiology, pathogenesis, immunology and control of virus infections. The authors have provided consistently detailed reviews of pathogenic viruses, the infections arising from them and the principles of diagnosis and control, and provide clear exposition of the implications of molecular techniques for the categorization and classification of viruses.

**Obstetrics & Gynaecology****Recently Published & New****Differential Diagnosis in Obstetrics and Gynaecology: an A-Z**

**Tony Hollingworth**, Consultant in Obstetrics & Gynaecology at Whipps Cross University Hospital Trust; and Honorary Senior Lecturer at Queen Mary and Westfield College, London

This book adopts a unique approach to the diagnosis of obstetric and gynaecological problems, allowing the reader to be able to differentiate quickly and correctly between the various diseases to which the presenting symptoms may be attributed. User-friendly and ideal for quick reference, the book is arranged alphabetically, with potential diagnoses listed in order of importance and an extensive collection of colour photographs to aid in diagnosis. The book also contains a series of useful appendices, including definitions, reference ranges, lab values, tumour staging and obstetric measurements, amongst others – all of which enhance this book's use as a diagnostic aid.

**Key features:**

- Based on the successful premise of *French's Index of Differential Diagnosis*, now in its 14th edition
- Diagnoses are listed in order of importance, guiding the reader through a step-by-step approach
- Both scientific and common terms for symptoms and conditions are used, to allow non-specialists and students to look up items quickly and easily
- Full colour photographs are used where instrumental in aiding a diagnosis
- Useful appendices enhance this book's use as a diagnostic aid, such as definitions, reference ranges and much more

**Readership:** Students and SHOs/junior registrars in obstetrics and gynaecology.

*Also of interest to:* GPs and practice nurses, A&E personnel, gynaecology nurses and midwives.

978 0 340 92825 7 • April 2008 • 400 pp • PB • 200 illus • £34.99

## EMQs for MRCOG Part 2

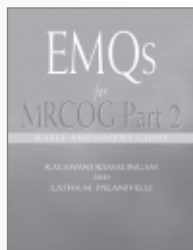

A self-assessment guide

**Kalaivani Ramalingam**, SpR, Obstetrics and Gynaecology, North Hampshire Hospital, Basingstoke

**Latha M Palanivelu**, SpR, Obstetrics and Gynaecology, Milton Keynes General Hospital

Editorial advisors: **Christian Philips**, Consultant Gynaecologist, Basingstoke

**Jeremy Brockelsby**, Consultant, Leeds General Infirmary

This book provides those studying for the MRCOG Part 2 examination with welcome practice in answering the newly introduced EMQ style of question. Based on the MRCOG syllabus, this book is designed to test the candidate's theoretical and practical knowledge of obstetrics and gynaecology.

The book opens with an introductory section, explaining the EMQ and its place in the examination, and advising candidates on how they should approach this question type in order to obtain the highest marks. This is followed by a collection of 75 EMQ themes, with a total of 350 questions for the reader to attempt. The questions are based on common clinical scenarios and cover a variety of topics. After each topic follow the answers, which include explanatory material and useful references.

### Key features:

- A unique revision guide, the first of its kind providing practice in this new question type
- Modelled on the current MRCOG syllabus
- Provides 75 EMQ themes with over 350 questions for self-assessment practice
- Answers are provided, including explanations and references
- A useful introductory section explaining the EMQ and how candidates can prepare for this part of the exam, in order to ensure maximum marks

**Contents:** Benign gynaecological conditions / Early pregnancy complications / Subfertility and assisted reproductive techniques / Gynaecological oncology / Menopause and hormone replacement therapy / Sexual health and contraception / Urogynaecology / Surgical gynaecology / Obstetrics: antenatal screening / Medical and surgical disorders complicating pregnancy / Antepartum fetal surveillance / Labour and puerperium / Operative obstetrics / The newborn infant

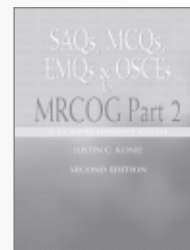

**Readership:** MRCOG Part 2 candidates

978 0 340 94169 0 • February 2008 • 176 pp • PB • £19.99

## SAQs, MCQs, EMQs, and OSCEs for MRCOG Part 2

A Comprehensive Guide  
Second Edition

**Justin C Konje**, Senior Lecturer and Honorary Consultant Obstetrician and Gynaecologist at Leicester Royal Infirmary, University of Leicester, UK

*"I'm sure I passed the part 2 written [exam] because of Justin Konje's book ... It is a clear descriptive book"*

*BMJ Careers, about the previous edition*

This is the first book to encompass all elements of the MRCOG Part 2 examination and the newly introduced question type, 'extended matching questions'. Now in its second edition, this book is fully updated in line with the current MRCOG syllabus and provides readers with the definitive 'one-stop-shop' revision aid in this area.

The book is divided into four key parts, one for each style of question, each of which opens with an introductory section on how to approach the exam and, crucially, how to avoid failing it. Concentrating on testing the candidate's theoretical and practical knowledge as recommended in the current MRCOG syllabus, the book tests the trainee with questions in obstetrics and gynaecology and those aspects of medicine, surgery and paediatrics relevant to the practice of both.

### Key features:

- Updated content to reflect the current MRCOG syllabus
- Now includes practice EMQs as well as the standard question-types
- Practice questions are supplemented with model answers and annotations to give readers logical explanations to aid learning
- Includes additional information on how to approach each question type, key methods for ensuring success and common pitfalls that lead to failure

**Readership:** MRCOG Part 2 candidates

This book applies current understanding in medicine, physiology and the behavioural sciences to the stresses faced by both civil and military aircrew on a daily basis.

- Enhanced international coverage and appeal, including worldwide regulation of medical standards, and travel and disease
- Greater attention to the principles that underlie the standards in the field rather than the standards themselves
- Increased relevance to all forms of passenger carrying aircraft, including the transport of 'well' passengers and the sick and injured
- Improved differentiation between the coverage of physiology, operational issues and clinical aspects

## Basic Clinical Radiobiology

Fourth Edition

**Albert van der Kogel**, Course Director for the Basic Clinical Radiobiology Course at ESTRO, Biology Editor of the journal, Radiotherapy and Oncology, and Chair of Clinical Radiobiology at the Radboud University Medical Centre of Nijmegen, The Netherlands

**Michael Joiner**, Founding teacher for the Basic Clinical Radiobiology Course at ESTRO, and Head of the Radiation Biology Program at Mayne State University, USA

This concise but exhaustive textbook sets out the essentials of the science and clinical application of radiobiology for those seeking accreditation in radiation oncology, clinical radiation physics and radiation technology. Highly regarded, this book has been enlisted as a core text for the Royal College of Radiologists' radiobiology exam and adopted by the European Society for Therapeutic Radiology and Oncology (ESTRO) as a course book.

The fourth edition of this classic text has been fully updated and written by a variety of new editors and experienced authors, who have used their significant international teaching experience to ensure the content remains clear and comprehensive. This new edition is highly illustrated to improve understanding; and continues to present in an interesting way the biological basis of radiation therapy, discussing the basic principles and significant developments that underlie the latest attempts to improve the radiotherapeutic management of cancer.

#### Key features:

- Reputable text: the gold-standard European text for training, adopted by the European Society for Therapeutic Radiology and Oncology (ESTRO) as a course book and; enlisted as a core text for the Royal College of Radiologists' radiobiology exam
- Global in approach, drawing on the considerable teaching experience of an international author team
- Revised and updated to keep abreast of current developments in radiation biology and radiation oncology
- New topics include chapters on: mechanisms of cell death, biological response modifiers, biological image guided radiotherapy

**Contents:** Introduction / Initial cellular responses to radiation – checkpoints and DNA repair / Cell death after irradiation – how, when and why cells die / Models of radiation response / Dose-response relationships in radiotherapy / RBE and LET (relative biological effectiveness and linear energy transfer) / Tumor growth and response to radiation (concepts of proliferation, tumor responses, Tpot, TD) / Fractionation: the L-Q approach / The L-Q approach in clinical practice / Time factors in tumours and modified fractionation / Time factors in normal tissue response to radiation / The dose-rate effect / Pathogenesis of normal tissue side-effects / The volume effect in radiotherapy / The oxygen effect and fractionated radiotherapy / Microenvironment and cellular hypoxia responses / Therapeutic approaches to tumor hypoxia / Combined radiotherapy and chemotherapy / Retreatment tolerance of normal tissues / Biological image guided radiotherapy / Cell signalling and modifying radiation responses (EGFR, Ras, PI3K) / Biological response modifiers in the clinic: tumor / Biological response modifiers: normal tissue / Molecular targeting and individualization of treatment / Protons and other ions in radiotherapy / Radiation-induced cancer

**Readership:** FRCR (clinical oncology) and equivalent candidates, SpRs (and equivalent) in radiation oncology, practicing radiation oncologists and radiotherapists.

*Also of interest to:* radiotherapy physicists and radiobiologists.

**"... excellent, current and comprehensive ... keep a copy of this book ready to hand and consult it often"**

*The New England Journal of Medicine, about the previous edition*

The third edition of this comprehensive and authoritative guide provides a 'one-stop shop' reference covering all aspects of the group of disorders collectively known as the lymphoid neoplasms. Written by a global team of editors who synthesise for the reader aspects of current knowledge and likely future developments, this book has improved coverage of the basic science aspects and includes a number of improved features for increased accessibility.

The book discusses normal cellular origins and the molecular genetic abnormalities that can lead to this group of conditions. It also looks at the environmental factors that may be relevant to disease development, and finally, to the pragmatic aspects of disease management.

### Key features:

- **'One-stop shop' reference:** now includes Hodgkin's Disease and the acute lymphoblastic leukemias
- **Authoritative:** authored by a series of internationally renowned editors
- **FREE CD-ROM:** with references for additional scientific or literature research
- **Coherent:** new improved structure makes it easy to find information and learn
- **Accessible:** new text features including summary points, text boxes, reference annotations

**Contents:** Part 1: Introduction / Part 2: Epidemiology / Part 3: Immunobiology / Part 4: Classification and pathogenesis / Part 5: Pathology and pathogenesis of specific lymphomas / Part 6: Presenting features, diagnosis, staging / Part 7: General principles of management / Part 8: Management of specific diseases / Part 9: Future directions in diagnosis and treatment

**Readership:** Medical, clinical and radiation oncologists, haematologists - both trainees and qualified practitioners.

*Also of interest to:* pathologists and laboratory researchers with a particular interest in this area.

