

The University of Florida's
21st Annual

Florida Bull Test Sale

Florida Bull Test

UF UNIVERSITY of
FLORIDA
IFAS Extension

**Internet bidding is highly
suggested this year, to comply
with social distancing!**
(See inside for details)

Saturday, January 16, 2021

Bull viewing will be allowed from 8 to 11 am Central Time
Sale (preregistered buyers only) starts at 12:30 (Central Time)

**IMPORTANT: Due to COVID-19 restrictions, only preregistered buyers
will be allowed inside the pavilion for the sale.**

To preregister as a buyer, call 850-526-1613

Office: 850-526-1611

Sale Day Phone: 850-526-1620

**North Florida Research and Education Center
Beef Cattle Unit**

Obituary

Spencer Taylor Duncan

January 31, 1942-June 15, 2020

Spencer Taylor Duncan of Whigham, GA, died on June 15, 2020, at his home surrounded by his immediate family. He was born January 31, 1942 as the youngest of 8 children of Wylie and Pearl Duncan.

Spencer was a graduate of Whigham High School. He was a farmer who ran a diversified farming operation on the family farm, later including the establishment of a herd of pure-bred Angus Cattle. He raised hogs at one time, with cattle and hogs winning awards in various local, state shows. He was twice named one of the top 10 breeders in the State of Georgia in registered Angus cattle. He was an active member of the Georgia and Florida Angus Association with he and his wife serving in leadership capacities in the FLAA. In addition, Spencer was a member of the American Angus Association and he was a very active member and supporter of the Florida Bull Test Committee. His family was named the Grady County Chamber of Commerce Farm Family of the Year in 1997. Representing the Southwest District, he was one of the four outstanding farmers in the Young Farmers Association in the State of Georgia in 1976. He served on the Grady County ASCS Committee from 1967-1987. He was designated “Georgia Master Cattleman” in 1995, Winner of the Conservation Award, 1980, Grady County M.O. Prince 4-H Volunteer Leader Award, Recognition for outstanding service to Whigham Memorial Park in 1993 by the Whigham Community Development Council, Rotary Club “Service Above Self” Merit Award, Honorary Chapter Farmer Whigham FFA 1977, Rotary Club Soil Conservation Man of the Year, 1979, Friend of Grady County 4-H Award 1986. Gold (2000) and Silver (1998-1999) Breeder Award Triple D Angus, and Honorary Member of the Whigham High School Future Homemakers of America 1986.

His stature always drew the attention of children and youth. He never forgot what it was like to be “little.” He always made sure his pockets had enough “gum” in them to hand out after church at Whigham United Methodist Church where he was a member. He served on the Board of Trustees through a major renovation project, and served in other capacities.

His jovial, sincere demeanor, and personality and his knack for doing things right, made him a person who was admired and befriended by many not only locally but throughout the area. These qualities caused him to be a source of confidence and strength as a husband, father, and friend.

He considered his family to be his greatest achievement and motivation.

Obituary

George Edward Pounds

February 22, 1942-August 7, 2020

George Edward Pounds 78 of Boaz passed away Friday, August 7, 2020 at his residence

Rev. Daryl Ross officiated at his Funeral Service at Etowah Memorial Chapel. Pallbearers were Tyler Ross, John Bearden, Avery Ross, Brent Claburn, Jack Tate, Johnny Dale Parris, Bill Hodgens, Bernie Claburn, Honorary Pallbearers were all of his National Guard friends of the 279th Army Field Support Brigade.

Mr. Pounds is survived by his Daughters: Deneen Bearden (Tony), Cresap Ross (Daryl), Grandchildren: Tyler Ross (Brandy), John Bearden (Kimberly), Avery Ross (Jessica), Great Grandchildren: Everlee Ross and Natalee Bearden, Brothers: Bobby Pounds (Patty), Loverrall Pounds. He is preceded in death by his Parents: Travis and Tincie Pounds, Sister: Ellen Stevens, Brother: Jake Pounds.

