

# *2020 Nursing Informatics Workforce Survey*

May 2020

# *2020 HIMSS Nursing Informatics Workforce Survey*

**Since 2004**, HIMSS has surveyed the nursing informatics community to better understand the **functions, responsibilities, and compensation** related to this role.

In 2020, **more than 1,300 nurse informaticists** provided information about their current positions and their career trajectories, making this the most comprehensive view of the community to date.

# *Nursing Informatics Workforce Survey*

## *Overview*

- **As with previous years, an online survey was used to collect this data. Nurse informaticists were invited to participate during November and December of 2019. Invitations were sent by HIMSS and by organizations that sponsored and supported this research. These organizations include:**
  - Alliance for Nursing Informatics, American Nurses Association, Association of periOperative Registered Nurses, American Society of PeriAnesthesia Nurses, American Nursing Informatics Association, American Organization for Nursing Leadership, Oncology Nursing Society
- **1,359 nursing informaticists provided responses during this data collection period.**
  - The 2017 survey received 1,279 responses, the 2014 survey received 1,047, and the 2011 survey received 660.
- **To reflect current workforce trends, new questions and response options were added in 2020.**
- **This report includes a written executive summary and detailed information about nurse informaticists' functions, responsibilities, and compensation.**

# Executive Summary

## OVERVIEW

Building upon research that began in 2004, the HIMSS 2020 Nursing Informatics Workforce Survey continues to show that nurse informaticists play a crucial role in healthcare. As we celebrate the International Year of the Nurse and Midwife, it is a unique opportunity to recognize the increasing importance of the nurse informaticist. They are the driving force behind health innovation & technology to realize the full health potential of every human, everywhere.

2020 HIMSS Nursing Informatics Committee

# Executive Summary

% based on survey respondents

## 1

### Workplace

- Over two-thirds (68%) work for a hospital or multi-facility health system.
- 94 respondents from global audience outside of the U.S.
- Significant change in reporting structure, with more nurse informaticists reporting to Nursing (42%), Quality (12%) and Operations (9%) over the historical trend of reporting to IT (48%).

## 2

### Title, Education, Training

- CNIO/Senior Nursing Informatics Officer title continues to advance with 41% reporting that their organization had the formal role.
- Uptick in the percentage (66%) with a master's degree
- Certification took a significant jump from 49% in 2017 to 58% in 2020.

## 3

### Salary and Satisfaction

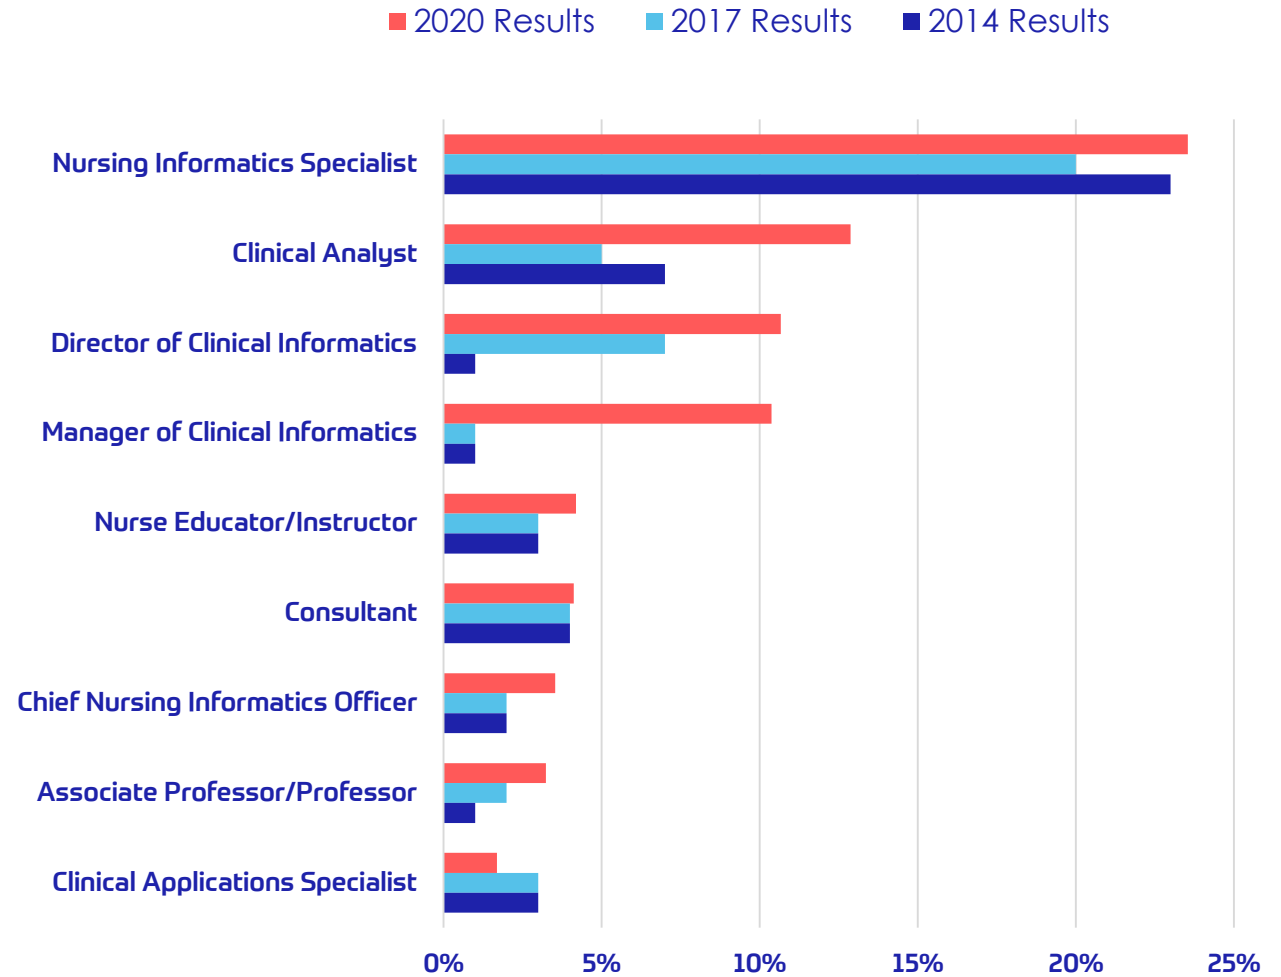

- (63%) stated they earn a base annual salary between \$61,000 and \$115,000.
- Overall, respondents seem to have remained quite satisfied with their choice of career in informatics but not as satisfied with the current position they hold.

# *Nurse Informaticists Overview*

# Job Title

## NEW JOB TITLES BEING USED

While Nursing Informatics Specialist (24%) remains the most common title, Clinical Analyst (13%), Director of Clinical Informatics (11%), and Manager of Clinical Informatics (10%) are increasingly being used.

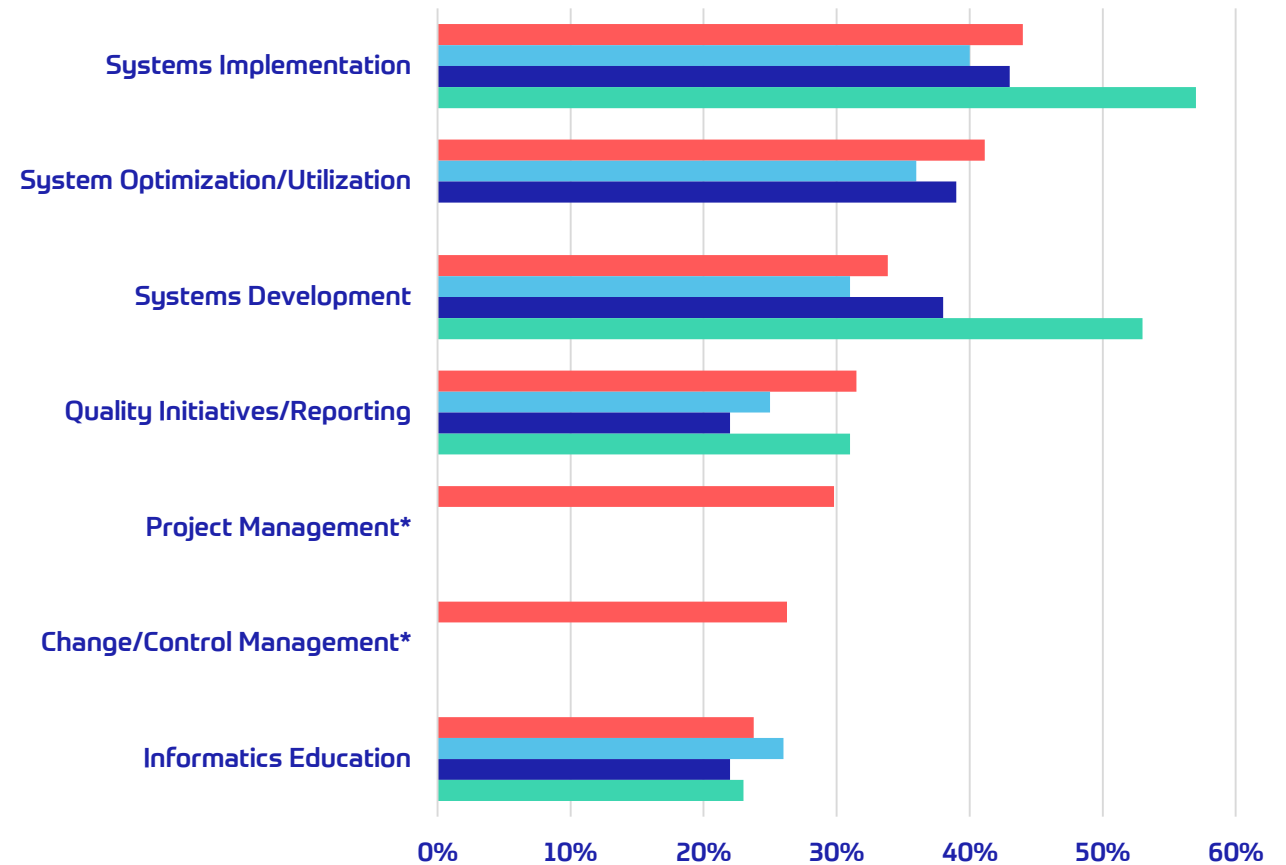

# Job Responsibilities

## RESPONSIBILITIES REMAIN CONSISTENT

Systems Implementation (44%), System Optimization/Utilization (41%), Systems Development (31%), and Quality Initiatives/Reporting (31%) are the top four job responsibilities for nurse informaticists.

2020 Results 2017 Results 2014 Results 2011 Results

# Primary Workplace

## WORKPLACE REMAINS CONSISTENT

Hospitals and health systems (68%) remain the most common primary workplace for nurse informaticists.

# Applications Developing, Implementing, or Optimizing

## APPLICATIONS ARE SLOWLY SHIFTING

Nurse informaticists are increasingly working with Point-of-Care CDS (44%) and decreasingly working with Nursing Clinical Documentation (67%).

■ 2020 Results ■ 2017 Results ■ 2014 Results ■ 2011 Results

# *Job Satisfaction in Current Position*

SATISFACTION REMAINS HIGH,  
BUT DECLINING SLIGHTLY

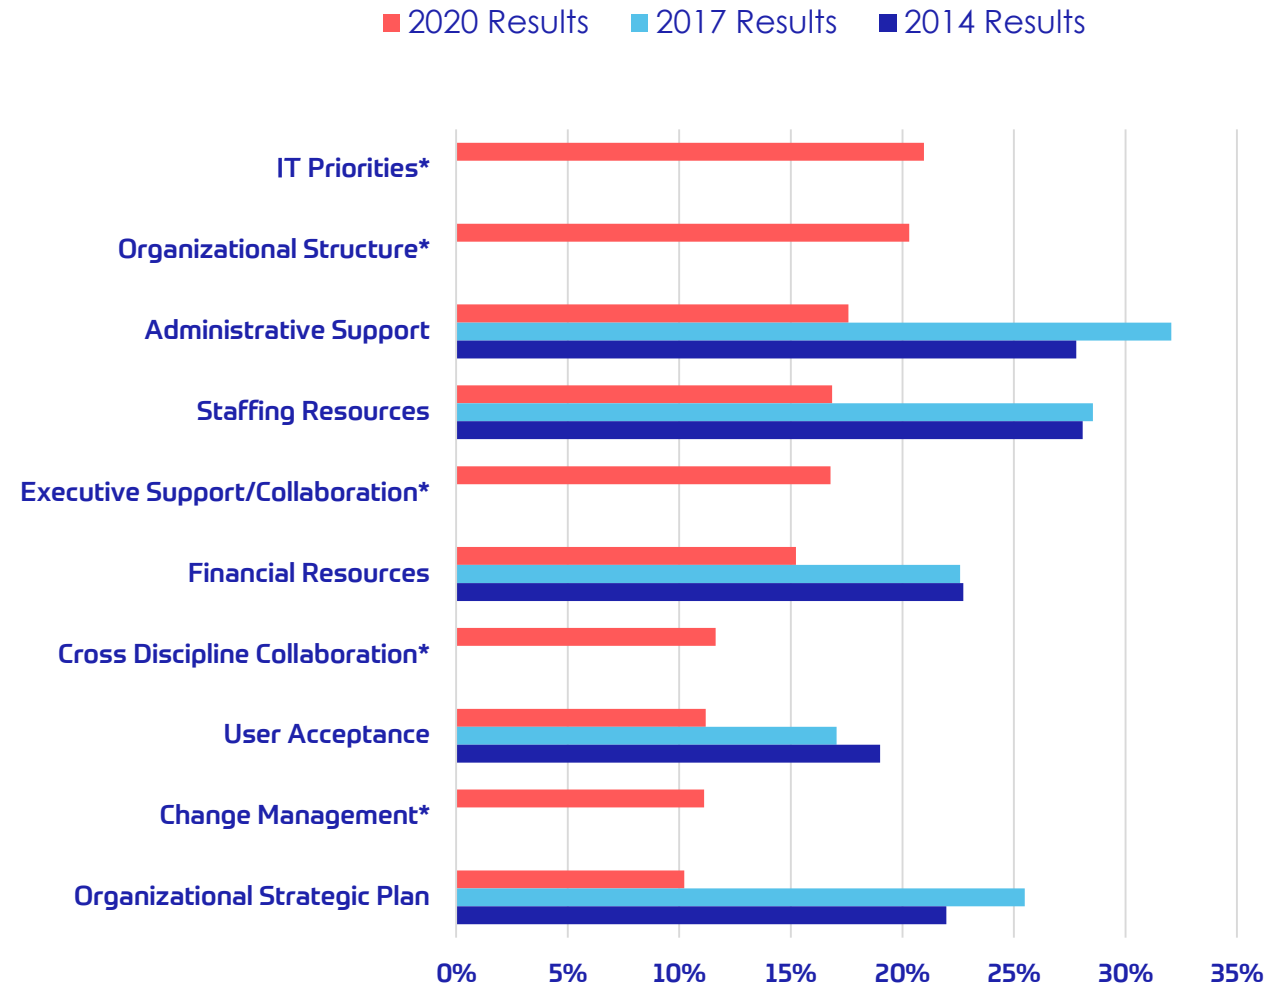

51% are highly satisfied with their current position, a slight decline from 58% in 2017 and 57% in 2014.