## Treatment of Cancer

Fifth Edition

Pat Price, Professor of Radiation Oncology, University of Manchester, Cancer Studies Division, Academic Department of Radiation Oncology, Christie Hospital NHS Trust, Manchester, UK

Karol Sikora, Medical Director, Cancer Partners UK and Visiting Professor of Cancer Medicine, Imperial College, Hammersmith Hospital, London, UK

Tim Illidge, Professor of Targeted Therapy and Oncology and Cancer Research UK Senior Clinical Research Fellow, Patterson Institute, University of Manchester, Cancer Studies Division, Christie NHS Trust, Manchester, UK

**"It will, I am sure, become the standard textbook on the treatment of cancer and will be of value to all those studying or practising oncology in any form"**

*British Medical Journal, about the previous edition*

Thoroughly revised and updated, the fifth edition of this outstanding reference surpasses other oncology texts in condensing the essential information for exemplary cancer care into one readable and accessible guide. Retaining the successful structure of previous editions, this book includes several completely new chapters, new features for increased accessibility and an integrated approach to patient care.

**Part one** considers the scientific basis and fundamental principles underlying cancer treatment and examines the likely developments that will occur over the next decade at the leading edge of oncology.

**Part two** is divided into two sections; the first covering general issues of cancer management, including planning techniques, concomitant chemoradiotherapy, surgical oncology and palliative care; and the second using a system-based approach to cover the clinical aspects and management plans for the whole spectrum of malignant disease.

### Key features:

- **Comprehensive:** incorporates scientific discoveries with the best of current practice in a single but accessible volume
- **Revised and updated:** new chapters on: drug development, cancer prevention, radioimmunotherapy, biological therapies, antibody therapy, late effects and surgical oncology
- **Integrated:** supports an integrated approach to patient care, involving radiotherapy, chemotherapy and surgery where appropriate
- **Accessible:** with learning points and key references highlighted in each chapter to aid revision and wider reading

**Contents:** Introduction / Molecular biology / Applied molecular radiobiology / Clinical radiobiology / Mathematical modelling and its application in radiation oncology / Protons and heavy ion therapy / Principles of chemotherapy and drug development / Tumour imaging in oncology / Interventional radiology / Cancer vaccines / Biological therapies / Radioimmunotherapy / Antibody therapy for cancer / Angiogenesis and the treatment of cancer / Gene therapy / Central nervous system / Ocular and adnexal tumours / Head and neck / Thyroid / Endocrine system / Breast / Bronchus / Oesophagus / Liver / Pancreas / Biliary tract / Stomach / Bladder / Prostate / Colon and rectum / Anus / Germ cell cancers of the testis and related neoplasms / Kidney, renal tumours / Ovary and fallopian tube / Uterus / Cervix / Vagina and vulva / Gestational trophoblastic tumours / Non-melanoma skin cancer / Malignant melanoma / Bone / Soft tissue sarcomas / Leukaemias / Hodgkin's Disease / Non-Hodgkin's lymphoma / Multiple myeloma / Total body irradiation and bone marrow transplantation / Cancer in childhood / AIDS related cancer / Medical care / Brachytherapy / Planning techniques / Conformal

radiotherapy, IMRT and image-guided radiotherapy / Concomitant chemoradiotherapy principles and management / Palliative care / Communications with the cancer patient / Clinical cancer genetics / Large scale randomised evidence: trials and overviews / The economics of cancer care / Medical audit / The organisation of cancer services: a UK perspective / New drug development / Late effects of cancer therapy / Surgical oncology / Cancer prevention strategies

**Readership:** Oncologists in training (MRCP / FRCR) and in practice; clinical oncologists [radiotherapists] and medical oncologists.

*Also of interest to:* surgical oncologists, haematologists.

# Otorhinolaryngology

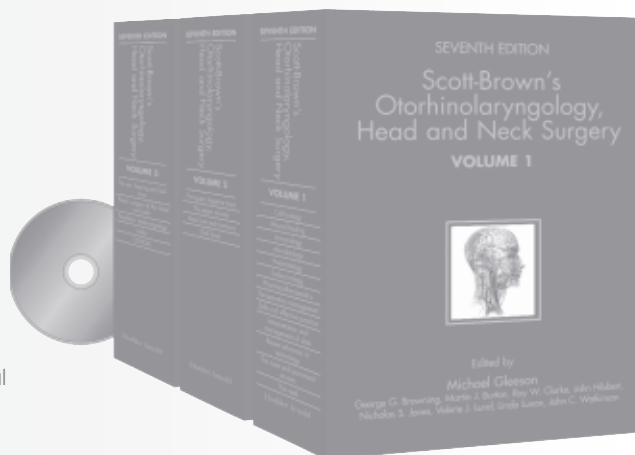

## Recently Published & New

### Scott-Brown's Otorhinolaryngology, Head and Neck Surgery

3-volume set + CD-ROM  
Seventh Edition

Used the world over as the definitive reference, this book provides detailed, reliable and authoritative information on all aspects of ear, nose and throat disease and treatment. This seventh edition is presented in a three-volume set and is accompanied by a fully searchable CD-ROM.

Fully revised and updated by a new international team of editors, the majority of the chapters are evidence-based and each contains useful features including key points, best clinical practice guidelines, details of the search strategies used to prepare the material, and suggestions for future research.

#### Key features:

- Internationally acclaimed, comprehensive reference covering **all** aspects of ENT, head and neck surgery
- CD-ROM, containing the same content as the print edition, with references linked to PubMed provides quick and easy access to supplementary information about clinical conditions
- Evidence-based approach drawing on practical scenarios to place learning into context
- Easily navigable with accessible features and colour illustrations to aid the understanding of complex points
- Additional supporting web resource for further reference: [www.scottbrownENT.com](http://www.scottbrownENT.com)

#### Contents

Part 1: Cell biology / Part 2: Wound healing / Part 3: Immunology / Part 4: Microbiology / Part 5: Haematology / Part 6: Endocrinology / Part 7: Pharmacotherapeutics / Part 8: Perioperative management / Part 9: Safe and effective practice / Part 10: Interpretation and management of data / Part 11: Recent advances in technology / Part 12: The nose and paranasal sinuses / Part 13: The neck / Part 14: The upper digestive tract / Part 15: The upper airway / Part 16: Head and neck tumours / Part 17: Skull base / Part 18: The ear, hearing and balance / Part 19: Plastic surgery of the head and neck / Part 20: Paediatric otolaryngology

#### About the Editors

**Michael J Gleeson**, Professor of Otorhinolaryngology and Skull Base Surgery at the Institute of Neurology in University College London and Honorary Consultant Skull Base Surgeon to the Great Ormond Street Hospital, London, UK

**George G Browning**, Professor of Otorhinolaryngology at the MRC Institute of Hearing Research, Glasgow, UK

**Martin J Burton**, Consultant Otolaryngologist at The Radcliffe Infirmary, Oxford, and Honorary Senior Clinical Lecturer at the University of Oxford, Oxford, UK

**Ray W Clarke**, ENT consultant at Royal Liverpool Children's Hospital, Alder Hey, Liverpool, UK

**John Hibbert**, Formerly at the Department of Otorhinolaryngology, Guy's Hospital, London, UK

**Nicholas S Jones**, Professor in the Department of Otorhinolaryngology, Queen's Medical Centre, Nottingham, UK

**Valerie J Lund**, Professor in Rhinology and Honorary Consultant ENT Surgeon at the Royal Free and University College Medical School, University College London and the Institute of Laryngology and Otorhinolaryngology, London, UK

**Linda M Luxon**, Professor in the Department of Neuro-otology, National Hospital for Neurology and Neurosurgery, London, UK

**John C Watkinson**, Consultant Head and Neck and Thyroid Surgeon, Queen Elizabeth Hospital, Birmingham, UK

**Readership:** Trainee ENT surgeons, audiologists and trainee head and neck surgeons.

#### A Manual of Neonatal Intensive Care

Fifth Edition

Janet M Rennie, Consultant and Senior Lecturer in Neonatal Medicine, Elizabeth Garrett Anderson Obstetric Hospital, University College London Hospitals, UK

This book continues to provide precise instructions on the diagnosis and management of common neonatal problems. Extensively revised with completely new chapters and features such as key point boxes, illustrations and easy-to-digest lists – the fifth edition of this well-regarded reference continues to provide clear explanatory guidance for the busy paediatrician or nurse working in neonatal intensive care.

This new edition has been updated with more international applicability, including a re-focus of the chapter on the organisation of neonatal care to concentrate on reasons for admitting a baby to the intensive care ward, rather than UK-specific admission criteria. It also retains the background physiology much admired in previous editions, along with key references and diagrams.

##### Key features:

- **Fully updated:** new chapters include the subjects of foetal medicine, antenatal diagnosis, and obstetrics for the neonatologist
- **Global:** increased international relevance for a clearer insight
- **Comprehensible:** key references and diagrams are used to provide guidance with reasoning, rather than providing a book of lists
- **User-friendly:** key point boxes to aid rapid assimilation of information
- **Evidence-based:** enables readers to evaluate the advice given through clear explanations in order to develop understanding

**Readership:** Trainees in paediatrics, neonatology and neonatal nursing. Also forms a useful ready-reference for the practising paediatrician, neonatologist and paediatric nurse.

#### Growth Disorders

Second Edition

Christopher J H Kelnar, Consultant Paediatric Endocrinologist and Professor of Paediatric Endocrinology, Department of Child Life and Health, Hospital for Sick Children and University of Edinburgh, Edinburgh, UK

Martin O Savage, Professor of Paediatric Endocrinology, Department of Endocrinology, St Bartholomew's Hospital, London, UK

Paul Saenger, Professor of Pediatrics, Department of Pediatrics, Division of Pediatric Endocrinology, Montefiore Medical Center, Albert Einstein College of Medicine, New York, USA

Chris T Cowell, Clinical Associate Professor, Director of Clinical Research and Head, Institute of Endocrinology and Diabetes, University of Sydney, Australia

*'... well written and intelligible ... Growth Disorders will surely be a new classical reference.'*

*Acta Paediatrica, about the previous edition*

Fully revised and updated, this unique book approaches growth and its disorders from both a physiological and pathophysiological standpoint. The book outlines in detail the fundamental biological mechanisms of normal and abnormal linear growth, how to assess growth accurately fundamental to the early detection of abnormality and, importantly, how to manage disorders leading to short and tall stature, and disorders of the timing of puberty. Throughout, emphasis is given on achieving a satisfactory outcome for the child and parent by keeping them fully informed regarding potential treatment strategies.

