MARMOLEUM
COCOA

marmoleum® cocoa

Chocolate floors a first

New Marmoleum Cocoa is an innovation which adds a seventh natural raw material to Marmoleum's long established recipe which makes it the most sustainable flooring available today.

Upcycled cocoa bean shells

Cocoa bean shells, which come from a local chocolate producer, are crushed and added to create a rich, tactile flooring which is entirely different and yet uniquely Marmoleum.

INTRODUCING

marmoleum® COCOA

The new member of the Marmoleum Solid family.

Marmoleum Cocoa embraces our ethos of sustainable design and is a truly new addition to the collection. By using a waste product from another industry we are collaborating to reduce waste, improve recycling and contribute to a better environment. By adding cocoa shells to the traditional Marmoleum ingredients we have created an innovation in construction aesthetics. The result is a new and exciting surface texture that is both natural looking and contemporary in feel. The inclusion of cocoa adds a rich look that is fresh, modern and yet uniquely Marmoleum.

Linseed oil

Linseed oil, the most important raw material used to make linoleum, is obtained by pressing the seeds of the flax plant. In the past linseed oil was used as cooking oil, as well as for lighting. We add to this Tall oil, a recycled post-industrial by-product of the paper industry, which optimises the oxidation process in the production of linoleum.

Wood flour

Wood flour is used to bind the pigments and to ensure colour-fastness.

This is the reason why Marmoleum keeps its beautiful, vibrant colours throughout its lifespan.

Another reason for using wood flour is that it helps to give an especially smooth surface. We have chosen not to use tropical hardwood flour but wood flour made from timber grown in controlled European forests, where every tree felled is replaced.

Rosin

Rosin, the key agent in the first steps of producing Marmoleum, is tapped from pine trees, without affecting growth.

Together with linseed oil, rosin gives Marmoleum its strength and flexibility.

Limestone

Limestone is found all over the world in enormous quantities. Very finely ground, it is a valuable ingredient of Marmoleum.

Pigments

The most beautiful colours are created by using ecologically responsible pigments that do not contain heavy metals such as lead and cadmium.

Jute

From the wide variety of materials available for making the floor covering's backing we prefer natural jute. The yarn for the webbing is spun from jute grown in India and Bangladesh.

Cocoa bean shells

Cocoa shells that are produced from chocolate production. Forbo uses cocoa shells from a traceable source that produces under ecological and socially responsible programmes.

DEFINING PURE SPACES

Pure Design

Marmoleum Solid is a contemporary collection that fits perfectly with the desire for more solid visuals and raw tactility. With its variety of plain to semi-plain aesthetics, it provides a large choice of honest designs that give the collection a strong, modern identity. Solid has been designed to combine beautifully with other natural materials such as wood, glass or metal.

Pure Material

Marmoleum is made from, on average, 97% natural raw materials including linseed oil and wood flour. Marmoleum Solid also introduces a brand new range which includes upcycled cocoa shells from a Dutch chocolate producer, creating an organic and tactile surface, Marmoleum Cocoa.

Pure Emotion

Marmoleum Solid can help convey the right first impression and contribute to creating an environment that has integrity and functional honesty. It is a natural substrate that can be used with the assurance of its heritage and the confidence of its future relevance through our development of structured embossing effects and the introduction of new material ingredients such as cocoa shells.

marmoleum® slate

Marmoleum Slate introduces a naturally inspired texture to Marmoleum, bringing a new dimension to the collection. The result is a surface that has the timeless aesthetic of stone with the warmth and purity of linoleum. The look is sophisticated and refined offering a solution that has visual interest whilst remaining understated.

