Seamless sheath, protects flux from contamination

Traditional wire closures do not protect the flux in the wire core from ambient humidity

Superior Protection Inside and Out
Copper coating protects wire surface and aids feeding

Seamless Copper Coated FCW
Longer Shelf Life and Open-Air Exposure Over Standard Seamed Wires
Less Tip Abrasion & Longer Tip Life

The welded seam allows for a homogenous flux-fill, eliminating any shifting or settling of larger or heavier particles within the flux matrix.

NIPPON STEEL SF-1A approvals: ABS, NK, LR, DNV, GL, BV, PRS, CWB

Fusion 160 with optional electric start shown.

POWER SHIFT

Work anywhere convenience. PowerShift technology provides weld capabilities using either the Fusion 160 gasoline engine or 120/240-volt utility power. You'll have the confidence of knowing that you can weld virtually anywhere — outdoors and indoors — with just one machine.

The multi-voltage plug (MVP™) makes it easy to connect the welder to either 120- or 240-volt power.

The Fusion 160 delivers a smooth, stable arc from either engine power or 120/240 volt utility power, providing a unique combination of versatility and productivity in a lightweight package.

ArcReach™

Increase, Improve and Maximize

Exclusive Miller® technology uses the weld cables to communicate changes in voltage settings. With an ArcReach System, voltage and wire-feed-speed controls are conveniently located at the operator's fingertips — right at the point of use — not back at the power source. By eliminating control cables to the feeder, cabling is streamlined and operators work at maximum efficiency.

- Increase productivity — No time-consuming trips to the power source.
- Improve weld quality — Reduces costly "work arounds".
- Improve worker safety — Reduces operator hazards and injuries.
- Maximize efficiency — Reduces costly cord set up, maintenance and repair.

ArcReach

Remote control of the power source without a cord. With a SuitCase® ArcReach feeder and ArcReach power source you can change output voltage at the feeder, and save a trip to the power supply. No extra control cable to purchase, maintain, string or unstring — saving time and money.

ENDURO-FLEX™ 4 1/2" \$9.29

The longest life and highest overall material removal in the industry

ENDURO-FLEX outperforms all competitive flap discs thanks to its innovative design and exclusive abrasive grain blend. Featuring a new ECO-TRIM backing that can be trimmed back to extend disc life, ENDURO-FLEX is the longest lasting flap disc in the industry and removes more material than any competitive flap disc. Your employees will spend more time getting the job done and less time making trips to the tool crib, saving you time and money while maximizing your productivity.

ENDURO-FLEX STAINLESS™

Guaranteed not to contaminate stainless steel

ENDURO-FLEX Stainless offers all the benefits of the standard ENDURO-FLEX with a formula free of iron, sulfur and chlorine to meet quality control objectives in sensitive operations. ENDURO-FLEX Stainless is the flap disc of choice for workers nationwide for blending applications on stainless steel, aluminum and other heat sensitive alloys.

ZIPWHEEL CUTTER KIT 4 1/2" & 6"

The most powerful cordless cutter on the market

**4.5" # 34A949
\$ 289**

**6" # 34A949
\$ 310**

The ZIP WHEEL CUTTER is a powerful cordless cutting tool that delivers the most cuts and longest battery life when paired with Walter cut-off wheels. It comes with an 18V/ 5.2 Ah battery pack and a Ventilated Charging System, allowing you to charge faster and reduce downtime. This cordless cutter features the DYNAMAX electronic RPM control, which protects the unit from overloading and overheating. It also contains a 270° rotating battery pack so you can adjust the battery for greater comfort while working and offers easy access to the internal carbon brushes.

ZIP WHEEL

ZIP WHEEL is the highest performing cut-off wheel on the market. Faster, cooler, freer cutting and heavily reinforced for added safety, ZIP Wheel provides premium performance while resisting twisting and bending. This allows for a true, straight cut every time. The end result is a wheel that improves worker safety while delivering the lowest cost-per-cut in the industry.