##### Key features:

- The **first** comprehensive reference available devoted to this important topic within the fields of both paediatrics and endocrinology
- Written by a highly-respected editorial team, with authors from around the world to achieve a truly international and multi-disciplinary approach
- Reviews all paediatric disorders that may be associated with abnormal growth, including endocrine disease and chronic disorders such as diabetes, renal disease, recommending appropriate management strategies
- Considers all therapies currently available – from growth hormone administration to novel pharmacological therapies and surgical options

**Contents:** Historical background and worldwide perspectives / Part 1: Physiology of linear growth / Part 2: Growth assessment / Part 3: Chronic paediatric disorders and management of the associated growth disturbance / Part 4: Endocrine causes of abnormal growth / Part 5: Treatment of growth disorders

**Readership:** Paediatricians, paediatric endocrinologists and endocrinologists.

## Practical Paediatric Procedures

Mike Silverman, Professor of Child Health, University of Leicester, UK

Nia Henderson, Paediatric SHO, Leicester Royal Infirmary, UK

Sanjiv Nichani Consultant Paediatrician, Leicester Royal Infirmary, UK

*Practical Paediatric Procedures* comprises an invaluable and truly integrated book and multimedia tool that provides readers with a complete package to enhance their understanding and ability to practice all the core procedures. Meeting the criteria of the *RCPCH's Framework of Competencies*, this book covers all the core diagnostic and therapeutic procedures that the trainee paediatrician would be expected to know how to do. Each procedure is introduced in the book - describing the scientific background, clinical applications and associated problems; and is uniquely illustrated on the accompanying DVD-ROM.

### Key features:

- Conforms to the RCPCH training syllabus and framework of competencies
- DVD-ROM clearly demonstrates each procedure using a variety of techniques - video clips, animated diagrams and figures, and enhanced by text and commentary
- Accompanying textbook provides useful background information regarding indications, equipment, considerations, problems and useful lists of further reading
- Covers all the core procedures as well as additional procedures that the trainee needs to know about (but does not actually need to perform)
- Clinical examples are used to place procedures into a clinical investigation and management context
- Problems are highlighted, particularly in relation to the interpretation of investigative procedures to drawing attention to common pitfalls to aid learning

**Contents:** Section 1: ICU/Emergency/Acute / Section 2: Neurology / Section 3: Respiratory / Section 4: Cardiovascular / Section 5: Gastrointestinal and nutrition / Section 6: Renal tract / Section 7: Endocrine and genital tract / Section 8: Special Senses / Section 9: Skin disorders / Section 10: Clinical path, oncology and immunity / Section 11: Surgical procedures for paediatricians

**Readership:** Trainee paediatricians at SHO, SpR and fellow level, particularly when studying for MRCPCH exam.

*Also of interest to:* trainee and qualified paediatric nurses, as well as other doctors and nurses who may come into frequent contact with children in their field of practice.

## Clinical Pain Management: Cancer Pain

Second Edition

Nigel Sykes, Michael Bennett, Chun-Su Yuan

The second edition of *Cancer Pain* is divided into four parts, covering the following:

**Part One** examines the basic aspects of acute pain and its management, including applied physiology and development neurobiology, the drugs commonly used in therapy, assessment, measurement and history-taking, post-operative pain management and its relationship to outcome, and preventive analgesia.

**Part Two** reviews the techniques used for the management of acute pain. Methods of drug delivery and non-pharmacological treatments including psychological therapies in adults and children and transcutaneous electrical nerve stimulation are considered here.

**Part Three** looks at the many clinical situations in which acute pain can arise, and the methods of treatment that may be suitable in each circumstance, whether the patient is young or old, has pain due to surgery, trauma, medical illness or childbirth, or is undergoing rehabilitation. Issues specific to the management of acute pain in the developing world are also covered here.

## Textbook of Palliative Medicine

Eduardo Bruera, Professor and Chair, Department of Palliative Care & Rehabilitation Medicine, U.T. MD Anderson Cancer Center, Houston, Texas, USA

Irene J Higginson, Professor of Palliative Care and Policy, King's College London, UK

Carla Ripamonti, Head, Day-Hospital and Outpatient Clinic of Pain Therapy and Palliative Care, Rehabilitation and Palliative Care Operative Unit, National Cancer Institute, Milan, Italy

Charles von Gunten, Director, Center for Palliative Studies, San Diego Hospice and Palliative Care, San Diego California, USA

*Textbook of Palliative Medicine* provides an alternative, truly international approach to this rapidly growing specialty. It fills a niche with its evidence-based, multi-professional approach and global perspective ensured by the international team of editors and contributing authors. In the absence of an international 'curriculum' for the study of palliative medicine, this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field, and the structure and content have been constructed very much with this in mind.

### Key features:

- Evidence-based approach to modern palliative care practice focusing on what the palliative physician in training or in practice needs to know
- Multidisciplinary approach, reflecting the needs of the palliative care team
- Designed to shape current thinking and the future planning of care - establishing an 'unofficial' international curriculum for the study of palliative medicine
- Represents a truly global perspective with particular emphasis on practice in continental Europe and North America as well as the UK
- Also addresses the important issue of palliative care in the less developed nations
- Exemplary editorial team and renowned list of contributors

**Contents:** Part 1: The development of palliative medicine / Part 2: Bioethics / Part 3: The problems and challenges of global reach / Part 4: Education / Part 5: Research and audit / Part 6: Organization and governance / Part 7: Overview of assessment / Part 8: Pain / Part 9: Gastrointestinal systems / Part 10: Fatigue / Part 11: Respiratory systems / Part 12: Neuropsychiatric / Part 13: Assessment and management of other problems / Part 14: Emergencies in palliative medicine / Part 15: Specific conditions and situations / Part 16: Interdisciplinary issues

**Readership:** Palliative care physicians in training and in practice.

*Also of interest to:* palliative care nurses, other health professionals in the palliative care team.

## Recently Published & New

### Greenfield's Neuropathology

2-volume set  
Eighth Edition

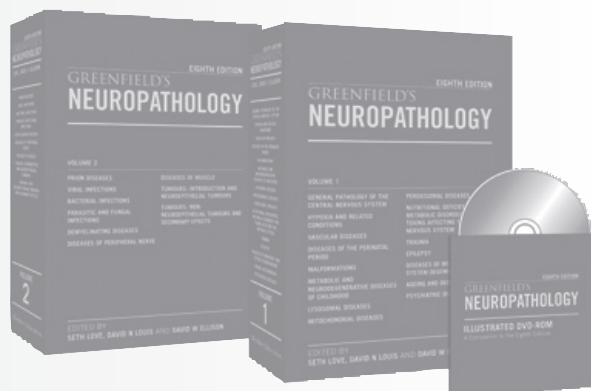

**Professor Seth Love**, Professor of Neuropathology, Institute of Clinical Sciences, Frenchay Hospital, Bristol, UK

**Dr David N Louis**, Molecular Pathology Unit, Massachusetts General Hospital, Charlestown, MA, USA

**Professor David W Ellison**, Professor of Pathology, St. Jude Children's Research Hospital, Memphis, TN, USA

*'... a true monument of neuropathology that cannot be compared with anything existing in this field ... It is really a seminal work and ... can be recommended to all'*

*European Journal of Neurology, about the previous edition*

*Greenfield's Neuropathology*, the world's pre-eminent neuropathology reference, provides an authoritative, comprehensive account of the pathological findings in neurological disease, their biological basis and their clinical manifestations. This account is underpinned throughout by a clear description of the molecular and cellular processes that are relevant to the development, and normal and abnormal functioning of, the nervous system. While this scientific content is of paramount importance, however, care has been taken to ensure that the information is presented in a way that is accessible to readers working within a range of disciplines in the clinical neurosciences. This also places the neuropathological findings within the context of a broader diagnostic process.

#### Key features:

- **Classic reference:** provides THE definitive account of neuropathology
- **International:** highly regarded editorial team, new to this edition, and expert contributors ensure a truly up-to-date and global perspective
- **Comprehensive:** covers authoritatively and comprehensively, all of the pathological findings in neurological disease, their biological basis and clinical manifestations
- **Accessible:** the science underpinning the molecular and cellular processes described is placed in context for the non-specialist
- **Navigable:** user-friendly presentation, with key information placed in boxes and tables for ease of reference
- **Highly illustrated:** over 2,700 high-quality photographs and explanatory line diagrams and also available on a companion DVD-ROM

**Contents:** VOLUME 1: General pathology of the central nervous system / Hypoxia and related conditions / Vascular diseases / Diseases of the perinatal period / Malformations / Metabolic and neurodegenerative diseases of childhood / Lysosomal diseases / Mitochondrial diseases / Peroxisomal diseases / Nutritional deficiencies, metabolic disorders and toxins affecting the nervous system / Trauma / Epilepsy / Diseases of movement and system degenerations / Ageing and dementia / Psychiatric diseases / VOLUME 2: Prion diseases / Viral infections / Bacterial infections / Parasitic and fungal infections / Demyelinating diseases / Diseases of peripheral nerve / Diseases of muscle / Tumours: introduction and neuroepithelial tumours / Tumours: non-neuroepithelial tumours and secondary effects

**Readership:** Neuropathologists.

*Also of interest to:* neurologists, neurosurgeons, general pathologists, neuradiologists and clinical neuroscientists.

## Muir's Textbook of Pathology

Fourteenth Edition

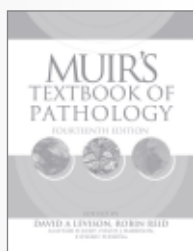

**David A Levison**, Professor of Pathology, University of Dundee

**Robin Reid**, Consultant Pathologist, Western Infirmary, Glasgow

**Alistair D Burt**, Professor of Pathology and Dean of Clinical Medicine, Newcastle University

**David J Harrison**, Professor of Pathology and Director of the Edinburgh Cancer Research Centre, University of Edinburgh

**Stewart Fleming**, Professor of Cellular and Molecular Pathology, University of Dundee

**'Muir remains an excellent, modestly priced textbook of pathology that will serve the student as a reference through the clinical years and beyond.'**

*Histopathology, about the previous edition*

A trusted textbook for generations of undergraduates for over 80 years, this new, 14th edition, emphasises the clinical application of pathology through the inclusion of clinical case studies that relate pathological mechanisms to patients, problems and prognoses. Divided into two main sections, Muir's Textbook of Pathology opens with a series of introductory chapters on the mechanisms of general pathology before moving on to a discussion of pathology in relation to specific body systems.