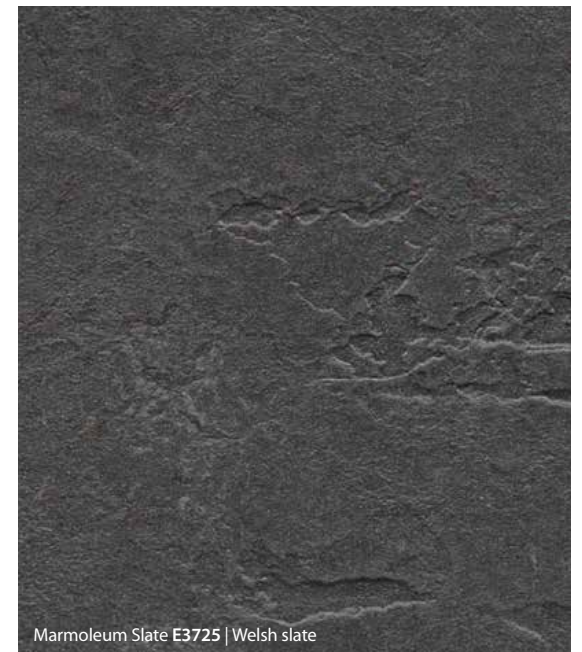

Marmoleum Slate E3725 | Welsh slate

Marmoleum Slate E3725 | Welsh slate

marmoleum® concrete

The traditional colour palette of Marmoleum Concrete is neutral with a combination of warm tones and cool modern concretes. However, an exciting new extension of 6 bright 'glow' accent colours have been specifically designed to be combined with their 'shimmer' counterparts; neutral concretes with a flash of colour that glimmers through the surface. With the two matching visuals you can create stunning floor designs.

Marmoleum Concrete 3734 | blue shimmer + 3739 | blue glow + Walton 3369 | titanium

Marmoleum Concrete 3733 | yellow shimmer + 3741 | yellow glow

Marmoleum Concrete 3733 | yellow shimmer + 3741 | yellow glow + Marmoleum Walton 3369 | titanium

Marmoleum Concrete 3733 | yellow shimmer

Marmoleum Concrete 3741 | yellow glow

marmoleum® piano

Our Piano range is the perfect alternative for those who love the minimal and plain aesthetics of our Walton range but require soil hiding properties. New colours being introduced in this collection bring bright, fresh options to the fore.

Marmoleum Piano 3607 | grey dusk + 3613 | almost darkness + 3629 | frosty grey

Marmoleum Piano 3629 | frosty grey + 3630 | angora + 3631 | otter + 3646 | young grass

Marmoleum Piano 3630 | angora + 3634 | meadow + 3645 | neptune blue + 3607 | grey dusk

Marmoleum Piano 3646 | young grass

marmoleum® walton

Presenting the pure character of linoleum. Its plain visual makes Walton easily adaptable to the context it is used in and the subtle texture gives it a soft and natural look.

The solid identity presents an unpretentious material expression that makes it the ultimate and pure representative of our linoleum flooring while the contemporary colour palette presents both cool grey tones, warm earthy shades and rich classic shades.

CREATING BETTER ENVIRONMENTS

From how they're made to how they perform, we make outstanding floors that are truly sustainable.

That's because our floors are good for people, good for buildings and good for the environment.

So, from the building they're in to the outside world, we're helping our customers work, live and relax in better environments.

You don't have to take our word for it, Marmoleum holds no less than 11 independently award global eco-labels. To find out more visit www.forbo-flooring.com.au/CBE

COMMITTED TO THE HEALTH OF ONE

WWW.FORBO-FLOORING.COM.AU/CHO

With our Committed to the Health of One programme, we strive to create better indoor environments and Marmoleum is a prime example of this commitment.

Naturally bacteriostatic, Marmoleum does not harbour allergens and holds the Allergy UK Seal of Approval. It has extremely low VOCs contributing to positive indoor air quality and has high LRVs which help create positive environments in which to work, learn, live and play.

Marmoleum also is protected by a unique water based finish 'Topshield 2' which ensures no hiding place for dirt or bacteria.

