SMS 100

SIDEMOUNT & ALLROUND SYSTEM

Our SMS100 Sidemount system was designed not just with the sidemount cave divers in mind, but any diver. Whether you are a beginner, advanced or technical diver, this kit was designed for you. Suitable for sidemounting twin or single cylinders, but also for use with rebreathers or rear mounted singles. This "go anywhere" system can be used in any environment from open water to the overhead environment. Ready to dive out of the box.

- Full visibility over your system
- Reduces additional gear: Doubles bands / Hardware / Manifold - Benefit when traveling
- Aids in transporting gear to and from the beach or boat - one tank at a time
- Streamlined profile which in turn reduces drag increasing your bottom time

SMS 50

SIDEMOUNT

TRAVEL

SPORT

Hollis "SMS" sidemount systems have been designed not just with cave divers in mind, but any sidemount diver. The new SMS50 "Sport" is no exception. Built for sidemount only, this kit can be used in any environment from open water to overhead. Includes an adjustable, one size fits most harness based on a minimalist design; ideal for traveling sidemounters. First of its kind harness, wing and plate in one with an over the shoulder hose routing for recreational sidemount divers. Like all Hollis SMS harnesses, ready to dive out of the box.

SMS 50 TRAVEL:

- Inner located elbow to avoid overhead interference
- Built-in trim pockets - 3lbs upper shoulders & 3lbs (Pair) located on inner panel
- Neoprene covered shoulder straps
- Ready out of the box! (2) Tank bungees, (2) SS Cam bands, (4) SS Bolt snaps & line included with kit
- also includes a Sternum strap & Crotch strap

SMS 50 SPORT:

- Traditional over the shoulder inflator routing
- Built-in trim pockets - 3lbs (Pair) located on inner wing
- Removable shoulder pads
- Ready out of the box! (2) Tank bungees, (2) SS Cam bands, (4) SS Bolt snaps & line included with kit
- also includes a Sternum strap & Crotch strap

Part n°	Description	Price
208-1350	SMS50 TRAVEL , one size	€ 585.00
208-1351	SMS50 SPORT , one size	€ 585.00
208-1322	SMS BUNGEE 2pcs	€ 12.00
208-1038	SMS RAIL KIT , SMS 50 (1 Set)	€ 17.00

HD 200

Comfort, function and durability. The HD200 is everything the advanced sport diver could ask for. Fitted with a combination of Tech/Rec features that provide ultimate comfort and function. Heavy duty construction and innovative design make this BC the best in class.

- 35 lbs bladder S & M sizes / 45 lbs bladder L & XL sizes
 - 1000 denier Cordura™ w/ PU lamination outer shell & 15mm urethane internal bladder
 - Contoured, lightweight backpack w/back pad, lumbar support, and a rolled neoprene comfort neck
 - 10lb (4.5kg) interchangeable quick release weight pockets
 - 5 lb (2.27kg) non-dumpable rear weight pockets
- System weight: 9.4lbs (4.3kg)

NEW AVAILABILITY SUMMER 2013

RIDE

TECHnically the worlds best travel BC.

Here is the all new RIDE. Its lightweight at just over 6lbs but packed with technical features.

It includes a simple yet strong nylon harness, that is one size fits most and easily adjustable. The wing is a rugged one-piece 1000 denier cordura which comes in 37lbs capacity.

Standard are the stainless steel 2" d-rings on the shoulders and hips, padded crotch strap, backpad and lower storage pouch. It also has the ability to dive singles or twins

Part n°	Description	Price
208-1170-037	RIDE, 37 lbs / 17 ltr	410,00

LX SERIES NEW

Internal bungee

K-style inflator with oval corrugated hose.

- Stylish dark red accented sides, for good visibility.
- Oval crushproof corrugated hose
- **Internal 360 degree bungee** - retains excess material when partially inflated keeping the wing streamlined
- Material color and embroidery color changes
- 420 denier nylon wing
- Outer shell constructed of HD Laminated 1680D Cordura
- Easy access to the internal bladder for servicing
- Centrally located elbow to avoid tank valve/regulator interference

500 SE / DC7

Side Exhaust Regulator. The 500 SE Utilizes a servo-controlled valve to provide precision air flow to the diver. Hollis has redesigned the old 'Tilt-Servo Valve' with a 'Lever-Servo Valve' to provide unparalleled performance in a side exhaust configuration.

