CENTERFORCE® PRODUCTS

Centerforce® offers multi-level product lines allowing customers to choose a performance clutch that matches their application and driving style. All Centerforce clutch assemblies are designed as improved OE-style, direct bolt-in replacements, delivering maximum performance with modern non-asbestos materials. The unique Centerforce design allows for easy pedal effort and everyday drivability, while offering increased holding capacity for maximum performance. Centerforce engineers evaluate each assembly and apply our patented processes to increase the clutches holding-capacity and performance.

CENTERFORCE® I

The Centerforce® I is designed as a high-quality entry-level performance clutch for those in need of a superior stock replacement. Using the patented Centerforce centrifugal weights (where applicable) and premium, non-asbestos facings; the Centerforce Stage 1 clutch system is perfect for applications with stock engines or mild power increases from minor bolt-on modifications.

CENTERFORCE® II

The Centerforce® II system utilizes a full facing-disc with premium non-asbestos materials and a pressure plate with patented centrifugal weights (where applicable). Static clamp load is increased via our patented machining processes. This combination allows superb holding power and maximum clutch life, making this the ideal performance upgrade for selected street/strip, off-road and towing applications.

CENTERFORCE DUAL FRICTION®

The Centerforce Dual Friction® pressure plates feature our patented processes to provide a performance clutch that offers exceptional street characteristics, while offering outstanding holding-capacity and durability. The Dual-Friction disc relies on a balance of premium non-asbestos materials with a full facing on the pressure plate side for drivability and longevity, and a carbon composite puc style (segmented) facing is on the flywheel side for a positive engagement and increased holding-capacity. The Dual Friction line is the ultimate choice for street/strip holding power and performance without sacrificing pedal effort and driver control.

LMC™ SERIES (Light Metal Clutch)

The Centerforce® LMC™ Series is a specifically designed low inertia performance clutch that dramatically reduces engine rotating mass. These lightweight, SFI approved competition clutches are intended with most road racing and circle track applications in mind. Centerforce machines these special pressure plates from high-strength aircraft-grade billet aluminum and then attach a special heat-treated replaceable friction surface. The Centerforce LMC series friction disc utilizes a dual-segmented carbon lining for improved cooling and excellent torque capacity. This new series of Light Metal Clutch assemblies from Centerforce uses their patented 'Ball Bearing' actuated diaphragm and centrifugal weight system for maximum grip while maintaining a comfortable and controllable clutch pedal. When used in conjunction with Centerforce's aluminum flywheels, LMC Series brings the term 'Light Weight' to an unparalleled level!

DFX® SERIES

The DFX® line is the latest series of performance clutches from Centerforce. DFX is Centerforce's competition-proven clutch package for select import and domestic applications. The DFX series is engineered for competition standards of quality and craftsmanship. The DFX series is aimed at high-end applications that continually demand increased integrity and holding-capacity. DFX scores big, not only with holding-capacity and strength, but also provides some of the best drivability from a race-inspired clutch. DFX uses sprung hub style discs with high performance cerametallic friction materials and Centerforce's patented ball bearing actuated diaphragm for better holding capacity, easy pedal effort, and smooth engagements. The Centerforce DFX performance clutch system is SFI approved for competition with Nodular Iron pressure plate rings and reinforcements designed to help prevent drive strap breakage and safety.

CENTERFORCE® FLYWHEELS

Centerforce® manufactures the best in SFI approved performance flywheels by using high-strength billets, not castings. Centerforce flywheel part numbers with a "700" prefix are made from billet steel and match closely to the original equipment flywheel weight. Centerforce "800" and "900" flywheel part number prefixes designate specially made flywheels from aircraft grade billet aluminum for light weight (low inertia). Centerforce aluminum flywheels also feature mechanically retained starter ring gears as well as replaceable steel friction surfaces that have been heat-treated for abrasion resistance and long life. The "400" series flywheels are O.E. cast iron replacement flywheels and are not SFI approved for competition use, these are a quality replacement wheel only. Centerforce billet flywheels are CAD/CAM designed and then CNC machined to strict tolerances for perfect fitment and hassle-free, bolt-in performance. Consult your Centerforce catalog or web site for the latest in performance flywheel applications! or web site for the latest in performance flywheel applications!

CENTERFORCE PRODUCTS

Some of the Centerforce products are grouped differently than others. Depending on the application, the Centerforce I & Centerforce II lines are available with Pressure Plate and Disc as separate pieces, or Pressure Plate and Disc as a matched set. The Dual Friction line is always available as a matched set only. The LMC and DFX line of severe street/strip performance clutches can be used with the DFX 4-6 button style sprung hub discs. These combinations can be purchased as separate pieces, or as Centerforce recommended matched sets. The race-ready LMC (Light Metal Clutch) Series is available as individual pieces, or as a matched set.

FREQUENTLY ASKED CENTERFORCE TECHNICAL QUESTIONS

Disclaimer

The information presented in the following pages is accurate to the best of our knowledge. However, Midway Industries, Inc. / Centerforce® is not responsible for any inaccuracies that may be found.

WHICH CENTERFORCE CLUTCH SYSTEM IS BEST FOR MY VEHICLE?

IT IS IMPORTANT TO MATCH THE PROPER CENTERFORCE CLUTCH SYSTEM WITH THE VEHICLE AND ITS INTENDED USE!

TO ANSWER THIS QUESTION PROPERLY, SEVERAL THINGS MUST BE TAKEN INTO CONSIDERATION.

