

INSTAR
Indian Society for Third Party Assisted Reproduction

2ND ANNUAL INSTAR CONFERENCE

DATE - 11th October - 2015

VENUE - India Habitat Centre,
Lodhi Road, New Delhi

Theme - Science & ART of Third Party Reproduction

From the President's Desk

Dr Himanshu Bavishi

Third Party Assisted Reproduction is facing its biggest challenge ever, not only in India but globally. It is blessing for millions of couples who can be blessed with the child with this technology and the only option to complete their family for a few. Many couples have been benefited and are likely to benefit if this treatment option remains available to them.

A few stray incidents of unexpected behavior of intended parents, surrogate mothers, ART banks of ART clinics brings a bad name to this extremely useful treatment. These incidences have happened more outside India, in so called most "Ethical & Popular" surrogacy destinations to Thailand and Mexico, the "emerging preferred destinations".

If we see India such incidents are minimal as compared to rest of the world. However systematic efforts are done to defame our nation and stop the ever rising reputation of India as preferred destination for quality medical care at affordable price.

INSTAR is working towards the welfare of all the parties involved in third party ART form best privileged to most privileged. INSTA is actively striving to spread awareness in the society about this modern treatment morality and remove negativity. INSTAR also promotes ethical & legal practices amongst its members.

Second "INSTAR Annual Conference" in Delhi will be one more landmark. I thank my enthusiastic team to make all this happen with Dr. Rita Bakshi & her team of Delhi, all the very best for the upcoming conference.

From the Vice President's Desk

Dr. Rita Bakshi

It's a great honor and proud privilege for me to extend a very hearty and warm welcome to all the delegates of the 3rd Annual Indian Society for Third Party Assisted Reproduction's Conference being organized on 11th October 2015 at India Habitat Centre, New Delhi, India.

The new ART bill that addresses the ethical, financial and legal aspects of third party reproduction would be a hotly contested topic. Panel discussion involving social activists, lawyers, journalists and doctors will prove to be thought provoking. INSTAR 2015, I am sure shall provide an opportunity for all of us to increase our knowledge, and how to migrate the new boundaries of Surrogacy.

The scientific programme has been designed to address various contemporary issues in the fields of reproduction, fertility and surrogacy. I am hopeful that the interactions with eminent international and national faculty shall not only open new dimensions to the challenges of third party reproduction, but also provide an innovative opportunity to all delegates to invigorate their mind and provide solutions to the new challenges presented in this field.

As Organising Chairperson, I welcome you all to INSTAR 2015.

From the Secretary's Desk

Dr. Shivani Sachdev Gour

This is an exciting moment in time for ART and compensated surrogacy in India as India becomes a touchstone for what is the best practice in our field and we move towards being one of the few countries in the world with national guidelines.

We are giving an Indian voice to our practice, to the clinics & agencies that work in this field and sharing our practice wisdom with each other and the world. We are encouraging our surrogates to find their own voice and share their own stories, rather than having others tell their stories. I would encourage all of you, who are interested and passionate about this work to join us, through formal membership of INSTAR or by attending one of our workshops, conferences or CMEs session & be part of process of change.

Organising Chairperson

Dr. Rita Bakshi

Organising Secretary

Dr. Richa Sharma
Dr. Samit Sekhar