- The only book required - students can use this book for both systems-based and problem-based undergraduate courses
- Promotes useful directions for further study with special study topics that appear in each chapter
- Applies pathology to practice with the inclusion of several illustrative case histories
- Ensures students are up-to-date and in sync with UK medical school curricula
- 'Reader-friendly' aids enhance the value of the text during revision
- Complemented by an online image bank at [www.muirspathology.com](http://www.muirspathology.com)

**Contents:** Section 1- Mechanisms of Disease: Cellular and Molecular / 1 Applications of pathology / 2 Normal cellular function / 3 Genetics / 4 Injury and tissue damage / 5 Cancer and other growth disorders / Section 2 - Systemic Pathology / 6 Cardiovascular system / 7 Respiratory system / 8 Blood, bone marrow and lymphoreticular system / 9 Gastrointestinal system / 10 Liver, biliary tract and pancreas / 11 Nervous system and the eye / 12 Locomotor system / 13 Kidneys and urinary tract / 14 Female reproductive system / 15 The breast / 16 Male reproductive system / 17 Endocrine System / 18 The skin / 19 Infections / Index

**Readership:** Undergraduate medical students during their entire course; pathology students and those studying for the MRCPPath.

## Paediatric Forensic Medicine and Pathology

Anthony Busuttill, Jean Keeling

Compiled by two internationally acclaimed editors, *Paediatric Forensic Medicine & Pathology* brings together an excellent team to provide a detailed and up-to-date reference. The book provides all the necessary background to prepare for court cases and investigations whether in a clinical, laboratory, or legal setting. This unique resource is not aimed solely at doctors, but at all others in the judicial system, criminal investigation and social services that need to deal with such cases.

## Pathology of Melanocytic Disorders

Second Edition

**Wolter Mooi**, Professor of Pathology, VU Medical Centre, Amsterdam, The Netherlands

**Thomas Krausz**, Professor of Pathology and Director of Anatomic Pathology, University of Chicago, USA

**'I strongly recommend this book to everyone interested in benign or malignant melanocytic disorders'**

*The New England Journal of Medicine, about the previous edition*

The second edition of this highly respected reference work and practical bench book provides a thorough clinical-pathologic analysis of melanocytic disorders, as well as effective practical guidance in the diagnosis of problem lesions.

### Key features:

- An authoritative reference work and practice bench book providing THE definitive account of the subject
- Written by two internationally known authors
- Fully updated encompassing major developments of standards and procedures, over the past fifteen years
- Pertinent up-to-date references included with a meticulously compiled index
- Includes tables of diagnostic features for quick reference, accompanied by clear discussion of controversial issues
- High quality photographs illustrate the important differential features and accompanying descriptions portray potential pitfalls encountered in this problematic field

**Contents:** Part 1: Introduction / Melanin, Melanocytes, Skin / Techniques and Practical Considerations / Part 2: Cutaneous Naevi and Other Pigmented Skin Lesions / Common Acquired Naevus / Spitz Naevus and Related Lesions / Blue Naevus and Related Lesions / Congenital Naevus / Naevi as Melanoma Precursors; Dysplastic Naevus / Skin Pigmentations Not Related to Naevi or Melanoma / Part 3: Cutaneous Melanoma / Melanoma: General Features and Main Subtypes / Melanoma: Variants / Cytological Diagnosis of Melanoma / Melanoma Prognosis; Staging / Part 5: Extracutaneous Melanotic Tumours / Melanocytic Tumours / Non-melanocytic Melanotic Tumours

**Readership:** Pathologists, dermatopathologists.

*Also of interest:* dermatologists, plastic/skin surgeons.

## Russell & Rubinstein's Pathology of Tumors of the Nervous System

Seventh Edition

Roger McLendon, Darell Bigner,  
Marc Rosenblum

This is the leading international professional reference text that also serves as a bench book, describing all aspects of the pathology of brain tumours - genetics, molecular biology, epidemiology, morphology, immunohistochemistry, diagnostic criteria and prognosis. Beautifully illustrated in colour throughout and comprehensively referenced, Russell & Rubinstein is regarded as the ultimate source for key information.

Entirely revised and updated throughout by a wide range of internationally revered authorities, the content reflects the latest tumour classification and grading while neuroradiologic correlation via state of the art neuroimaging techniques continues to be emphasised in all diagnostic entities. A companion CD-ROM, providing quick and easy access to all the images from the book, retrievable by figure number, chapter title and keyword searches, completes the offering.

### Key features:

- Content restructured and re-organised into a single volume for improved accessibility
- Basic science fully integrated
- Top quality colour photographs throughout, all presented on the fully searchable companion CD
- Reflects the latest tumour classification and grading
- Many new contributors including key international authorities

## Culture and Mental Health

A Comprehensive Textbook

Kamaldeep Bhui, Professor of Cultural Psychiatry &  
Epidemiology, Barts & The London School of Medicine  
and Dentistry, Queen Mary University of London, UKDinesh Bhugra, Head, Cultural Psychiatry Section,  
Institute of Psychiatry, London, UK

Unique in its cohesiveness and clarity, this text focuses on the issues surrounding the provision of mental health services within multi-cultural societies and how they translate in practical clinical terms.

The authors provide a detailed account of the state of clinical services across the globe, paying particular attention to the impact of cultural differences on management techniques and styles from an ethical, religious, legal and social point of view.

By drawing experiences from a variety of medical and social science disciplines throughout the world, the book integrates a wealth of invaluable information and experiences, otherwise inaccessible to most.

### Key Features:

- Multi-disciplinary approach – reflecting the way psychiatric treatment is delivered today
- High calibre team of international experts – first hand experience of many cultural groups provided in one volume
- A balanced account of the local and global aspects of mental health care
- A comprehensive resource of illustrative case studies and scientific data

**Contents:** Part 1: Basic sciences / Anthropology and its contributions / Sociology of health and illness / The epidemiological method and its contribution to international and cross-cultural comparative mental health research / Philosophical tools for cultural psychiatry / Religion and mental health / Mental health law and clinical practice: an international and cultural perspective / Management studies and organizational development / Health service research and policy / Psychopathology and psychology: disorders of possession and dissociation in the intercultural clinical practice / The history and relevance of culture bound syndromes / Part 2: World experts / Russian culture and psychiatry / Culture and mental health in West Africa: Nigeria / North Africa: focus on psychiatry in Egypt / Culture and mental health services in the Horn of Africa: Ethiopia / Psychiatry in East Africa / Culture and the mental health of African refugees: Somali help seeking and healing / Culture and mental health in South Africa and neighbouring countries / Indigenous peoples of South America: inequalities in mental health care / Mental health and cultural psychiatry in Latin America / South Asian region / Mental health and cultural psychiatry in the United States and Canada / Culture and mental health in New Zealand: indigenous and non-indigenous people / The culture of deterrence: the mental health impact of Australia's asylum policies / Multicultural mental health in Australia / Aboriginal and Torres Strait Islander mental health / Hong Kong: development of psychiatric services / Cultural adaptation of cognitive therapy for Chinese peoples / Psychiatric services in China: Guangzhou / European perspectives on cultural psychiatry / Mental health and cultural psychiatry in the Caribbean / Understanding mental illness in the English-speaking Caribbean

**Readership:** Clinical psychiatrists, psychologists, researchers.

*Also of interest to:* occupational therapists, nursing staff, and primary care doctors.

## 'Overcoming' series

Developed in liaison with a wide range of experts, the 'overcoming' series adopts the established *Five Areas Assessment* model to assist readers in overcoming a variety of mental health disorders. The series uses self-help workbooks designed to empower and support readers to make changes to their lives in a constructive and achievable manner.

The 'Overcoming' series provides a clear model of intervention using the proven cognitive behaviour therapy (CBT) evidence-based approach; each book allows users to self-assess and manage their symptoms single-handedly or with support from a health care professional.

### Key features:

- Uses the trusted and successful cognitive behaviour therapy approach
- Written by accredited CBT practitioners with vast experience of the technique, as well as in their own specialist areas
- Jargon-free and clearly laid out, adopting the established and popular workbook format
- Approachable workbooks with boxes, checklists and bullet points, and memorable cartoon illustrations
- Free complementary website with downloadable material available at [www.livinglifetothefull.com](http://www.livinglifetothefull.com) and [www.fiveareas.com](http://www.fiveareas.com)

## Textbook of Clinical Neuropsychiatry

Second Edition

David P Moore, Associate Clinical Professor, Dept of Psychiatry, University of Louisville School of Medicine, Louisville, KY, USA

*"an impressive single-author publication ... I would recommend this text..."*

*Brain, about the previous edition*

This is an encyclopaedic, clinically orientated guide to the diagnosis, treatment and underlying pathology of neuropsychiatric conditions. Based on an exhaustive scan of the English-language literature in the fields of psychiatry and neurology, the second edition of this indispensable guide presents practitioners and students with all they need to know to diagnose and treat patients with neuropsychiatric disorders by illustrating the overlap between the two disciplines.

**Section one** covers methodological and diagnostic issues

**Section two** goes on to describe in detail every sign, symptom and potential diagnoses encountered in clinical practice

**Section three** presents essentially every neuropsychiatric disorder

**Key features:**

- **Comprehensive:** covering every neuropsychiatric symptom and syndrome
- **Authoritative:** based on an exhaustive scan of the neurology and psychiatry literature
- **Clear and logical:** information is presented in an easily accessible and understandable style

**Contents:** Part 1: Diagnostic assessment / Diagnostic assessment / Part 2: Signs, symptoms and syndromes / 'Cortical' signs and symptoms / Abnormal movements / Other signs and symptoms / Syndromes of cognitive impairment / Syndromes of disturbances of mood and affect / Part 3: Specific disorders / Neurodegenerative disorders / Congenital disorders / Vascular disorders / Trauma / Nutritional, toxic, and metabolic disorders / Infectious disorders / Prion diseases / Endocrinologic disorders / Immune-related disorders / Sleep disorders / Cerebral tumors and hydrocephalus / Idiopathic psychotic, mood, and anxiety disorders / Intoxications and withdrawals / Medication and substance-induced disorders

**Readership:** Psychiatrists and neurologists, also trainees in these subjects.

*Also of interest to:* psychopharmacologists, gerontologists and medical students.

