

Ludacris Ho Map

Stefanie Gray

Hunter College

Area Codes In Which Ludacris Claims to Have Hoes

Based on his 2001 single, "Area Codes"

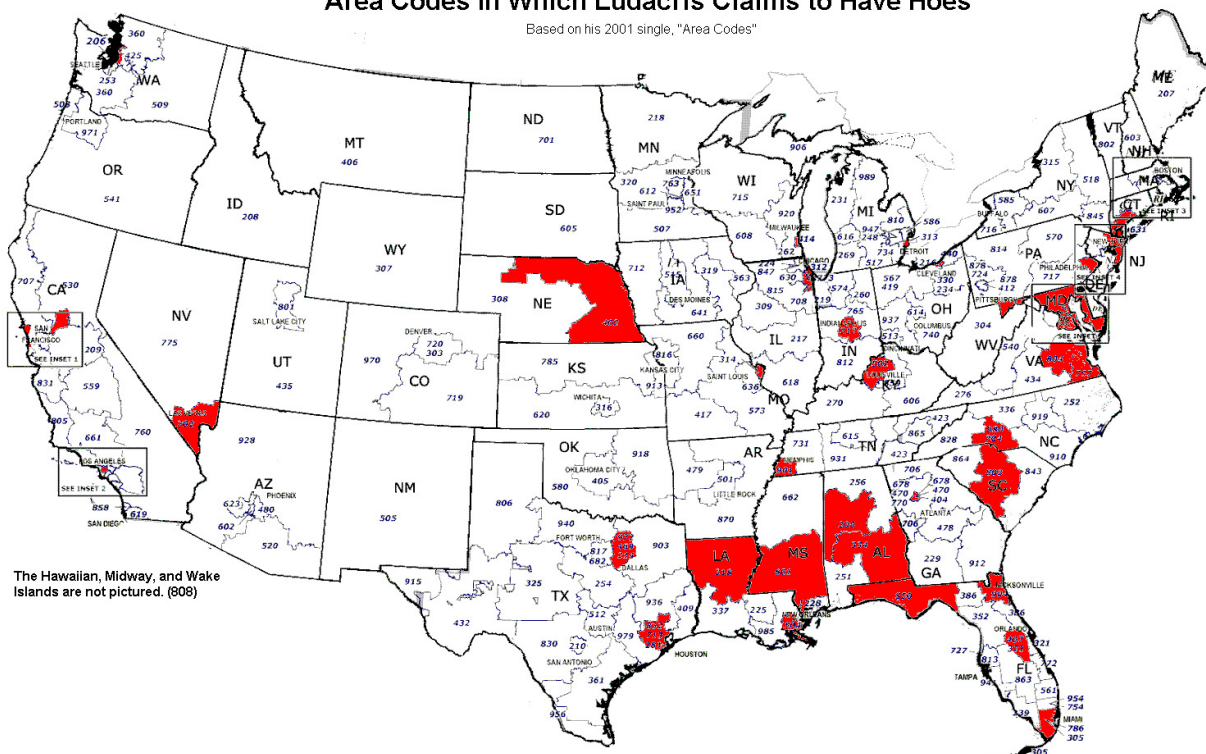

Figure 1. Map of United States area codes (telephone prefixes) in which rapper Ludacris claims to have hoes.

ABSTRACT

In the song "Area Codes", rapper Ludacris brags about the area codes in which he knows women, whom he refers to as "hoes". In the "Ludacris Ho Map", the area codes mentioned in this song are plotted on a map of the United States, visualizing trends in the rapper's preferred locations for female companionship.

KEYWORDS: Telephone area codes; Gangsta rap; hoes; United States cartography.

INDEX TERMS: J.6 [Computer Applications]: Arts and Humanities — Fine Arts.

