**For more than 85 years,** FINN has been providing quality equipment to the landscape and erosion control industries and is your number one solution for environmental stewardship. Our machines are known for productivity, reliability, and long lasting product performance. Our company is known for innovation, dependability, and industry leading product support.

We pride ourselves on manufacturing products that give you the ability to work more profitably by completing more jobs for less cost than ever before. We think it's a **Smarter Way To Work**.

Today, FINN Corporation has a worldwide presence with more than 175 North American dealer and service locations, plus others in Australia, South America, Africa and Europe. Even as our network continues to expand, we will not forget our humble beginnings and our Midwestern roots.

The new Titan HydroSeeders<sup>®</sup> provide more performance, more power and more productivity than ever before. Designed to improve overall user experience and outperform all other units with ease, the Titan provides the unique features demanded by industry experts and required to meet today's challenging applications.

### Features and Benefits

- Spraying distance up to 368 feet with Finn Longshot<sup>®</sup> Nozzle
- Dual booms as an option for spraying on both sides of the unit for hard-to reach areas
- Hydraulic hose reel with Reel-In and Reel-Out functionality
- Integrinder<sup>®</sup> bale grinder for faster and more efficient loading

- Helical designed agitators optimizes material movement within the tank for more efficient mixing and circulation
- Long-life, low maintenance agitator bearings
- Interchangeable centrifugal and vortex pump
- Centralized lubrication/service points for increased unit serviceability
- Larger gates and open-space design dramatically increases the amount of usable storage space on top of the tank
- Remote control seamlessly integrated into the unit control system to easily control the pump while working with the hose

Innovative multi-lingual control system digitally manages all key system functions

Sturdy, steel-stiffened, larger deck with tie downs

Patent Pending Water Curtain reduces dust during loading.

Robust, Long-life, Agitator bearings tested to over 700 continuous hours.

Patent pending agitators with shredding paddles improve mixing and auto-reverse when jams are detected

**Tier 4 Final engine** with hydrostatic drive provides noise reduction and less vibration for operator

3

Find your Finn Dealer at www.FinnDealers.com

FINN invented the HydroSeeder<sup>®</sup> in 1953 creating a new industry of turf and erosion control contractors. Hydroseeding is far more efficient than broadcast seeding or installing sod. It speeds the seeding process, saving time, labor hours and money. And the results are lush, thick grass beds that establish quickly.

FINN HydroSeeders are robust, commercial grade equipment that use reversible, paddle agitation to enhance the loading, mixing and discharge operation. They are engineered for safety, operator convenience and efficiency. Each is designed to spray all commercially available hydromulching products. A wide variety of options are available depending on the model selected. See your FINN Dealer for details.

The LF120 HydroSeeder<sup>®</sup> is the most efficient and effective solution for applying Alternate Daily Cover (ADC). For the challenging conditions of a landfill, FINN has protected the engine and components from debris with the addition of special guards and skid plates; high clearance, heavy-duty tandem 10,000 lb. rubber torsion axles, along with tubeless high flotation tires for maneuvering on uneven surfaces; and an extended and reinforced trailer tongue for towing behind any piece of heavy equipment.

Designed specifically for use in landfill environments, the LF120 can also be used to apply products for dust control, erosion control and revegetation. FINN landfill units are also available in larger tank sizes if desired.

Enhance your profits with a FINN Material blower. With a FINN material blower your workers can increase productivity by as much as 700%. Free up labor hours to take on more jobs at a higher margin and reduce worker fatigue at the same time. Plus, the even application of mulch through a FINN material blower results in material savings of up to 40%.

These machines are ideal for delivering materials to hillsides, rough terrain, and hard to reach places and they can handle spreading, bark, mulch, soil, compost, over seeding and a wide variety of other materials. FINN material blowers are among the most versatile equipment you will own. Put these labor savers in your fleet and watch your profits soar.

# **Straw Blowers**

FINN Straw Blowers multiply your productivity and profits by doubling straw coverage in a fraction of the time it takes to apply by hand. There's no more efficient way to ensure soil moisture retention and protect against erosion damage to freshly seeded areas.

Designed to deliver smooth, reliable power for maximum straw shredding and discharge, FINN Straw Blowers make quick work of straw mulching even in the most demanding conditions. FINN offers a technologically advanced line of Straw Blowers to handle jobs ranging from small lawns to massive mining sites.

Your FINN Straw Blower will keep you busy earning profits with numerous applications, including: Seed Protection, Soil Stabilization, Mud Control, Pipelines, Agriculture, and Erosion Control.

FINN ground preparation attachments are multi-use attachments engineered to clear terrain, de-compact and level soil in preparation for seedbed planting. They are available for Skid Steers, Mini Skid Steers and Tractors.

Scarifiers work in combination with the finish and leveling rakes to prepare the soil up to 6" deep depending on the model. Different sizes and models are available to match your equipment and the size of jobs you typically take.
