Topper 8 Gauze

Topper 8 is composed of nonwoven viscose rayon and polyester. These cost effective low-linting swabs with high absorbency are ideal for use in all general wiping and cleansing procedures associated with wound management.

- Ribbed structure provides a textured surface to facilitate debris removal
- The non-woven fabric permits high absorbency without linting, unlike gauze swabs

Cutilin

Cutilin is a low-adherent dressing for exuding wounds that can be cut to suit, without linting.

- Step 1: Clean the wound with saline solution. Do not dry the wound bed.
- Step 2: Cutilin can be secured with an adhesive tape or bandage.
- Step 3: Cutilin can be left in place until the capacity of the pad is exhausted, which can be seen when exudate reaches the edges of the dressing