Mr. Pounds has been one of the greatest supporters of the Florida Bull Test, and almost never missed any of the two annual meetings of the Bull Test committee, or the annual sale. His enthusiasm and unconditional support of the

Florida Bull Test will not be forgotten. Mr. Pounds was one of the most active participants, and he was fully engaged and committed to the mission of this important Extension program at the University of Florida. Mr. Pounds had such a positive attitude that made him a real pleasure to interact with. His passion for cattle and his commitment to the success of the beef industry was inspiring for many members of the Florida Bull Test Family, and for that he will be truly missed.

BULL TEST ADVISORY COMMITTEE

Dr. Glen Aiken	Mr. Jacob Gilmore	Mr. Rodney Sewell
Dr. Todd Anderson	Mr. Terry Harris	Mr. Jeff Snell
Dr. Nicolas DiLorenzo	Mr. Larry Warden	Mr. David Thomas
Dr. Jose Dubeux	Mr. Hubert Hightower	Mr. Herman Walker
Dr. Angela Gonella-Diaza	Mr. Doug Mayo	Mrs. Kalyn Waters
Mr. Winston Griffith	Mr. Mark Mauldin	
Mr. Nick Griffith	Mr. Jerry Osteen	

UNIVERSITY OF FLORIDA, ADMINISTRATION

Dr. Kent Fuchs, President, University of Florida
Dr. Scott Angle, Vice President for Agriculture and Natural Resources
Dr. John Arthington, Chair and Professor, Animal Sciences
Dr. Glen Aiken, Professor and NFREC Center Director
Dr. Barry Tillman, Professor and NFREC Assistant Center Director
Dr. Nicolas DiLorenzo, Associate Professor and Florida Bull Test Coordinator
Mr. David Thomas, Beef Unit Manager and Bull Test Foreman

TERMS AND CONDITIONS

1. Each bull will be sold to the highest bidder.
2. The auctioneer will settle any dispute as to bids.
3. The terms of the sale are cash or check payable to the **Florida Cattlemen's Association**.
4. Each bull becomes the risk of the new owner as soon as sold in the auction ring. Every precaution will be taken for the safety of all bulls until they are loaded.
5. Bulls will be attended to **no more than 4 hours after the sale** unless other arrangements are made.
6. A certificate of registry, properly transferred, will be furnished by the owner for each bull sold. Any exception will be announced from the auction box.
7. Health certificates will be furnished on each bull sold upon request.
8. All bulls have passed a breeding soundness exam and should have the ability to settle healthy cows with the exception of:
 - a. Injury or disease occurring to the bull after the sale.
 - b. Gross negligence or willful misconduct on the part of the purchaser.
9. Concerns regarding the fertility of the bull should be resolved between purchaser and consignor.
10. A consignor may not "no sale" a bull during or after the sale.
11. Certification of parentage testing of bulls is strongly recommended for the 2021 sale and may be required in future sales.
12. The sale is a contract between the consignor and the buyer. **The University of Florida, the Florida Cattlemen's Association, their employees, and representatives are merely facilitators and not parties to the contract.**

ALL PERSONS WHO ATTEND THIS SALE DO SO AT THEIR OWN RISK. THE OWNERS AND SPONSORS ASSUME NO LIABILITY, LEGAL OR OTHERWISE, FOR ANY ACCIDENTS OF ANY NATURE.

Because of the COVID safety restrictions, only registered buyers and bull consignors will be allowed to participate in the sale in person. Live streaming of the sale will be available via Facebook Live at the following link:

<https://www.facebook.com/FlaPanhandleAgriculture/>

If you are not already a follower, like the page in advance so you will be notified when the broadcast starts. Note: You will not be able to place a bid through Facebook live! This service is being provided so that everyone who wants to watch the sale has the opportunity to participate.

If you are interested in buying bulls in the sale from the safety and comfort of your home or office, please visit <http://www.cattleinmotion.com/> in advance of the sale to register for this service.

Dear Cattlemen:

Welcome to the 21st Annual Florida Bull Test Sale. The objective of this test is to evaluate the performance potential and breeding soundness of bulls consigned. This year was the 9th year in which individual feed efficiency was established on all bulls.

