Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 369 (2017) are as follows: for paper delivery, US\$2632 list, US\$2105.60 institutional member, US\$2368.80 corporate member; for electronic delivery, US\$2316 list, US\$1852.80 institutional member, US\$2084.40 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$6 for delivery within the United States; US\$85 for delivery outside the United States. Subscription renewals are subject to late fees. See www.ams.org/journal-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Permissions to reuse portions of AMS publication content are handled by Copyright Clearance Center's RightsLink® service. For more information, visit: www.ams.org/rightslink.

Translation rights and licensed reprint requests should be sent to: reprint-permission@ams.org.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Transactions of the American Mathematical Society (ISSN 0002-9947 (print); ISSN 1088-6850 (online)) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Transactions, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

INDEX TO VOLUME 369 (2017)

- Adamović, Dražen, Naihuan Jing, and Kailash C. Misra. *On principal realization of modules for the affine Lie algebra $A_1^{(1)}$ at the critical level*, 5113
- Adams, Terrence M., and Andrew B. Nobel. *Entropy and the uniform mean ergodic theorem for a family of sets*, 605
- Akman, Murat, Matthew Badger, Steve Hofmann, and José María Martell. *Rectifiability and elliptic measures on 1-sided NTA domains with Ahlfors-David regular boundaries*, 5711
- Alexakis, Spyros, and Arick Shao. *On the profile of energy concentration at blow-up points for subconformal focusing nonlinear waves*, 5525
- Alsedà, Lluís, David Juher, and Francesc Mañosas. *On the minimum positive entropy for cycles on trees*, 187
- Andréka, H., and I. Némethi. *How many varieties of cylindrical algebras are there*, 8903
- Andrews, Uri, Mingzhong Cai, David Diamondstone, Steffen Lempp, and Joseph S. Miller. *Theory spectra and classes of theories*, 6493
- Ara, P., and K. R. Goodearl. *The Realization Problem for some wild monoids and the Atiyah Problem*, 5665
- Arhancet, Cédric, Stephan Fackler, and Christian Le Merdy. *Isometric dilations and H^∞ calculus for bounded analytic semigroups and Ritt operators*, 6899
- Arias-de-Reyna, Sara, Luis Dieulefait, and Gabor Wiese. *Compatible systems of symplectic Galois representations and the inverse Galois problem I. Images of projective representations*, 887
- Arzhantseva, Goulmara, and Liviu Păunescu. *Linear sofic groups and algebras*, 2285
- Atkinson, Christopher K., and David Futer. *The lowest volume 3-orbifolds with high torsion*, 5809
- Attouchi, Amal, and Philippe Souplet. *Single point gradient blow-up on the boundary for a Hamilton-Jacobi equation with p -Laplacian diffusion*, 935
- Ayyer, Arvind, and Svante Linusson. *Correlations in the multispecies TASEP and a conjecture by Lam*, 1097
- Badger, Matthew. *See Akman, Murat*
- Baek, Sanghoon. *Chow groups of products of Severi-Brauer varieties and invariants of degree 3*, 1757
- Balwe, Chetan, and Anand Sawant. *A^1 -connectedness in reductive algebraic groups*, 5999
- . *Corrigendum to “ A^1 -connectedness in reductive algebraic groups”*, 8317
- Ban, Jung-Chao, and Chih-Hung Chang. *Tree-shifts: Irreducibility, mixing, and the chaos of tree-shifts*, 8389
- Barański, Krzysztof, Núria Fagella, Xavier Jarque, and Bogusława Karpińska. *Accesses to infinity from Fatou components*, 1835
- Bárceñas, Noé, Paulo Carrillo Rouse, and Mario Velásquez. *Multiplicative structures and the twisted Baum-Connes assembly map*, 5241
- Baricz, Árpád. *See Mező, István*
- Barlak, Selçuk, and Gábor Szabó. *Rokhlin actions of finite groups on UHF-absorbing C^* -algebras*, 833
- Barreira, Luis, and Claudia Valls. *Lyapunov regularity via singular values*, 8409
- Barron, E. N., M. Bocea, and R. R. Jensen. *Duality for the L^∞ optimal transport problem*, 3289
- Bates, Peter W., Giorgio Fusco, and Jiayin Jin. *Invariant manifolds of interior multi-spike states for the Cahn-Hilliard equation in higher space dimensions*, 3937
- Bauer, Ulrich, and Herbert Edelsbrunner. *The Morse theory of Čech and Delaunay complexes*, 3741
- Baumgartner, F., and S. Geiss. *Permutation invariant functionals of Lévy processes*, 8607
- Baumslag, Gilbert, Roman Mikhailov, and Kent E. Orr. *Localization, metabelian groups, and the isomorphism problem*, 6823
- Bayer-Fluckiger, Eva, and Uriya A. First. *Patching and weak approximation in isometry groups*, 7999
- Bays, Martin, Martin Hils, and Rahim Moosa. *Model theory of compact complex manifolds with an automorphism*, 4485
- Bekjan, Turdebek N., Zeqian Chen, and Adam Osekowski. *Noncommutative maximal inequalities associated with convex functions*, 409
- Belk, James, and Collin Bleak. *Some undecidability results for asynchronous transducers and the Brin-Thompson group $2V$* , 3157

