

990DSL CopperPro™ Loop Tester

The next generation in test performance —
Network SuperVision™ for your local loop.

12 test sets in one

CopperPro packs all the test, analysis and troubleshooting capabilities an OSP technician needs into one integrated hand-held tool for a new view of your local loop:

1. **Digital Multimeter** — AC/DC Voltage, Resistance
2. **Opens Meter** — measure capacitance
3. **RFL Meter** — locate shorts, crosses or grounds
4. **Noise Meter** — VF & WB, Gaussian & Impulse
5. **Time Domain Reflectometer** — precisely locate and identify faults
6. **Dial Set** — set up or monitor calls
7. **Leakage Tester** — “punch” through resistance faults not detected by other tests
8. **Ammeter** — test AC and DC current on a pair
9. **Loss Meter** — VF & WB. Measure signal loss over a pair in voice or wideband frequency ranges
10. **VF & WB Precision Signal Generator** — generate precisely controlled signals in single tones, swept sets or composite signals
11. **Tracing Tone Generator** — identify pairs
12. **ANI & CID Tester** — verify Caller ID and Automatic Number Identification functions

Productivity tool.

CopperPro™ brings the power of Fluke Networks SuperVision™ to your local loop.

The more complex and competitive your business becomes, the more difference the right test equipment makes. In one rugged, easy-to-use tool, CopperPro brings together the test sets a technician needs to handle subscriber loop installation, expert troubleshooting, precision fault location and xDSL/broadband-services testing. Quickly. Easily. Cost-effectively. With less training than yesterday's test tools require. CopperPro is all you need to test for the most demanding services that other tools can't. That's because it's configured around the way your network, and your testing needs, have changed. Just grab CopperPro and go. You're up and running fast. And so is your local loop.

A power-packed advance in subscriber line test sets

From everyday installation and maintenance to troubleshooting the most elusive local loop problem, CopperPro increases productivity with every use. In an industry where the smartest win, that's not only good service; it's good business.

- Integrates a dozen test sets in one tool for quick, complete troubleshooting, precise fault location and ADSL/digital services qualification.
- Fast, accurate results increase efficiency on every job.
- Easy for the novice; powerful and flexible for the expert. That keeps training time and costs low, productivity high.

- Scalable architecture adds flexibility and protects your investment.

CopperPro is a product of Fluke Networks SuperVision™ — our ongoing commitment to bringing you professional tools that optimize the performance and profitability of today's network. And tomorrow's.

The next generation in subscriber line test sets

Integrates today's top OSP testing and troubleshooting tasks in one tool; less to buy, maintain and train on

Configurable one-button auto-test "toolboxes" support techs of all skill levels for higher productivity and consistency

Scalable design for POTS, wideband and precision fault location applications; match the configuration to the workload and add capability as needed

Built tough for rugged field use and low cost of ownership: sealed to resist moisture, drop tested 1 meter

Large graphic interface is fast and easy to read whether your frontline tech is up a telephone pole or down a manhole

Serial interface for downloading software and uploading or printing reports quickly and easily

Single test modes support the needs of more expert techs

Handheld - weighs in at less than 4 lbs. (1.8 kg)

Local hero.

Profit from providing better loop service.

Now one tool is all it takes

CopperPro's handheld portability and versatile performance make it the right tool for running local loop tests. Any time. Anywhere. You can identify, locate and repair line faults and qualify loop performance—all at the push of a button. And CopperPro can capture the test results for complete documentation. The result? Better and faster service. Higher productivity—and profitability.

As a standalone tool, CopperPro's handheld design makes it easy to carry and operate wherever testing takes you.

CopperPro is easily automated for even greater testing speed and consistency—with documented test results.

Scale up as you need to

CopperPro's unique scalable architecture lets you tailor its testing capabilities to your specific needs—even as they evolve.

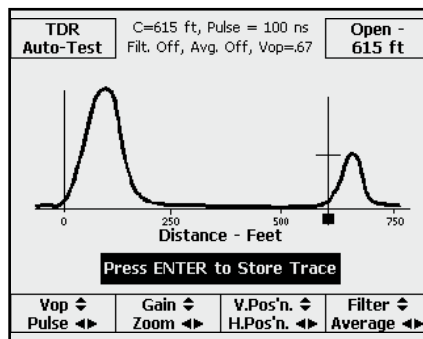

CopperPro's basic configuration is designed for POTS applications including voltage, opens, shorts, balance, RFL, VF noise and loss, terminated and dial-up tests, as well as load coil detection and line monitoring.

The TDR option delivers accurate fault location capability in a handheld test set. With it, you can test and compare pairs, store measurements, and test for crosstalk between pairs.

The Wideband option includes everything you need to qualify and troubleshoot lines for all standard digital services, including HDSL, HDSL2, T1, E1, ISDN BRI, ISDN PRI and DDS. Within seconds, the unique ADSL AutoTest determines whether a pair can provide ADSL service—even predicts upstream and downstream rates and bits per tone.

Do more with less training

Sophisticated inside, simply smart outside—CopperPro combines an easy-to-use toolbox interface with programmable AutoTests for fast, easy testing.