## Atlas of Clinical Pediatric Nuclear Medicine

**Helen R Nadel**, Department of Radiology, Children's and Women's Health Centre of British Columbia, Vancouver, Canada

**Ignac Fogelman**, Professor, Department of Nuclear Medicine, Guy's Hospital, London UK

The first book to be dedicated to this specialty; this atlas contains extensive examples of all the cases in paediatric nuclear medicine that are likely to be encountered by those working in this field. A comprehensive and indispensable reference, this guide also includes a companion CD-ROM presenting dynamic images that are integral to nuclear medicine practice.

Organised by organ system, each includes an image of normal anatomy that is arranged by age for quick reference to anatomical variants. The various pathophysiological processes that might be encountered in children are then described, with appropriate examples to demonstrate the role of nuclear medicine in solving clinical problems.

#### Key features:

- Free CD-ROM with tomographic studies, which can not otherwise be represented, and are integral to nuclear medicine practice
- A comprehensive reference with dedicated sections on PET and bone densitometry
- Details both common and rare cases to help the reader avoid diagnostic pitfalls
- Full of handy hints and easily remembered tips pertinent to paediatric practice, making this an ideal teaching tool for all departments, even those where paediatric imaging is not a routine

**Readership:** Paediatric nuclear medicine specialists in higher training and in practice; all departments of paediatric nuclear medicine, general/clinical nuclear medicine and radiology where nuclear medicine is performed as part of the imaging service.

## Human Sectional Anatomy

Atlas of body sections, CT and MRI images

Third Edition

Harold Ellis, Professor and Clinical Anatomist, Applied Clinical Anatomy Group, Guy's Hospital, London, UK

Bari M Logan, Formerly University Prosector, Department of Anatomy, University of Cambridge and The Royal College of Surgeons of England, UK

Adrian Dixon, Professor and Fellow, Department of Radiology, University of Cambridge; and Honorary Consultant Radiologist, Addenbrookes Hospital, Cambridge, UK

**'The quality of the illustrations is excellent ... this atlas can be recommended unreservedly to both medical students and young clinicians...'**

*European Radiology, about the previous edition*

First published in 1991, *Human Sectional Anatomy* set new standards for the quality of cadaver sections and accompanying radiological images. Now in its third edition, this unsurpassed quality remains and is further enhanced by useful new material.

### Key features:

- Superbly photographed cadaver sections showing realistic colour
- Several new sections covering completely new pages of sagittal and coronal sections
- New, improved radiological images using the most up-to-date equipment
- Accompanying line diagrams redrawn to correlate exactly with the CT and MRI
- Comprehensive labelling updated with current terminology
- Invaluable additional notes giving extra detail on anatomical and radiological features
- **Illustrations:** 130 colour sections, 180 MRI and CT scans, 180 diagrams; plus view and orientation guides for all sections

**Contents:** Brain / Head / Head – Temporal bone / Inner ear / Neck / Thorax / Abdomen / Pelvis / Lower limb / Upper limb

**Readership:** Radiologists, radiographers, anatomists, medical students and those taking postgraduate qualifications in radiology, surgery and medicine.

## Musculoskeletal MRI

Asif Saifuddin, Consultant Radiologist, Royal National Orthopaedic Hospital Trust, Stanmore, Middlesex; and Honorary Senior Lecturer, Institute of Orthopaedics and Musculoskeletal Disorders, University College London

Covering the entire musculoskeletal system, and all conditions - both common and rare - *Musculoskeletal MRI* is an extensive yet accessible guide for use in the clinical setting. Heavily illustrated with high quality images, the information is presented in an easy to digest bullet-point format, providing the radiologist with all the information required to make an informed diagnosis.

The book is divided by body part and each chapter begins with a section on technical considerations. The body part is then subdivided into smaller areas, and descriptions and pictures of the normal anatomy are provided. These are each followed by a comprehensive, illustrated listing of the various pathologies for each area.

### Key features:

- Comprehensive and balanced content; even the rarest pathologies are described so the reader can find everything they want in this single volume
- High quality MRI images sized sensibly to allow the reader to clearly see the pathology
- Bulleted, list-style text provides the essential information at a glance
- Includes valuable detail on the normal anatomy and appearances, to give a reference point
- Authoritative and comprehensive with useful listings of differential diagnoses and meticulous referencing

**Contents:** The shoulder girdle / The elbow / The wrist and hand / The hip joint and pelvic girdle / The knee / The ankle and foot / The joints / The limbs / The spine

**Readership:** Consultant radiologists and trainee radiologists.

## Recently Published & New

### Clinical Tests of Respiratory Function

Third Edition

**G John Gibson**, Professor of Respiratory Medicine, University of Newcastle upon Tyne, UK

*"... authoritative, comprehensive, extensively referenced and – for a book on this topic – easy to read and understand"*

*Thorax, about the previous edition*

Established as a 'classic' in the field, the third edition of *Clinical Tests of Respiratory Function* presents an authoritative yet user-friendly account of this complex area, achieving a successful fusion of the basic principles of pulmonary physiology with applications in clinical practice across a wide range of disorders.

Written by a highly respected author with extensive experience, this new edition has been thoroughly revised to reflect new developments in our understanding of pulmonary physiology and technological advances in the equipment involved in investigation and treatment. The book is subdivided into two broad sections, with a concluding chapter of 'clinical cases':

**Part One** discusses the commonly used tests, their application and interpretation in the context of the underlying physiology.

**Part Two** considers clinical applications in pulmonary and non-pulmonary diseases

#### Key features:

- 'Clinical Cases' included to place learning into context and aid understanding
- Lucid descriptions aid a clear understanding of difficult physiological concepts
- Successfully bridges the gap between academic research and daily clinical practice
- Highly illustrated and enhanced by the introduction of a second colour

**Contents:** Part 1: Tests: Theory and Practice / Tests of mechanical ventilation and associated equipment / Tests of gas exchange function / Acidbase balance / Tests of ventilatory control / Measurements during sleep / Assessment of breathlessness / Exercise tests / Normal variation / Part 2: Clinical Application / Airway diseases / Alveolar diseases / Pulmonary vascular diseases / Diseases of the pleural and chest wall / Neuromuscular diseases / Sleep apnoea syndromes / Cardiac disease / Blood disorders / Renal diseases / Hepatic and bowel disease / Metabolic and endocrine disorders / Rheumatic and connective tissue disorders / Function of the transplanted lung / Psychogenic dyspnoea / Clinical aspects of respiratory function tests / Case examples

**Readership:** Respiratory physicians in training and in practice, and respiratory physiologists.

*Also of interest to:* other hospital physicians requiring a reference to this area, including cardiologists, neurologists, haematologists, nephrologists, gastroenterologists and laboratory investigators.

978 0 340 92561 4 • November 2008 • 432 pp • HB • 185 illus • £79.00

### Clinical Tuberculosis

Fourth Edition

**Peter D Davies**, Director, The Cardiothoracic Centre, Liverpool, UK

**Peter Barnes**, Professor of Medicine, Microbiology and Immunology, The University of Texas Health Center at Tyler, Tyler, TX, USA

**Stephen B Gordon**, Liverpool School of Tropical Medicine, Liverpool, UK

*"as an up-to-date, authoritative, comprehensive, and fully referenced account of tuberculosis, this book is unrivalled"*

*The Lancet, about the second edition*

This established, indispensable resource provides a comprehensive account of tuberculosis; fully updated with authoritative information on all aspects of the disease.

Written by a truly international team of editors, the fourth edition of this reference gives practical guidance to health professionals who may be involved in any aspect of patient management or disease control, including chapters on epidemiology, pathology, immunology, disease presentation, diagnosis, treatment and management options.

Specific consideration is given to the problems of TB associated with HIV infection, and issues of control relating to low and high prevalence countries, respectively. The ongoing issues surrounding the BCG vaccination and preventive therapy are also covered, as are the increasing problems of multi-drug resistant strains and environmental opportunist mycobacteria.

#### Key features:

- With a foreword by Archbishop Desmond Tutu
- Truly global with an international editorial team
- Fully revised and updated, with an emphasis on clinical relevance to aid learning
- Combines an historical and descriptive focus with fully up to date diagnostic and therapeutic information
- Integrated coverage of the basic science aspects of the disease and its treatment

**Contents:** Part 1: Background / History from earliest times to the development of drugs / Epidemiology / Part 2: Pathology and immunology / Genotyping and its implications for transmission dynamics and tuberculosis control / Diagnosis of tuberculosis / Immunodiagnostic tests / Histopathology / Human immune response to tuberculosis / Part 3: Clinical aspects / Respiratory tuberculosis / Non-respiratory tuberculosis / Tuberculosis in childhood / Part 4: Treatment / Clinical pharmacology / Chemotherapy including drug resistant therapy and new-future developments / New developments in treatment. / Standards of care in tuberculosis / The surgical management of tuberculosis and its complications. / Directly observed therapy and other aspects of management. / Part 5: Tuberculosis in special situations / HIV and TB in the developing world / HIV and TB in industrialised countries / Tuberculosis and migration / Part 6: Prevention / Preventive therapy / Clinical interpretation of tests for latent tuberculosis infection. / BCG vaccination / Part 7: Control / Control in low prevalence countries / Control in high prevalence countries / Patient Holding / Global plan for tuberculosis control 2006-2015. / Part 8: Related aspects. / Environmental mycobacteria / Tuberculosis in animals / Part 9: Conclusions

**Readership:** Respiratory physicians, infectious disease specialists.

*Also of interest to:* nurses, public health specialists.

978 0 340 94840 8 • May 2008 • 512 pp • HB • 130 illus • £130.00

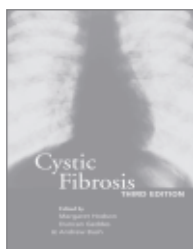

## Cystic Fibrosis

Third Edition

**Margaret Hodson**, Professor of Respiratory Medicine and Consultant Physician, Department of Cystic Fibrosis

**Duncan Geddes**, Professor of Respiratory Medicine and Consultant Physician

**Andrew Bush**, Professor of Paediatric Respiriology - all at the Royal Brompton & Harefield NHS Trust, London, UK

**'Anyone who cares for patients with cystic fibrosis or is researching this condition need this book on their shelf'**

*Hospital Medicine, about the previous edition*

Established as a leading reference in the field, *Cystic Fibrosis* evaluates in detail the basic science that underlies the disease and its progression, putting it into a clinical context. Thoroughly revised and updated throughout, it reflects the significant advances that have been made in the field since the second edition published in 2000.

