

SPRING LAKE SIMMENTALS

The Zimmers

BULL SALE

Wednesday
March 3, 2021

Camrose Regional Exhibition
Camrose, Alberta
Sale Time 1:00 PM

Welcome to our second annual Spring Lake Simmental bull sale. We are excited about the group of bulls that we are presenting to you this year and think that we have something for everyone and every herd. Whether that is a performance red, black or fullblood or a calving ease bull from one of our proven herdsire groups. Our goal again is to raise an easy doing, structurally sound type of animal with good calving ease while maintaining the performance of the Simmental breed. We will go the extra mile to make sure that you are happy with your purchase because we don't want to just sell you a bull, we want a satisfied customer that wants to keep coming back.

There are some new AI sired groups to appraise as we feel we need to continually try to improve our genetic pool. As well, we have some new walking herdsire groups that we are very happy with and different for us genetically. Along with those bulls, are the tried and proven sires like Sysco, Sedona, Dempsey, Ranger and Ripcord. We know about the consistently good calves that they sire and we are not going to ignore them just because we have used them for a couple of years. You don't throw good stuff away because it's old (I'm only 64 honey) if you're reading this.

We have "new". We have "tried, tested and true". We have a great breed with great people in it and around it. Welcome one and all to the 2021 Spring Lake Simmentals, "The Zimmer's" Bull Sale.

Thanks,

Doug and Larene, Eric and Cristin and family

Box 273, Daysland AB T0B 1A0

As we move into this sale season, we are pleased to represent Spring Lake Simmentals as their sale management. It was a thrilling sale last year, was one of the most talked about Simmental bull pens to be sold and very comparable group exist again!

Similarly to last year, the "Sysco" sons stand out, just more of them! They are always thick, have a real look to them and carry that blood red colour! Plus a few bonus black sons included too. You won't miss the blaze-faced "Gameface" son in this red category either! They are flanked by sons of Sedona, Ranger and Century! Lots of quality with diversity to sustain any buying needs. The "Red Pen" is one of Western Canada's best!

The "Blacks" who are sired similarly, but add some top sons of "Missile" are strong too. Lots of hair, top and shape in this group.

The Fullblood bulls have some "Raptor" sons that sort to the top. The Dempseys once again gather the most sire codes in this group and are of similar quality to last year.

Let us be your eyes, if you aren't able to attend, with our highly-trusted, industry-leading, order-buying services. Or if you simply would like an opinion prior to your arrival, also call any of cell phones.

For the Zimmers,

--

ZSL Raxil 3H is the only Crossroads Warden son in the sale this year. He is however, a full brother to ZSL Red Alaska 3B who is doing a heck of a job in the Rendezvous Simmental herd in Manitoba, where he has been the sire of many of their high selling bulls and females. This bull is every bit as impressive with an actual 1060 pound weaning weight and looking every bit the part of a herd bull. His length, depth and thickness along with his magnificent hair coat and darker than dark red color will make him stand out on sale day. On the maternal side of Raxil 3H, there has been no other cow in our herd that has out produced his Crosby mother, ZSL 56Y. When she hasn't produced a top seller like ZSL Red Alaska 3B, ZSL Abiscus 29D and ZSL Titan 118C she has produced females that we have valued at the very top of our replacement pen. We truly are excited to offer this feature bull for sale and excited to see who ends up with him.

ZSL Hudson 95H is a typical Mandako son who is deep barrelled, pear shaped and soft made with the thickness that Mandako consistently passes on to his offspring. His dark red hair color and overall eye appeal made him an easy choice to be one of the poster boys for our upcoming bull sale. On the maternal side he comes from a tremendous cow that has put several calves at the front end of our previous sale offerings.

This LFE Game Face son is a Red Summit heifers first calf with a birth weight to weaning weight performance that is hard to beat, especially coming from two calving ease pedigrees. The volume, depth and thickness of ZSL Tillman 127H along with his sound structure, correct feet and legs and docile temperament will interest the most discerning cattleman. Add in the possibility of this impressive young herd sire prospect working in your heifer pen and he becomes that much more attractive and valuable. There will be a lot of really good bulls for sale this spring but I believe this bull deserves some extra attention.