Part n°	Description	Price
240-3501-07	500 SE / DC7 DIN, Maxflex	€ 575.00

SMS REG-KIT

Complete Kit Includes: 2x 2nd Stage 212, 2x 1st Stage DC1 DIN, 1x LP Hose 100cm, 1x LP Hose 210cm, 2x Pressure gauges with HD-hose 15cm, 1x Necklace, 2x SMS-Bungee Kit, 1x Hollis Backpack.

Part n°	Description	Price
240-1500	SMS REG-KIT	€ 1,099.00

212 / DC1 DIN / 321 OCTO

Just in - "Testers Choice" by Sport Diver UK. Now have unlimited versatility in our top of the line regulator and a 5 out of 5 winner according to Scubalab. We have just added a 5th low pressure that points directly down from the first stage providing easier hose routing for backmounted doubles, sidemount or even for recreational divers.

221 / DC3

Built with the same quality as the DC1, without the swivel turret, the DC3 is the ideal 1st stage for double cylinder configuration as well as perfect for single cylinders. Paired with the 221 which uses the same technology as the 212 without the dynamic adjustment. This reg set is designed for those who believe keeping it simple is best.

Part n°	Description	Price

DG 05

DG05 is a technical dive computer for the growing technical diver. Whether you are advanced nitrox looking towards Trimix or an avid CCR diver, the DG05 will provide you the platform to modify based on your diving needs. Benefit from the only Trimix dive computer capable of monitoring up to 4 independent transmitters. Includes a vibrant OLED display and the freedom of a variable decompression model VGM all encased in a rugged mil-spec aluminum case. Accepted by NOAA for use by NOAA Divers.

- Single/triple cell PO2 monitoring capable
- Dive Profile and Look Ahead Graphics on Dive Screen
- User customizable dive information screen
- Air/Nitrox/Trimix capable with up to 10 gas switch presets
- CNS % and OTU tracking of oxygen exposure
- Programmable safety factors to increase conservancy
- Water activated and fully programmable underwater
- Warnings for PO2, deco violation, air break and ascent rate
- On-Board Dive Planner/Simulator
- Imperial or Metric display
- Ready for anything, from air to trimix, OC, SCR and CCR capable
- Simple to use menu system with easy to read icons and auto detect functions
- Optocon (IR transmission of PO2/PC link) No more wet connectors
- VGM algorithm allows you to customize your parameters or mimic other commercial algorithms on your own
- Automatically switch to large graphics mode - menu bar disappears after a few seconds and the primary dive information fills the screen
- Rechargeable lithium-ion battery

M1 ONYX

Visibility is the most important aspect of any dive. The M1 mask raises the bar for optical quality and distortion free vision. This lens is an extra clear glass which is valued for its attractive appearance and optical qualities. The low iron content produces a higher light transmittance and a reduced green tint inherent in other glasses. This makes the lens distortion free and helps improve color and visibility in low light conditions underwater.

M3

Visibility is the most important aspect of any dive. The new M3 mask provides that with distortion free vision and superior fit. This low profile design uses a rigid frame and two lenses with an extra clear glass which is valued for its attractive appearance and optical qualities. The low iron content produces a higher light transmittance and a reduced green tint inherent in other glasses. This makes the lens distortion free and helps improve color and visibility in low light conditions underwater.

M4

When choosing a mask, fit and field of vision come first. The M-4 gives you the best of both worlds, fitting a wide variety of faces and offering superior peripheral and vertical vision. It is low profile, stows easy and carries an excellent value.

Part n°	Description	Price
205-4500-07	M1 ONYX , frameless, black	€ 99.95
205-4700-07	M3 , black	€ 89.00

F 1

Power without compromise. The Hollis fin blends graceful movement, power, and bulletproof construction. Meet the new standard in diving.