STATEMENT

"I'll jump off the G4, we can meet outside / So control your hormones and keep your drawers on / 'Til I close the door and I'm jumping your bones / 3-1-2's, 3-1-3's (oh), 2-1-5's, 8-0-three's (oh) / Read your horoscope and eat some horderves (sic) / Ten on pump one, these hoes is self serve / 7-5-7, 4-1-0's, my cell phone just overloads." [1]

I'm a female and a feminist. I dislike the usage of the word 'ho'. However, as both a geography major and Gangsta rap

aficionado, I find this song hilarious, and had to map it. I made this map at 4a.m. one night and it became a brief internet sensation thanks to *StrangeMaps.wordpress.com*. I wrote this stuff about it, too:

- Ludacris heavily favors East Coast hoes to the West, save for those in Seattle, San Francisco, Sacramento, and Las Vegas.
- Ludacris travels frequently along the Boswash corridor.
- There is a "ho belt" nearly equivalent to the "Bible Belt".
- Ludacris has hoes in the entire state of Maryland.
- Ludacris has a large ho-zone in rural Nebraska. He might favor girls who farm.
- Ludacris' ideal 'ho-highway' would be I-95.
- Ludacris has hoes in the Midway and Wake Islands. Only scientists are allowed to inhabit the Midway Islands, and only military personnel may inhabit the Wake Islands. Draw your own conclusion.

ARTIST BIOGRAPHY

Stefanie Gray is a 20 year old senior at Hunter College in New York City, majoring in Geography. Despite her attempts to be the classiest of redheads, her youth spent on the scary side of Fort Lauderdale has given her a special appreciation for funny hip-hop.

Twistori

Amy Hoy and Thomas Fuchs

Slash7

Figure 1. A screenshot of the *Twistori* web site.

ABSTRACT

“Twistori” is a real-time typographic display of Twitter postings, filtered according to basic human feelings.

KEYWORDS: Text visualization; real-time; microblogging; short messaging, Twitter.

INDEX TERMS: J.6 [Computer Applications]: Arts and Humanities — Fine Arts.

STATEMENT

“Twistori” is a dynamic display based on “Twitter”, a popular service that allows users to broadcast text-based posts of up to 140 characters in length. Twistori aggregates and re-presents select

Amy Hoy is at Slash7. E-Mail: amy@slash7.com.

Thomas Fuchs is at Slash7. E-Mail: thomas@script.aculo.us.

Twitter posts in a real-time visual feed, filtered according to essential human impulses. Only those postings containing the phrases “I love”, “I hate”, “I think”, “I believe”, “I feel”, or “I wish” are displayed. Visitors to the *Twistori* site select one of these six channels; live Twitter postings containing the desired phrase are then presented in a scrolling stack.

Twistori is the direct result of our frustration with our respective fields' lack of focus on the human element of new technologies. It seems like few of our peers take the time to understand the human context of software, technology and the internet. We want to help change that by showcasing what can be done.

Twistori can be found at <http://twistori.com/>.

ARTIST BIOGRAPHIES

Amy Hoy is a self-avowed “armchair anthropologist,” and, professionally speaking, an information and interaction designer.

Thomas Fuchs is the author of the script.aculo.us JavaScript effects library and is devoted to sharpening the cutting edge of web interaction technologies. Together they take on select consulting clients through their company, Slash7.