# Top Barriers to Success

## BARRIERS TO SUCCESS ARE VARIED

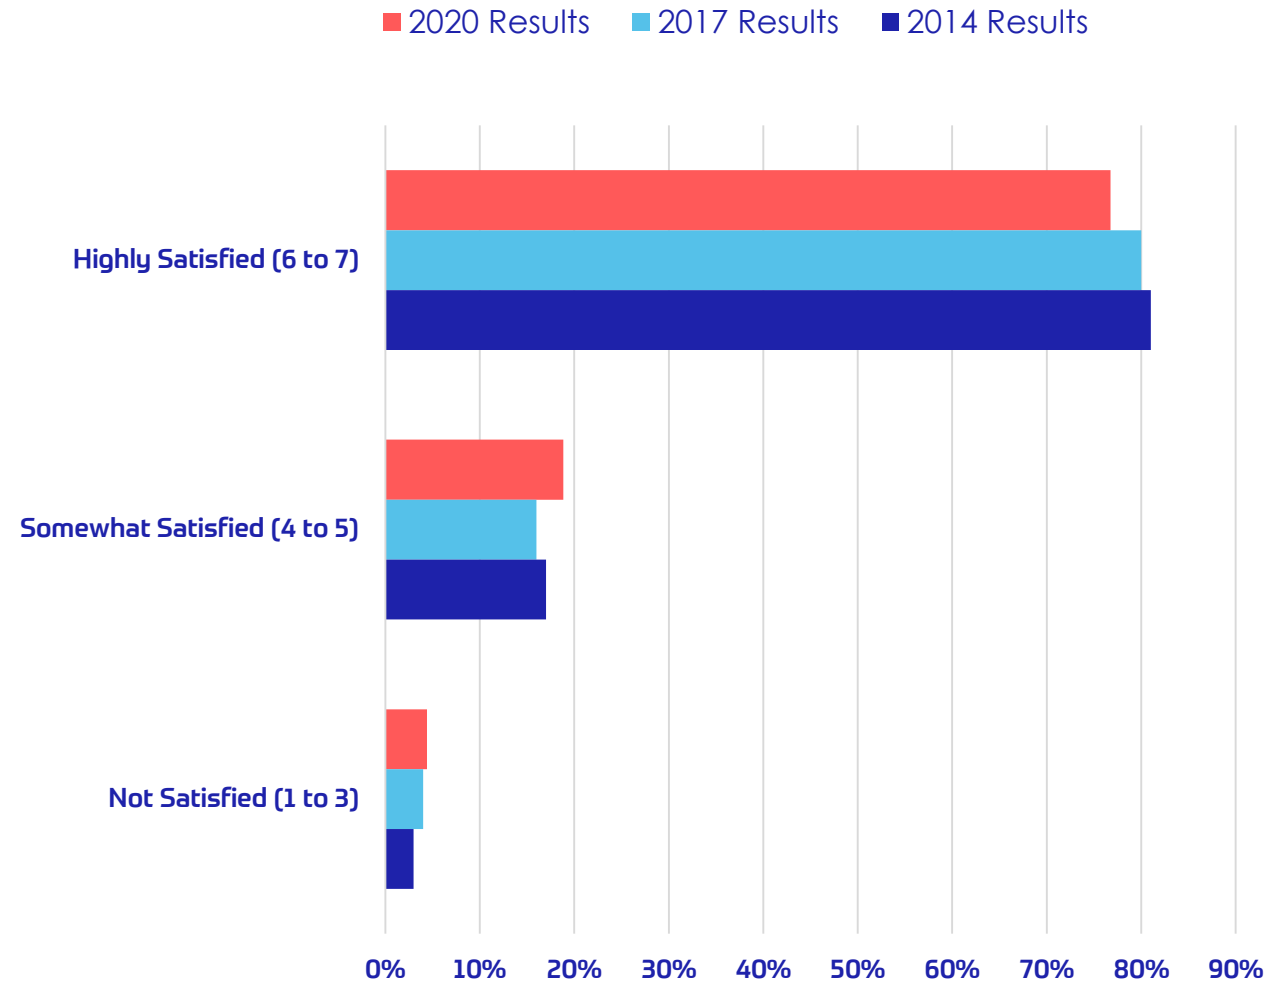

IT Priorities (21%), Organizational Structure (20%), and Administrative Support (18%) are the top three barriers to success in 2020.

# *Satisfaction with Informatics Career Choice*

## CAREER SATISFICATION IS HIGH

While only half are highly satisfied with their current position, more than 3-in-4 are highly satisfied with their career choice overall.

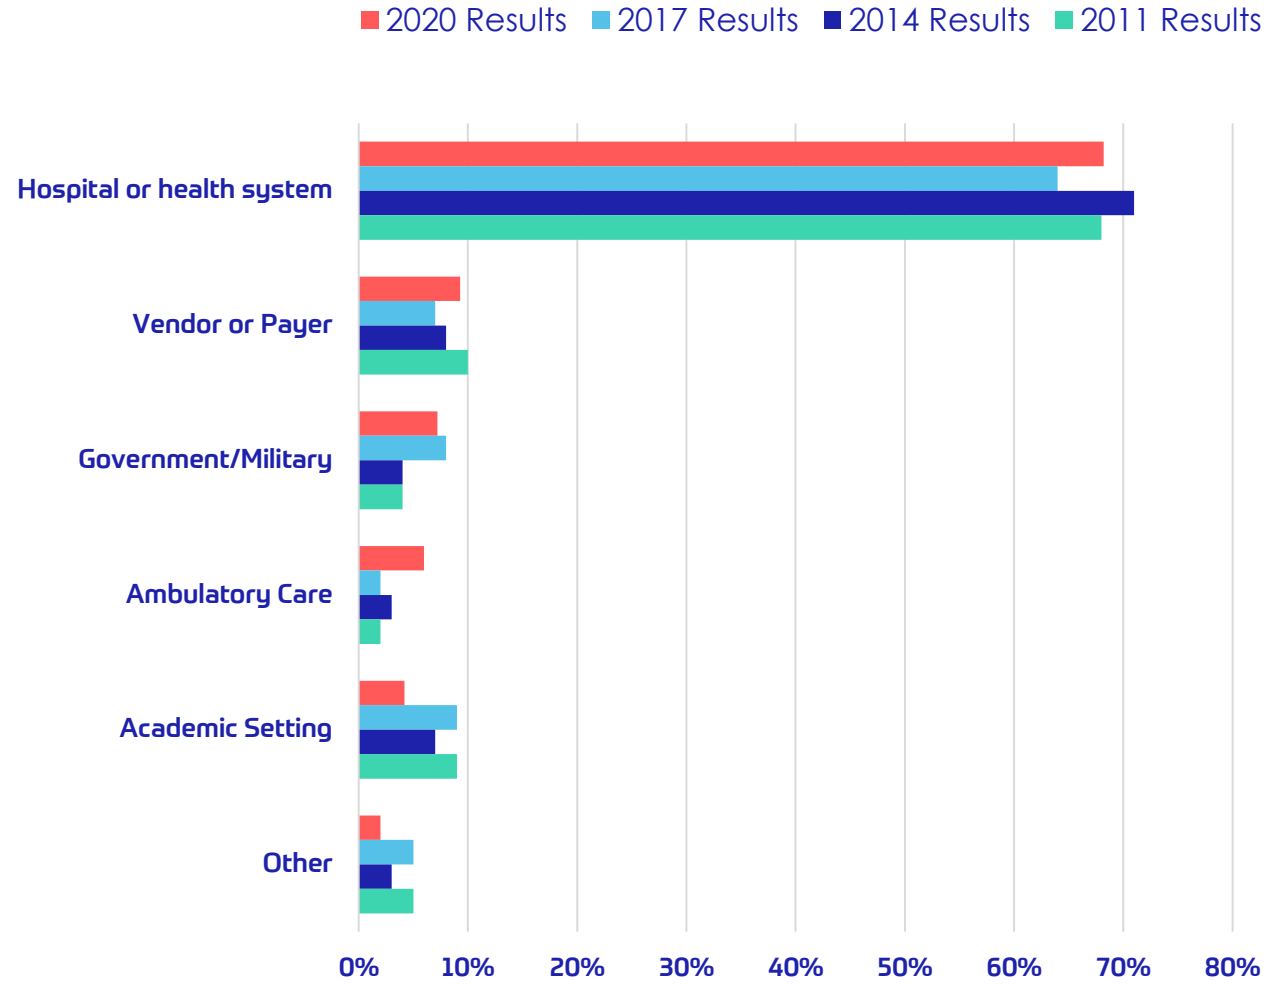

*Focus:*  
*Nursing Informatics*  
*Workplaces*

# Primary Workplace

## HOSPITAL OR HEALTH SYSTEM IS TOP

As with all previous years, the vast majority of nurse informaticists have a primary workplace that is a hospital or health system (68%).

# Magnet Status

## MAGNET STATUS MORE COMMON

Just over half work in health systems with at least one hospital designated with Magnet Status (53%), this is up from 41% in 2014.

# *Health System is Stage 6 or 7 EMRAM*

## MANY WORK AT TOP-RATED HEALTH SYSTEMS

Among nurse informaticists who know the EMRAM status of their health system, 64% work at a health system which has received a stage 6 or 7 EMRAM rating.

# *Health System is Davies Award Recipient*

## DAVIES AWARD GAINING TRACTION

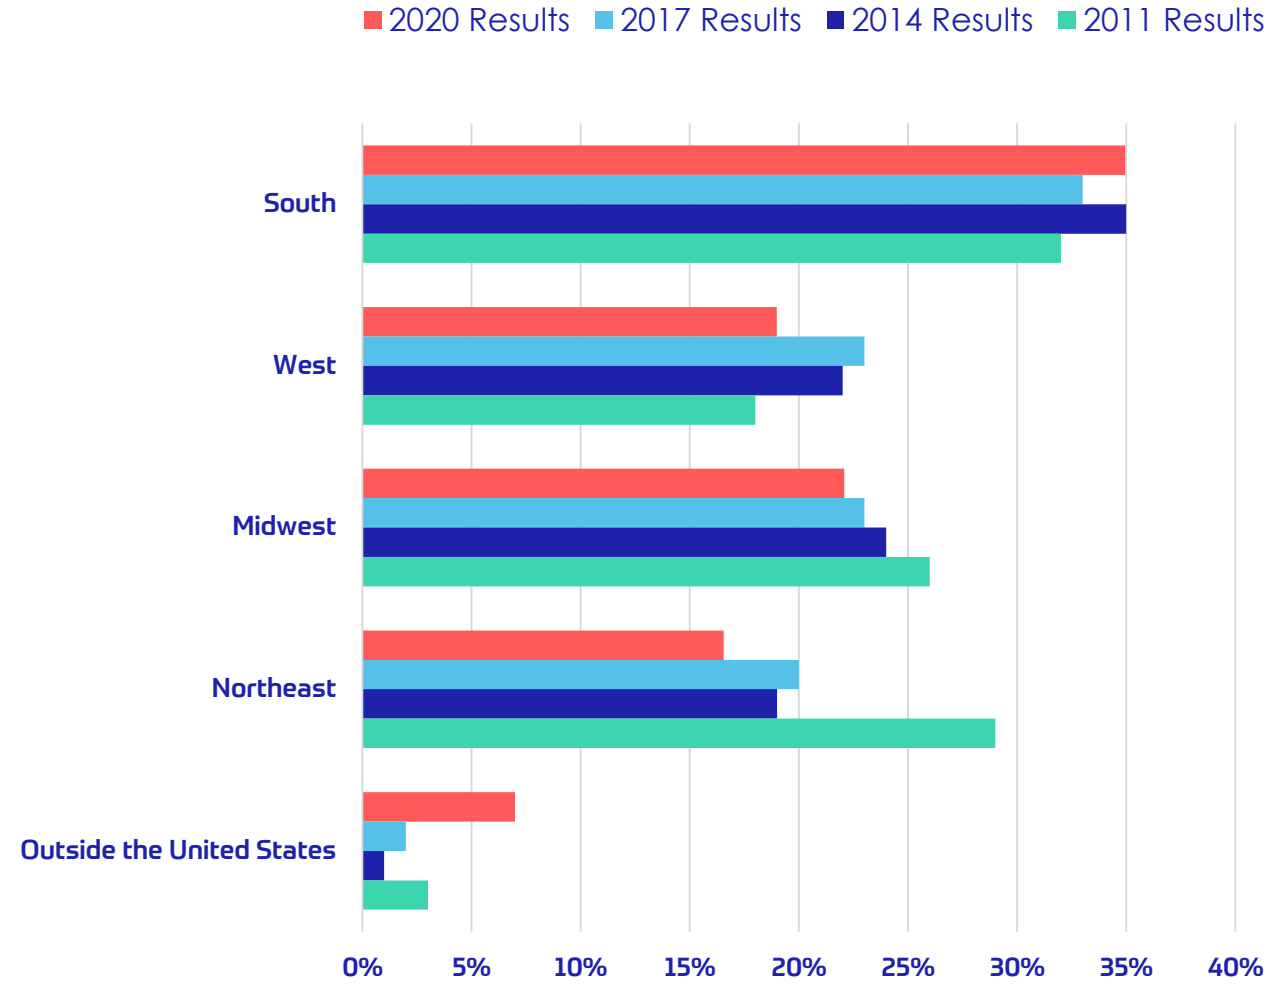

Among nurse informaticists who know the Davies Award status of their health system, 24% work at a health system which has received a Davies Award.

# Geographic Region

## GLOBAL REACH INCREASING

Distribution of nurse informaticists across the United States in 2020 roughly matches the distribution of the population. 94 respondents outside of the U.S.