- 1. WHAT ARE THE VEHICLES' MAKE, MODEL, YEAR AND ENGINE SIZE?**
- 2. WHAT IS THE VEHICLE USED FOR? (DAILY DRIVING, TOWING, OFF ROAD, COMPETITION USE, ETC.).**
- 3. WHAT TYPE OF CHANGES HAVE BEEN MADE TO THE VEHICLE?**
- 4. IS THE ENGINE STOCK OR HAS IT BEEN MODIFIED? IF THE ENGINE HAS BEEN MODIFIED, TO WHAT EXTENT? (HI FLOW FILTER, COMPUTER CHIP, EXHAUST MODIFICATIONS, SUPER CHARGERS, NITROUS, ETC.).**
- 5. HAVE ANY DRIVELINE CHANGES BEEN MADE? (DIFFERENT SIZE TIRES, DIFFERENT GEAR RATIO, ETC.).**
- 6. HAS ANY EXTRA EQUIPMENT (WEIGHT) BEEN ADDED TO THE VEHICLE? (CAMPER, WINCH, TUBE BUMPER, ROLL CAGE, ETC.).**

! WARNING

Older, non-CENTERFORCE® clutches may be formulated with asbestos. Breathing dusts from these products has been linked to LUNG DISEASE AND CANCER HAZARDS.

- Avoid creating and breathing clutch/friction dusts during replacement work.**
- Wear high-efficiency mask or dust respirator during cleaning if you are unsure whether clutch/friction dusts may contain asbestos fibers. Wet surfaces with either water or brake cleaner and use rags to clean if necessary. Properly dispose of rags in air-tight container.**
- NEVER GRIND OR USE COMPRESSED AIR IN AND AROUND FRICTION PRODUCTS.**

THE FOLLOWING INFORMATION WILL HELP AS A GENERAL GUIDE IN CHOOSING THE BEST CENTERFORCE CLUTCH SYSTEM FOR YOUR VEHICLE. IF YOU SHOULD NEED FURTHER ASSISTANCE, PLEASE CONTACT OUR TECHNICAL DEPARTMENT AT (928) 771-8422.

WHICH CENTERFORCE CLUTCH SYSTEM IS BEST FOR MY DRIVING STYLE AND APPLICATION?

CENTERFORCE I®

Centerforce I is engineered as a quality upgrade clutch over the O.E.M. for those seeking longer clutch life. Our Centerforce I is also compatible with vehicles that have mild modification such as, performance computer chip, under drive pulleys, aftermarket exhaust, performance air filters, etc.

CENTERFORCE II®

Centerforce II is engineered to perform well in daily driven vehicles in which the engine has been modified for increase torque. This clutch is compatible with aftermarket heads, cams, performance exhaust, air filters, etc. The Centerforce II also works well in towing applications and lifted trucks with larger tires. Typically the Centerforce II is not recommended for use with upgraded turbo or nitrous systems.

DUAL FRICTION®

Dual friction assemblies are engineered for maximum street performance. This clutch is compatible with aftermarket heads, cams, performance exhaust, air filters, etc. plus the use of aftermarket turbos, supercharger and mild nitrous systems. Also works well for towing application with heavy load. Performance gear ratios are recommended for maximum results.

DFX® SERIES

DFX assemblies are engineered for radically altered vehicle driven on the street and strip. This clutch is compatible with aftermarket heads, cams, performance exhaust, air filters, etc. plus the use of aftermarket turbos, superchargers and fogger nitrous systems. Performance gear ratios are recommended for maximum results.

LMC SERIES

LMC series clutches were engineered for the car enthusiast seeking lightweight for street or optimum acceleration on the road course. Similar to the performance of the dual friction clutch, this clutch is compatible with aftermarket heads, cams, performance exhaust, air filters, etc. plus the use of aftermarket turbo, supercharger and mild nitrous systems. Performance gear ratios are recommended for maximum results.

**REMEMBER IF YOU HAVE ANY QUESTIONS, PLEASE CALL OUR
TECH. LINE (928) 771-8422
-WE WOULD LIKE TO HEAR FROM YOU-**

WHAT IS NECESSARY TO PROPERLY INSTALL MY NEW CENTERFORCE CLUTCH?

ALL PATENTED CENTERFORCE CLUTCHES ARE DESIGNED TO BE A DIRECT BOLT IN HIGH PERFORMANCE CLUTCH SYSTEM NEEDING NO SPECIAL MODIFICATIONS FOR INSTALLATION.

CLUTCH INSTALLATION GENERAL GUIDELINES.

BE PREPARED TO CHECK AND DO THE FOLLOWING:

1. IT IS ALWAYS RECOMMENDED TO REFER TO YOUR FACTORY SERVICE MANUAL FOR CLUTCH INSTALLATION SPECIFICATIONS REGARDING YOUR PARTICULAR MAKE AND MODEL OF VEHICLE.
2. REPLACE BOTH THE PRESSURE PLATE AND DISC ASSEMBLY. THEY WORK TOGETHER ALWAYS REPLACE THEM TOGETHER. (NEVER USE A NEW DISC WITH A WORN PRESSURE PLATE)
3. DETERMINE THE CAUSE OF ORIGINAL CLUTCH FAILURE! IF REPLACEMENT IS FOR OTHER THAN NORMAL WEAR, THE CAUSE OF FAILURE MUST BE PROPERLY DIAGNOSED AND REPAIRED. IF OIL IS PRESENT ON THE OLD CLUTCH ASSEMBLY, THE LEAK MUST BE CORRECTED BEFORE INSTALLING A NEW CLUTCH ASSEMBLY.
4. CLEAN AND THEN CHECK THE SPLINES ON THE TRANSMISSION INPUT SHAFT FOR SIGNS OF ABNORMAL WEAR OR TWISTING, THEN SLIDE THE NEW DISC ON THE INPUT SHAFT CHECKING FOR FREE MOVEMENT OVER THE SPLINES.
5. THE FLYWHEEL SHOULD BE RESURFACED TO THE ORIGINAL SPECIFICATIONS, THIS WILL INSURE PROPER, TROUBLE FREE CLUTCH PERFORMANCE AND OPERATION.
6. REMOVE ALL TRACES OF OIL OR GREASE FROM THE FLYWHEEL AND PRESSURE PLATE ASSEMBLY USING A NON-PETROLEUM BASED CLEANER. (BRAKE CLEANER WORKS WELL)
7. THOROUGHLY CLEAN AND INSPECT ALL CLUTCH LINKAGE PARTS (FORK, CLEVIS, PINS, ETC.) AND REPLACE ANY PARTS SHOWING SIGNS OF WEAR OR DAMAGE.
8. ALWAYS REPLACE THE THROWOUT BEARING AND PILOT BUSHING/ BEARING (WHERE APPLICABLE), AND SPARINGLY LUBRICATE THE THROW OUT BEARING RETAINING COLLAR SURFACE AFTER INSPECTING FOR SIGNS OF WEAR OR GALLING.
9. BE SURE THAT ANY SPECIAL FASTENERS (SHOULDERED BOLTS, FLYWHEEL DOWEL PINS, ETC.) ARE USED AND PLACED IN THEIR PROPER LOCATIONS
10. ALWAYS USE A PROPER CLUTCH ALIGNMENT TOOL DURING INSTALLATION TO INSURE CORRECT POSITIONING OF THE PRESSURE PLATE ASSEMBLY, DISC AND PILOT BUSHING/BEARING.
11. TORQUE ALL PRESSURE PLATE AND FLYWHEEL ASSEMBLY BOLTS TO MANUFACTURERS SPECIFICATIONS USING A PROGRESSIVE CRISSCROSS PATTERN.
12. ADJUST CLUTCH PEDAL FREEPLAY (WHERE APPLICABLE) TO CORRECT ORIGINAL SPECIFICATIONS. THIS IS A VERY IMPORTANT STEP THAT INSURES PROPER OPERATION, PERFORMANCE AND CLUTCH LONGEVITY.