Writing Without Words

Stefanie Posavec

Penguin UK

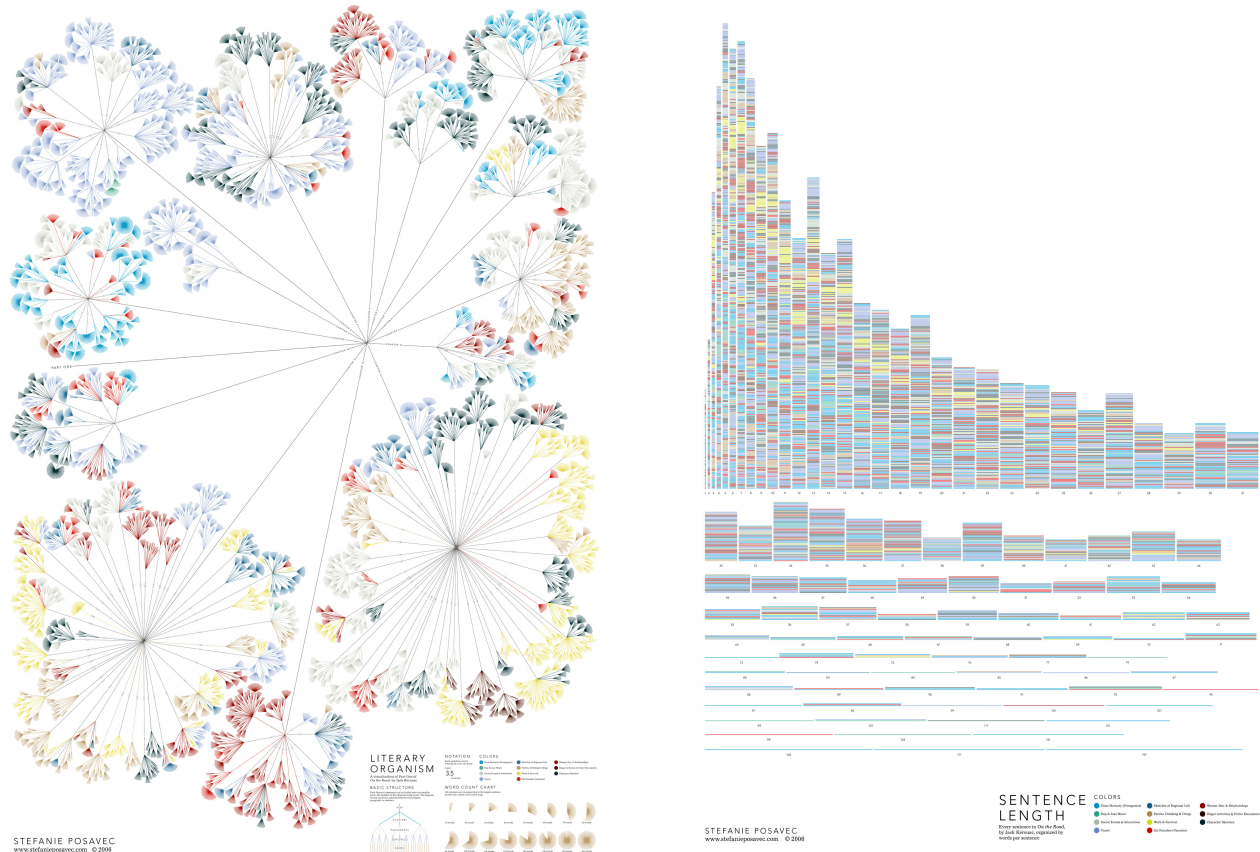

Figure 1. Various visualizations of Jack Kerouac's "On the Road" created for "Writing Without Words". At left, a hierarchical breakdown of the text's structure; at right, a structured histogram of its sentence length. Both are color-coded according to key characters and themes.

ABSTRACT

I present a collection of visualizations which visually represent the rhythm and structure of Jack Kerouac's novel "On the Road".

KEYWORDS: Text visualization; literature; Jack Kerouac.

INDEX TERMS: J.6 [Computer Applications]: Arts and Humanities — Fine Arts.

STATEMENT

"Writing Without Words" was a collection of text visualizations completed for my final year in the MA Communication Design course at Central Saint Martins College of Art and Design in London, England. The intention of this body of work was to explore various methods of visualizing literature without using

words. I wanted to find a way of communicating the complexity of a story as well as create a system to highlight the similarities and differences in the writing styles of various authors. The structure of a novel, punctuation, parts of speech, and words per sentence were used to generate the final patterns.

Any piece of literature can be visualised using my techniques, but I chose to focus my project on the novel *On the Road*, by Jack Kerouac, because of its importance to me while growing up in Denver, Colorado – a key city within the novel. The designs are color-coded according to key themes and characters in the book, all of which were painstakingly marked out in a worn copy of the novel with highlighters and markers. The colors used in the final posters were chosen from automobile paint swatches of the 1940s.
