**NISSAN NP200**

Every effort has been made to ensure that the content of this publication is correct at the time of going to press (October 2009). This brochure has been produced featuring prototype vehicles exhibited at motor shows and, in accordance with the company's policy of continuously improving its products, Nissan South Africa reserves the right to change the specification and the vehicles described and shown in this publication at any time. Nissan dealers will be informed of any such modifications as quickly as possible. Please check with your local Nissan dealer to receive the most up-to-date information. Due to the limitations of the printing processes used, the colours shown in this brochure may differ slightly from the actual colours of the paint and interior trim materials used. All rights reserved. Reproduction in whole or part of this brochure without the written permission of Nissan is forbidden.

# SHIFT\_

A single word that captures more than a vision. More than a philosophy. It's a dedication to looking at the familiar in a different way. To opening the mind to new ways of thinking. And forever advancing the way people move through the world.

# NP200

Globally Nissan has a longstanding heritage in the commercial vehicle market that dates back to 1932. The Nissan brand presence in the LCV market has been built over the last seven decades and today Nissan boasts the most comprehensive commercial vehicle line-up in South Africa.

The previous Nissan half-ton Bakkie is a living legend in South Africa. Highly versatile and functional, it proved to be the most hardworking and affordable half-tonner on the market. The new Nissan NP200 range picks up where its predecessor left off, and brings a youthful energy to the line-up. Tough, workhorse reliability is combined with an exciting, adventurous design to deliver impressive versatility.

As with the rest of the Nissan commercial vehicle range, the NP200 offers the highest levels of reliability and durability, in conjunction with the lowest possible levels of overall running and repair costs.

The versatile Nissan NP200 bakkie range will take your business to new heights with its never-say-die attitude, offering:

- The biggest payload in the segment – 800kg\*
- The biggest loadbox volume in the segment – 1.25m<sup>3</sup>
- The longest loadbody in its class – 1 807mm
- Cross over styling
- More power & torque output with 1.6 16V engine
- Sporty interior
- Comfort features (CD & MP3, air conditioner, power steering)
- Class Leading safety specifications – Dual airbags, Anti Lock Braking System with Electronic Brake force Distribution (ABS/EBD)
- Rubberised loadbox as standard feature
- Economical and fuel efficient 1.6 litre engine (1.6 8V, 1.6 16V and 1.5dCi engines)

If you are looking for a smart investment and versatile bakkie, the Nissan NP200 gets the job done.

\*up to and including 1.6 engine capacity

## BEST OF BOTH WORLDS

All work and no play is no fun. Which is why the Nissan NP200 range gives more than practicality and under-the-skin durability. The sleek exterior styling projects a no-nonsense attitude. The extremely spacious interior cabin provides passenger car-like comfort and lots of space for your belongings. The ergonomically designed driving position keeps you in control, while power steering and a coil spring suspension ensures an unbelievably smooth driving experience. The interior layout is smart. Extensive storage capacity includes glovebox, door bins and drink holders under the central console, as well as storage space behind the seat and two hooks for hanging work clothes. There are 14 anchor points, 6 of which are on the floor of the load box, to make sure that anything you tie down, stays down.

The NP200 range effortlessly brings together practical ruggedness and modern flair. Besides being a smart business investment, this multi-talented bakkie is also a stylish statement on a night out on the town. And on weekends you have a robust bakkie that will take your leisure activities in its stride.

## UTILITY INTERIOR

The stylish NP200 interior is open and inviting, and offers an array of comfort features.

The NP200 boasts the biggest interior cabin space in its class with an additional storage area (300ℓ) behind the seats. Everyday items are within easy reach and the storage areas are logically arranged. Extensive storage capacity includes glove box, door bins and drink holders under the central console, as well as storage space behind the seat for added functionality.

## COMFORT

The Nissan NP200's high quality aesthetics offer you the luxury and styling of a passenger vehicle without compromising on the practicality and versatility that is consistent with a bakkie.

High quality trim is smart and inviting and the impressive levels of equipment and instrumentation combine comfort with safety and performance, making every drive an effortless experience.

Driver-friendly technology includes an air-conditioner, power steering, audio system and central locking.

Built to the highest specification, the Nissan NP200 range does not compromise on your safety.

Crumple zones are engineered around impact resistance while the engine compartment is designed to stack up in frontal impact collisions. The restraint system includes 3-point seat belts; impact absorbent material underfoot in the dashboard and the doors provide hip and limb protection.

The Anti-lock Braking System (ABS) and Electronic Brake force Distribution (EBD) prevents the wheels from locking, so you can still steer round the obstruction with ease. The Nissan NP200 SE models come standard with dual airbags and driver airbag is standard on S models.

The NP200 also comes standard with Nissan's Microdot Anti-theft technology. So, if you're looking for a practical workhorse or a vehicle for leisure pursuits, you will undoubtedly be impressed by the NP200's versatility and uncompromising robustness.

#### Safety Shield

In the commitment to "Real World Safety", Nissan pursues innovation as part of its Safety Shield concept. Based on the idea that cars should help protect people, advanced, proactive safety technologies help driver and passengers to avoid danger and injury in a wide range of circumstances. ### Nissan's commitment to quality

To provide all customers with a consistently high level of quality, Nissan applies the same standards worldwide, to ensure that all Nissan owners enjoy peace of mind for the lives of their vehicles. The approach is based on quality from the customer's perspective on three key elements:

First, the expectation of a smooth driving experience with complete peace of mind. Second, the intangible appeal of a vehicle, its power to captivate and excite, with features that capture attention and imagination. Third, the level of attentiveness and service during the sales process, and long after the sale is concluded.

### Nissan's commitment to the environment

Nissan's environmental philosophy embraces people, vehicles and nature. In the pursuit of a sustainable mobile society, the Nissan Green Program 2010 aims to reduce the environmental impact of Nissan vehicles at every stage of the vehicle life cycle, while corporate activities address environmental challenges.