HOW LONG CAN I EXPECT MY NEW CENTERFORCE CLUTCH TO LAST ME?

ALL PATENTED CENTERFORCE PRODUCTS ARE DESIGNED WITH LONGEVITY IN MIND, HOWEVER, CLUTCH LIFE WILL GREATLY DEPEND ON THE VEHICLE, YOUR TYPE OF DRIVING AND OUTPUT OF THE ENGINE. FOR EXAMPLE A VEHICLE DRIVEN IN HEAVY STOP AND GO TRAFFIC WILL HAVE A SHORTER CLUTCH LIFE THAN THE SAME VEHICLE THAT IS DRIVEN ON THE OPEN HIGHWAY. REGARDING TRUCKS WITH OVERSIZED DIAMETER TIRES, THEY WILL TYPICALLY GET LESS CLUTCH LIFE THAN A TRUCK WITH STOCK TIRE SIZE.

NOTE: APPROPRIATE FINAL DRIVE GEAR RATIO CHANGES ARE NECESSARY AND WILL GREATLY AID DRIVELINE LONGEVITY (INCLUDING THE CLUTCH) ON VEHICLES CARRYING HEAVY LOADS OR USING OVERSIZED DIAMETER TIRES.

WILL A CENTERFORCE CLUTCH INCREASE MY PEDAL EFFORT CAUSING DAMAGE TO MY CABLE, HYDRAULICS OR MECHANICAL LINKAGE?

ALL THREE CENTERFORCE CLUTCH SYSTEMS (CENTERFORCE I, CENTERFORCE II, AND DUAL FRICTION) UTILIZE OUR PATENTED CENTERFORCE WEIGHT SYSTEM, THIS COMBINED WITH OUR SUPERIOR FRICTION MATERIALS ALLOW US TO ENGINEER CLUTCH PRODUCTS THAT INCREASE PERFORMANCE WITHOUT INCREASING CLUTCH PEDAL EFFORT. THIS IS IMPORTANT IN ORDER TO MAINTAIN COMFORTABLE DRIVEABILITY AS WELL AS TO PREVENT OVERLOADING THE RELEASE MECHANISM.

DOES CENTERFORCE RECOMMEND USING A LIQUID THREAD LOCKER ON PRESSURE PLATE AND FLYWHEEL BOLTS?

YES, USING A MEDIUM VISCOCITY LIQUID THREAD LOCKER REDUCES THE POSSIBILITY OF PRESSURE PLATE AND FLYWHEEL BOLTS FROM COMING LOOSE.

WHAT TYPE OF FLYWHEEL IS BEST RECOMMENDED FOR MY APPLICATION?

OUR FRICTION MATERIALS ARE DESIGNED TO BE USED WITH THE STOCK FLYWHEEL, AFTERMARKET STEEL BILLET FLYWHEELS, OR ALUMINUM FLYWHEELS WITH STEEL INSERT HEAT SHIELDS. IF YOU ARE REPLACING YOUR STOCK O.E.M. FLYWHEEL, BE SURE THAT THE NEW FLYWHEEL MEETS THE SAME SPECIFICATIONS, SUCH AS RING GEAR TOOTH COUNT, FLYWHEEL THICKNESS, RING GEAR OFFSET, ETC. ALL BILLET CENTERFORCE FLYWHEELS ARE DESIGNED TO MEET STANDARD O.E.M. SPECIFICATIONS, AND ARE S.F.I. APPROVED.

DOES CENTERFORCE REQUIRE THE FLYWHEEL TO BE RESURFACED BEFORE INSTALLING A NEW CLUTCH?

YES! FLYWHEELS ARE SUBJECT TO HEAT, SCORING AND WARPING DURING USE, THEREFORE THE FLYWHEEL SHOULD ALWAYS BE PROPERLY RESURFACED OR REPLACED TO ASSURE GOOD CLUTCH PERFORMANCE. RESURFACING MUST BE PERFORMED ON A QUALIFIED FLYWHEEL GRINDING MACHINE. CENTERFORCE DOES NOT RECOMMEND RESURFACING FLYWHEELS ON A LATHE OR A BLANCHARD GRINDER. ALSO, BE AWARE THAT USING A HAND-HELD ELECTRIC OR PNEUMATIC GRINDER/SANDER OR SCUFFING THE SURFACE WITH SANDPAPER DOES NOT CONSTITUTE A PROPERLY RESURFACED FLYWHEEL. REFER TO YOUR FACTORY SERVICE MANUAL FOR SPECIFICS ON YOUR VEHICLE REGARDING FLYWHEEL RESURFACING AND SPECIFICATIONS (FLAT, STEP, ETC.). SOME VEHICLES REQUIRE NEW REPLACEMENT FLYWHEELS INSTEAD OF RESURFACING. PLEASE CONSULT THE FACTORY SERVICE MANUAL OR CALL OUR TECH. LINE AT (928) 771-8422 IF YOU HAVE ANY QUESTIONS

IS IT NECESSARY TO USE THE ALIGNMENT DOWEL PINS ON MY FLYWHEEL?