Results of a TDR Auto-Test on a balanced pair, with Tip and Ring open at 615 feet (187.45m), showing the bottom line condition of the pair.

Integrated tests combine functions to help the user understand what's causing a problem and pinpoint the location. Results are displayed graphically on CopperPro's large bitmapped display, which you can easily view in any light conditions.

CopperPro lets you equip more technicians of all skill levels to perform complex tasks faster, with higher precision and less training than ever before. That optimizes your investment in people as well as equipment.

Dependability pays

With CopperPro's reliable accuracy and expert analysis at their fingertips, technicians can find and fix the real problem the first time. That reduces expensive call-backs. And because CopperPro is built with the rugged durability of all Fluke Networks' professional test tools, you can count on it to stand up to the abuse of daily field use—rain, heat and cold included.

Fluke Networks: working for you

CopperPro™ is part of our Network SuperVision Solutions™—a complete family of leading-edge tools, services and training from Fluke Networks that equips you to stay on top of your fast-moving networked world. Our loop recovery, troubleshooting and record management solutions are the choice of local exchange carriers who want to reduce held orders. Increase revenue. Lower OSP operating expenses. Improve workforce efficiency. Reduce OSP defects rates. And increase customer satisfaction.

With Fluke Networks working for you, your local loop is more than a service. It's a strategic advantage that allows you to meet customer demand in a competitive marketplace. That's keeping your eye on the future. That's Network SuperVision™. And it's yours only from Fluke Networks.

Get a better look at your local loop

In one integrated handheld tool, CopperPro gives your OSP technicians the insight they need to provide the quality of subscriber loop service you want:

- Quickly identify and locate such common physical cable faults as shorts, crosses, opens, splits, pair imbalances caused by bad splices, and corroded metallic faults on unused pairs.
- Find the root causes of transmission problems, such as excessive noise or signal loss.
- Help locate and identify loop treatment devices such as range extenders, network interface devices and maintenance termination units.
- Qualify POTS services including Caller ID, Automatic Number Identification and dial-up modems—and digital broadband services including ADSL (DMT and CAP), T1, E1, DDS, ISDN, HDSL and HDSL2. Zero in on noise, loss and crosstalk measurements, predicted data rates, and location of impairments such as load coils or bridge taps.

Specifications

Physical

Size	(H x W x D): approximately 25 cm x 13.5 cm x 8.1 cm (9.8" x 5.3" x 3.2")
Weight	1.8 kg (4.0 lb.)
Display	320 x 240 pixel graphic LCD with backlight and adjustable contrast
LED Indicator	Charging status indicator (located on side connector panel)
Communication Port	RS-232 PC/Printer port (DB-9)

Power

AC Operation	Operates from an external AC adapter/charger
Battery Type	Operates from an internal removable NiMH rechargeable battery pack (installed)
Battery Life	A fully charged battery provides approximately 16 hours of normal use
Battery Recharge Time	2 to 3 hours (in the tester) for a fully discharged battery pack

Environmental

Operating Temperature	-20° to 60°C (-4° to 140°F)
Storage Temperature	-40° to 70°C (-40° to 158°F)
Humidity Tolerance	95% (operation without condensation)
Rain Resistance	UL50, moderate rainfall
Vibration	Random, 2 g, 5-500 Hz
Shock	1 Meter Drop Test (3 ft.)
Altitude	4500 m (15,000 ft.)

Standards Compliance

Analog Transmission Parameter Measurement	IEEE 743-1994
ADSL Metallic Interface	ANSI T1.413-1998

Regulatory Compliance

Safety	CSA C22.2 No.950-95
CE	EN 60950, EN 61326

Specifications: Basic 990DSL

Function	Range	Accuracy
AC Voltage	0 to 250 V	1% ± 0.5 V
DC Voltage (RTN = 100 kΩ, 10 MΩ)	0 to ±300 V	1% ± 0.5 V
DC Loop Current (430Ω)	0 to 100 mA	2% ± 0.3 mA
Resistance	0 to 100Ω 100 to 1000Ω 1 to 4 kΩ 4 kΩ to 100 MΩ	0.2% ± 0.10Ω 0.4% ± 0.10Ω 1% 3%
Leakage Stress	2 kΩ to 100 MΩ	3%
Opens	0 to 3000 ft. (0 to 9144m) 3 to 50 kf (914.4 to 15240m) 50 to 80 kf (15240 to 24384m)	1% ± 5 ft. (1.5m) 3% 5%
Splits	0 to 50 kf (0 to 15240m)	10% of Cable Length

Go with the Pro

Put CopperPro to the test

See CopperPro in action where it matters most—on your own local loop. Call us at 1-800-283-5853 (U.S. and Canada) for a CD-ROM demo. A Fluke Networks Systems Engineer will evaluate your network on-site and show you how to make the most of CopperPro in your own local loop. Or visit our Web site at www.flukenetworks.com for a virtual product demo.

Due to continuous product improvement, specifications can change without notice. For the latest information, contact your Fluke Networks representative.
