

Dear Parents,

The math packet for rising 6<sup>th</sup> graders is designed to help your son practice his math skills over the summer months. We know how easy it is to forget something you learned unless you practice it, and we hope that by completing this packet your son will get off to a strong start in math in September. The problems in the packet should be familiar to him. If he does not understand something, please encourage him to watch a video about it on YouTube or log in to IXL and search for the topic.

This packet is optional. We included the answer key so you can check the work with your son as he finishes each section. This should give you an idea of different topics he may need to review. He can use Mathletics, IXL or Khan Academy to get additional practice if he needs it.

Also, please make sure your son knows his math facts. If he does not know them automatically, please practice them with him this summer. While driving in the car, ask him random times table facts or to count up by a certain number. If he is using mental energy to recall these facts, it makes it harder for him to learn new material and make connections so it is important that they are mastered.

We hope you and your family enjoy these summer months, and we look forward to welcoming your son to Crosman Hall!

Sincerely,

Tracy Nelson and Nick Romero