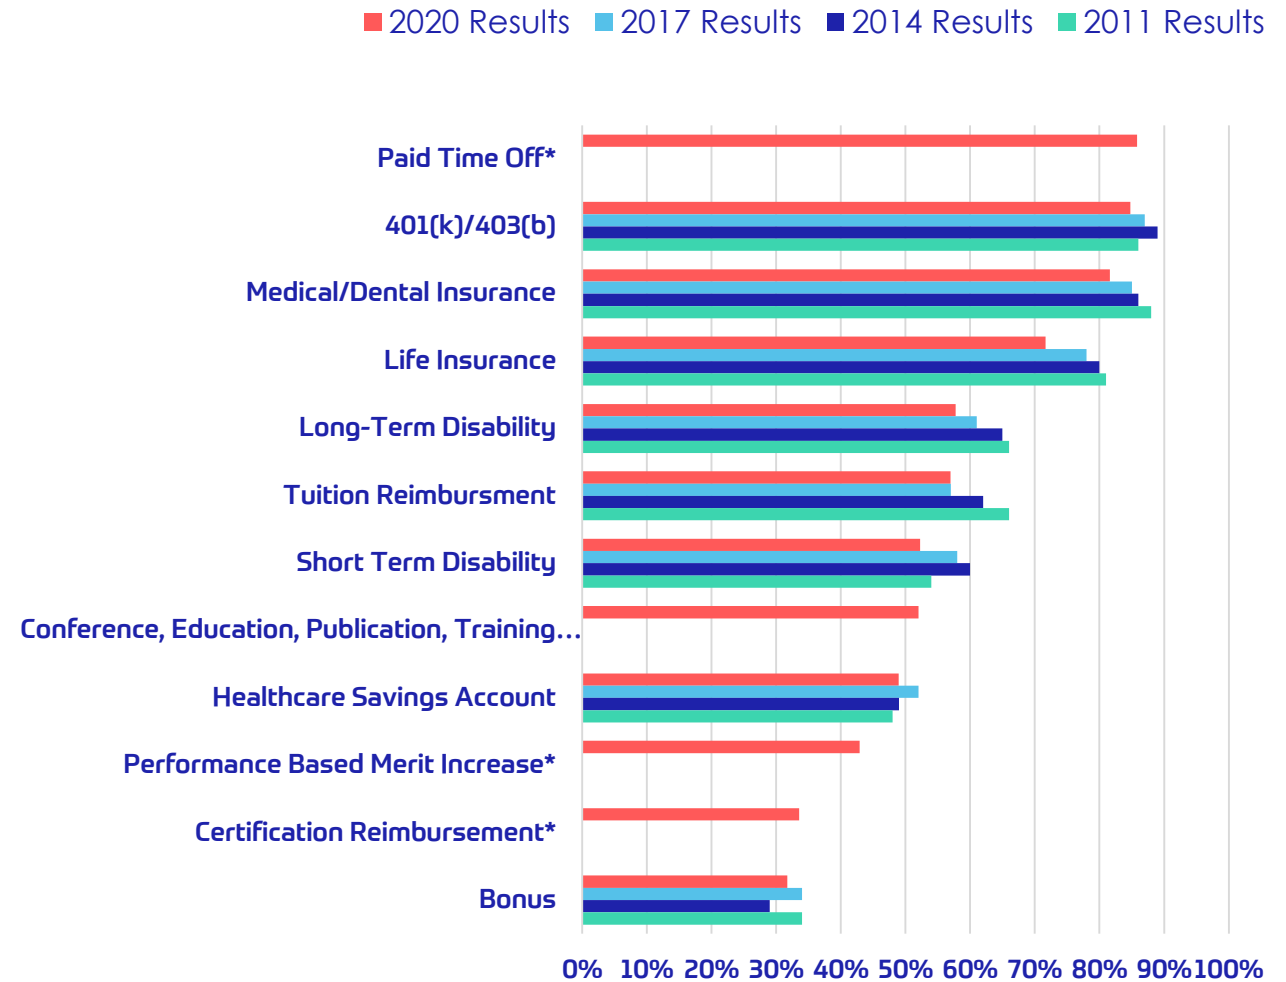

# *Focus: Compensation*

# Benefits and Non-Salary Compensation

PTO, 401k, INSURANCE MOST COMMON

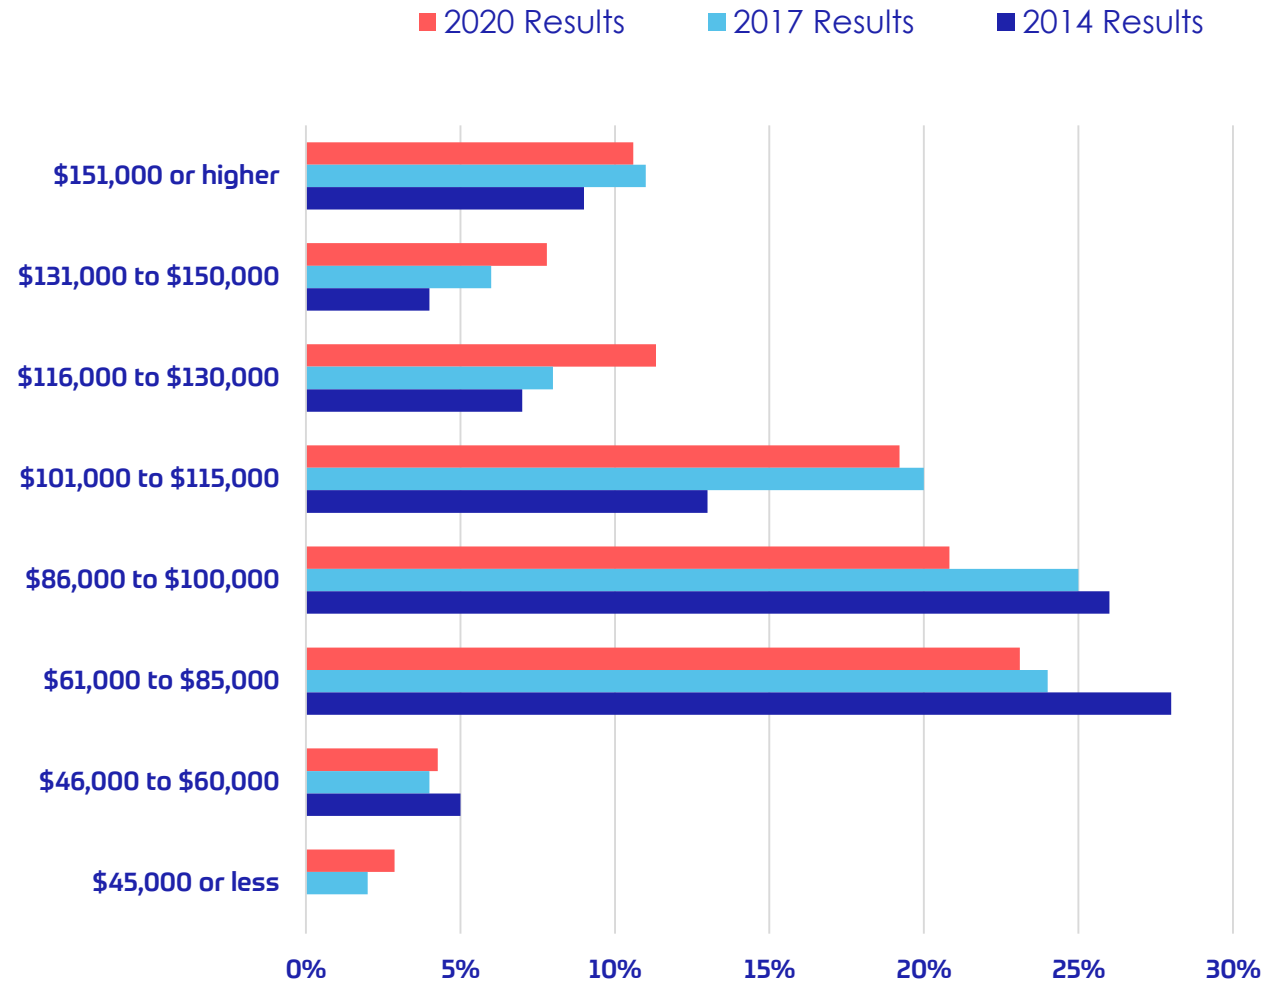

More than 70% receive each of the following benefits: paid time off (86%), 401k/403(b) (85%), medical/dental insurance (85%), and life insurance (72%).

# Salary

## SALARIES ARE INCREASING

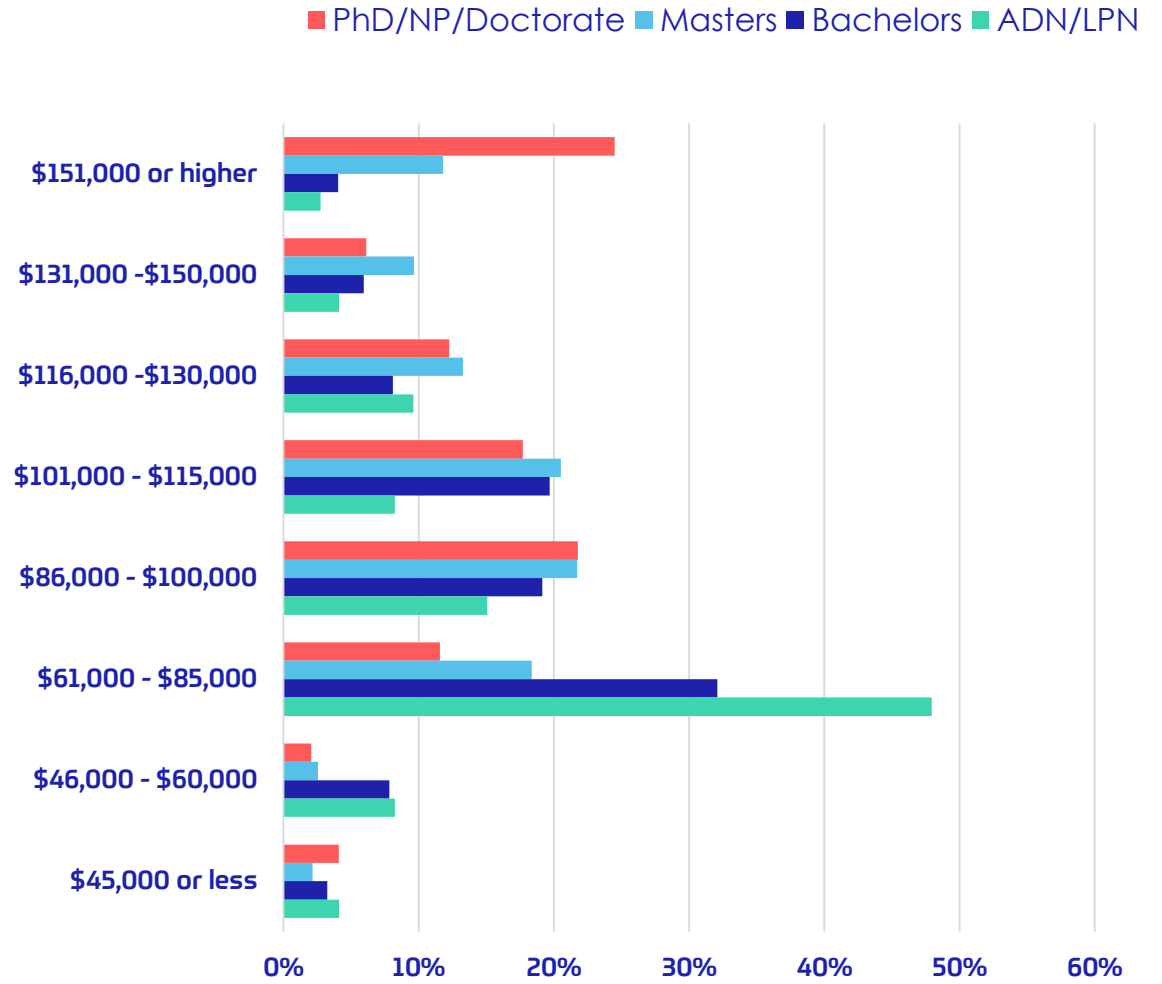

In 2020, 49% of nurse informaticists report a salary greater than \$100,000. This is up from 45% in 2017 and 33% in 2014.

# Salary by Highest Level of Education

## HIGHER EDUCATION TRACKS WITH SALARY

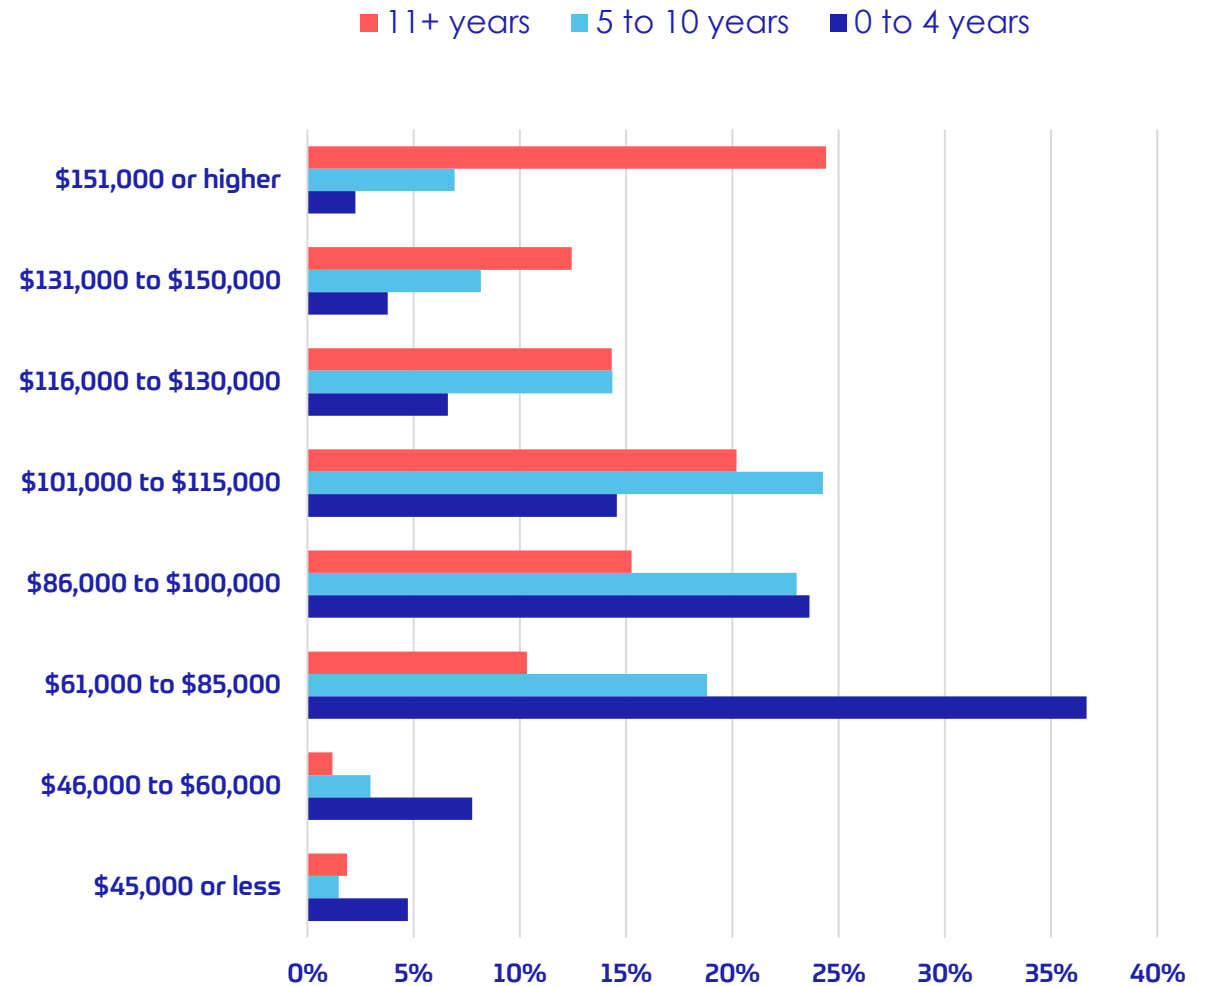

Nurse informaticists with higher levels of formal education tend to have higher salaries— 61% of PhD or equivalent degree holders have a salary over \$100,000, compared to just 25% of those with an ADN/LPN.

