

APLA-TECH, INC.

DRYWALL TOOLS & PUMPS

Continuous
Flow

Air Powered

*Apla-Tech® air powered and continuous flow drywall finishing tools are ergonomically designed to reduce the physical strains normally associated with drywall finishing. Even better, we have set the new standard for quality and consistency. **Every component is engineered to save you time and make you money.***

Working Smarter. Working Easier. Working for You.

AIR POWERED SYSTEM

No push tools let air do the work!

T-Series Pump™
(66 lbs)

- 15 Gallon Material Reservoir
- Includes Tool Box

Apla-Pump®
(54 lbs)

- 10 Gallon Material Reservoir

Jr.™ Pump
(28 lbs)

- Place siphon tube in 5 Gallon Bucket

Jr. Mechanical Box
Tool Filler

Jr. Mechanical
Taper Filler

Apla-Tech's Cannon® offers one simple solution to all your finishing needs. Attach desired head. Fill via air powered pump. Remove ends and spray clean. Internal piston allows for use of thicker mud. Lightweight and balanced design requires only *half the effort* of pushing traditional mechanical tools.

Cannon®
(5 lbs)

- Attach nail spotters and mud heads for tape-on products
- Travel 3x farther before refilling

Mud End Attachments

- Attach Slim Line Boxes for coating flats & butts
- Attach angle heads for inside 90° fill & skim coat

- 3', 4', 5' tube lengths are quickly interchangeable
- Transparent tube allows monitoring of compound levels

Apla-Tech® pumps are designed to be fully operational workstations. Mix compound in reservoir or bucket. Easily roll or carry to desired location. Fills *all* types of tools with no effort. Clean pump and tools with fresh water using spray hose.

Tape Apla-Cator
(8 lbs)

- Simultaneously applies paper tape and compound to all wallboard joints including flats, butts and angles with no drag feel

- 28", 3', 4', 5' transparent tube lengths are quickly interchangeable

HEAD ATTACHMENTS

← Attach to either the air powered or continuous flow systems →

Slim Line Boxes

- Available in 7", 10" and 12"

Apla-Tech® Slim Line Boxes require only *half the effort* of pushing traditional mechanical boxes, and the lightweight box design coats flats with *half the weight*.

Angle Heads

Angle Heads

- Attach to gooseneck for effortless angles and corners
- Available in 2.5", 3", 3.5", 4"

Nail Spotters

5.5" Coater
Bed or skim coat tape-on bead, 90° and inside off angles

4.5" Nailspotter/Coater
Skim coat nails, Fill coat tape-on bead once in place

3" Nailspotter
Spot nails, Pre-fill joints, Cross of edges

Mud Heads

Inside 90° Mud Head
Applies a layer of compound prior to application of:

- Paper tape to inside 90° corners
- 90° inside tape-on products

Outside 90° Mud Head
Applies a layer of compound to both sides of outside 90° corners before application of tape-on products

Flat Mud Head

Applies a layer of compound prior to application of:

- Paper tape to wall and ceiling flat joints
- Off angle tape-on inside or outside corners

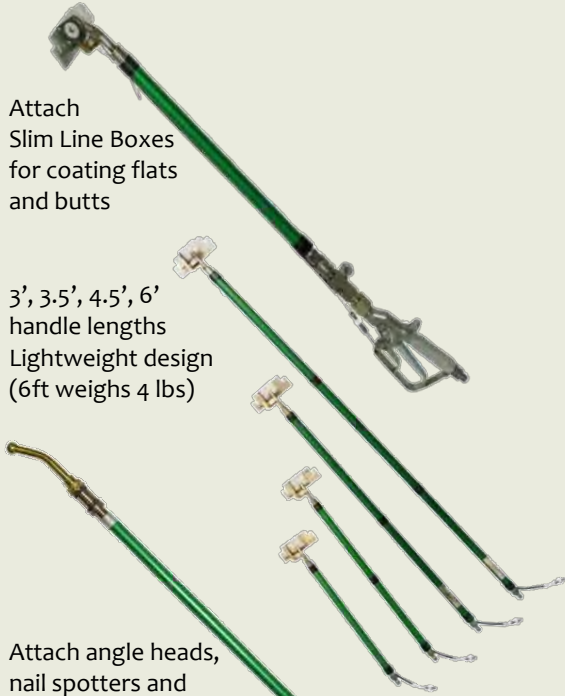

No stopping to refill!

CONTINUOUS FLOW SYSTEM

Box Handle (2.5 lbs)

- Attach Slim Line Boxes for coating flats and butts
- 3', 3.5', 4.5', 6' handle lengths
- Lightweight design (6ft weighs 4 lbs)

Finishing Pole (2 lbs)

- Attach angle heads, nail spotters and mud heads for tape-on bead
- 2', 2.5', 3', 4', 5', 6' pole lengths
- Lightweight design (6ft weighs 4 lbs)

Tape Apla-Cator (12 lbs loaded)

- Simultaneously applies paper tape and compound to all wallboard joints including flats, butts and angles with no drag feel
- Stop only once every 500' to change the roll of tape
- 28", 3', 4', 5' tube lengths
- Weighs only 2 lbs more per each foot of tube

Apla-Tech's Continuous Flow System (CFS) continuously flows mud to our Tape Apla-Cator, Slim Line Boxes, Nail Spotters, Mud Heads and any brand angle head. Tubes and poles easily interchange with the trigger via quick connect coupling. You can *double your production* while cutting your weight and effort by over *half*. Finish up to 153 ft from the pump.

- Pushes approximately 1 gallon of finishing compound per minute for CFS
- Paints
- Sprays Textures (orange peel, splatter & knock-down)
- Sprays Level 5
- Pro Connect System

*Graco® Mark V™

- Can operate two sets of CFS tools at the same time
- Paints
- Sprays Textures (orange peel, splatter & knock-down)
- Sprays Level 5
- Pro Connect System

*Graco® Mark X™

* Registered trademark name of Graco, Inc.

CFS

Texture Attachment

- Interchange pole lengths to spray higher off the floor

AIR POWERED TEXTURE

T-Series Pump™ Texture Only

Apla-Tech's pumps may be purchased in a texture only configuration. Along with the trigger gun, a standard 50' texture line is included; 25' texture line optional. This system enables you to spray a variety of finishes including knock-down, stomp, splatter, orange peel, and simulated acoustical.

Trigger Gun

- Includes 4 brass texture tips

Apla-Pump® Texture Only

Pole Gun

- Includes 3 texture tips

Jr.™ Pump Texture Only

Cannon® Texture Attachment

- Includes 3 texture tips
- Perfectly match existing textures

ACCESSORY TOOLS

Corner Roller with Standard Handle

Corner Roller with Extendable Handle

After paper taping inside angles, corner roller will crease tape into the angles.

Glazer Pole with Extendable/Standard Handle

Attaches to angle head for glazing angles.

Rol-Plow

After paper taping inside angles, the Rol-Plow creases and glazes the angle in one pass.

Where Quality, Ease & Speed Come Together

Our Company

Apla-Tech was started in 1995 by a drywall contractor on the premise that there really has to be a better way; that working smarter is better than working harder.

With over 30 years as a successful drywall construction company and still in operation, we have experienced all the issues affecting a company's bottom line. Using existing mechanical tools and new techniques helped the process, but we needed to look further...

Ergonomics is what led us to the development of Apla-Tech's drywall taping and finishing tools.

From the air powered Cannon® to the Continuous Flow System, the dream became a reality.

Whether you're a contract remodeler who likes to do it himself, a high-rise construction contractor or someone in between, we can supply you with the right tools at a price you can afford.