The Florida Bull Test consists of a 112-day performance test plus a breeding soundness evaluation on every bull that qualifies for the auction. When the bulls arrived at the NFREC Feed Efficiency Facility (FEF), they were sorted into contemporary groups, and then moved into pens where they were adapted to a soy hull and corn gluten-based diet for three weeks, before initiating the test. The bulls remained in the FEF for 56 days to collect intake data and were then relocated to 3.25-acre pastures for the remaining 56 days of the test, where they received the same diet. Animal performance, specifically average daily gain (ADG), was calculated using only the official starting and finishing test weights. Throughout the test, bulls were observed and screened for structural soundness and disposition. Bulls deemed to be structurally unsound or of poor disposition did not qualify for the sale.

As you may note, the bulls had an overall ADG of 3.73 lb/day. The average weight per day of age was 3.06 lb/day. Average daily feed intake during the first 56 days of the test was 23.96 lb/day (on a dry matter basis) and average feed:gain ratio of 6.73 pounds of feed for every pound of gain.

A significant portion of the test is the inclusion of feed efficiency of individual bulls. To rank the bulls on feed efficiency we use residual feed intake (RFI), which is the difference between actual feed intake and expected feed intake. The more negative the number, the more efficient the bull. During this bull test the RFI of bulls ranged from -4.87 to 7.12 lb/d. **Therefore, the most efficient bull consumed 4.87 lb per day less feed than expected for his gain. This equates to more than 1,700 lb per year less feed than that bull was expected to consume!**

Our staff has worked hard to provide the best care possible for these bulls. We believe each bull has been given the chance to express his own genetic potential for performance and fertility. Thank you for making our sale stronger year after year. We look forward to visiting with you about the bulls either before or on sale day.