# Salary by Years of NI Experience

## HIGHER SALARY WITH EXPERIENCE

Nurse informaticists with more experience tend to have higher salaries. 71% with 11 or more years of experience have a salary greater than \$100,000, compared with 27% of those with less than 5 years of experience.

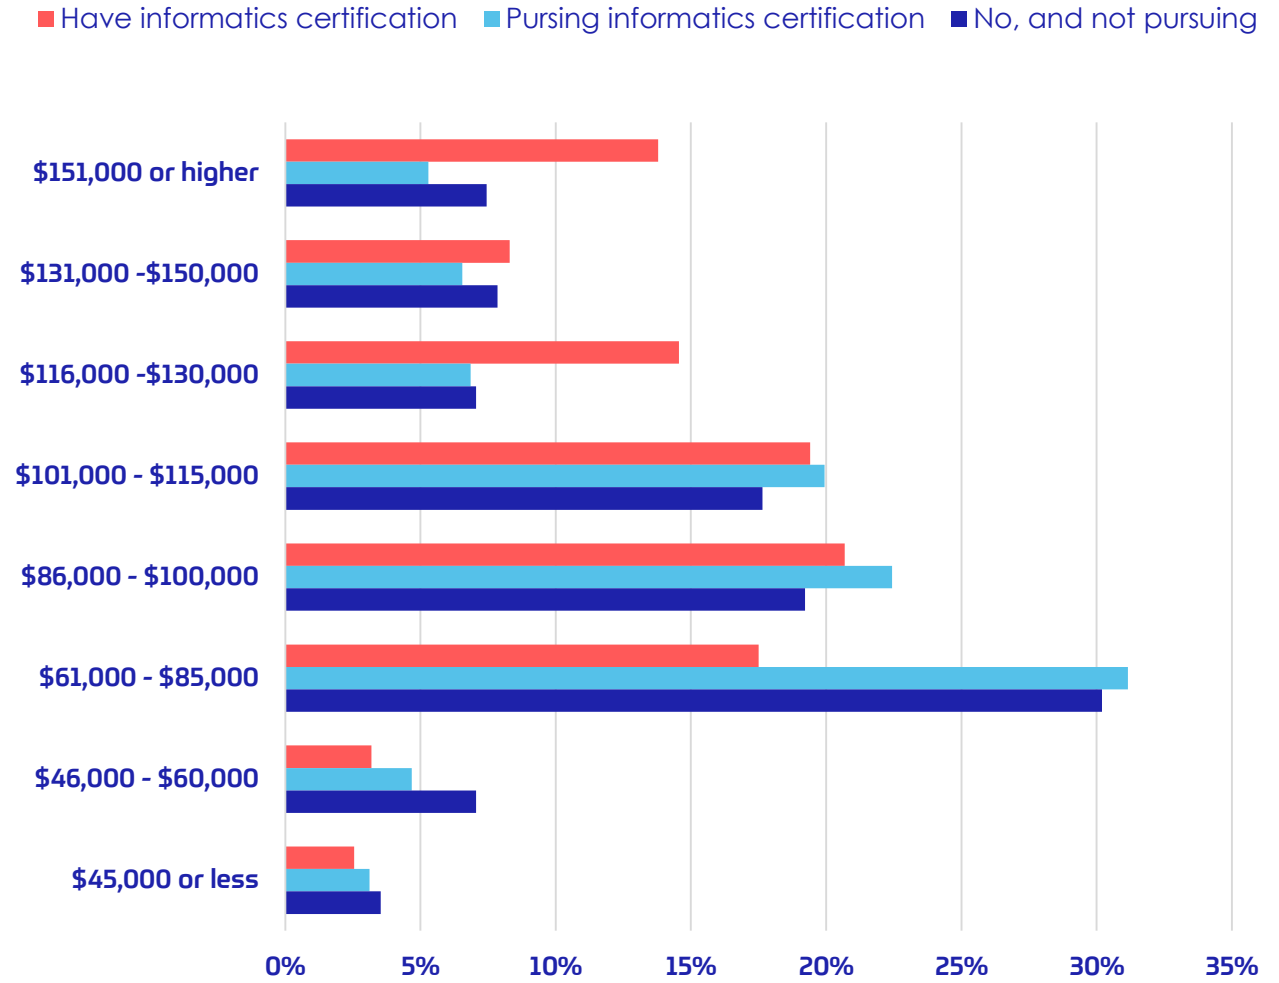

# Salary by Informatics Certification

## HIGHER SALARY WITH CERTIFICATION

56% of nurse informaticists who hold certification in informatics have a salary greater than \$100,000, compared with 39% of those pursuing certification and 40% of those not pursuing certification.

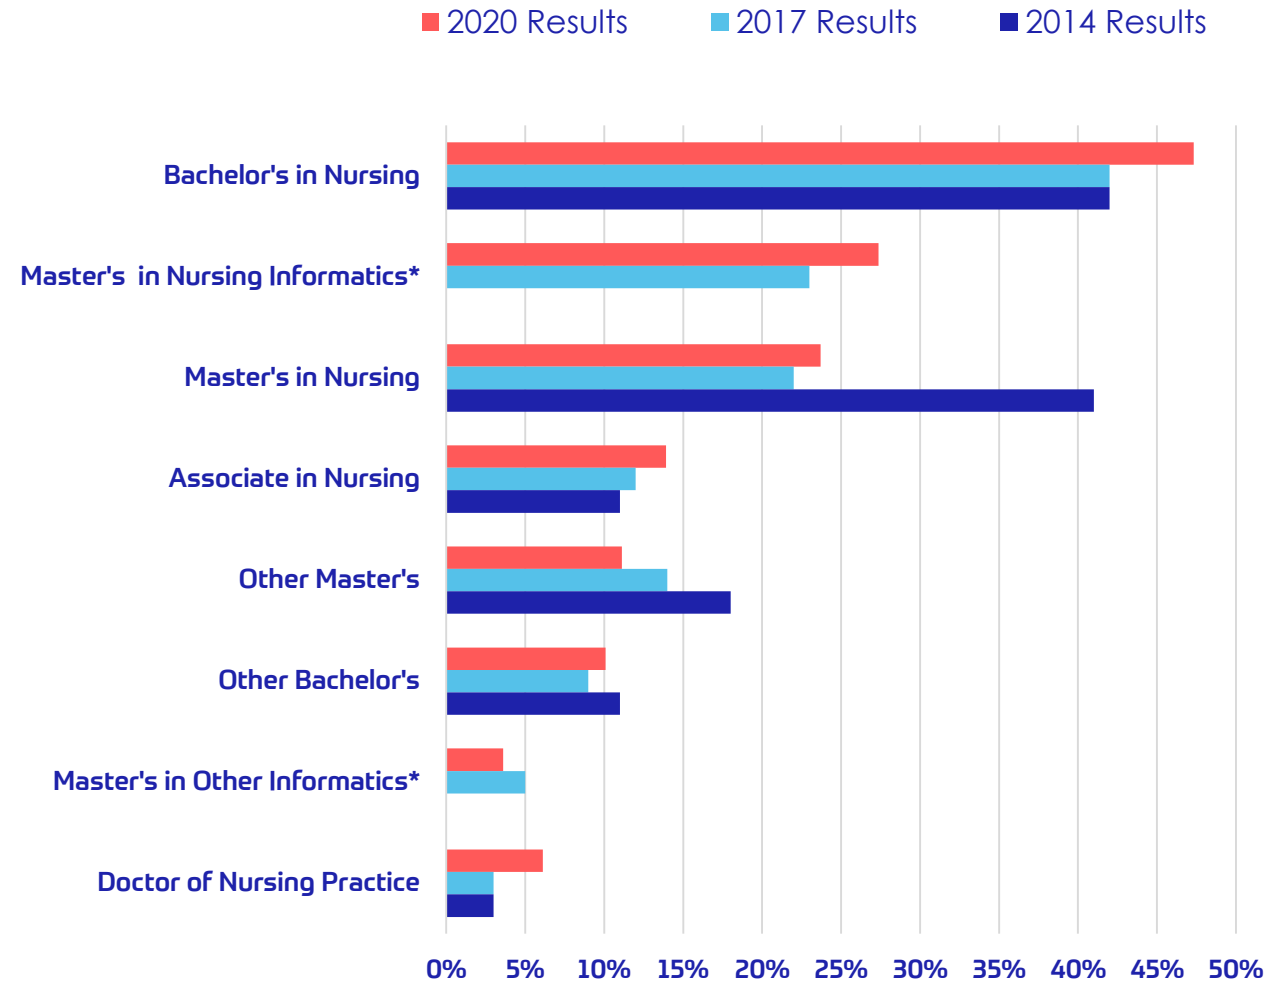

***Focus:  
Education and  
Experience***

# Nursing Education

## ADVANCED DEGREE INCREASING

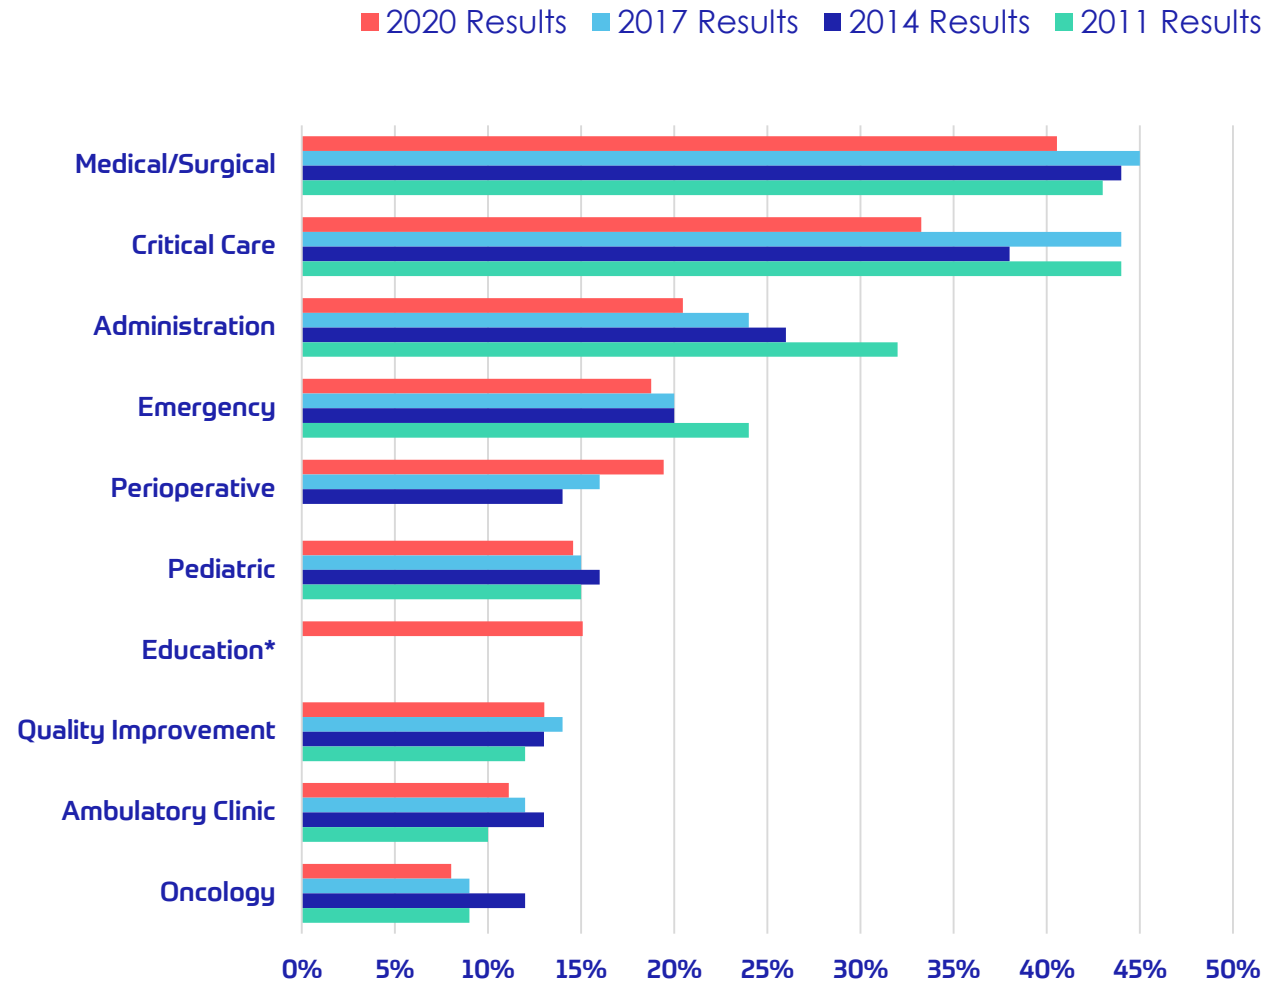

47% report having a Bachelor's in Nursing, followed by 27% with a Master's in Nursing Informatics and 24% with a Master's in Nursing. 66% have any Master's degree in 2020, comparable to 64% in 2017.