### Key features:

- **International and authoritative:** this leading reference integrates current knowledge and significant advances into a single, readable volume
- **User-friendly:** divided into accessible sections reflecting the multi-disciplinary nature of the cystic fibrosis care team
- **Comprehensive:** covers management in the hospital and at home
- **Updated:** new section on monitoring discusses the use of databases to improve patient care, and covers monitoring in different age groups, exercise testing and the outcomes of clinical trials in these areas
- **Expanded:** coverage of clinical areas, including chapters covering sleep, lung mechanics and the work of breathing, upper airway disease, insulin deficiency and diabetes, bone disease, and sexual and reproductive issues

**Contents:** Part 1: Introduction: What is cystic fibrosis? / Part 2: Basic science for the clinician / Part 3: Diagnostic aspects of cystic fibrosis / Part 4: Clinical aspects of cystic fibrosis / Part 5: Monitoring / Part 6: Multidisciplinary care / Part 7: Cystic fibrosis: The future

**Readership:** Respiratory physicians, paediatricians and other general physicians involved in the care of CF patients.

*Also of interest to:* specialist nurses, physiotherapists and occupational therapists.

978 0 340 90758 0 • 2007 • 512 pp • HB • 220 illus • £99.00

## Drug-Induced & Iatrogenic Lung Disease

**Philippe Camus**, University Medical Centre, Le Bocage and Medical School, Université de Bourgogne, Dijon, France

**Edward C Rosenow III**, Mayo Clinic, Rochester, MN, USA

Written by a strong international team of experts, this unique reference provides the definitive account of drug-induced and iatrogenic lung disease.

A wide variety of pulmonary disorders can arise as side-effects to drugs prescribed for non-respiratory disorders, or to which the body has been accidentally exposed; this book fully explores these issues as well as adverse effects arising from other substances to which the body has accidentally been exposed, and adverse effects arising from intentional drug abuse.

- Truly global contributor list ensuring this text is the authoritative reference
- The first comprehensive book on drug-induced and iatrogenic lung diseases

**Contents:** Introduction / Drug-induced respiratory disease: classification, diagnosis, and management / Mechanisms in respiratory toxicology / Chest imaging of drug-induced respiratory disease / Chest imaging of illicit drug-induced respiratory disease / Bronchoalveolar lavage in drug-induced lung disease / Pathology of drug-induced respiratory disease / Part 1: Drug-Induced respiratory emergencies / Drug-induced allergy / Drug-induced acute upper airway obstruction / Drug-induced severe bronchospasm / Drug-induced pulmonary edema/ARDS / Pulmonary complications of blood transfusions / Drug-induced alveolar hemorrhage / Respiratory complications resulting from the use of illicit drugs and substances / Iatrogenic tracheobronchial and chest injury / Part 2: Oncology and allied conditions / Pulmonary reactions due to chemotherapeutic agents: the "chemotherapy lung" / Pulmonary reactions due to novel chemotherapeutic agents and biomolecules / Radiation-induced thoracic involvement / Pulmonary complications of bone marrow and stem cell transplantation / Pulmonary complications of solid organ (including lung) transplantation / Drug-induced pulmonary infection / Therapy-induced neoplasms / Part 3: Nononcologic conditions / Drug-induced pneumonitis induced by noncytotoxic agents / Amiodarone pulmonary toxicity / Drug-induced eosinophilic pneumonia / Drug-induced organizing pneumonia / Drug-induced cough / Drug-induced pleural involvement / Drug-induced lupus erythematosus syndrome / Drug-induced vasculitis and systemic illnesses with possible pulmonary involvement / Drug-induced pulmonary hypertension / Respiratory involvement from herbals

**Readership:** Respiratory physicians and pharmacologists.

978 0 340 80973 0 • August 2008 • 256 pp • HB • £95.00

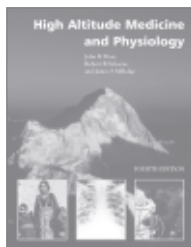

## High Altitude Medicine and Physiology

Fourth Edition

**John B West**, Professor of Medicine & Physiology, The School of Medicine, University of California, San Diego, USA

**Robert B Schoene**, Clinical Professor of Medicine, The School of Medicine, University of California, San Diego, USA

**James S Milledge**, Formerly Consultant Respiratory Physician and Medical Director, Northwick Park Hospital, Harrow, UK

**'... must be regarded as the definitive textbook of high-altitude medicine'**

*Wilderness & Environmental Medicine, about the previous edition*

This authoritative text has been fully updated to include major changes in the scientific content, with increased coverage of genetics and advances in molecular biology and medicine. Authored by a team of experienced mountaineering physicians, internationally known and highly respected, this book will help physicians continue to improve the health and safety of all people who visit, live or work in the cold, thin air of high mountains. Summary boxes and increased tabulation are both new features for this fourth edition, helping to highlight important concepts and aid rapid reference.

### Key features:

- **Authoritative and global:** written by three highly regarded physicians in the field
- **Comprehensive and updated:** includes significant updates to scientific content with new and improved sections throughout, whilst retaining the key information from the previous editions
- **User-friendly and easily navigable:** thanks to introductory summaries and key concept boxes for easy reference

**Contents:** History / The atmosphere / Geography and the human response to altitude / Altitude acclimatization and deterioration / Ventilatory response to hypoxia and carbon dioxide / Pulmonary gas exchange / Cardiovascular system / Hematology / Blood—gas transport and acid—base balance / Peripheral tissues / Exercise / Limiting factors at extreme altitude / Sleep / Nutrition, metabolism and intestinal function / Endocrine and renal systems at altitude / Central nervous system / High altitude populations / Acute mountain sickness / High altitude cerebral edema / High altitude pulmonary edema / Chronic mountain sickness and high altitude pulmonary hypertension / Other altitude-related conditions: neurovascular disorders, eye conditions, altitude cough, anesthesia at altitude / The physiology and pathology of heat and cold / Pre-existing medical conditions at altitude / Women at altitude / Extremes of age at altitude: Children and the elderly / Commuting to high altitude for commercial and other activities / Athletes and altitude / Clinical lessons from high altitude / Practicalities of field studies

**Readership:** Physicians specialising in illness and accidents at altitude including those accompanying expeditions; doctors advising patients on fitness to travel to altitude; physiologists specialising in oxygen dependence and the adaptation of the body to altitude.

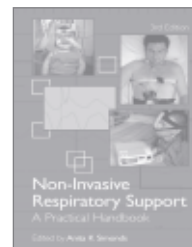

978 0 340 91344 4 • 2007 • 480 pp • HB • 205 illus • £79.00

## Non-Invasive Respiratory Support

A Practical Handbook

Third Edition

**Anita K Simonds**, Consultant in Respiratory Medicine, Sleep and Ventilation Unit, Royal Brompton and Harefield NHS Trust, London, UK

**'... an excellent overview of the subject, well referenced and supported with good illustrations ... highly recommended'**

*Thorax, about the previous edition*

- Accessible and user-friendly
- Restructured; increased use of algorithms and flow charts for rapid reference
- Presents issues particular to the use of NIV in different hospital settings, including the ICU, HDU, emergency department and during patient transfer
- Considers long-term NIV in the home and in palliation, including the practicalities associated with patient discharge
- Compares and contrasts the roles of negative pressure ventilation, tracheostomy ventilation and nasal intermittent positive pressure ventilation
- Provides in-depth coverage of the use of nasal continuous positive airway pressure in sleep disordered breathing in adults and children

**Contents:** Overview of indications for non-invasive respiratory support / Equipment for non-invasive ventilation: Ventilators, interfaces and accessories / Setting up a non-invasive ventilation service / Non-invasive ventilation in acute exacerbations of chronic obstructive pulmonary disease / Continuous positive airway pressure and non-invasive ventilation in acute hypoxaemic respiratory failure / Acute non-invasive ventilation in neuromuscular disease, chest wall disorders and cystic fibrosis and bronchiectasis / Starting non-invasive ventilation: Practical aspects / Cough assistance and physiotherapy aspects of the patient requiring non-invasive positive pressure ventilation / Problem-solving in acute non-invasive ventilation / Non-invasive ventilation and post-extubation respiratory failure / Weaning using non-invasive ventilation / Non-invasive ventilation in the emergency department, for transferring patients and during intercurrent procedures / Assessment and selection of patients for home ventilation / Domiciliary non-invasive ventilation in restrictive disorders and stable neuromuscular disease / Home ventilation in progressive disorders, quadriplegia and palliative non-invasive ventilation / Noninvasive ventilation in chronic obstructive pulmonary disease / Home ventilation in cystic fibrosis, bronchiectasis and diffuse interstitial lung disease / Discharging the ventilator-dependent patient and the home ventilatory care network / Problem-solving and transitions in long-term non-invasive ventilation / Non-invasive ventilation in acute respiratory failure in children / Home ventilation in children / Continuous positive airway pressure therapy for sleep disordered breathing in adults / Continuous positive airway pressure for sleep disordered breathing in children / Organization of long-term ventilation in Europe / Ethical and medico-legal aspects of assisted ventilation

**Readership:** Respiratory physicians; intensivists and anaesthetists in training and in practice; specialist nurses allied to these areas.

*Also of interest to:* emergency medicine personnel, other nursing staff, physiotherapists and medical technicians working in this area.

978 0 340 92560 7 • 2007 • 368 pp • PB • 95 illus • £34.99

## Textbook of Pleural Diseases

Second Edition

**Richard W Light**, Professor of Medicine, Vanderbilt University, Nashville, TN, USA

**YC Gary Lee**, Consultant Physician & Senior Lecturer, Osler Chest Unit, Churchill Hospital, Oxford, UK

This internationally respected and authoritative work is an updated and expanded edition of the most comprehensive reference title on pleural diseases. Written in an accessible and uniform style with sufficient clarity so as to be understood by clinicians with only a limited science background, *Textbook of Pleural Diseases* provides in-depth coverage of all aspects of pleural conditions. With detailed sections on basic science and clinical aspects, each chapter concludes with a summary of key points to highlight practical messages regarding patient management.