We have two Game Face sired calves in the sale and I think that they are both tremendous herd sire prospects. This is a black baldy and he continues to impress me with his thickness and structural soundness. His mother is a high volume solid black cow and is one of the easiest doing cows in the herd. With her maternal power and the strength of genetics that are seen in his sire, LFE Game Face, it makes this combination one that is sure to work and is easily seen in ZSL Gambit 149H.

 ZSL MISS LAKER 35P
 KS BRAVADO P68
 ZSL MISS SELECT 91T

Like his name Ironman 86H suggests, this blaze faced, solid made herdsire prospect is wide topped, heavy quartered and big barreled. This Sysco son will, without a doubt, put the extra pounds on the calves that he sires when you take them to market. His mother is a hard working, soft made, attractive female with a great udder. She has played a big part as to how good this bull is because she is a top end cow, and by the way, she too is blaze faced if that is important to you.

Mohave 108H is a MRL Sysco sired bull with great muscle expression that is wide topped and heavy quartered with the extra length to justify his 1400 pound yearling weight. The Sysco sired calves continue, year after year, to show up at the front of the bull pen as they have a unique balance of calving ease and performance in their pedigree. Mohave will be a great addition to anyone's herd where he will produce those heavy steer calves and sought after females.

Tennessee is a Sysco sired bull that has the WOW factor making him easy to find in the pen as he stands out. He is a bull that you will want to get behind to appreciate the overall thickness and depth of quarter that he exhibits. His side view is just as pleasing with the extra length and rib depth that he displays while blending into a very smooth shoulder and front end. His mother originates from our high selling bull of 2014, ZSL Red Dragon 98A, who sold to the Pleasant Valley Colony where the reports on him were that both his steers and his replacement females were exceptional. Tennessee will have many astute cattlemen around him on sale day.

Truly a commercial cattleman's kind of bull. Wide based, stout featured and soft made while being exceptionally sound on his feet and legs. This dark red baldy is a herd sire in the making and is ready to work. We feel that he will produce heavier and above average calves every season that he is out there working for his new owner. Longevity is in his pedigree as his mother, 51X, came over on the ark and she is just as sound today as the day she hit dry ground.

Nordic 90H is a son of one of our newest herd sires, LJR Tundra 43F, who was purchased because of his tremendous depth, rib shape and muscle dimension. He also had the thick, wavy hair coat and the liver red color that we try to maintain in our bulls. His performance is in the top end of the breed yet he calves exceptionally well and they go on to be among some of the best in our bull and female pens. 90H has the genetics in him to make him a very valuable asset to use on your cow herd. 88 pound birth weight to 920 pound weaning weight makes the math fairly easy.

In my opinion, this black bull is one that you will drive a lot of miles this spring to find one better. He is a thick made, big barrelled and easy doing kind of a bull yet tracks as smooth and athletic as any in the pen. His natural softness, eye appeal and excellent disposition are among some of his attributes. This is exactly the type of bull calf that we had hoped Tundra 43F would help us to produce and he has certainly done that. His dam, ZSL 6D, is a tremendous thick cow with an excellent udder, huge capacity and the kind of cow that I love.

 JNR'S GRACEFULLY YOURS

Mr Quincy 109H has that overall balance, eye appeal and thickness in a moderate framed, dark red and hairy package that will make him one of the favorite IPU Red Century sired calves on sale day. His mother is a moderate sized female with excellent rib shape and a tidy udder attachment that along with these characteristics and more, will keep her producing in the herd for quite a few years.

Winston 135H is an IPU Red Century son that is well balanced while possessing a deep rib and the extra capacity that we like to see in our bull calves. This blood red Century son crossed with his Warden mother is going to add performance, thickness and the dark red color pattern to his offspring. We feel that this is the type of bull that commercial cattlemen are searching for and will find very useful.

ZSL Mr Shield 803H is a moderate framed, calving ease potential sire with extra rib shape and the natural thickness to make him a very useful young herd sire. Add in his super hair coat and quiet disposition and you have a very complete individual. His sire, ZSL Timber180F, is out of an outstanding Shear Force female which will increase the maternal value of this young bull, ZSL 803H.