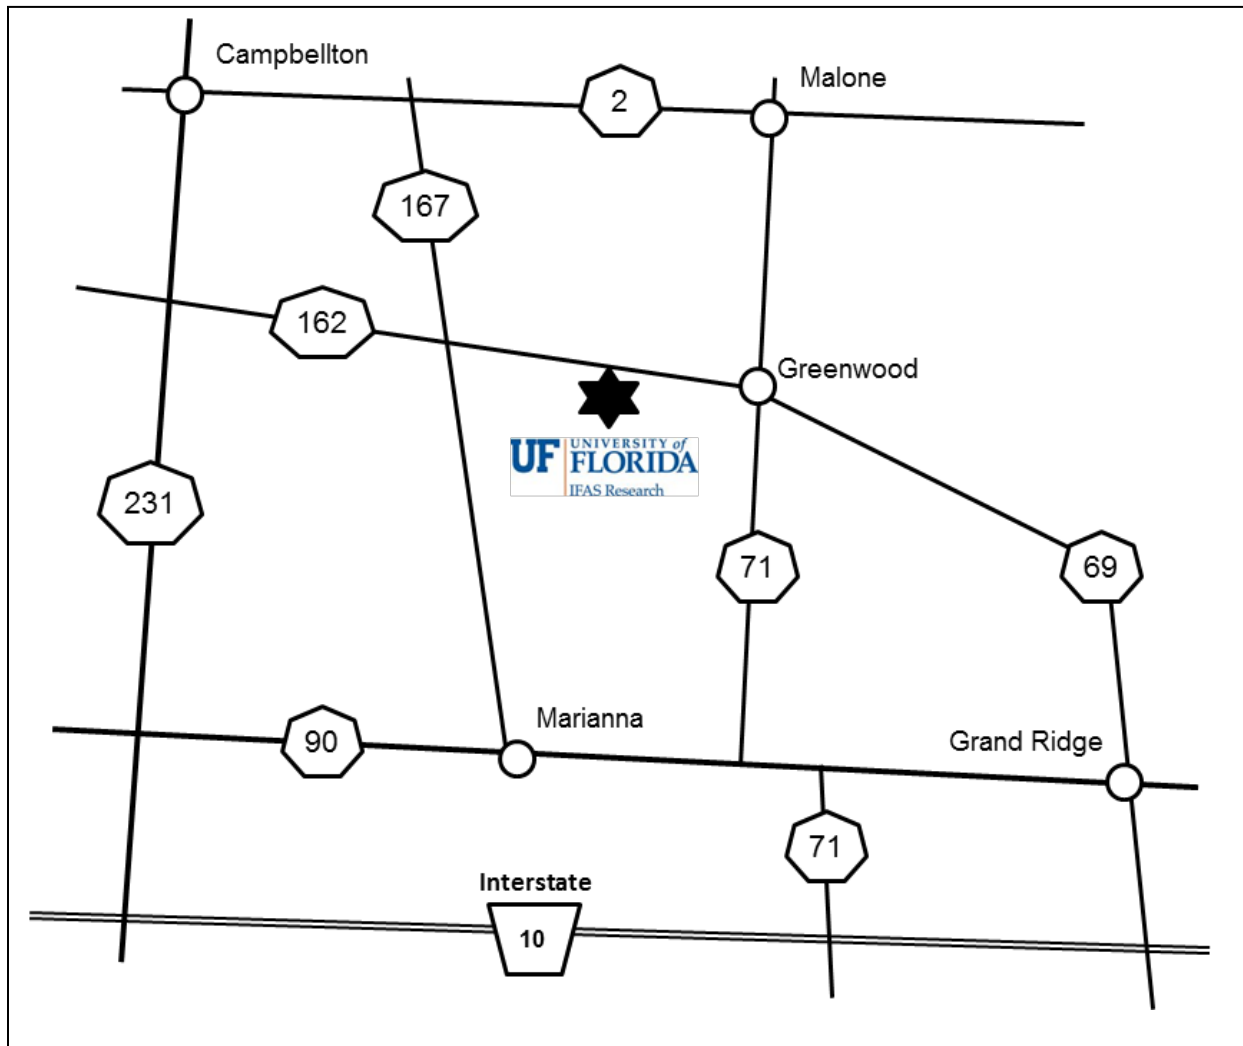

Sincerely,

Florida Bull Test Committee

BULL TEST SALE LOCATION

The sale will be held in the sale pavilion at the NFREC-Marianna Beef Unit, home of the Florida Bull Test. The Beef Unit/Bull Test is located 1.4 miles west on Highway 162 from the traffic light in Greenwood. The unit is 11.4 miles east of Highway 231 on Highway 162. From I-10, take Highway 71 north at exit 142, through Marianna to Greenwood (approximately 11 miles). An alternative route for those coming from the east on I-10, is to exit at 152 at Grand Ridge and take Highway 69 to Greenwood. From Dothan, AL take Highway 231 south and turn left on Highway 162 (look for green bull test sign).

ANNOUNCEMENTS FROM THE AUCTION BOX WILL TAKE PRECEDENCE OVER THE PRINTED MATTER IN THIS CATALOG AND ALL OTHER ANNOUNCEMENTS

SALE ORDER: The sale order is determined by test index.

Index = average daily gain (ADG) on test + weight per day of age (WDA) at the end of the test.

ELIGIBILITY FOR SALE: Bulls eligible for the sale indexed 90 or greater on the test.

SALE ORDER BY BREED

ANGUS	HEREFORD	RED ANGUS	SIMANGUS	SIMBRAH	SIMMENTAL

Several bulls are listed in the catalogue to have a retained semen interest (designated by a “Y”). This indicates that in the event the buyer purchases a bull and chooses to collect semen on that bull, the consignor is entitled to one third of the semen rights but is also obligated to one third of the semen collection costs. However, if the buyer does not elect to collect or market semen on the bull, then there is no obligation to the consignor. In addition, the buyer has 100% ownership of the bull and retains all salvage value when marketed. Bulls with certified parentage testing are designated with a “PT” or will be identified as Y in the “Parent Verified” section.