# Nursing Background

## SLIGHT SHIFT IN BACKGROUND

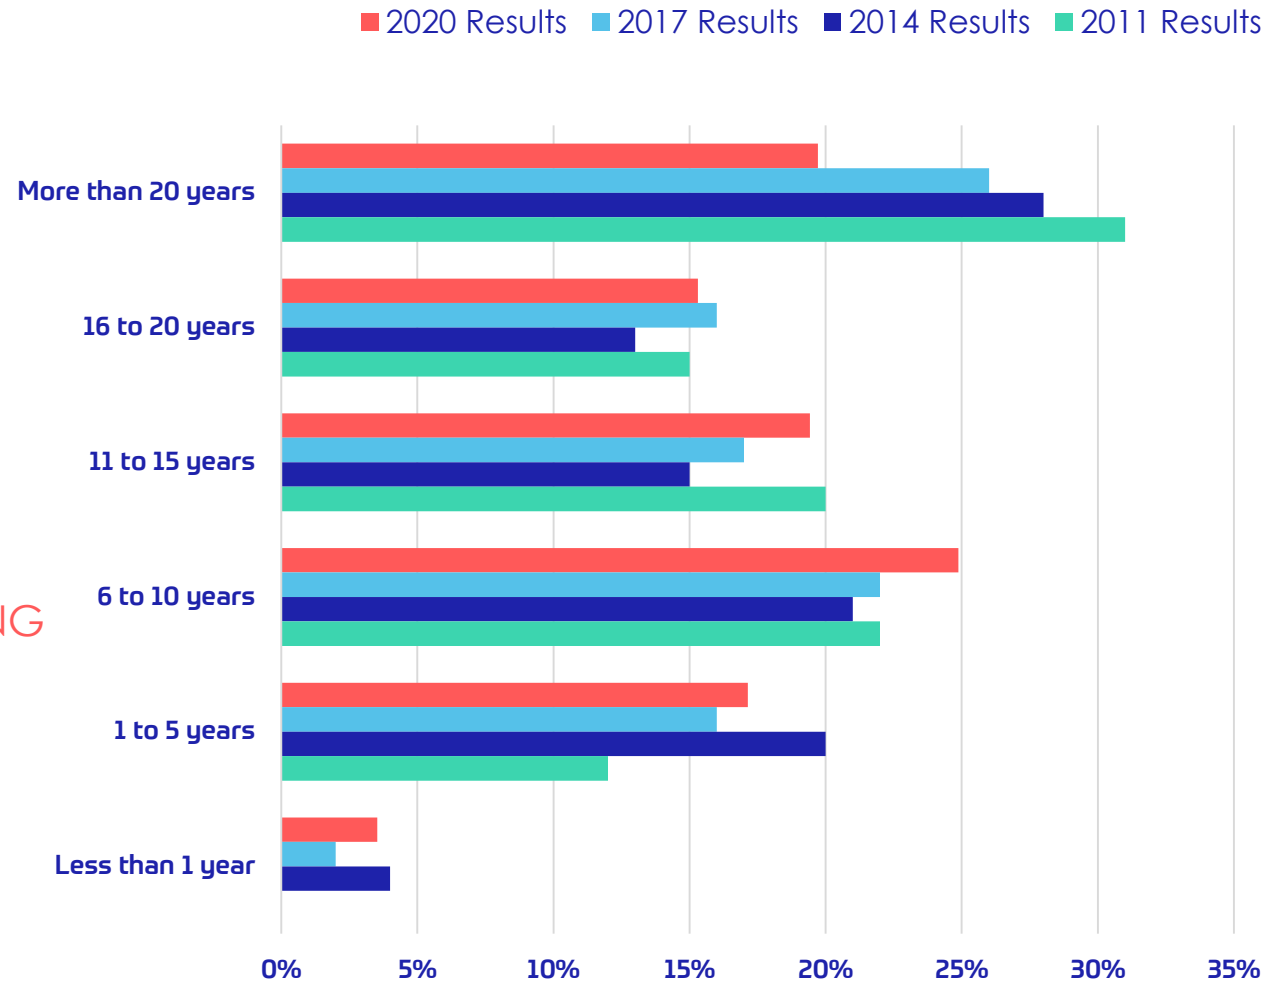

While top areas of experience remain consistent, nurse informaticists are showing an increasing nursing background in perioperative care and a decrease in administration, emergency care.

# Years of Clinical Experience

## YEARS of CLINICAL EXPERIENCE DECREASING

Just 20% of nurse informaticists have more than 20 years of clinical experience, compared with 31% in 2011.

# Years of Informatics Experience

## INFORMATICS A GROWING FIELD

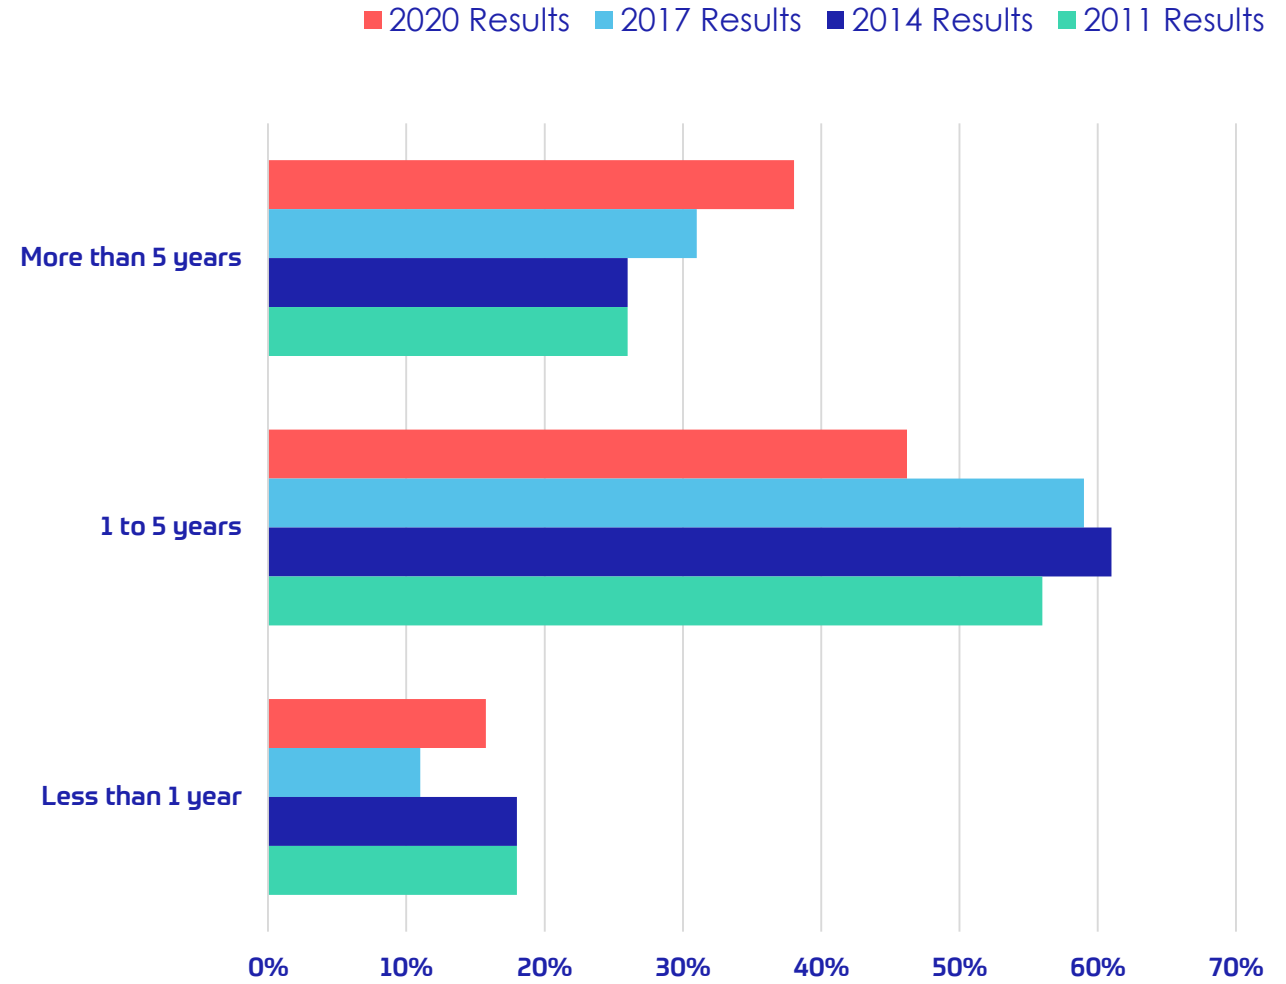

Similar to years past, 61% of nurse informaticists have more than 5 years of experience in informatics.

# Years in Current Role

## LONGER TENURE IN ROLES

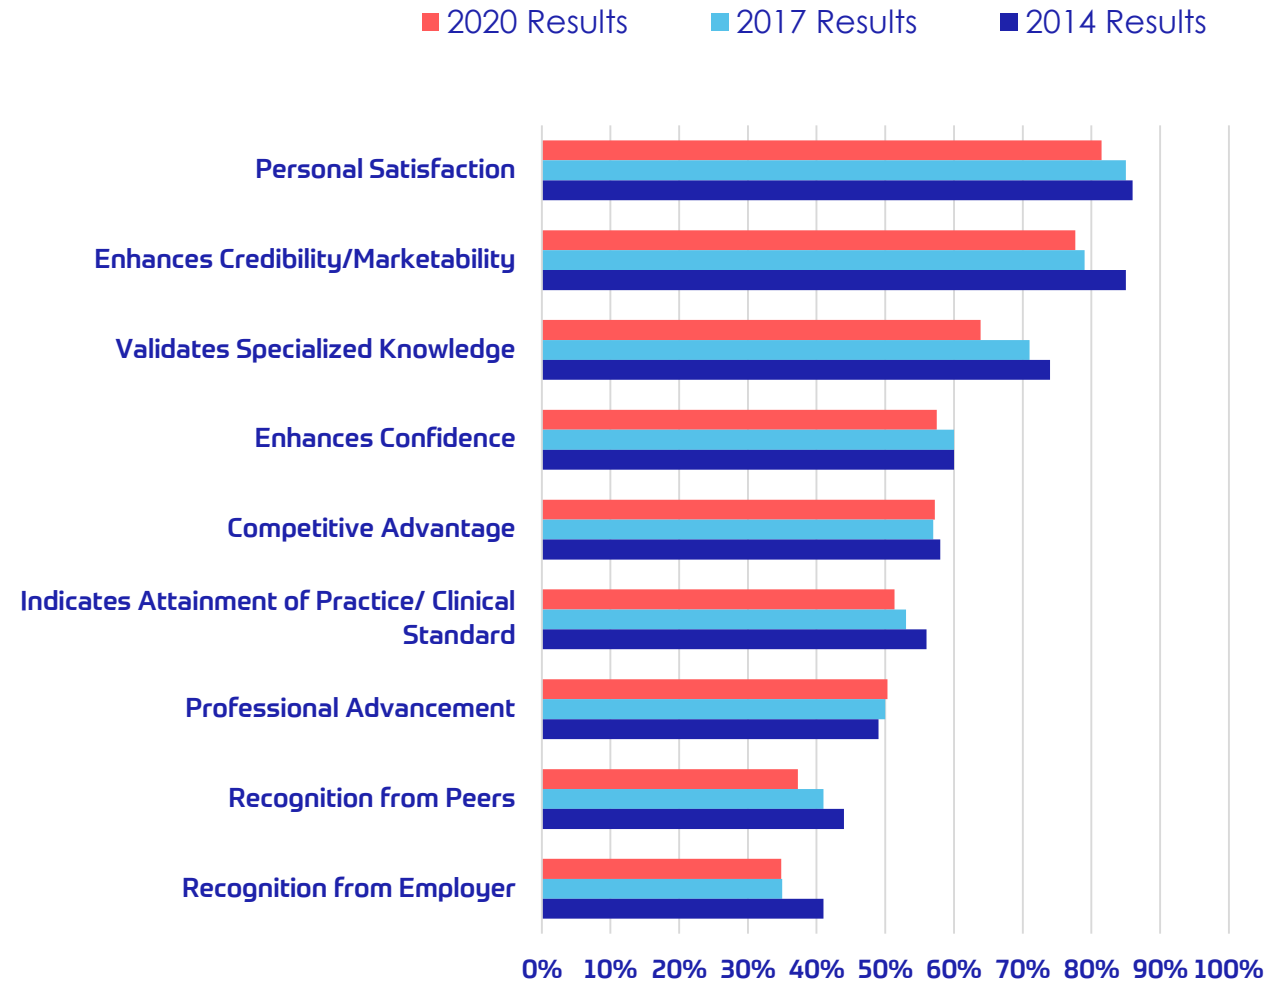

In 2020, 38% have been in their current role for longer than 5 years, this is an increase from 26% in 2011.

# Perceived Value in Holding Certification

## CERTIFICATION VALUES ARE CONSISTENT

As seen in prior years, personal satisfaction (81%), credibility (78%), and validation of specialized knowledge (64%) are top three values seen in certification.