ON FLYWHEELS THAT ORIGINALLY USE ALIGNMENT DOWEL PINS, THE ANSWER IS YES! THE ALIGNMENT DOWEL PINS PROPERLY LOCATE THE PRESSURE PLATE TO THE FLYWHEEL FOR BALANCE PURPOSES AS WELL AS ADD PRESSURE PLATE TO FLYWHEEL SHEAR STRENGTH. THE ALIGNMENT DOWEL PINS SHOULD ALWAYS BE REPLACED IF THEY ARE DAMAGED, BROKEN OFF, OR MISSING FROM THE FLYWHEEL.

WHAT TYPE OF PRESSURE PLATE BOLTS SHOULD BE USED WITH MY CENTERFORCE CLUTCH?

CENTERFORCE CLUTCHES ARE DESIGNED TO BE USED WITH STOCK O.E.M. STYLE BOLTS OR AFTERMARKET BOLTS DESIGNED SPECIFICALLY FOR PRESSURE PLATE RETENTION. CLUTCH HARDWARE MUST ENDURE HIGH LOADS, BE SURE REPLACEMENT BOLTS ARE OF HIGH QUALITY AND MATCH STOCK O.E.M. BOLT CONFIGURATION, (I.E. IF STOCK BOLTS ARE SHOULDERED, REPLACEMENT BOLTS SHOULD BE SHOULDERED TOO).

WHAT ARE THE CLUTCH BOLT TORQUE SPECIFICATIONS?

BOLT TORQUE VALUE SHOULD BE DETERMINED BY THE BOLT MANUFACTURER OR IF USING STOCK O.E.M. BOLTS, REFER TO YOUR VEHICLES SERVICE MANUAL FOR PROPER TORQUE SPECIFICATIONS. PROPER TORQUE IS CRUCIAL TO YOUR SAFETY, TAKE THE TIME TO GET THE CORRECT PRESSURE PLATE ASSEMBLY AND FLYWHEEL BOLT TORQUE SPECIFICATIONS AND TIGHTEN THE BOLTS CORRECTLY USING A HIGH QUALITY TORQUE WRENCH.

ARE THERE ANY SPECIAL MODIFICATIONS NECESSARY TO INSTALL A CENTERFORCE CLUTCH?

ALL PATENTED CENTERFORCE CLUTCH ASSEMBLIES ARE DESIGNED TO BE A DIRECT BOLT IN REPLACEMENT FOR THE STOCK CLUTCH ASSEMBLY. IF ANY OF THE SURROUNDING CLUTCH COMPONENTS (BELLHOUSING, FLYWHEEL, LINKAGE, ETC) HAVE BEEN CHANGED FROM ORIGINAL, BE SURE THEY MATCH STOCK (O.E.M.) SPECIFICATIONS, OR CONTACT OUR TECHNICAL DEPARTMENT AT (928) 771-8422 FOR ASSISTANCE.

ARE CENTERFORCE CLUTCHES PRE-BALANCED?

YES! ALL CENTERFORCE CLUTCH ASSEMBLIES ARE BALANCED TO ORIGINAL FACTORY EQUIPMENT SPECIFICATIONS.

DOES CENTERFORCE RECOMMEND CHANGING THE PILOT BUSHING WHEN INSTALLING A NEW CLUTCH?

YES, IF YOUR VEHICLE IS EQUIPPED WITH A PILOT BUSHING OR BEARING, IT IS ALWAYS RECOMMENDED TO REPLACE IT DURING THE NEW CLUTCH INSTALLATION PROCESS. WHERE APPLICABLE, IT IS RECOMMENDED TO UPGRADE FROM A PILOT BUSHING TO A ROLLER NEEDLE OR BALL BEARING TYPE PILOT BEARING.

DO CENTERFORCE CLUTCHES REQUIRE A BREAK IN PERIOD?

YES. IT IS RECOMMENDED TO PROPERLY SEAT IN THE NEW PRESSURE PLATE & DISC ASSEMBLY TO ASSURE GOOD CLUTCH PERFORMANCE. CENTERFORCE RECOMMENDS 450-500 MILES OF IN TOWN STOP AND GO TYPE OF EASY DRIVING BEFORE APPLYING FULL POWER. IF YOUR DRIVING CONSISTS OF MAINLY HIGHWAY TYPE USE, THE BREAK IN PERIOD SHOULD BE LONGER THAN THE 450-500 MILES. IF THE BREAK IN PERIOD IS NOT PROPERLY FOLLOWED, CLUTCH LIFE AND PERFORMANCE CAN BE SACRIFICED.

CAN I USE A CENTERFORCE DISC WITH MY BRAND X PRESSURE PLATE OR CENTERFORCE PRESSURE PLATE WITH MY BRAND X DISC?

IT IS NOT RECOMMENDED TO USE CENTERFORCE COMPONENTS WITH OTHER MANUFACTURERS PRESSURE PLATES OR DISCS. CENTERFORCE PARTS ARE DESIGNED TO WORK AS MATCHED SETS AND TO GIVE SUPERIOR CLUTCH PERFORMANCE AS WELL AS RELIABLE OPERATION. WE CANNOT GUARANTY PARTS FROM OTHER MANUFACTURES.

ARE CENTERFORCE CLUTCHES REPAIRABLE OR REBUILDABLE?

