2018 CABIN AIR FILTER COVERAGE CHART

Finding the right Cabin Air Filter just got easier. Our Cabin Air Filter catalog is sorted by All Makes, Location and GM Filters.

The recommended change interval for GM vehicles is 22,500 miles. See specific Owner's Manuals for recommended intervals for other makes and models.

GM OE AND PROFESSIONAL CABIN AIR FILTERS

ACDelco Cabin Air Filters are specifically engineered to help provide cleaner air from the outside into the vehicle. As air passes through the filter's electrostatic multilayer inserts, up to 95% of dirt, dust, pollen and other unwanted pollutants (down to 10 microns in size) are caught before entering the cabin through the fresh-air inlet.* The result is cleaner air entering the cabin. When a cabin air filter requires replacement, choose an ACDelco General Motors Original Equipment (GM OE) or Professional Cabin Air Filter.

GM OE FEATURES & BENEFITS

- Multi-layer compound media captures large and small particles and provides strength and stability.
- Layered construction creates "separated" media, which contains dust and pollen particles, resulting in higher efficiency.
- GM-recommended replacement parts for GM vehicles' original factory components
- The quality, reliability, and durability of GM OE
- Manufactured to GM OE specifications for fit, form, and function

**24 MONTH/
UNLIMITED
MILE
LIMITED WARRANTY**

*Recirculating air or air entering the vehicle through means other than the fresh air inlet is not filtered by a cabin air filter.

PROFESSIONAL FEATURES & BENEFITS

- Highly durable and reliable
- Advanced filter media technology helps keep certain pollutants from entering the interior cabin
- Helps remove most allergens from air entering the ventilation system
- Helps keep bacteria and mold from growing inside the ventilation system
- Available in both carbon and non-carbon paper media