# Impact of Certification on Career Path

## CERTIFICATION IS IMPACTFUL

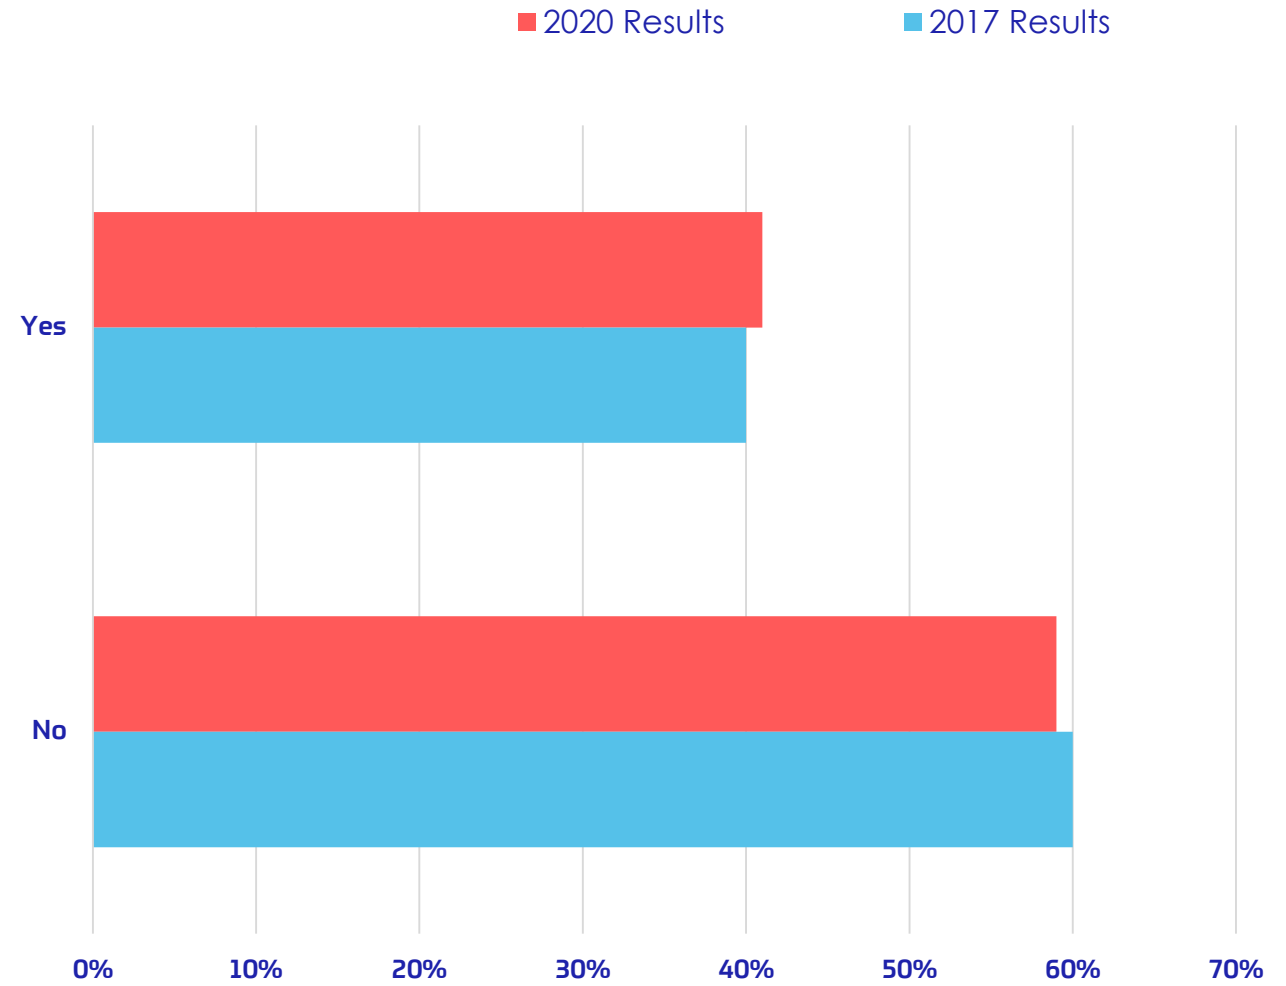

47% report that achieving certification has been highly impactful on their career, a continuation of the trend begun in 2017.

# *New Role Post Certification?*

4-IN-10 HAVE NEW ROLE POST CERTIFICATION

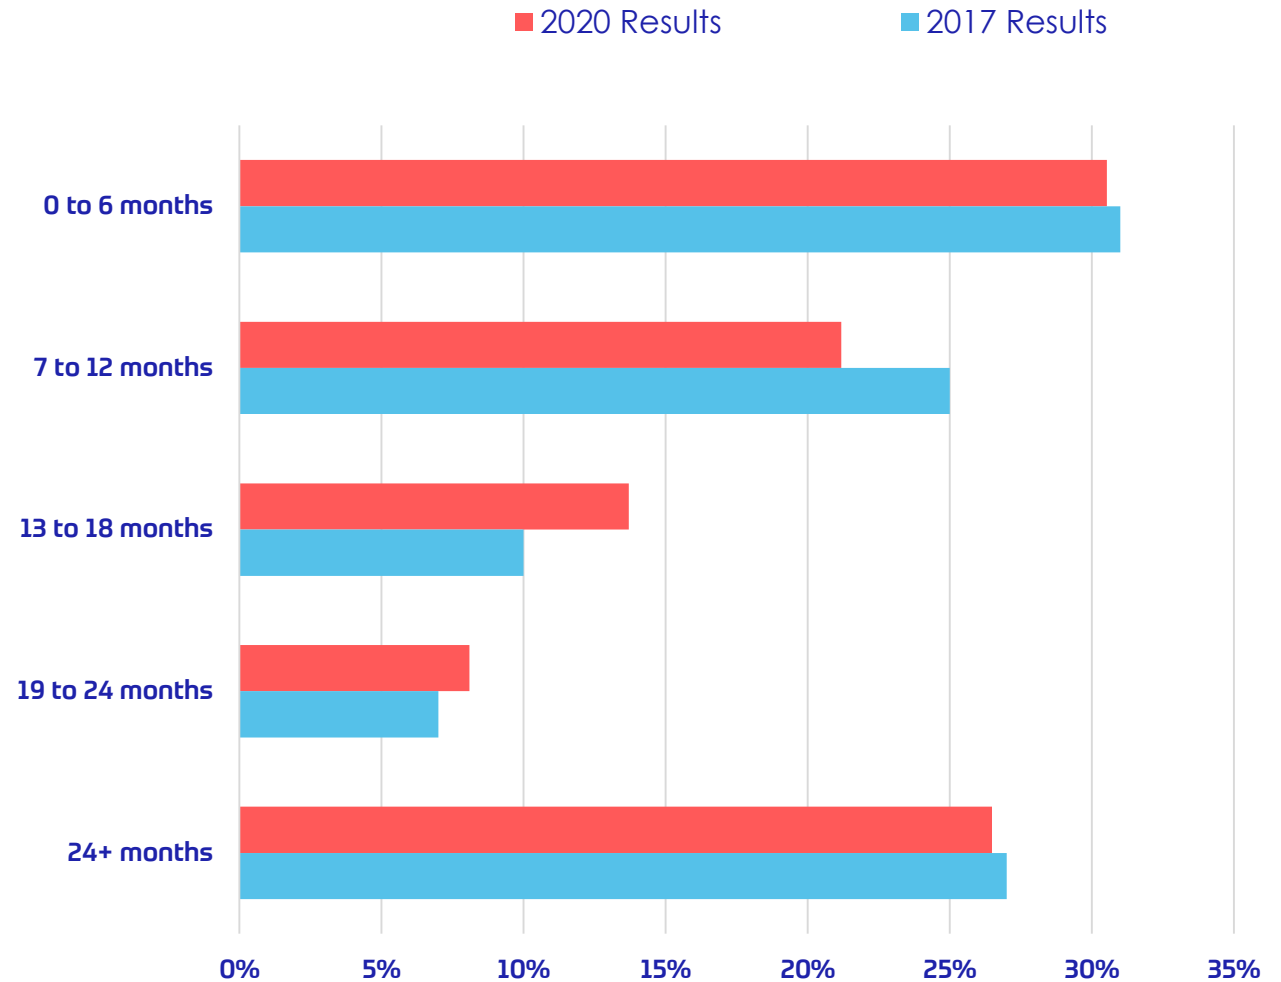

Among those with a certification, 41% have moved to a new role since becoming certified.

# Timeframe of Role Change After Certification

## NEW ROLE IS SPEEDY FOR HALF

New roles come quickly for half—52% are in a new role within a year after certification. However, 26% didn't move to a new role for more than 2 years.

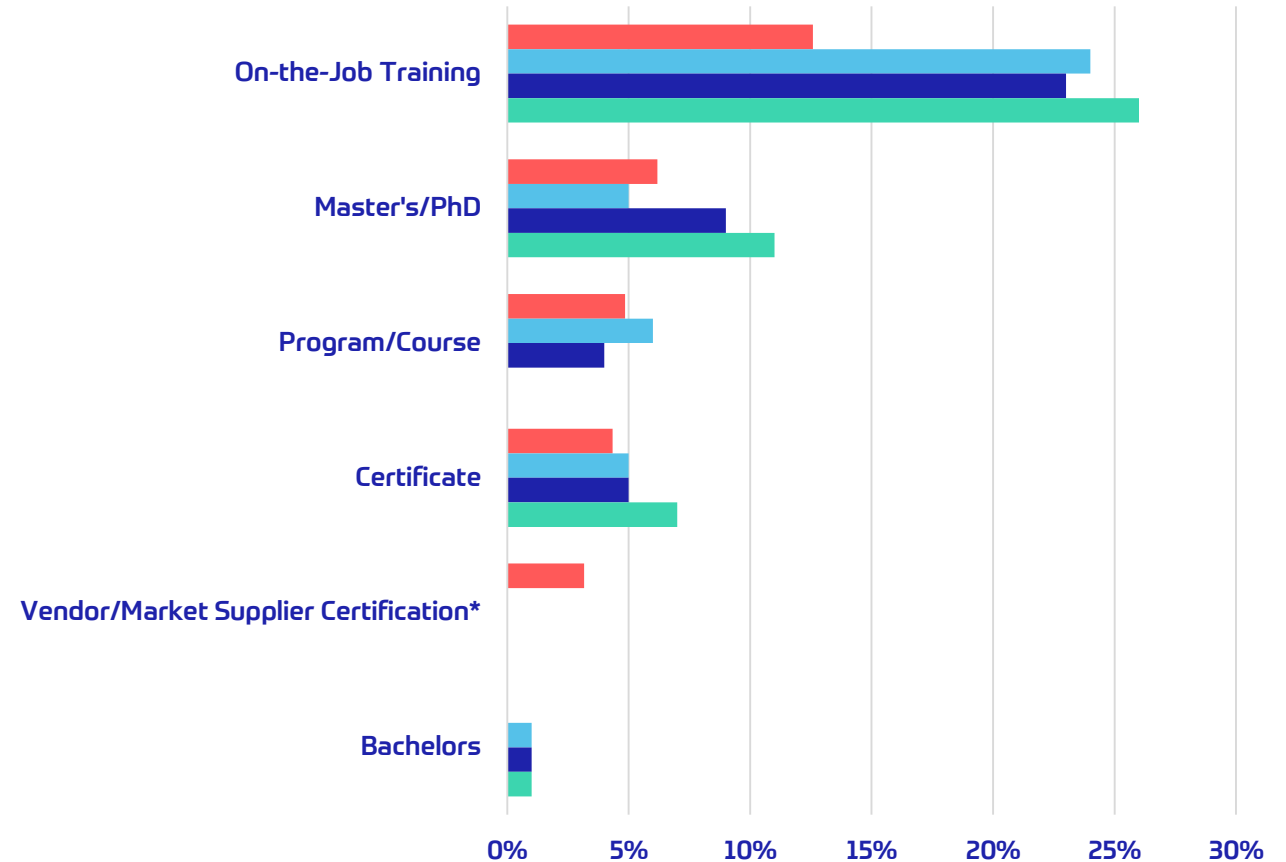

# Informatics Training/Education In-Process

## DECREASE IN CURRENT TRAINING

31% are currently undertaking any form of informatics training and education, a decrease from more than 40% in prior surveys.

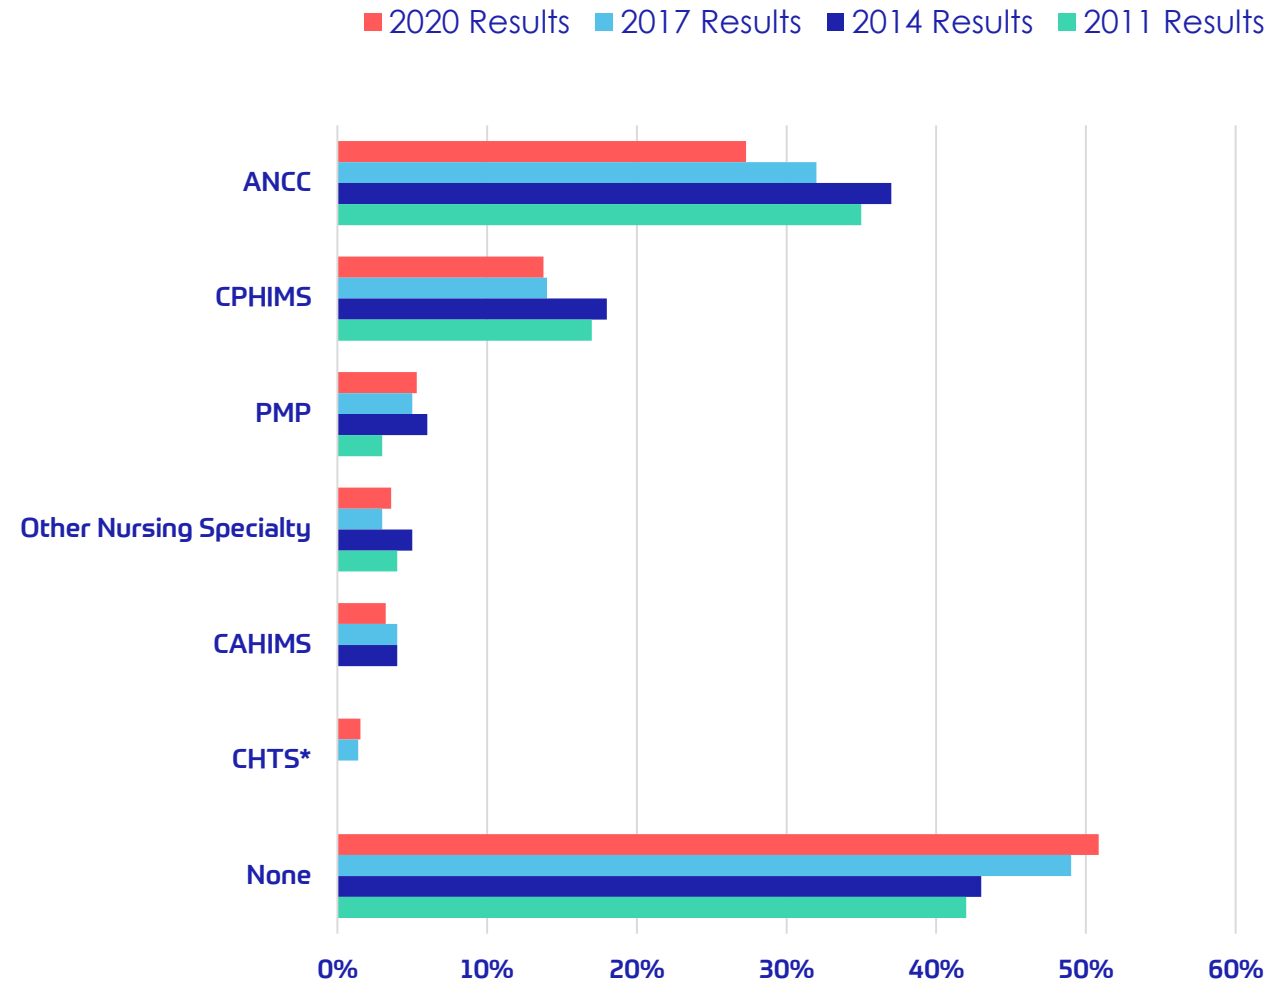

2020 Results 2017 Results 2014 Results 2011 Results

# Certification Pursuing

## HALF PURSUING CERTIFICATION

49% are currently pursuing some form of certification. As with prior surveys, the greatest proportion (27%) are pursuing ANCC certification. However, this is a decrease from 37% pursuing this certification in 2014.