IN ORDER TO MAINTAIN PROPER CLUTCH SERVICE, IT IS NOT RECOMMENDED TO REBUILD PATENTED CENTERFORCE CLUTCHES. HOWEVER, REPAIR MAY BE POSSIBLE IN SOME CASES BY CENTERFORCE, AFTER INSPECTION OF THE ASSEMBLY. PLEASE CONTACT OUR TECHNICAL DEPARTMENT AT (928) 771-8422 FOR FURTHER INFORMATION.

CAN A NEW DUAL FRICTION DISC BE PURCHASED SEPARATELY?

NO. DUAL FRICTION DISCS ARE CUSTOM BUILT AND DESIGNED TO BE USED WITH SPECIFIC PRESSURE PLATE ASSEMBLIES. THE PRESSURE PLATE ASSEMBLY AND CLUTCH DISC SHOULD ALWAYS BE REPLACED AS A MATCHED SET. IF THE DISC HAS WORN OUT, SO HAS THE PRESSURE PLATE.

DOES THE CENTERFORCE CLUTCH SYSTEM WEIGH LESS THAN THE STOCK O.E.M. CLUTCH I AM REPLACING?

TYPICALLY, THE WEIGHT OF THE PATENTED CENTERFORCE CLUTCH ASSEMBLY WILL BE VERY SIMILAR TO THE WEIGHT OF A STOCK O.E.M. CLUTCH ASSEMBLY. IF ROTATING MASS (WEIGHT) IS A CONCERN, CENTERFORCE MANUFACTURES A LIGHT WEIGHT CLUTCH ASSEMBLY DESIGNED SPECIFICALLY FOR COMPETITION USE (AVAILABLE IN LIMITED APPLICATIONS. THE CENTERFORCE LMC CLUTCH ASSEMBLY SAVES A CONSIDERABLE AMOUNT OF WEIGHT WHEN COMPARED TO CONVENTIONAL CLUTCH SYSTEMS. PLEASE NOTE, THESE LIGHT WEIGHT CLUTCHES ARE INTENDED FOR COMPETITION USE AND ARE NOT RECOMMENDED FOR STREET APPLICATIONS.

HOW IMPORTANT IS PROPER BELLHOUSING ALIGNMENT?

BELLHOUSING ALIGNMENT IS CRUCIAL FOR PROPER CLUTCH FUNCTION AND RELIABILITY OF THE RELATED COMPONENTS. DUE TO MANUFACTURING TOLERANCES OF ENGINE BLOCKS AND BELLHOUSINGS, IT IS POSSIBLE FOR THE TRANSMISSION CENTERLINE AND CRANKSHAFT CENTERLINE TO BE MISALIGNED. THE RESULT OF THIS MISALIGNMENT MAY BE HARD SHIFTING, PILOT BEARING WEAR, TRANSMISSION MAIN SHAFT BEARING WEAR AND FAILURE OF THE CLUTCH DISC HUB. PLEASE REFER TO YOUR FACTORY SERVICE MANUAL OR CONTACT OUR TECHNICAL DEPARTMENT AT (928) 771-8422 FOR PROPER BELLHOUSING ALIGNMENT PROCEDURE.

MY ENGINE IS USED MAINLY AT LOW RPM'S; WILL THE CENTERFORCE CENTRIFUGAL WEIGHT SYSTEM BE BENEFICIAL FOR MY APPLICATION?

THE ANSWER IS YES! WHILE IT IS TRUE THAT CENTRIFUGAL ASSIST IS A DIRECT FUNCTION OF RPM, THE PATENTED CENTERFORCE WEIGHT SYSTEM IS EFFECTIVE AND WILL ADD ADDITIONAL CLUTCH PERFORMANCE AT ALL ENGINE RPM LEVELS.

MY NEW THROWOUT BEARING APPEARS TO BE OFF CENTER ON THE BEARING RETAINER AND WOBBLER, IS IT DEFECTIVE?

ALTHOUGH THIS MAY LOOK ABNORMAL, THIS BEARING MOVEMENT IS ONE OF ITS DESIGN FEATURES. CENTERFORCE STRIVES TO SUPPLY ONLY THE BEST QUALITY BEARINGS AVAILABLE, FOR MOST APPLICATIONS WE PREFER TO USE A SELF ALIGNING OR SELF CENTERING TYPE THROWOUT BEARING. THIS BEARING MAY APPEAR TO BE OFF CENTER OR IMPROPERLY MANUFACTURED, HOWEVER, REST ASSURED, THE BEARING WILL ALIGN AND CENTER ITSELF PROPERLY DURING NORMAL USAGE.

MY APPLICATION IS NOT LISTED IN THE CENTERFORCE CATALOG, WHAT SHOULD I DO?

THE CENTERFORCE CATALOG IS ONE OF THE MOST EXTENSIVE AND COMPLETE AFTERMARKET PERFORMANCE CLUTCH PUBLICATIONS AVAILABLE. WE ARE CONTINUALLY MAKING CHANGES AND ADDING IN NEW APPLICATIONS. IF A PARTICULAR APPLICATION IS NOT FOUND IN THE CENTERFORCE CATALOG, PLEASE CONTACT OUR TECHNICAL DEPARTMENT AT (928) 771-8422 FOR POSSIBLE NEW RELEASES OR ADDITIONS. ALSO, OUR RESEARCH AND DEVELOPMENT DEPARTMENT MAY BE ABLE TO CUSTOM BUILD/ MODIFY YOUR SUPPLIED PARTS FOR OTHER SPECIAL APPLICATIONS NOT LISTED IN THE CENTERFORCE CATALOG. THIS SERVICE IS ESPECIALLY HELPFUL ON EXOTIC AND SPECIALTY TYPE VEHICLES. PLEASE FEEL FREE TO CONTACT OUR TECHNICAL DEPARTMENT AT (928) 771-8422 REGARDING THESE SPECIAL SERVICES.

MY NEW CENTERFORCE CLUTCH LOOKS DIFFERENT FROM ANY OTHER CLUTCH I'VE SEEN- SHOULD I REMOVE THE CENTERFORCE WEIGHTS FROM THE CLUTCH FINGERS?