DEFINITION OF TERMS

ET	Embryo Transfer Embryo transfer
EPD	Expected Progeny Differences Predicts the differences expected in performance of future progeny of two or more sires of the same breed when mated to animals of the same genetic potential.
CED	Calving Ease Direct EPD Based on calving ease scores and birth weights. The EPD indicates the influence of the sire on calving ease in purebred females calving at 2 years of age.
BW	Birth Weight EPD A predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires; expressed in pounds.
WW	Weaning Weight EPD A predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires; expressed in pounds.
YW	Yearling Weight EPD A predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires; expressed in pounds.
Milk	Maternal Milk EPD A predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.
Scrotal	Scrotal Circumference EPD A predictor of the difference in transmitting ability for scrotal size compared to that of other sires; expressed in centimeters.
IMF	Intramuscular Fat - Marbling EPD A predictor of the difference in USDA marbling score of a sire's progeny compared to that of other sires; expressed as a fraction.
REA	Ribeye Area EPD A predictor of the difference in ribeye area of a sire's progeny compared to that of other sires; expressed in square inches.
BF	Fat Thickness EPD A predictor of the difference in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires; expressed in inches.
ADG	Average Daily Gain Average daily gain on test during the 112-day FL Bull Test.
WDA	Weight per Day of Age

Weight per day of age from birth until the end of the final weight of the FL Bull Test.

Index

Index Ratio

This test index is used to rank the bulls on performance and is the sum of ADG and WDA expressed as a ratio of each individual bull to the average index for the group. A ratio of 100 is average. This index was used for the final rankings at the end of the test.

Frame

This score describes the skeletal size of cattle and is expressed as a score from 2 to 10. With appropriate height growth curves, most animals should maintain the same frame score throughout their life, while their actual height increases with age. This allows one frame score value to be used regardless of when the animal was evaluated. However, the frame score will change for animals that mature earlier or later compared with average animals.

\$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

\$API All-Purpose Index

The expected average performance of progeny of Simmental bulls used on the entire Angus cowherd, with a portion of the daughters being retained for breeding and the remaining progeny being put on feed and sold grade and yield.

\$TI/TSI Terminal index

The expected average profit per carcass of progeny of bulls mated to British-cross cows, with all offspring placed in the feedlot and sold grade and yield. It includes growth and carcass information only.

\$BMI

This is an index to maximize profit for commercial cow-calf producers who use Hereford bulls in rotational crossbreeding programs on Angus-based cows. Retained ownership of calves through the feedlot phase of production is maintained and the cattle are to be marketed on a CHB pricing grid.

\$CHB

This is a terminal sire index, where Hereford bulls are used on British-cross cows and all offspring are sold as fed cattle on a CHB pricing grid. There is no emphasis on milk or fertility since all cattle will be terminal. This index promotes growth and carcass.

\$W Weaned Calf Value

The expected average difference in future progeny performance for preweaning merit; expressed in dollars per head. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

\$F Feedlot Value

The expected average difference in future progeny performance for postweaning merit compared to progeny of other sires; expressed in dollars per head.

\$B Beef Value

The expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires; expressed in dollars per head.

PT Parentage Testing

The use of genetic markers to determine the most likely sire and/or dam.

FEED EFFICIENCY DATA:

Feed Efficiency Rank

Ranking from most efficient (low ranking) to least efficient (high ranking) compared to all bulls in the FL Bull Test.

Intake

The pounds (on a dry matter basis) consumed on a daily basis during the 56-day feed efficiency portion of the test.

F:G Feed to Gain ratio

The pounds of feed consumed per pound of gain per bull during the 56-d feed efficiency portion of the test.

RFI Residual Feed Intake

Calculated as the difference between actual average daily feed intake and expected daily feed intake for each bull based on their average daily gain on test during the 56-d feed efficiency portion of the test. This value was used as the criteria for Feed Efficiency Rank. Bulls with a low RFI are more efficient than bulls with a high RFI.

Adjusted

Because ultrasound measurements are taken on a single day, bulls vary in age. Therefore, measurements are adjusted to be on an equal age basis so that bulls may be compared with each other. When comparing ultrasound data between bulls, adjusted measurements are more reliable.

INTERNET BIDDING AND VIDEOS

Internet bidding and videos of bulls are available through Cattle In Motion www.cattleinmotion.com)