# Top Reasons to Pursue Certification

## MARKETABILITY IS TOP REASON

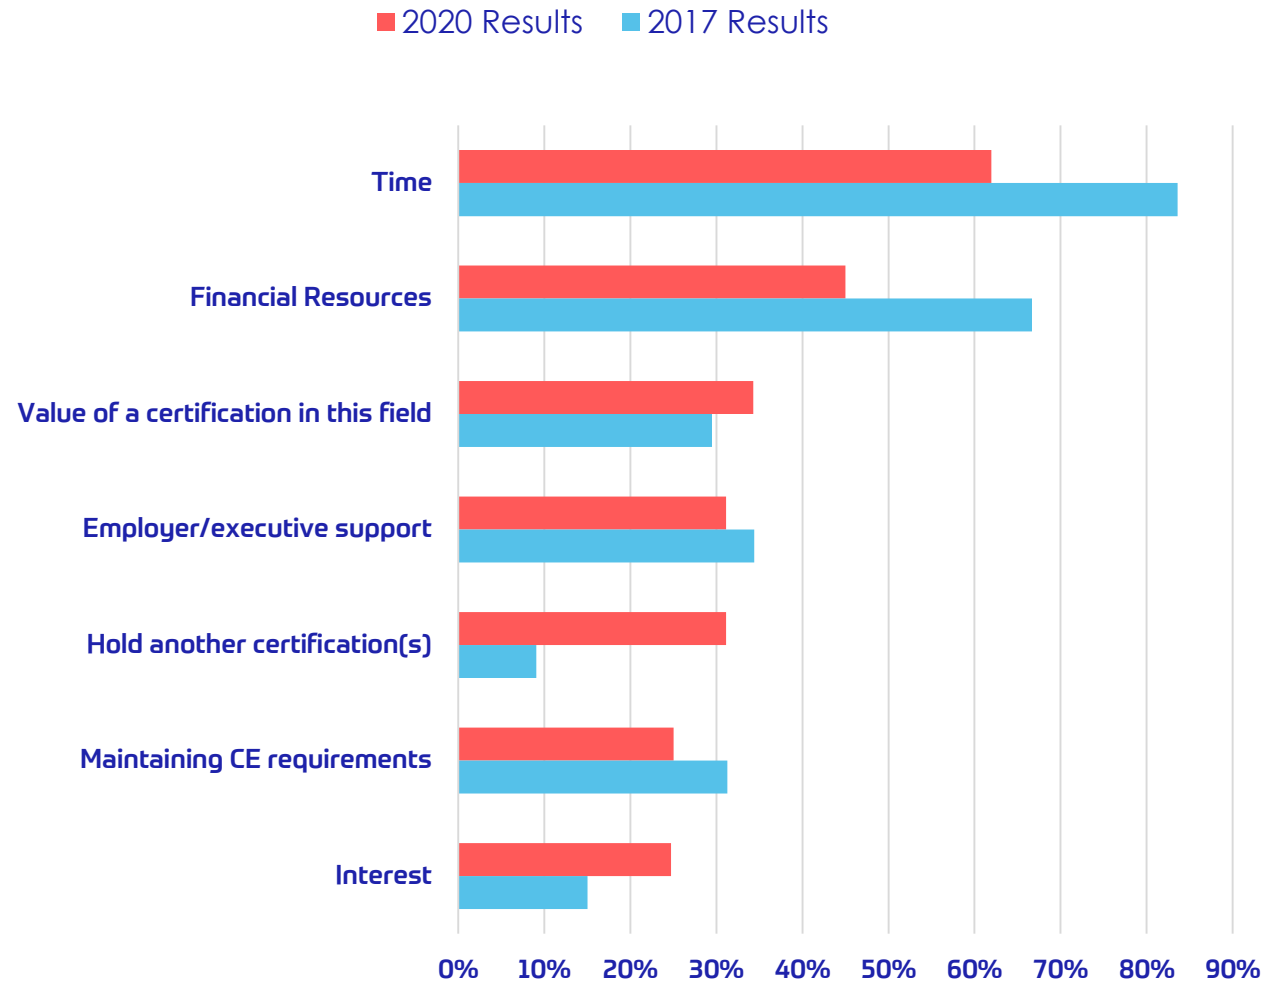

Top three reasons to pursue certification are to increase their credibility or marketability (49%), personal satisfaction (45%), and validation of knowledge (43%).

# Top Barrier to Certification

## TIME, RESOURCES ARE TOP BARRIERS

Time (62%) and financial resources (45%) remain the top barriers to certification, despite decreases. Notably, 31% report holding another certification as a barrier, up from 9% in 2017.

# Sources for Continuing Education

## MAJORITY USE VIRTUAL EDUCATION

71% turn to audio conferences or webinars for training, followed by professional organizations (59%) and national conferences (47%).

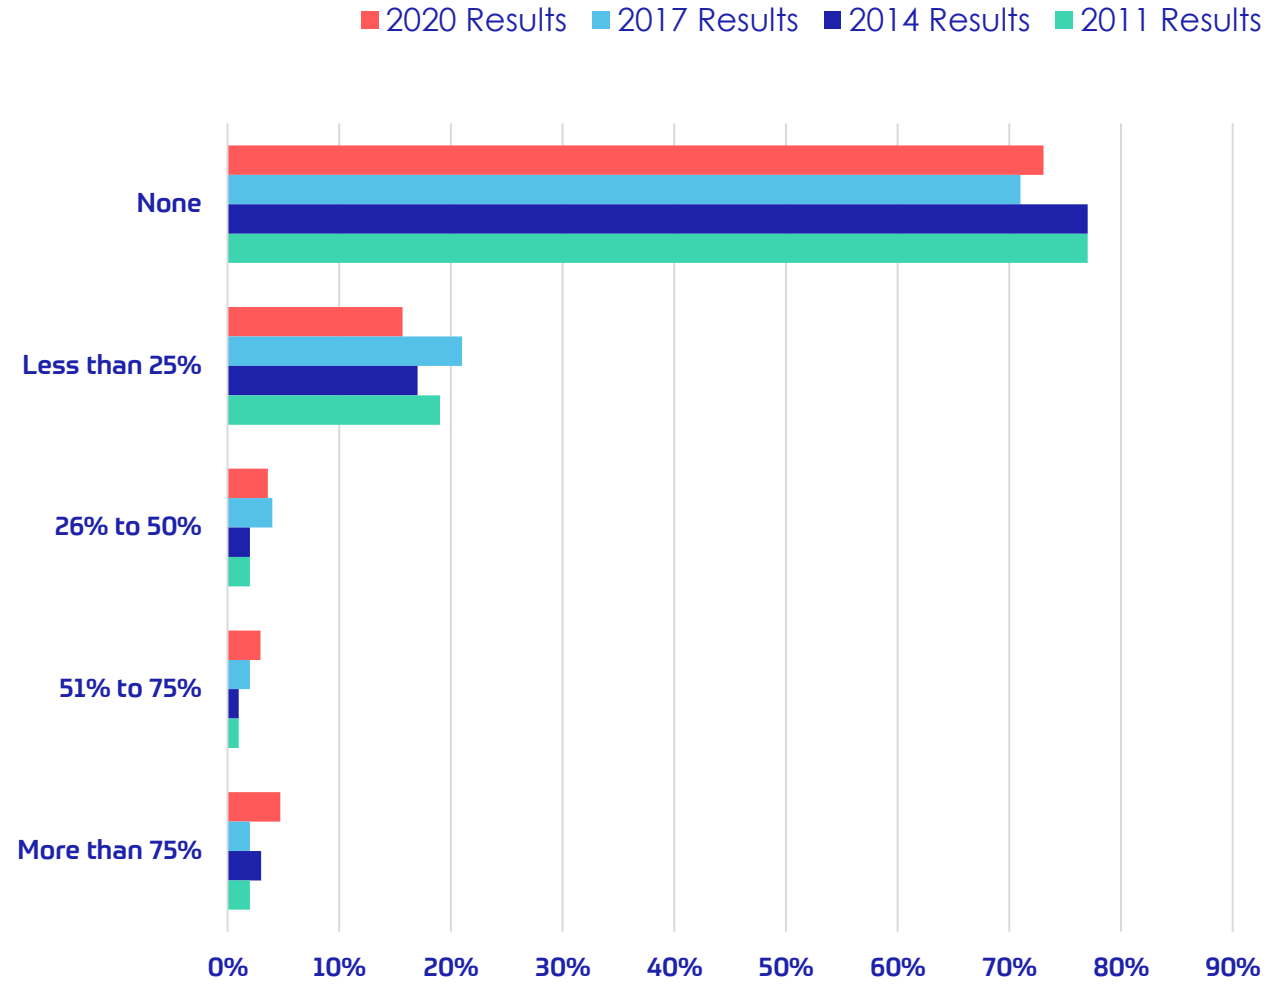

# *Focus: Job Details*

# Time Spent on Clinical Care

3-IN-4 DO NOT DO CLINICAL CARE

As seen in prior surveys, more than 70% do not spend work time in clinical care.

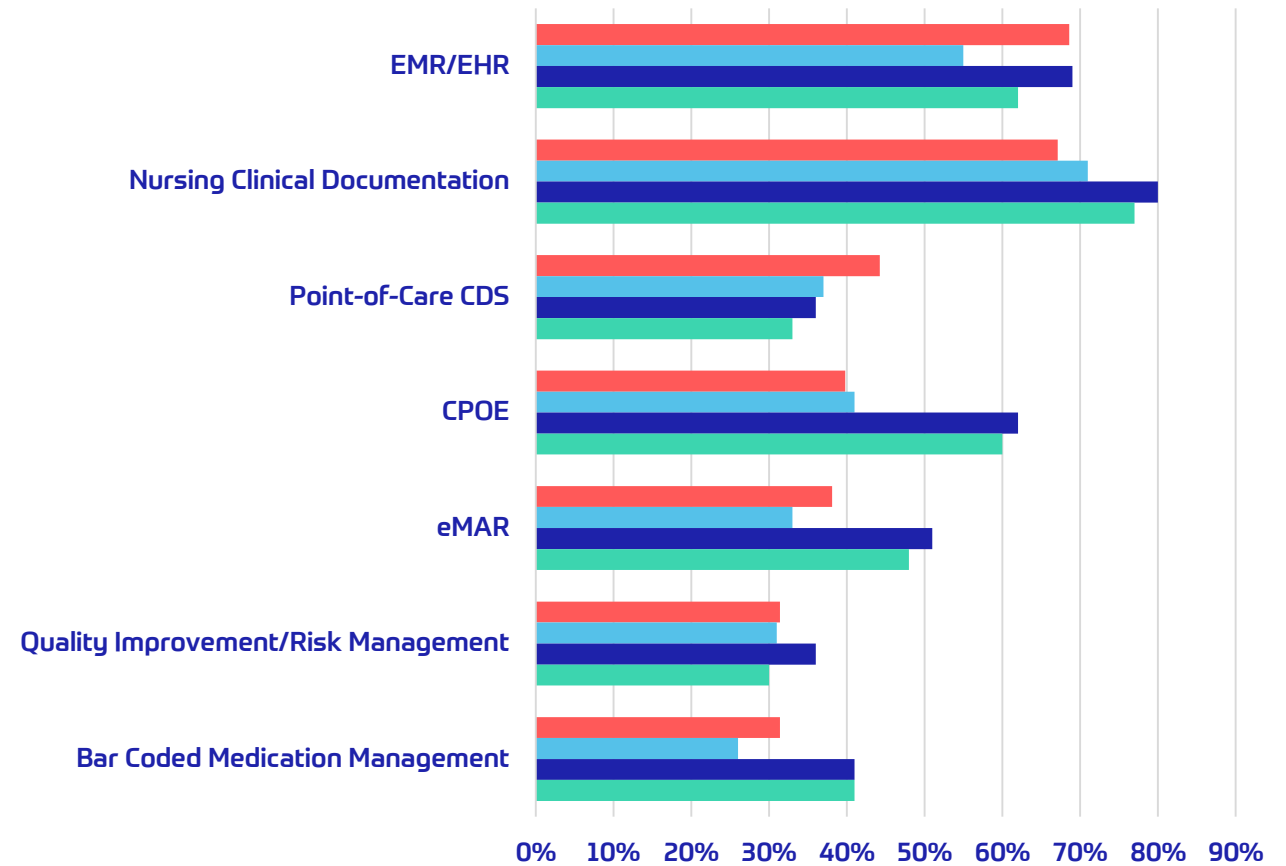

# Applications Developing, Implementing, or Optimizing

## APPLICATIONS ARE SLOWLY SHIFTING

Nurse informaticists are increasingly working with Point-of-Care CDS (44%) and decreasingly working with Nursing Clinical Documentation (67%).

■ 2020 Results ■ 2017 Results ■ 2014 Results ■ 2011 Results

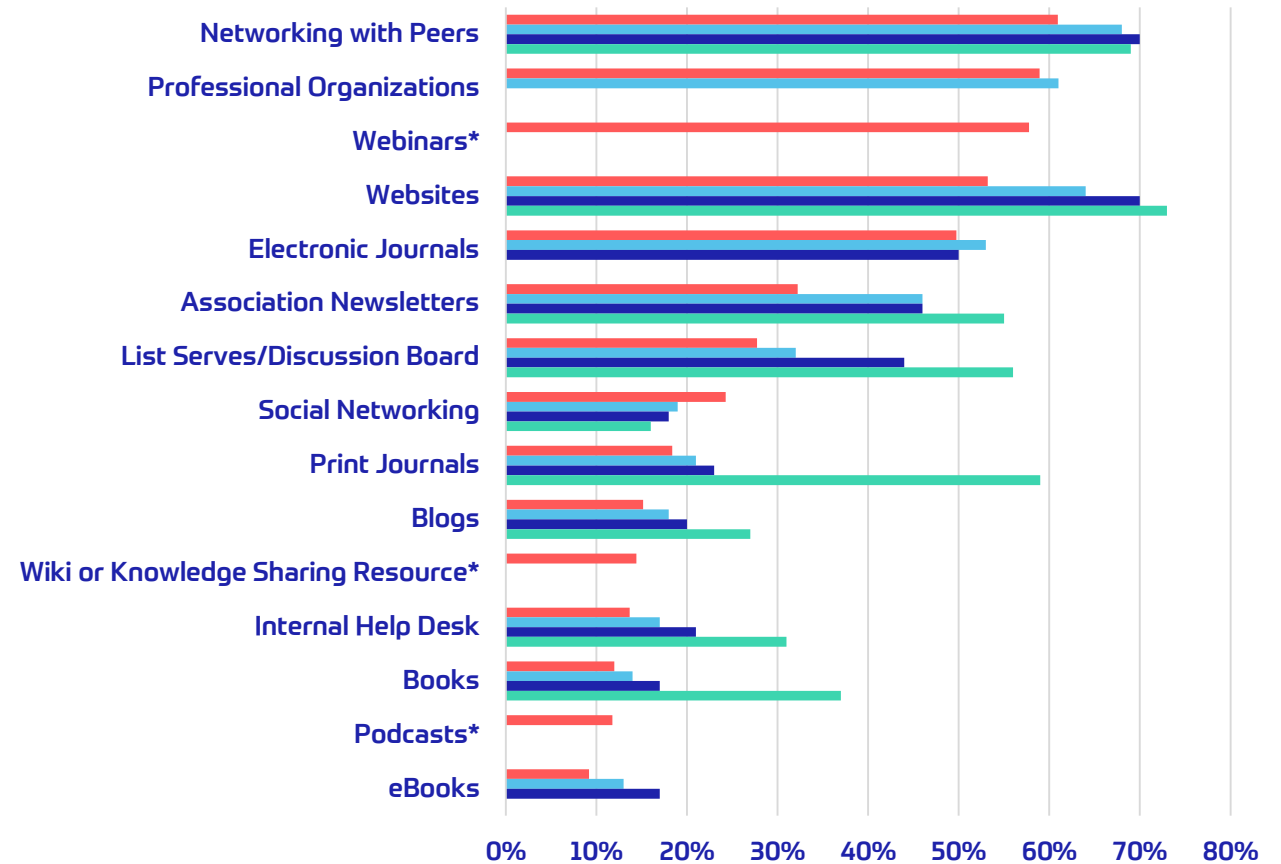

# Sources of Information

## PEERS AND ORGS ARE KEY SOURCES

While sources of information are changing, peers (61%) and professional organizations (59%) remain key sources for a majority of nurse informaticists.