This Equity sired bull calf started out with a very modest 84 pound birth weight yet went on to perform extremely well. This black blaze faced heifer bull prospect is very long and sleek in his design yet still has enough power through his top line and quarter to sire calves that will be well accepted and will weigh up when you take them to town. His mother is a great young cow that was one of the high selling females in the Rendezvous sale in the spring of 2019.

Justice is a polled fullblood bull that is not bred to be one of the biggest bulls in the pen. However, with his 80 pound birth weight and a pedigree that reflects total calving ease, this wide topped and soft made young herdsire prospect will be as close to a bullet proof heifer bull as you can come. Also the maternal power in this pedigree will be a bonus should you decide to keep replacements from Mr Justice 111H.

ZSL Mr Zac 239G is one of those bulls that has the wow factor. He certainly catches your eye with his liver red color, full goggles, length of spine and easy fleshing ability over a very sound frame. Two year old bulls are tougher to keep around because they are extra work and take an extra pen. However, this guy was an easy decision as even though he was a little younger, he was a standout from birth. His extra age will mean that he will be able to cover more cows and that will be a bonus for his new owner. Imagine a pen full of calves that look like 239G.

This two year old bull is a combination of two of the highest profile bulls that we have sold through our sale. ZSL Ripcord 2E on the top of his pedigree, sold for \$30,000 into the Perkins herd in Manitoba, and ZSL Mandako 49B who sold for \$40,000 into the Rendezvous herd also in Manitoba. Those two pieces of this bull's make-up are why he is such an impressive individual. He is a moderate framed, soft sided and stout herd sire prospect with a thick hair coat and quiet disposition second to none. He certainly would have sold at the very start of the sale last year but suffered a chute injury, from which he has now fully recovered, but at the time, wasn't ready for the sale. This type of two year old does not come along very often. Use his extra maturity to your advantage.

Sparta is a red blaze faced two year old bull that is a very sound, moderate framed herd sire prospect with the extra length and thickness to make him a popular choice on sale day for many commercial cattlemen. He comes from a cow line with perfect feet and udders and that easy fleshing ability that will keep him looking good year round. Look for this bull to produce many top end sale prospects whether they are steers or heifers.

Eric & Cristin Zimmer
Eric: (780) 678-6156

Doug & Larene Zimmer
Doug: (780) 679-8311

www.springlakesimmentals.com

If you are unable to attend the sale this year, online bidding will be available through Transon Online, or give us a call or stop by the farm prior to sale to see the bulls. We have hired the most trusted sale staff we could think of to assist you with any purchasing requirements you may have in your absence. We use them ourselves to help with buying when we can't be there ourselves. Call any of the cell numbers listed in the front of this catalogue.

Terms & Conditions

DELIVERY:

\$100 off per lot if picked up sale day. Bulls will be kept free of charge for a reasonable length of time, usually until you need them. In rare cases and for convenience reasons, you may be asked to receive your bull(s) when delivering other bulls to your area. All bulls must be insured if going back to the seller's farm unless arrangements have been made between the buyer and seller. Insurance will be available on sale day.

HEALTH OF BULLS:

Spring Lake Simmentals guarantee to sell you a bull that is structurally sound and has passed a semen test done by a licensed veterinarian. Our bulls are raised on a BULLSEYE ration and go through a regiment of herd health shots designed to protect and enhance the longevity of the bulls.

SIGHT UNSEEN PURCHASING:

Every year more and more bulls are purchased sight unseen because of the increasing number of repeat buyers. If you wish, contact Eric or Doug with the bulls of your choice and they will discuss them with you. They will then forward you on to one of our very knowledgeable Transcon sale staff members. Then you, the buyer, can get your bull buying done in a very confidential and professional manner.

TERMS & CONDITIONS:

The sale will be conducted under the standard Transcon Livestock Corp. terms and conditions. Copies will be available at the settlement desk.

SEMEN RESERVE:

Spring Lake Simmentals reserves the right to collect 100 straws of semen for in herd use only on any bull in our sale. Semen would be collected at our expense and the buyers convenience.

HerdSire **MRL SYSCO 14D**

Where do I start with this bull? Before we bought Sysco we had been using his sire, Capone, fairly heavily and thought why not just buy a Capone son. We feel we hit a homerun with the purchase of MRL Sysco 14D. He has done everything that we could have hoped for. He calves extremely well and the calves grow like weeds posting above average weaning weights and yearling weights. The bull calves have been extremely popular in our sales with their thickness, soundness, hair coats and gentle temperaments. The daughters have emerged as soft made and moderate framed females that have above average udders and milking ability. We have no doubt that a Sysco sired bull in your herd will be one that you will be happy with.