- Bell, Jason P., Albert Heinle, and Viktor Levandovskyy. *On noncommutative finite factorization domains*, 2675
- Berhanu, S., and Ming Xiao. *On the regularity of CR mappings between CR manifolds of hypersurface type*, 6073
- Bhatwadekar, S. M., Neena Gupta, and Swapnil A. Lokhande. *Some K-theoretic properties of the kernel of a locally nilpotent derivation on $k[X_1, \dots, X_4]$* , 341
- Biesel, Owen, David Holmes, and Robin de Jong. *Néron models and the height jump divisor*, 8685
- Biringer, Ian, Khalid Bou-Rabee, Martin Kassabov, and Francesco Matucci. *Intersection growth in groups*, 8343
- Biringer, Ian, and Omer Tamuz. *Unimodularity of invariant random subgroups*, 4043
- Bisch, Dietmar, Vaughan F. R. Jones, and Zhengwei Liu. *Singly generated planar algebras of small dimension, Part III*, 2461
- Bizoń, Piotr, and Patryk Mach. *Global dynamics of a Yang-Mills field on an asymptotically hyperbolic space*, 2029
- . *Erratum to “Global dynamics of a Yang-Mills field on an asymptotically hyperbolic space”*, 3013
- Bleak, Collin. *See* Belk, James
- Bocea, M. *See* Barron, E. N.
- Bodirsky, Manuel, Michael Pinsky, and András Pongrácz. *Reconstructing the topology of clones*, 3707
- Boggarapu, Pradeep, Luz Roncal, and Sundaram Thangavelu. *Mixed norm estimates for the Cesàro means associated with Dunkl–Hermite expansions*, 7021
- Boling, Jess, Casey Kelleher, and Jeffrey Streets. *Entropy, stability and harmonic map flow*, 5769
- Böröczky, Károly J., and Daniel Hug. *Isotropic measures and stronger forms of the reverse isoperimetric inequality*, 6987
- Bostan, A., I. Kurkova, and K. Raschel. *A human proof of Gessel’s lattice path conjecture*, 1365
- Bou-Rabee, Khalid. *See* Biringer, Ian
- Bourdon, Abbey, Pete L. Clark, and James Stankewicz. *Torsion points on CM elliptic curves over real number fields*, 8457
- Bouttier, Jérémie, Guillaume Chapuy, and Sylvie Corteel. *From Aztec diamonds to pyramids: Steep tilings*, 5921
- Bowen, Lewis, Rostislav Grigorchuk, and Rostyslav Kravchenko. *Characteristic random subgroups of geometric groups and free abelian groups of infinite rank*, 755
- Bowen, Lewis, Yair Hartman, and Omer Tamuz. *Generic stationary measures and actions*, 4889
- Brannan, Michael, Benoît Collins, and Roland Vergnioux. *The Connes embedding property for quantum group von Neumann algebras*, 3799
- Brenti, Francesco, and Angela Carnevale. *Proof of a conjecture of Klopsch–Voll on Weyl groups of type A*, 7531
- Bringmann, Kathrin, and René Olivetto. *Kac–Wakimoto characters and non-holomorphic Jacobi forms*, 1163
- Brito, Matheus, and Evgeny Mukhin. *Representations of quantum affine algebras of type B_N* , 2775
- Brownlowe, Nathan, Nadia S. Larsen, and Nicolai Stammeier. *On C^* -algebras associated to right LCM semigroups*, 31
- Brudnyi, A., and D. Kinzebulatov. *Kohn decomposition for forms on coverings of complex manifolds constrained along fibres*, 167
- Brunat, Olivier, and Jean-Baptiste Gramain. *Perfect isometries and Murnaghan–Nakayama rules*, 7657
- Bui, The Anh, and Xuan Thinh Duong. *Laguerre operator and its associated weighted Besov and Triebel–Lizorkin spaces*, 2109
- Butterley, Oliver, and Peyman Eslami. *Exponential mixing for skew products with discontinuities*, 783
- Cacciatori, S. L., F. Dalla Piazza, and A. Scotti. *Compact Lie groups: Euler constructions and generalized Dyson conjecture*, 4709
- Cai, Mingzhong. *See* Andrews, Uri