NO! THE PATENTED CENTERFORCE CLUTCH SYSTEM SHOULD NOT BE ALTERED OR TAMPERED WITH. THE CENTERFORCE CLUTCH IS DESIGNED TO BE A DIRECT PERFORMANCE REPLACEMENT CLUTCH SYSTEM, AND SHOULD NOT BE MODIFIED. THE CENTERFORCE WEIGHT SYSTEM IS ONE OF THE DESIGN FEATURES INCORPORATED INTO YOUR NEW CLUTCH. THE WEIGHTS ARE DESIGNED TO ADD CENTRIFUGAL ASSIST TO THE DIAPHRAGM CLUTCH SPRING AND INCREASE THE CLAMPING FORCE AS ENGINE RPM IS INCREASED. THE WEIGHTS SHOULD BE LEFT AS INSTALLED TO ASSURE PROPER CLUTCH PERFORMANCE.

WILL THE CENTERFORCE WEIGHT SYSTEM INTERFERE WITH MY THROWOUT BEARING?

NO! THE PATENTED CENTERFORCE WEIGHTS ARE FREE FLOATING, AND WILL AUTOMATICALLY CENTER THEMSELVES DURING NORMAL OPERATION. THEY WILL NOT INTERFERE WITH THE THROWOUT BEARING, OR MAKE NOISE DURING OPERATION.

MY NEW CENTERFORCE DID NOT COME WITH THE WEIGHTS ON THE CLUTCH DIAPHRAGM FINGERS, WAS IT BUILT IMPROPERLY?

WE UTILIZE THE PATENTED CENTERFORCE WEIGHT SYSTEM ON ALL APPLICATIONS THAT ARE POSSIBLE. HOWEVER, IN SPACE LIMITED APPLICATIONS (MOST FRONT WHEEL DRIVE CARS), IT MAY NOT BE FEASIBLE TO USE THE CENTERFORCE WEIGHTS DUE TO CLEARANCE RESTRICTIONS IN THE BELLHOUSING. REST ASSURED, CENTERFORCE HAS MODIFIED THESE CLUTCH ASSEMBLIES TO INCREASE THE OVERALL HOLDING CAPACITY WITHOUT HAVING THE CENTRIFUGAL WEIGHT SYSTEM.

WHAT PARTS IN THE CLUTCH SYSTEM/LINKAGE SHOULD I INSPECT BEFORE INSTALLING A NEW CLUTCH?

ALL RELATED CLUTCH PARTS SHOULD BE CHECKED FOR WEAR OR POSSIBLE PROBLEMS. THE CLUTCH LINKAGE STARTING FROM THE CLUTCH PEDAL BUSHINGS TO THE BELL CRANK (Z-BAR) TO THE CLUTCH FORK AND PIVOT BALL SHOULD BE INSPECTED FOR WEAR AND DAMAGE, ANY QUESTIONABLE PARTS SHOULD BE REPAIRED OR REPLACED. IF YOUR VEHICLE USES A HYDRAULIC LINKAGE SYSTEM, CHECK FOR ANY HYDRAULIC LEAKS AS WELL AS WEAR ON THE PUSH AND PULL RODS OPERATING THE HYDRAULICS AND ALL HOSES. HYDRAULIC SYSTEMS (ESPECIALLY ONES WITH HIGH MILEAGE) MAY HAVE INTERNAL LEAKAGE (PAST THE MASTER AND/OR SLAVE PISTON SEALS). KEEP IN MIND THESE ARE TOUGH TO DIAGNOSE BECAUSE THERE MAY NOT BE VISIBLE EXTERNAL LEAKAGE. IF YOUR VEHICLE IS CABLE EQUIPPED, THE CABLE SHOULD BE CHECKED FOR DAMAGE, STRETCH, EXCESSIVE RESISTANCE OR BINDING. IF FOUND TO BE DEFECTIVE THE CABLE MUST BE REPLACED. REFER TO YOUR VEHICLES SERVICE MANUAL FOR FACTORY SPECIFICATIONS. REGARDLESS OF YOUR VEHICLES LINKAGE TYPE, PAY PARTICULAR ATTENTION TO ANY SIGNS OF WEAR OR GALLING ON THE THROWOUT BEARING COLLAR.

IN THE CATALOG, WHY DOESN'T THE DUAL FRICTION LISTING SHOW A PART NUMBER FOR THE DISC?

FOR ALL DUAL FRICTION APPLICATIONS, THE PRESSURE PLATE AND DISC ARE SOLD AS A MATCH SET, THEREFORE THEY ARE LISTED TOGETHER UNDER ONE PART NUMBER.

**REMEMBER IF YOU HAVE ANY QUESTIONS, PLEASE CALL OUR
TECH. LINE (928) 771-8422
-WE WOULD LIKE TO HEAR FROM YOU-**

WHAT COULD BE THE CAUSES FOR CLUTCH CHATTER?

- FLYWHEEL HAS EXCESSIVE RUN-OUT.
- FLY WHEEL WAS NOT RESURFACED BEFORE THE NEW CLUTCH WAS INSTALLED.
- FLYWHEEL WAS RESURFACED IMPROPERLY OR HAS IMPROPER SURFACE FINISH.
- FLYWHEEL HAS SEVERE HARD SPOTS OR HOT SPOTS.
- FLYWHEEL RESURFACED IMPROPERLY (I.E. INCORRECT FLYWHEEL STEP).
- DAMAGED OR EXCESSIVELY WORN CV JOINTS.
- BAD U-JOINTS IN DRIVE SHAFT OR U-JOINTS MISALIGNED.
- EXCESSIVE BACKLASH IN DIFFERENTIAL.
- EXCESSIVE DRIVELINE ANGLE.
- BAD LEAF SPRINGS, BUSHINGS OR MOUNTS.
- IMPROPER GEAR RATIO VERSUS TIRE DIAMETER.
- DEFECTIVE PRESSURE PLATE AND/OR DISC.
- DISC HAS INADEQUATE OR NO MARCEL (NOT ENOUGH CUSHION BETWEEN THE FRICTION FACINGS).
- OIL OR GREASE CONTAMINATION ON CLUTCH FACINGS.
- WORN OR DAMAGED CLUTCH LINKAGE.
- BENT COVER ASSEMBLY AND/OR DISC.
- IMPROPERLY TUNED ENGINE.
- WORN OR DAMAGED ENGINE MOUNTS OR TRANSMISSION MOUNTS.