THE EDGE AMSTERDAM

Situated in Amsterdam, The Edge is considered to be one of the most innovative and sustainable office buildings in the world and was awarded an “Outstanding” rating with the highest ever BREEAM score of 98.36%. Showcasing an array of digital and sustainable innovations, many of which are “world firsts”, the occupants include companies such as Deloitte. When it came to finding a suitable floor covering for such an exemplary project, the natural choice was Forbo’s Marmoleum Solid Cement, made from 97% natural raw materials, 72% of which are rapidly renewable, and which has a recycled content of 43%.

WHAT ELSE IS **NEW?**

sphera®

A new era in homogeneous vinyl

Sphera is Forbo's new leading homogeneous vinyl floor covering produced in a brand new manufacturing plant in Europe with state of the art technology. It has a uniquely embossed surface that offers optimal performance, is low emitting and 100% phthalate free. Sphera is styled by our global design team and offers high LRV values and bright, saturated hues.

Made to meet only the highest quality standards Sphera is a premium and durable product. Achieves R10-P3 slip rating and 'Best Practice PVC'. The SMART Top finish provides excellent stain & scuff resistance - no polished required.

This collection offers a balanced palette of 62 colours in element and 52 colours in energetic that coordinates well with other Forbo floor coverings like Marmoleum and textile flooring.

allura

Allura is Forbo's brand of Luxury Vinyl Tile (LVT) and over the past decade, it's established itself as one of the most popular brands in our extensive product portfolio. There is no other LVT in the market today that can match Allura in terms of design, technology and sustainability.

Designed and produced in Europe, Forbo's Luxury Vinyl Tile brand Allura uses advanced production technology to ensure maximum dimensional stability.