- Cao, Yalong, and Naichung Conan Leung. *Relative Donaldson-Thomas theory for Calabi-Yau 4-folds*, 6631
- Caraballo, David G. *Existence of surface energy minimizing partitions of \mathbb{R}^n satisfying volume constraints*, 1517
- Carlson, Timothy. *Analysis of a Double Kruskal Theorem*, 2897
- Carneiro, Emanuel, and José Madrid. *Derivative bounds for fractional maximal functions*, 4063
- Carnevale, Angela. *See* Brenti, Francesco
- Castillo, Jesús M. F., Valentin Ferenczi, and Manuel González. *Singular twisted sums generated by complex interpolation*, 4671
- Celikbas, Olgur, Lars Winther Christensen, Li Liang, and Greg Piepmeyer. *Stable homology over associative rings*, 8061
- Cerf, Raphaël. *The quasispecies regime for the simple genetic algorithm with ranking selection*, 6017
- Chai, Jingsong. *A weak kernel formula for Bessel functions*, 7139
- Chandgotia, Nishant. *Generalisation of the Hammersley-Clifford theorem on bipartite graphs*, 7107
- Chang, Chih-Hung. *See* Ban, Jung-Chao
- Chang, Po-Yao, and Joel Spruck. *Self-shrinkers to the mean curvature flow asymptotic to isoparametric cones*, 6565
- Chapuy, Guillaume. *See* Bouttier, Jérémie

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9947 (print)

ISSN 1088-6850 (online)

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 369 (2017) are as follows: for paper delivery, US\$2632 list, US\$2105.60 institutional member, US\$2368.80 corporate member; for electronic delivery, US\$2316 list, US\$1852.80 institutional member, US\$2084.40 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$6 for delivery within the United States; US\$85 for delivery outside the United States. Subscription renewals are subject to late fees. See www.ams.org/journal-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Permissions to reuse portions of AMS publication content are handled by Copyright Clearance Center's RightsLink® service. For more information, visit: www.ams.org/rightslink.

Translation rights and licensed reprint requests should be sent to: reprint-permission@ams.org.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Transactions of the American Mathematical Society (ISSN 0002-9947 (print); ISSN 1088-6850 (online)) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Transactions, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editorial Information

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication.

Papers submitted to the *Transactions* should be 15 or more published journal pages in length. Shorter papers may be submitted to the *Proceedings of the American Mathematical Society*. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/tran>.

In an effort to make articles available as quickly as possible, articles are electronically published on the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish is required before we can begin processing your paper. After a paper is accepted for publication, the Providence office will send a Consent to Publish to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. All articles submitted to this journal are peer reviewed. The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the reviewers are. The AMS uses Centralized Manuscript Processing for initial submissions. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/submission/tran, or send one copy of the manuscript to the following address: Centralized Manuscript Processing, TRANSACTIONS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Transactions* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper should be the 2010 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/msnhtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. Manuscripts should be electronically prepared in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web.

Authors may retrieve an author package for *Transactions of the AMS* from www.ams.org/tran/tranauthorpac.html. The *AMS Author Handbook* is available in PDF

format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org, or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

Any graphics created in color will be rendered in grayscale for the printed version unless color printing is authorized by the Managing Editor and the Publisher. In general, color graphics will appear in color in the online version.

AMS policy on making changes to articles after publication. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually published to the AMS website, changes cannot be made in place in the paper. The AMS does not keep author-related information such as affiliation, current address, and email address up to date after a paper is electronically published.

Corrections of critical errors may be made to the paper by submitting an errata article to the Editor. The errata article will be published electronically, will appear in a future print issue, and will link back and forth on the Web with the original article.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to tran-query@ams.org.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to tran-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at www.ams.org/tran/transubmit.html.

Dynamical systems and ergodic theory, Ian Melbourne, Mathematics Institute, University of Warwick, Coventry CV4 7AL, United Kingdom; e-mail: I.Melbourne@warwick.ac.uk

Ergodic theory and combinatorics, Vitaly Bergelson

5. ANALYSIS, LIE THEORY & PROBABILITY

Coordinating Editor: Stefaan Vaes, Department of Mathematics, Katholieke Universiteit Leuven, Celestijnenlaan 200B, B-3001 Leuven, Belgium; e-mail: stefaan.vaes@wis.kuleuven.be

Functional analysis and operator algebras, Stefaan Vaes

Harmonic analysis and complex analysis, Malabika Pramanik, Department of Mathematics, University of British Columbia, 1984 Mathematics Road, Vancouver, British Columbia V6T 1Z2, Canada; e-mail: malabika@math.ubc.ca

Harmonic analysis, representation theory, and Lie theory, Erik van den Ban, Department of Mathematics, Utrecht University, P.O. Box 80 010, 3508 TA Utrecht, The Netherlands; e-mail: E.P.vandenBan@uu.nl

Probability and statistics, Patrick J. Fitzsimmons, Department of Mathematics, University of California, San Diego, 9500 Gilman Drive, La Jolla, CA 92093-0112 USA; e-mail: pfitzsim@ucsd.edu

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

Memoirs is devoted to research in pure and applied mathematics of the same nature as *Transactions*. An issue consists of one or more separately bound research tracts for which the authors provide reproduction copy. Papers intended for *Memoirs* should normally be at least 80 pages in length. *Memoirs* has the same editorial committee as *Transactions*; authors may choose an Editor from the list above upon submission.