HerdSire **WFL RANGER 58E**

WFL Ranger 58E is a Red Mountain grandson that we purchased from Westway Farms for \$34,000 to use in our heifer pen. He has done a really good job there as the calves come easily and his bull calves develop into sound, easy doing and functional herd sire prospects. His females are bred to be good with the Red Mountain genetics in his pedigree and believe me, they are.

It has been a pleasure and privilege to continue to work with the Zimmer Family on their nutrition program. A family operation through and through, the future is strong for Spring Lake Simmentals as they grow and continue to focus on quality. The cow herd utilizes a customized mineral program that is balanced throughout the year. This supports proper bull calf development from a young age. The bull feeding program is built to maximize forage utilization and gut health; they are developed on grass with their moms and then moved onto a balanced TMR that promotes lean muscle. The bulls are challenged with a foraged based TMR to help them develop to their genetic potential. Organic minerals are used to ensure proper immune function and overall health. The Zimmer's use a total nutrition program on their entire operation, ensuring optimal cattle performance. If you have any questions about the nutrition of the sale bulls, please feel free to call. Best of luck on sale day!

© More Than Just Feed

Herdsire **ZSL MR DEMPSEY 80E**

ZSL Dempsey 80E is a smooth polled, fully goggled, blood red son of South Seven Mr Adonis 96Z. His calves are born easily, grow well and perform as efficiently as any horned full blood. His mother is a polled Foreman daughter that is a model cow, with the thickness, balance, and udder quality to make her a standout in the herd. His calves will add performance and maternal value while keeping the color consistency that Dempsey himself displays.

Herdsire **ZSL MR SEDONA 77E**

We love this bull. He sires calves with moderate birth weights, above average weaning and yearling weights and has a pedigree that takes any guess work out of this bull's value. Co-owned with the Bieleny's of Anchor Lazy U, we felt that we needed to keep using his genetics in our herd to add the performance and maternal values that we know are in this bull.

Herdsire **ZSL MR RIPCORD 2E**

ZSL Ripcord is a bull that we raised and sold for \$30,000 in our 2018 sale to Perkin Land and Cattle of Elgin, Manitoba. He was one of those bulls that was so soft made and full of meat and muscle with the heavy blood red hair coat that we like so much, that we just had to draw semen on this bull and continue to use him in our program. Adding to those qualities is the fact that he is royally bred, coming out of ZSL Red Alaska and a model Red Label cow on the maternal side that we absolutely loved. This bull has bred in consistency and the calves that he sires have it also.

Herdsire **ZSL MR MANDAKO 49B**

ZSL Mandako 49B is a powerful Godfather sired herd bull that we raised and sold in our sale in 2015. He now resides in the great beyond but before that the Maguets, of Rendezvous Simmentals, Ste. Rose du Lac, Manitoba used him heavily and did extremely well with his progeny, males and females. We also have used him with great success because his calves are just darn good. Mandako genetics will add performance and maternal characteristics that any cattle breeder will appreciate.

Herdsire **OH KAY TUNDRA 43F**

Tundra 43F was a Transcon's Red Deer Sale feature and when I saw him I knew that I wanted to own him. He was one of the soundest, thickest, longest, dark red and hairiest bulls that I had seen all spring. Fortunately his pedigree matched nothing in our herd and we brought him home. He calves extremely well and his calves are thick, moderate framed and correct. Come sale day you will see why we are so happy with the bull calves that he has sired for us.

Herdsire **IPU RED CENTURY 164F**

This is a dark red Century son that we bought from Labatte Simmentals to introduce different genetics into our herd, while keeping with our goal to produce moderate, thick and structurally sound beef cattle. IPU Red Century 164F has done that for us. We believe that you will appreciate his sons in this sale as much as we do. The bonus in this bull is that Barry says his mother, 105L, is one of the most prolific cows that had ever walked his pastures.

Thank you to all our bull buyers of 2020.
We are grateful for your continued confidence and support.
We look forward to seeing you at the sale.
