Bringing light to life has been our passion for over 75 years.

So, why skylights?

In 1942 in the Danish city of Copenhagen, a young engineer came up with the idea to transform dark, empty attics into bright living spaces. This idea developed into the first handcrafted, no-leak roof window, which became the foundation for VELUX to grow into the number one skylight company in the world.

At VELUX, we believe homes full of light are homes that are full of life, that daylight is powerful and fresh air is invigorating. Together, they improve our general health and well-being, decrease our dependence on electricity, and give functionality back to our space. Able to fit just about anywhere in your home, VELUX skylights deliver unmatched quality, beautiful results, and a brighter home for your family.

We often ask, "Why skylights?" But with endless reasons to install one, the question becomes more, "Why not skylights?"

VELUX®

Skylights Made for Florida and the Gulf Coast

WEATHERS THE WEATHER — WHATEVER THAT WEATHER MAY BE!

From hurricanes to sunny days, the Florida and Gulf Coast region is the ultimate challenge for any skylight. Except VELUX. Through extensive product research and development and countless product testing, these handcrafted skylights are designed to withstand the elements.

The Glass in Our Skylights

LoE³-340 Glass

We specifically picked LoE³-340 glass for our skylights installed in the Florida and the Gulf Region because of the glass' unprecedented design and superior performance.

LoE³-340 glass provides optimal year-round comfort for your home located in the sunny coast. This glass features a low SHGC (Solar Heat Gain Coefficient) which greatly reduces oppressive solar heat gain without compromising on clear sky views. Even more, because of its top solar

control, glare and fading in your home is minimized and almost eliminated. And if concerned about heat loss in the cooler months, LoE³-340 glass has a low U-Factor that prevents heat from escaping through the pane.

It's time to look no farther. LoE³-340 glass in your VELUX skylight is made to weather the weather -whatever that weather may be!

Understanding Sun Protection LoE³-340 Glass

Solar Heat Gain Coefficient

is the level of solar heat blocked by the skylight. A lower SHGC means less heat is transmitted into your home.

LoE³-340 SHGC 0.18

Ultraviolet Light (UV)

is the energy measurement associated with fading materials and furnishings. A lower UV is best.

LoE³-340 UV 0.20

Light to Solar Gain (LSG)

is the ratio of visible light transmittance to SHGC. A higher LSG is better for controlled light transmittance.

LoE³-340 LSG 2.17

Go Solar, Save Big!

The Sun provides us with more energy in a single hour than the entire world uses in a year. So, why depend on energy from anywhere else?

When you Go Solar by purchasing VELUX solar-powered products for your home, you are eligible for a federal solar tax credit on the entire cost of your products and installation. Just ask for the Go Solar option with your skylight to save big!

Eligible for
Federal Solar Tax Credit
on product and installation¹

Bringing light to life™

For more than 75 years, VELUX has had a passion for bringing light to life through skylights. And now we're happy to serve the Gulf Region. We're ready to show you how our skylights will weather the Florida weather, whatever that weather may be!

VELUX®

The VELUX Group creates better living environments with daylight and fresh air through the roof. The VELUX product program contains a wide range of roof windows and skylights, along with solutions for flat roofs. The Group also supplies many types of decoration and sun screening, roller shutters, installation products, products for remote control for installation in roofs. The VELUX Group, which has manufacturing companies in 11 countries and sales companies in just under 40 countries, represents one of the strongest brands in the global building materials sector and its products are sold in most parts of the world. The VELUX Group has about 10,000 employees and is owned by VKR Holding A/S, a limited company wholly owned by foundations and family. For more details, visit velux.com.