■ 2020 Results ■ 2017 Results ■ 2014 Results ■ 2011 Results

# *Work Remotely?*

## REMOTE WORK IS SPLIT

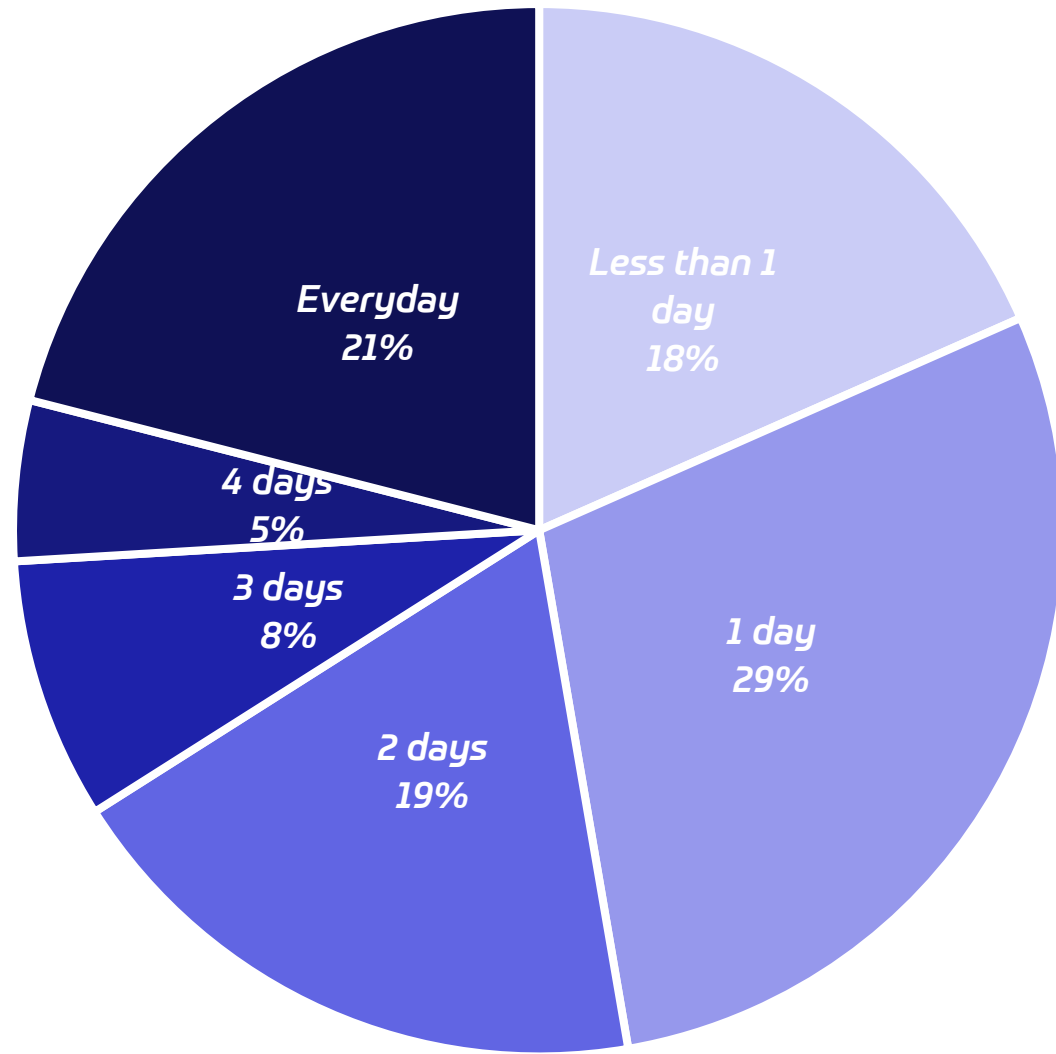

Just under half (45%) of nurse informaticists report working remotely at any point during their work week.

# Frequency of Remote Work per Week

## ONE REMOTE DAY MOST COMMON

Remote work has not fully replaced time in the office—among those who work remotely, 47% only do so day per week or less.

*Focus:*  
*Organizational*  
*Structure*

# Departments Reporting

## IS/IT AND NURSING MOST COMMON

While IS/IT is still the most common department to report to (49%), nurse informaticists are increasingly reporting to nursing (40%), administration (28%), and quality improvement (12%) departments than ever before.

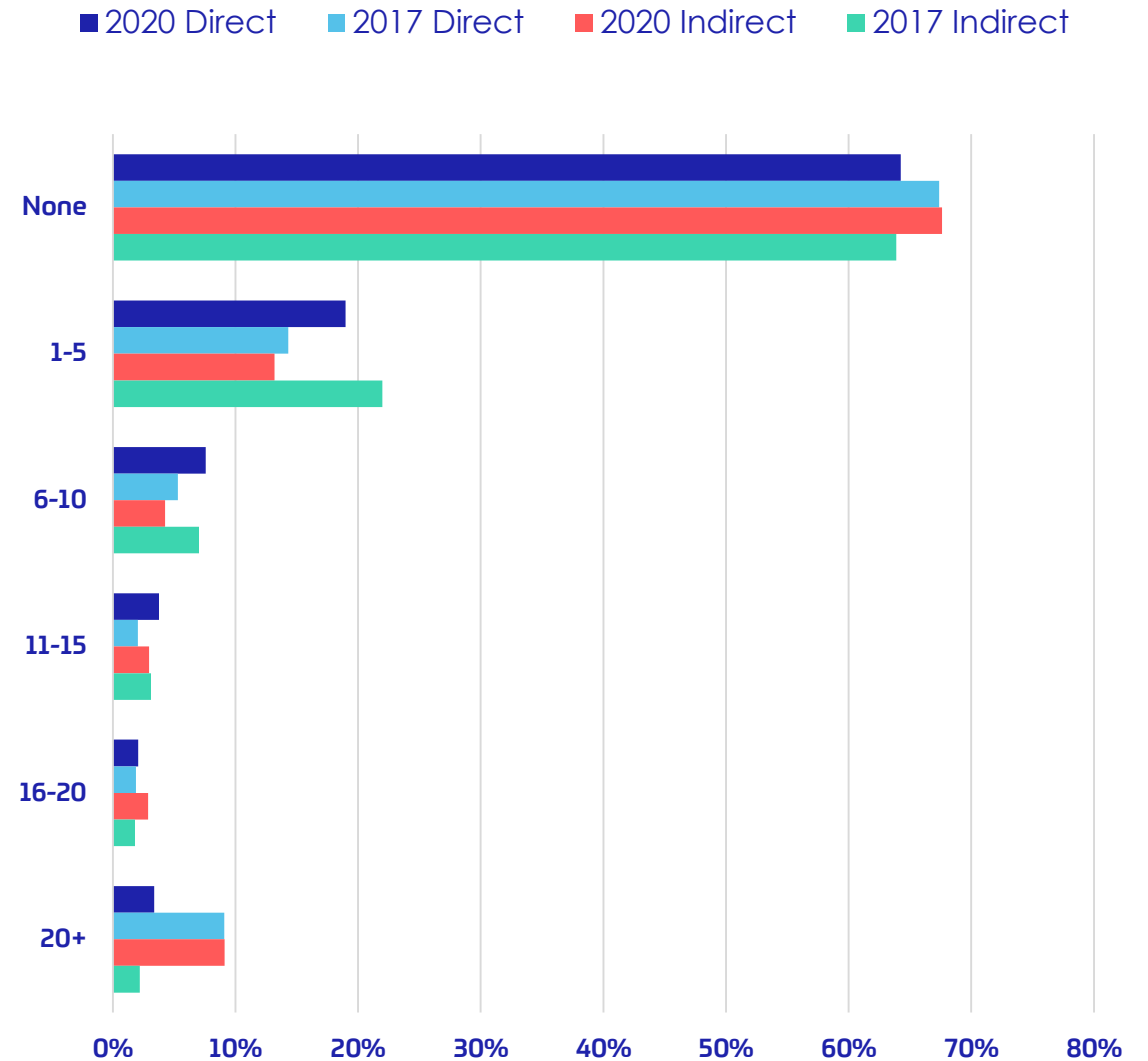

# Number of Direct and Indirect Reports

MAJORITY HAVE NO DIRECT OR INDIRECT REPORTS

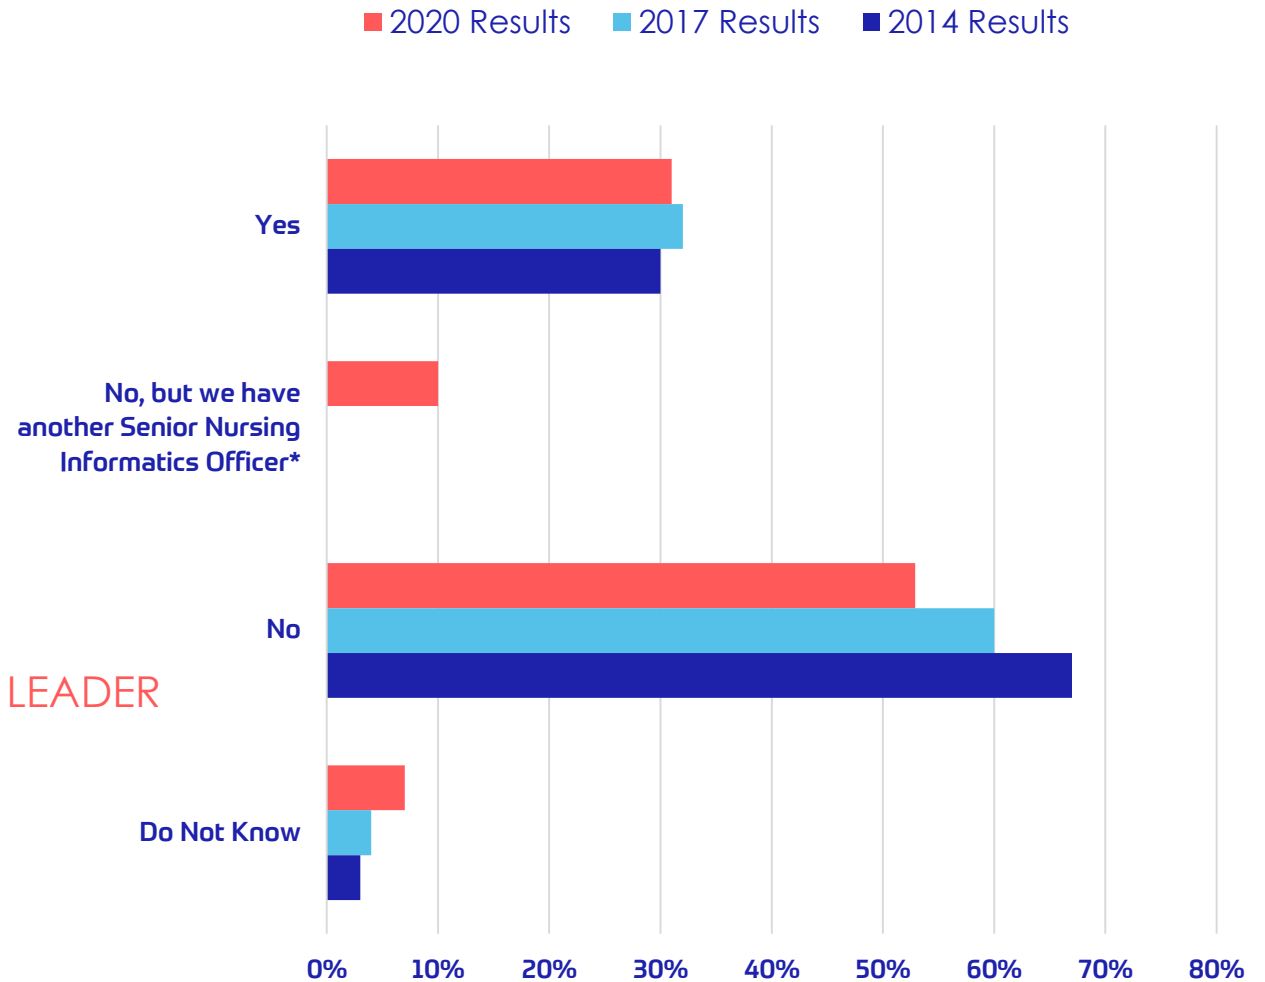

Consistent with 2017, 64% of nurse informaticists have no direct reports and 68% have no indirect reports.

# CNIO or other Senior Nursing Informatics Exec?

## 4-IN-10 HAVE SENIOR NURSE INFORMATICIST LEADER

41% of nurse informaticists work in organizations which have a CNIO or other senior nursing informatics officer.

# Reporting Structure for CNIO

## REPORTING STRUCTURE IS VARIED

Reporting structure for CNIOs is varied, as aligns with the variety of departments which house nurse informaticists. Top reporting structure is to the CNO (36%).

# Reporting Structure for CNIO/ Senior Nursing Informatics Leader

## REPORT STRUCTURE IS SIMILAR

Reporting structure for CNIOs and Senior Nursing Informatics Leaders is similar, with more than 1/3 reporting to CNO/Nursing Executive.