### Key features:

- **Comprehensive:** covering both the basic science and the clinical aspects of pleural disease with meticulous referencing
- **Global:** written by an international authorship, with highly respected editors from both the UK and USA
- **User-friendly:** highlighting key patient management issues in concise and memorable bulleted lists
- **Highly illustrated:** histological images are presented in full colour to aid understanding

**Contents:** Pleural Disease: Historic Perspective / Part 1: Basic science / Anatomy of the Pleura / Mesothelial cells / Normal physiologic fluid and cellular contents / Physiology: Fluid and solute exchange in normal physiological states / Physiology: Changes with pleural effusion and pneumothorax / Pleural Inflammation and Infection / Immunology / Pleural Fibrosis / Pleural Reaction to Mineral Dusts / Genetics of Malignant Mesothelioma / Proteomics in Pleural Disease / Pleural Pharmacokinetics / Experimental Models: Pleural disease other than mesothelioma / Experimental Models: Mesothelioma / Part 2: Clinical science / Approach to patients with pleural diseases / Pleural fluid analysis / Pleural Manometry / Radiology / Effusions / Asbestos-related diseases / Pneumothorax / Pediatric considerations / Intervention procedures / Conclusion

**Readership:** Pulmonologists and researchers (both clinical and non-clinical) with an interest in the pleura.

*Also of interest to:* trainees in respiratory medicine.

## Respiratory Emergencies

Alan M Fein, Stephan Kamholz, David Ost

An international authoritative 'one stop shop' covering all aspects of respiratory emergencies, helping the practising clinician to recognise both common and unusual causes of respiratory distress in a patient. This comprehensive reference offers practical solutions to aid rapid diagnosis and concentrates on current treatment approaches with a sound evidence base, while integrating current understanding of molecular biology and pathophysiology into clinical practice and patient care. To enhance this 'bench to bedside' approach, authors illustrate their material with helpful management algorithms, and each chapter will conclude with a summary of key points.

978 0 340 81195 5 • 2006 • £129.00

## Respiratory Genetics

Edwin K Silverman, Steven D Shapiro, David A Lomas, Scott T Weiss

978 0 340 81432 1 • 2005 • £129.00

★ Highly commended in the Respiratory Medicine category of the 2006 BMA Medical Book Competition

## Respiratory Infections

Antoni Torres, Santiago Ewig, Lionel Mandell, Mark Woodhead

An authoritative and international reference, *Respiratory Infections* brings together current knowledge in the field of respiratory infection, organised by presentation rather than causative organism. Each chapter concludes with a summary highlighting practical 'take-home' messages regarding patient management for the reader and is highly illustrated, including colour plates where appropriate.

- Organised by disease presentation rather than causative organism, a feature unique to this volume and which has met with the approval of the reviewers
- Comprehensive and authoritative, with contributions from the world's leading experts in the field
- Includes practical take-home messages regarding patient management, making the book much more useful in the clinical setting than a standard reference work
- Highly illustrated, including colour where appropriate

978 0 340 81694 3 • 2006 • £129.00

## Thoracoscopy for Physicians

A practical guide

D R Buchanan, E Neville

## Surgery

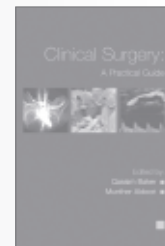

### Recently Published & New

## Clinical Surgery

A Practical Guide

**Qassim Baker**, General and Breast Surgeon, Tameside General Hospital, UK; previously Consultant Surgeon, Baghdad Teaching Hospital and Assistant Professor, Dept. of Surgery, Baghdad College of Medicine and Examiner in Surgery for Iraqi Committee for Medical Specializations

**Munther Aldoori**, Consultant General and Vascular Surgeon, Huddersfield Royal Infirmary; Senior Clinical Lecturer, University of Leeds; Examiner for MRCS and FRCS

Authoritative and concise, this handbook provides expert guidance on **all** aspects of clinical surgery encountered during day-to-day work. Written by a team of expert surgeons, some of whom are also examiners for the Royal College of Surgeons, this guide provides useful advice on how to deal with specific surgical problems, such as respiratory failure, wound healing, MRSA infection, tropical surgery and acute ischaemia. Comprehensive in content and including high quality images, the book also looks at more general topics such as clinical examination, pre-operative, peri-operative and post-operative care, amongst others, with further chapters that provide invaluable information on topics including nutrition, anaesthesia, sutures and surgical incisions.

### Key features:

- A concise handbook with an easy-to-read layout, designed for rapid reference in the clinical environment
- Written by senior specialists in a variety of surgical areas, providing invaluable guidance on each subject
- Several of the authors have links to the Royal College of Surgeons, either as examiners or as trainers
- Exceptional quality of images used to demonstrate features of clinical importance

**Contents:** Preoperative care / Perioperative care / Postoperative care / Management of acute renal failure in surgical patients / Enteral and parenteral nutrition and management of intestinal fistulae / Haematological issues / Management of severely injured patients / Respiratory failure and its prevention / Cardiovascular monitoring and support / Wound healing, inflammation and sepsis / Prophylactic antibiotics and MRSA infection / Hepatitis and HIV in surgical patients / Surgical jaundice / Upper GI bleeding and Lower GI bleeding / Medical therapy of surgical patients / Anaesthesia / Management of acute abdomen / Management of abdominal trauma / Acute ischaemia of the lower limb and diabetic foot / Special problems in the surgical management of elderly patients / Principles of surgical oncology / Sutures, surgical incisions and surgical anastomoses / Laparoscopic surgery / Tropical surgery / Day surgery / Surgery for the obese

**Readership:** Foundation level doctors on surgical rotation and MRCS level trainees.

## Manual of Definitive Surgical Trauma Care

Second Edition

**Kenneth Boffard**, Professor and Clinical Head,  
Department of Surgery, Johannesburg Hospital and  
University of the Witwatersrand, South Africa

Written by the editorial board of the DSTCTM course and developed for the International Association for Trauma Surgery and Intensive Care (IATSIC), the new edition of *Manual of Definitive Surgical Trauma Care* has been updated to incorporate all recent developments in this rapidly progressing area. It covers every aspect of surgical trauma care, including the causation of injuries; the decision-making process; the resources required; and the limitations in providing specialist expertise in the time frame required.

### Key features:

- Based on an internationally-run course that is widely respected – DSTCTM
- Provides clear access to all the necessary information, from theory of injury and surgical decision-making through to individual organ system injury, trauma systems and injury scoring
- Contains hints and highlights the pitfalls dealing with major trauma
- Acts as a resource pool for dealing with injury

**Contents:** Part 1: Introduction / Part 2: Physiology and metabolism / Part 3: Decision-making / Part 4: Specific organ injury / Part 5: Additional (optional) modules / Part 6: Appendices

**Readership:** Foundation level doctors on surgical rotation and MRCS level trainees.

978 0 340 94764 7 • 2007 • 240 pp • PB • 30 illus • £38.99

## Operative Surgical Procedures

DVD & Handbook

**Mo S Baguneid**, Consultant Surgeon, Manchester Royal Infirmary, Manchester, UK

**James Hill**, Consultant Surgeon, Manchester Royal Infirmary, Manchester, UK

**Malcolm G Walker**, Professor of Surgery, Manchester Royal Infirmary, Manchester, UK

This unique resource provides a step-by-step guide to the key operative procedures in general surgery, using a fully integrated DVD-ROM and complementary handbook.

The DVD-ROM consists of short clips of clear, consistently filmed video, labelled diagrams and concise text, all of which are structured to reflect the core competencies required for surgical trainees; while the handbook supports the disc by providing backup notes and operative checklists. The operations are easily viewed singly or as a sequence, and have been broken down into a step-by-step guide to provide the trainee with exact material they need, and no more.

### Key features:

- An audio-visual product of extremely high quality, providing the trainee with exactly what they need in terms of meeting their core competencies
- Supported by a concise complementary handbook, ideal for revision and quick reference
- Each surgical procedure can be viewed as single items or in sequence, at a pace suitable for the user
- Each operation is broken down into key steps showing only the relevant information to avoid superfluous footage

**Contents:** CORE / Knot tying / Laparotomy / Vascular anastomosis / Bowel anastomosis / ELECTIVE / Laparoscopy / Hernia / Skin lesion / Subcut lesion / Lymph node / Ingrowing toenail / Splenectomy / Pilonidal / Haemorrhoid / Internal sphincterectomy / Fistula-in-ano / Colectomy / Stoma / Thyroid lobectomy / Parathyroidectomy / Adrenalectomy / Gastro-jejunostomy / Cardio-oesophagectomy / Cholecystectomy / Feeding jejunostomy / Cystgastrostomy / Whipples / Liver resection / Laparoscopic Nissen / Veins / Carotid endarterectomy / AAA repair / ABG / Femero-popliteal bypass / Angioplasty / EVAR / Thorascopic sympathectomy / First rib resection / Fem-fem / Orchidectomy / Vasectomy / Circumcision / Hydrocele repair / Wide local breast excision / Mastectomy / Axillary nodes / LD flap / Tram flap / Breast implant / Carpal tunnel syndrome / Trigger finger release / Arthroscopy / Hip replacement / Total knee replacement / Renal transplant / Creation of AV fistula / Insertion of Tenckhoff / EMERGENCY / Femoral hernia repair (High) / Central line / Arterial line / Chest drain / Tracheostomy / Perianal abscess / Pilonidal abscess / Hartmans procedure / Ruptured AAA / Femoral embolectomy / Amputation / Suprapubic catheter / Scrotal exploration / DHS / Hemiarthroplasty / Open cholecystectomy / Perforated DU / Bleeding DU

**Readership:** MRCS candidates; trainee surgeons in general, including foundation doctors

978 0 340 90614 9 • September 2008 • 160 pp

DVD-ROM

## Paediatric Orthopaedics

A System of Decision-making

**Benjamin Joseph**, Professor of Orthopaedics, Kasturba Medical College, Manipal, Karnataka, India

**Selvadurai Nayagam**, Consultant Orthopaedic Surgeon, Royal Liverpool Hospital, Alder Hey, Liverpool, UK

**Randall T Loder**, Professor of Orthopaedic Surgery, and Director of Paediatric Orthopaedics, University of Indiana, Indianapolis, USA

**Ian Torode**, Professor of Orthopaedic Surgery, Royal Children's Hospital, Melbourne, Australia Chairman, Paediatric Orthopaedic Section, Asia Pacific Orthopaedic Association

**Leo Donnan**, Director of Orthopaedics, Royal Children's Hospital, Melbourne, Australia

Authored by a global team of experts, *Paediatric Orthopaedics* is an incomparable reference allowing trainee orthopaedic surgeons to make informed decisions during their Paediatric Orthopaedic rotation. This book equips the reader to speak confidently about the approach to individual patients during their specialty exams and adopts a detailed practical insight into available treatments and a strategy for determining which treatment to follow in particular circumstances.