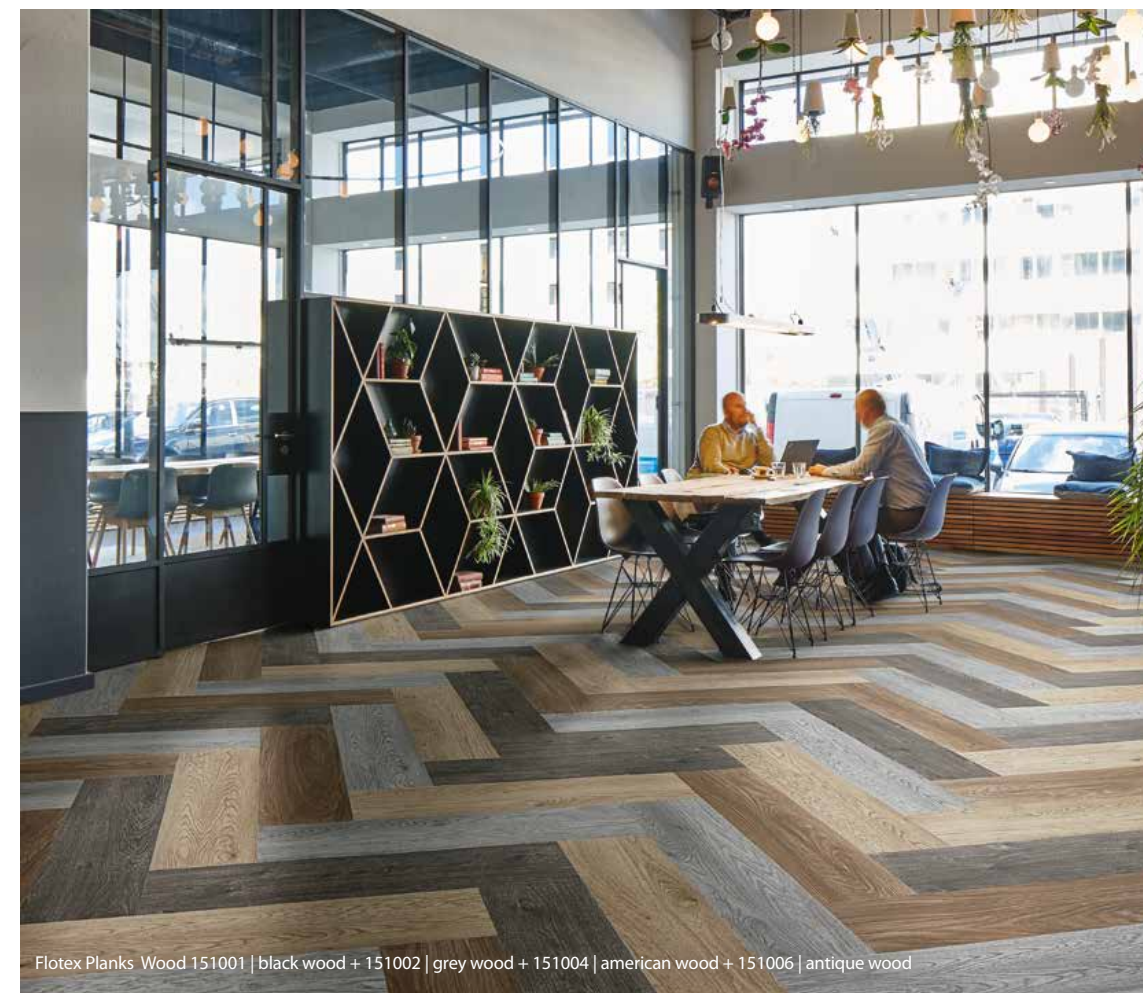

The design signature is inspiring, offering over 100 different designs across wood, stone and abstract designs.

flotex® planks

Flotex is the only product available in the flooring market that combines the appeal of a textile floor covering with the practical and hygienic advantages of a resilient floor.

Flotex plank offer endless possibilities to mix and match colours without one design. Laying patterns can also create stimulating and lively environments with zigzag motives or herringbone designs. Alternatively, as Flotex planks show little repeat in their patterning, they can be used to create interesting and beautiful floors even when only one single colour is used.

Our new Flotex Planks collection, contains 6 unique designs in plank sizes of 100x25 cm.

Stunning floorplans can be created with the contemporary designs that match every requirement.

Flotex is approved by Allergy UK as it has proven to have a positive impact on the lives of allergy sufferers.

Made from nylon 6.6 fibers Flotex is an indestructible textile

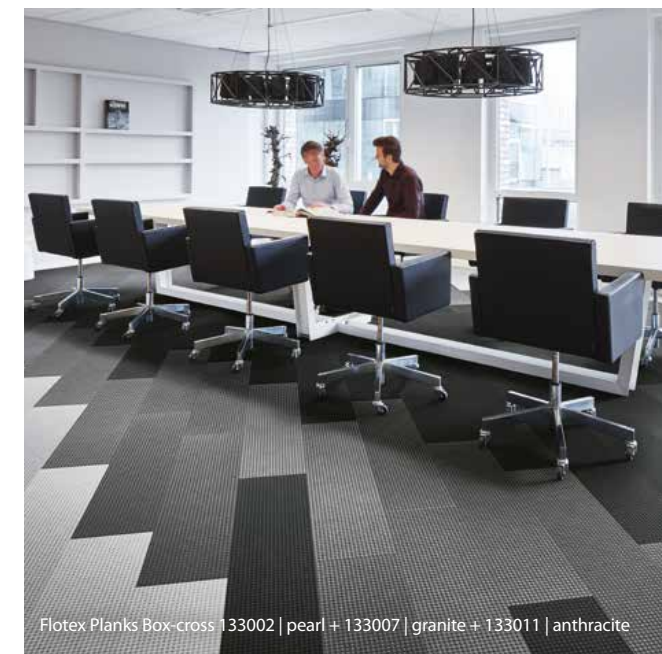

Densely placed fibers (up to 80 million per m2)

Avoids tripping or slipping hazards both in dry and wet
