## HOW TO MEASURE

For best results, have someone else take measurements. Measure body in underwear. Tape must be snug but not tight. If measurements fall between two sizes, order the larger size.

**HEAD**  
 Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

**CHEST/BUST**  
 Measure under your arms, around the fullest part of your chest.

**WAIST**  
 Measure around your natural waistline, keeping one finger between the tape and body.

**HIPS**  
 Across the fullest part of the seat.

**INSEAM**  
 Without shoes, from crotch to the floor.

**ARM LENGTH**  
 Let hands down the side in a slightly bent position. Measure from center back neck bone, along shoulder point and elbow, to bottom of wrist bone.

**GLOVES**  
 Measure palm width.

## WHAT CODE REPRESENTS YOUR SIZE?

1. Find your size.
2. The corresponding code is THE CODE you use to complete the part number on your order.  
 Example: 440 227\_\_90  
 Size: M = Code 06  
 Therefore 440 227 06 90

For tall sizes, look for the "T" next to the size. Example: "MT" stands for Medium Tall.

# USING THE RIGHT OIL MATTERS

The right oil delivers:

**THE BEST PERFORMANCE  
THE BEST RELIABILITY  
THE LONGEST LIFE**

It's a balancing act to deliver all three attributes – and only XPS, with its custom blend formulations and carefully matched additives, is specifically designed to do just that in a Rotax engine.

**“THE BEST OIL IS THE OIL THAT WAS SPECIFICALLY DESIGNED FOR THE ENGINE, WITHOUT COMPROMISING THE ENGINE.”**

Mischa Zimmermann  
Project Leader Engine Development, BRP

### DOES ONE OIL FIT ALL?

Our efficient, high-output engines place strong demands on engine oil. At BRP, we treat oil like an actual mechanical part that is developed concurrently with our latest high-performance engine technology.

### XPS 4-STROKE OILS

**Fact:** XPS 4-stroke oils are BRP engineer-certified for unmatched lubrication, the right torque and friction transfer characteristics for Spyder's manual and semi-auto clutches, the right viscosity to best protect our engines from startup to operating temperatures, and they all have extra corrosion protection to better safeguard your engine when stored or when riding in harsh conditions. Also, XPS has been proven to withstand the Rotax 1330 ACE 9,300-mile (15,000 km) extended drain interval.

### WHY CHOOSE XPS 4-STROKE ENGINE OILS INSTEAD OF LOWER-COST ALTERNATIVES?

BRP engineers and experts like Mischa Zimmermann have proven repeatedly that other brands of oil don't meet the high standards BRP desires for Spyder engines.

- Each vehicle manufacturer establishes their own lubrication standards and test criteria to validate OEM oil – this means XPS achieves a much higher standard than a typical powersports or motorcycle oil.
- Even oil that is more expensive than XPS will not have the same custom-matched engine and tuned clutch performance for Rotax engines and transmissions. Other oil – even premium aftermarket motorcycle oil – has caused premature clutch wear.
- Our oil is tested on the whole lineup of vehicles and engines we manufacture – not just one or two models. Our specific testing includes real world test miles to ensure XPS meets our performance requirements as opposed to relying only on generalized, minimum specifications that most aftermarket oil brands use.

### AREN'T THERE OTHER HIGH QUALITY OILS ON THE MARKET?

Yes. But no other oil is designed as an actual mechanical part during engine development like XPS. Your satisfaction matters.