WHAT COULD BE THE CAUSE FOR IMPROPER CLUTCH RELEASE?

- CLUTCH LINKAGE NOT PROPERLY ADJUSTED OR RESET.
- FLYWHEEL NOT SURFACED BEFORE NEW CLUTCH INSTALLED.
- FLYWHEEL SURFACED IMPROPERLY (I.E. INCORRECT FLYWHEEL STEP).
- FLYWHEEL MACHINED TOO THIN OR NOT MANUFACTURED TO STOCK (O.E.M.). SPECIFICATIONS.
- LINKAGE WORN OR DAMAGED.
- HYDRAULICS DEFECTIVE, LEAKING OR THERE MAY BE AIR IN THE SYSTEM.
- CABLE STRETCHED OR DAMAGED.
- IMPROPER CLUTCH FORK GEOMETRY DUE TO FLYWHEEL BEING TOO THIN OR BELLHOUSING DEEPER THAN STOCK (BELLHOUSING BALL STUD MAY NOT BE ADJUSTED PROPERLY).
- PILOT BUSHING BINDING DUE TO IMPROPER BELLHOUSING ALIGNMENT, BELLHOUSING DAMAGED, OR LOOSE.
- CLUTCH DISC INSTALLED IMPROPERLY.
- CLUTCH DISC HUB RUBBING AGAINST FLYWHEEL BOLTS.
- CLUTCH DISC BINDING ON INPUT SHAFT.
- INPUT SHAFT BENT CAUSING CLUTCH DISC RUNOUT.
- PRESSURE PLATE ASSEMBLY AND/OR CLUTCH DISC BENT OR DAMAGED.
- CLUTCH DISC IS TOO THICK/ OR HAS EXCESSIVE MARCEL (TOO MUCH CUSHION BETWEEN THE FRICTION FACINGS).
- PRESSURE PLATE HAS DEFECTIVE OR DAMAGED TORQUE DRIVE STRAPS.
- DAMAGED, WORN, OR IMPROPERLY INSTALLED PILOT BUSHING/BEARING.
- OIL OR GREASE CONTAMINATION ON CLUTCH FACINGS.
- DAMAGED OR WORN THROWOUT BEARING COLLAR.

**REMEMBER IF YOU HAVE ANY QUESTIONS, PLEASE CALL OUR
TECH. LINE (928) 771-8422
-WE WOULD LIKE TO HEAR FROM YOU-**

WHAT ARE THE POSSIBLE CAUSES FOR CLUTCH SLIPPAGE?

- IMPROPER CLUTCH ADJUSTMENT FREEPLAY.
- QUADRANT NOT RESET PROPERLY OR IS FAULTY (ON RATCHET CABLE TYPE LINKAGE SYSTEMS).
- INCORRECT THROWOUT BEARING IS BEING USED (TOO LONG).
- CLUTCH ASSEMBLY CONTAMINATED WITH GREASE/OIL.
- CLUTCH NOT FULLY/PROPERLY SEATED IN.
- FLYWHEEL NOT SURFACED AND DISC HAS BEEN GLAZED.
- CLUTCH ASSEMBLY NOT DESIGNED FOR THE APPLICATION.
- CLUTCH ASSEMBLY NOT DESIGNED FOR SPECIFIC TYPE OF USE (RACING/COMPETITION, ETC.).
- CLUTCH NOT ADEQUATE FOR HORSEPOWER/TORQUE OF APPLICATION.
- INCORRECT GEAR RATIO TO TIRE DIAMETER.
- CLUTCH ASSEMBLY HAS LOST FACING MATERIAL FROM THE DISC.
- CLUTCH ASSEMBLY HAS FAILED OR IS DEFECTIVE.
- FLYWHEEL SURFACED IMPROPERLY (I.E. INCORRECT FLYWHEEL STEP).
- DAMAGED OR WORN THROWOUT BEARING COLLAR.
- DAMAGED OR BENT PRESSURE PLATE ASSEMBLY AND/OR DISC.

WHAT ARE THE CAUSES OF POOR SHIFTING QUALITY OR NOTCHY SHIFTING?

- IMPROPER CLUTCH RELEASE CAUSED BY FAULTY LINKAGE AND/OR IMPROPER ADJUSTMENT.
- IMPROPERLY INSTALLED SHIFTER.
- IMPROPERLY ADJUSTED SHIFTER OR SHIFT LINKAGE.
- DAMAGED TRANSMISSION PARTS (BENT SHIFT FORK, ETC.).
- WORN TRANSMISSION SYNCHRONIZER RINGS.
- IMPROPER TRANSMISSION LUBRICANT (CHECK FACTORY SERVICE MANUAL FOR PROPER FLUID TYPE AND VISCOSITY).
- PILOT BUSHING/BEARING BINDING ON INPUT SHAFT.
- CLUTCH DISC HUB RUBBING FLYWHEEL OR FLYWHEEL BOLTS.
- DAMAGED OR DEFECTIVE PRESSURE PLATE TORQUE STRAPS.
- BELLHOUSING MISALIGNMENT

Centerforce Flywheels Aluminum & Steel

**CENTERFORCE
FLYWHEELS**

The SFI Foundation, Inc. is a non-profit organization that has been established to set and maintain standards for the automotive performance and racing industry. Most racing sanctioning bodies require participants to use components that are certified to SFI specifications. Centerforce® DFX and LMC series pressure plates as well as all billet Centerforce flywheels exceed SFI specification 1.1 for performance flywheels and clutch assemblies. In order to achieve SFI certification, Centerforce products are tested every 24 months by an independent lab for material strength and integrity. For more information regarding the SFI foundation please contact Centerforce or visit the SFI web site at www.sfifoundation.com

CENTERFORCE® TECHNOLOGIES

Centerforce® has always been at the forefront of research and development and currently holds 9 exclusive patents pertaining to automotive performance clutches. Centerforce uses their patented processes and over 25 years of experience to create the best clutch & flywheel package for your application. Some of these processes include the famous Centerforce weight system, Dual Friction® discs, and ball bearing actuated pressure plates, precision billet flywheels and more. Each application is developed to provide you with the right amount of clamp load, friction, durability and ease of use.

