

smart | SECURITY
solutions™

A complete range of technologies
to secure your entire facility.

Security needs vary across geography, buildings, departments, and offices, so security solutions need to be flexible. Upgrading your security can be as simple as installing Medeco Smart Security Solutions.

To determine your security needs, consider the following:

bilevel[®]

1

Is it important that your keys cannot be duplicated without permission?

You need: **patented key control** for assurance

- Patent-protected against unauthorized duplicate keys
- Retrofits into existing hardware

medeco³[®]

2

Is there any possibility that this door will be subject to physical attack?

You need: **high security** for physical protection

- Provides the same protection as BiLevel, and more
- Offers protection against physical attacks such as picking, drilling and bumping
- Tested and certified to represent the highest levels of physical protection available

m³logic[®]

3

Do you need to know or control who has access and when they enter this door?

You need: accountability and **loss and liability** protection

- Audit and scheduling capabilities
- Installs into standard hardware with no wiring or door modifications

A Complete Security Solution

Medeco's Smart Security Solutions offers a family of products that utilize a single key and provide three distinct levels of protection to address nearly any facility security need.

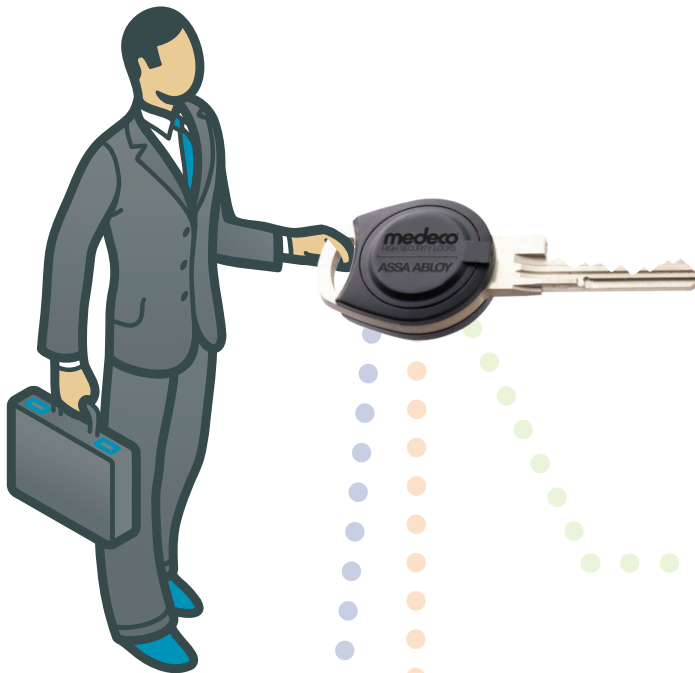

Three different levels of security (BiLevel, Medeco³, M³ Logic), all sharing a common key, give you the flexibility to easily address your facility's security needs and accountability levels.

Medeco keys are protected by strong utility patents that protect against unauthorized key manufacture, distribution, or duplication, giving you the confidence that you know what keys are in your system and who has access to what openings.

It's not surprising that Medeco's security solutions have been chosen to protect government buildings, museums, retail stores, airports, schools and universities, and businesses worldwide for decades.

One key...three
security solutions.

Utilizing Medeco's patented **key control**, BiLevel offers protection from unauthorized key duplication. By retrofitting existing hardware with BiLevel, you can cost-effectively improve your security with the benefits of a reliable, effective patented technology.

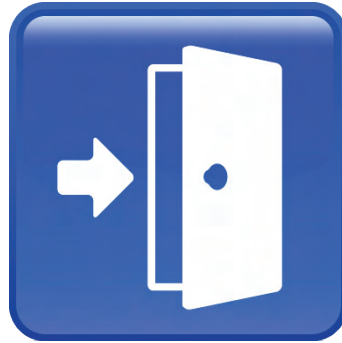

Ideal applications:
Interior doors
Meeting rooms
Maintenance and janitorial
Break rooms / common areas

Openings requiring higher levels of physical protection can benefit from the Medeco³ UL437 Listed **high security** cylinder. This is the ideal solution to gain the highest protection available against physical attack and manipulation.

Ideal applications:
Perimeter doors
Valuables storage
Offices

M³ Logic merges the flexibility of electronics with reliable mechanical technology and the ability to quickly and easily change access rights. Installs in a matter of minutes and offers auditing and scheduling capabilities to provide accountability, enhancing **loss and liability** protection.

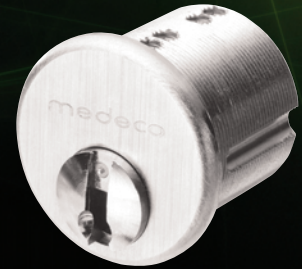

Ideal applications:
Sensitive records storage
Employee records
Financial information
Controlled substances
IT server rooms
Padlocks

Key Control

High Security

Loss & Liability