### Key features:

- Adopts a systematic approach to each topic guiding the clinician to make educated decisions
- Emphasis on treatment, using evidence-based decision-making to prepare the reader for the clinical setting
- Authoritative reference - written by a group of four internationally practising authors
- Extensively illustrated in two colour, with radiographs and explanatory line drawings

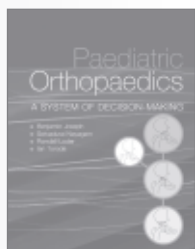

### Contents

Part 1: Deformities / General principles / Foot / Leg / Knee / Hip / Spine / Upper limb / Part 2: Dislocations / Knee / Hip / Shoulder / Elbow / Spine / Part 3: Deficiencies / Leg / Thigh / Forearm / Hand / Part 4: Discrepancies of limb length / General principles / Lower limb / Upper limb / Part 5: Decreased Joint Mobility / General principles / Upper limb / Lower limb / Epiphyseal problems / Part 6: Paralysis / General principles / Foot and ankle / Knee / Hip / Elbow / Shoulder

**Readership:** Trainees in orthopaedic surgery, especially those taking FRCS HST exams and equivalent.

*Also of interest to:* Consultants in orthopaedic surgery who include paediatric work in their practice.

978 0 340 88945 9 • August 2008 • 560 pp • HB • 500 illus • £99.00

## Trauma Care Manual

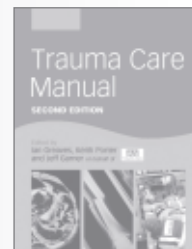

Second Edition

**Ian Greaves**, Visiting Professor in Emergency Medicine University of Teesside; Consultant in Emergency Medicine

**James Cook**, University Hospital, Teesside; and Lieutenant Colonel, Royal Army Medical Corps

**Keith Porter**, Chairman of Trauma Care. Consultant Orthopaedic Surgeon, Selly Oak Hospital, Birmingham

**Jeff Garner**, Specialist Registrar in General Surgery in the Defence Medical Services, UK

### "Definitely a worthwhile manual"

*Accident & Emergency Nursing, about the previous edition*

The second edition of this highly reputable manual benefits from an increase in illustrative material, and is further enhanced by the addition of at least one case study for every topic in the book. It continues to offer clear and practical guidelines for the management of victims of major trauma, reflecting the current practice within Europe.

'Objectives' and 'summary' boxes ensure a user-friendly and systematic approach to learning and are supplemented by key points, which are highlighted throughout the text for ease of scanning. Furthermore, new to this edition are 'global perspectives' boxes at the end of each chapter, which emphasise techniques and practices from around the world. Written by members of Trauma Care and invited experts, the Trauma Care Manual offers a nationally accepted set of standards for good practice which provide a benchmark for all those involved in the care of the trauma patient.

### Key features:

- Truly authoritative, authored by a team of experts and members of Trauma Care
- At least one case study per chapter, making the book more relevant to real life
- Many pedagogic features make this an invaluable learning tool - objectives, summaries, key points
- Increased illustrative material and a two-colour design to enhance the appearance and reinforce the 'textbook' feel
- Fully updated, including new chapters on Trauma in the Elderly and Organ and Tissue Donation and Transplantation

**Contents:** The trauma epidemic / Mechanism of injury / Patient assessment / Airway management / Thoracic trauma / Shock / Abdominal trauma / Head injuries / Musculoskeletal trauma / Spinal injuries / Ophthalmic injury / Maxillofacial injuries / Injuries in children / Trauma in women / Trauma in the elderly / Injuries due to burns and cold / Blast injuries / Gunshot injuries / Psychological reactions to trauma / Analgesia and anaesthesia for the trauma patient / Trauma intensive care / Patient transfer / Triage / Trauma scoring

**Readership:** Pre-hospital healthcare workers, emergency physicians, anaesthetists, intensivists, both in training and in practice.

*Also of interest to:* trauma surgeons, military doctors, paramedics, trauma nurses.

978 0 340 92826 4 • August 2008 • 336 pp • PB • 50 illus • £34.99

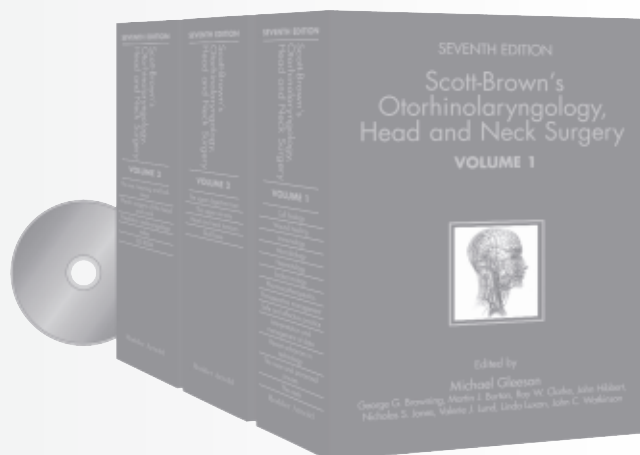

# Scott-Brown's Otorhinolaryngology, Head and Neck Surgery

3-volume set + CD-ROM  
Seventh Edition

Used the world over as the definitive reference, this book provides detailed, reliable and authoritative information on all aspects of ear, nose and throat disease and treatment. This seventh edition is presented in a three-volume set and is accompanied by a fully searchable CD-ROM.

Fully revised and updated by a new international team of editors, the majority of the chapters are evidence-based and each contains useful features including key points, best clinical practice guidelines, details of the search strategies used to prepare the material, and suggestions for future research.

## Key features:

- Internationally acclaimed, comprehensive reference covering **all** aspects of ENT, head and neck surgery
- CD-ROM, containing the same content as the print edition, with references linked to PubMed provides quick and easy access to supplementary information about clinical conditions
- Evidence-based approach drawing on practical scenarios to place learning into context
- Easily navigable with accessible features and colour illustrations to aid the understanding of complex points
- Additional supporting web resource for further reference: [www.scottbrownENT.com](http://www.scottbrownENT.com)

**Contents:** Part 1: Cell biology / Part 2: Wound healing / Part 3: Immunology / Part 4: Microbiology / Part 5: Haematology / Part 6: Endocrinology / Part 7: Pharmacotherapeutics / Part 8: Perioperative management / Part 9: Safe and effective practice / Part 10: Interpretation and management of data / Part 11: Recent advances in technology / Part 12: The nose and paranasal sinuses / Part 13: The neck / Part 14: The upper digestive tract / Part 15: The upper airway / Part 16: Head and neck tumours / Part 17: Skull base / Part 18: The ear, hearing and balance / Part 19: Plastic surgery of the head and neck / Part 20: Paediatric otorhinolaryngology

## About the Editors

**Michael J Gleeson**, Professor of Otolaryngology and Skull Base Surgery at the Institute of Neurology in University College London and Honorary Consultant Skull Base Surgeon to the Great Ormond Street Hospital, London, UK

**George G Browning**, Professor of Otorhinolaryngology at the MRC Institute of Hearing Research, Glasgow, UK

**Martin J Burton**, Consultant Otolaryngologist at The Radcliffe Infirmary, Oxford, and Honorary Senior Clinical Lecturer at the University of Oxford, Oxford, UK

**Ray W Clarke**, ENT consultant at Royal Liverpool Children's Hospital, Alder Hey, Liverpool, UK

**John Hibbert**, Formerly at the Department of Otolaryngology, Guy's Hospital, London, UK

**Nicholas S Jones**, Professor in the Department of Otolaryngology, Queen's Medical Centre, Nottingham, UK

**Valerie J Lund**, Professor in Rhinology and Honorary Consultant ENT Surgeon at the Royal Free and University College Medical School, University College London and the Institute of Laryngology and Otolaryngology, London, UK

**Linda M Luxon**, Professor in the Department of Neuro-otology, National Hospital for Neurology and Neurosurgery, London, UK

**John C Watkinson**, Consultant Head and Neck and Thyroid Surgeon, Queen Elizabeth Hospital, Birmingham, UK

**Readership:** Trainee ENT surgeons, audiologists and trainee head and neck surgeons.

## Praise for the sixth edition:

*"...this book is a comprehensive source of information, and obligatory for all trainees in the specialty of otolaryngology."*

*Australian Journal of Oto-Laryngology*

*"Regarded by some as the British bible of otolaryngology, this [book] proves to be an authoritative work, serving as a textbook, reference and atlas."*

## Bailey & Love's Short Practice of Surgery

Twenty-Fourth Edition

**R C G Russell**, Consultant Surgeon at the Middlesex Hospital, London, UK

**Norman S Williams**, Professor of Surgery and Centre Lead, Centre for Academic Surgery at Barts and The London, Queen Mary's School of Medicine and Dentistry, London, UK

**Christopher J K Bulstrode**, Professor and Honorary Consultant Orthopaedic Surgeon, Nuffield Department of Orthopaedic Surgery, University of Oxford, UK

**“Seventy years on from its first edition, Bailey & Love's Short Practice of Surgery goes from strength to strength. This 24th edition is compiled by over 80 experts in their field, is well laid out and a pleasure to read. It is comprehensive and highly relevant, combining the basic principles of surgery with the latest developments.”**

*Surgeons News*

With lifetime sales in excess of one million copies, *Bailey & Love's Short Practice of Surgery* remains one of the world's pre-eminent medical textbooks, beloved by generations of surgeons.

For the twenty-fourth edition, the book's traditional strengths are combined with complete revision and updating; it emphasises effective clinical examination and soundly based surgical principles while taking account of the latest development in surgical practice.

### Key features:

- The editors and contributing authors of international repute are also recognised for their skills in teaching and communication
- The underlying principles of surgical care are brought together at the start of the book
- Chapter extents have been adjusted to reflect relative balance between surgical specialties
- Pedagogic features: learning objectives are listed at the beginning of every chapter, key information boxes are included to add to the core material, as well as chapter summaries
- Extensive 4-colour illustration reinforces clinical messages
- All historical and biographical footnotes reviewed, expanded and updated, with many additions

**Readership:** Undergraduate and postgraduate surgical examinations.

*Also of interest to:* practising surgeons.