CENTERFORCE® WEIGHTS

The patented Centerforce® weight system provides additional clutch torque capacity by harnessing centrifugal force. As engine RPM increases, so does the clutch clamping force created by the Centerforce centrifugal weight system. This unique technology offers enthusiasts a progressive type clutch that actually increases grip to match engine speed and power – all the while maintaining smooth and user-friendly clutch control.

DUAL FRICTION®

The patented Centerforce Dual-Friction® disc system distributes pressure plate clamping force evenly over a 360-degree friction-facing on one side of the clutch disc, while the opposing side uses a segmented friction-facing to concentrate clamping pressure and maximize clutch holding-capacity. This combination of dual configured friction-facings, coupled with our performance pressure plate, creates the ultimate clutch system that is engineered for smooth drivability, maximum longevity and awesome grip!

BALL BEARING

Centerforce® provides innovative leadership in clutch technology by creating patented processes like their ball bearing pressure plate designs. When possible, Centerforce uses ball bearings as a fulcrum (pivot) point for the pressure plate diaphragm spring. By utilizing this unique system, Centerforce can increase clutch holding-capacity and keep the pedal effort low. This also allows Centerforce to increase the quality and repeatability of each clutch developed with this process.

TESTING FOR QUALITY

For more than 25 years Centerforce® has been a leader in asbestos-free clutch innovation and quality. To ensure the highest level of quality, every clutch design Centerforce offers is run through a gauntlet of testing procedures. We continually monitor and evaluate clutch-holding capacity by utilizing specific friction materials and accurate Pressure Plate clamp-load measurements. Clutch breakaway torque readings are further verified through our specially built clutch testing equipment. It is important to note that these values are not just mathematical calculations on paper – our numbers are backed-up by actual “real world” use and testing. Centerforce uses the latest in CAD/CAM technology for all of our in-house product designs. This coupled with precise measurement and strict manufacturing control means you get parts right – the first time. In addition to these procedures, Centerforce also regularly test components and materials through independent test labs to further ensure we not only meet, but also exceed industry standards. Centerforce is serious about quality. We take the extra steps so you can expect long life, ease of use, precise operation and maximum power transfer from your Centerforce clutch.

CENTERFORCE® LIMITED WARRANTY

Your CENTERFORCE® product is covered by the Limited Warranty explained below that gives you specific legal rights. This limited warranty is the only warranty Midway Industries, Inc. (hereafter "Midway" -the distributor/warrantor of these products) makes in connection with your purchase. Midway neither assumes nor authorizes any vendor, retailer or other person or entity to assume for it any other obligation or liability in connection with its products or this Limited Warranty.

What Is Covered? Subject to the terms, exclusions and limitations herein Midway warrants to the initial retail purchaser ("purchaser") only that when installed and used on purchaser's vehicle according to supplied product installation instructions, OE vehicle installation instructions, and/or warnings. The CENTERFORCE® product shall be free of defects in material and workmanship for NINETY (90 days) as measured from the date of initial retail purchase. This Limited Warranty is not transferable. **ALL OTHER EXPRESS OR IMPLIED WARRANTIES ARE HEREBY DISCLAIMED, INCLUDING BUT NOT LIMITED TO IMPLIED WARRANTIES OR MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.** Your warrantor for these parts is Midway Industries, Inc., 2266 Crosswind Dr., Prescott, AZ 86301. Midway reserves the right to: (a.) require proof of purchase as a condition of this Limited Warranty-please use warranty registration card, (b.) make future revisions to this product or its Limited Warranty without obligation to conform existing product or provide purchaser with prior notice.

What Is Not Covered? Your CENTERFORCE® Limited Warranty does not cover damage or claims to any component, vehicle or person other than the CENTERFORCE® product purchased. Your Limited Warranty does not cover damage or claims to any component, vehicle or person CENTERFORCE® determines to have been damaged by or subjected to:

- Installation or use not in accordance with CENTERFORCE® instructions or warnings, OEM installation and maintenance instructions, or accepted ASE guidelines.
- Damage in any part attributable to vehicle systems or components (including electronic stability control) or combination with non- CENTERFORCE® products.
- Normal wear and tear/product deterioration.
- Accidents, theft, vandalism or other negligent or intentional damage.

Remedy Limited to Repair / Replacement. The exclusive remedy provided for product covered under this Limited Warranty shall be, upon Midway's inspection and option, either repair or replacement (with CENTERFORCE® parts) of the defective part. Any parts repaired or replaced will be considered part of the original product and will not extend the term of Limited Warranty. Customers requesting warranty consideration should first contact Midway customer service (ph. 928/771-8422) to obtain a Returned Merchandise Authorization (RMA) number. All removal, shipping and installation costs are customer's responsibility.

Other Limitations - Exclusion of Damages - Your Rights Under State Law

• In consideration of the purchase price paid, neither Midway nor any independent distributor are responsible for any loss of use or time, rental costs, or for any incidental, consequential, punitive or other damages (whether arising in tort, contract or otherwise) you may have or incur in connection with your vehicle, or your CENTERFORCE® product. Your exclusive remedy hereunder is at Midway's option repair or replacement as described above.

• This Limited Warranty gives you specific rights. You may also have other rights that vary from state to state. For example, while all implied warranties are disclaimed herein, any implied warranty required by law is limited to the duration and other enforceable terms of Limited Warranty described above. Some states do not allow limitations of how long an implied warranty lasts and /or do not allow the exclusion or limitation of incidental or consequential damages, so the limitations and exclusions herein may not apply to you.