High grade, heavy duty rubber construction. Angled strap mounts for comfort and a better transition of power. Spring heel straps w/ easy-grip heel tab. Multiple strap mounting positions for a fine tuned fit. Vented blade to reduce stress while accelerating water over the blade. Generous foot pocket.

F 2

Increase your power to weight ratio with our new F2 fins. If you are a traveling diver, looking to reduce weight or just favor a lightweight fin, look no further. The patented F2 is designed to add blade surface on both the downstroke and upstroke to increase your efficiency with any type of kick. The F2 is injection molded using monoprene and uses a shorter blade design which packs easy and improves agility in tight areas. Standard with adjustable stainless steel spring straps.

AUG 200

The AUG 200 is a flexible, comfortable, and feature-rich undergarment ideally suited for cold water.

- Outer Rip-Stop nylon shell allows for easy glide drysuit entry and acts as a windbreaker
- Center layer 100 gram Thinsulate provides incredible warmth
- Inner layer 200 gram technical fleece provides additional warmth and comfort
- Neoprene ankle and wrist to prevent bunching while donning a drysuit and to create a wetness barrier from a possible wrist seal leak
- Machine washable for ease of cleaning
- Lined side pockets to keep hands warm on cold surface intervals
- Neoprene stretch panel in crotch to allow for more freedom of leg movement
- Soft and close-cut neck for comfort and to avoid neck seal interference
- Vents on arms to prevent air restrictions while trying to vent a drysuit
- Zippered left chest pocket

Part n°	Description	Price

SD7 FLEX

Our Tech-oriented 7mm Semi dry suit with TIZIP Master Seal. 2 Leg pockets (the left one with Zipper and with D-Ring inside, the right one with Velcro). Extremely comfortable. Neoprene double wrist seals, separate hood in Hollis-Design.

NEOTEK

- 8/7/6mm mix of compression resistant and superstretch neoprene
- Exclusive "ThermaSkin" inner liner
- G-lock horizontal front zipper with internal bib
- Neck, Wrist and Ankle internal dams
- Seams are quadruple glued and butt joined with a blindstitch
- Liquid glued seams cover entire suit
- Technically friendly thigh pockets on both left and right thigh for storage of accessories
- Attached hood standard

Part n°	Description	Price

LED 15 / LED 25

Our canister systems offer the power of HID with the reliability, durability and efficiency of LED technology. They offer a concentrated beam that is preferred for exploration diving.

- Lithium-ion Polymer rechargeable battery
- Maximal depth 150 m
- Light output 1000 Lumen @ 5600 K (Led 15)
1250 Lumen @ 5600 K (Led 25)
- Burntime 6 hours (Led 15) // 8 hours (Led 25)
- concentrated 8 degree beam
- Delrin canister body with aluminum head
- Weight: 1.2 kg (Led 15) // 1.7 kg (Led 25)
- Led lifetime up to 20 000 hours

LED 6

- Single 6W Backup Light
- Concentrated 8 degree beam
- Output 360 Lumens
- Burntime - 7 hours total
- Bulb life 50,000 hours
- T6061-T6 Anodized Aluminum
- 3 C alkaline batteries
- Depth rated to 200meters
- Dimensions: diameter 46mm / length 206mm

LED 3

- Single 3W "backup" Light
- Concentrated 8 degree beam
- Output 230 Lumen
- Burntime - 6 hours total
- Bulb life 50,000 hours
- T6061-T6 Anodized Aluminum
- 3 "AA" alkaline batteries
- Depth rated to 650ft/200meters
- Dimensions: diameter 50mm // length 147mm

LED 3X / MINI 3

- Single 3W "backup" Light
- Output 210 Lumen
- Burntime 4 hours
- Bulb life 50,000 hours
- T6061-T6 Anodized Aluminum
- 3 "AAA" alkaline batteries
- Depth rated to 200 m
- only in Led 3x: Adjustable 8 - 32 degree beam

Part n°	Description	Price
206-2001	LED 15 , Canister light	€ 737.50
206-2002	LED 25 , Canister light	€ 999.00
206-3080	LED 6 , 6 Watt	€ 115.00
206-3060	LED 3 , 3 Watt	€ 99.50
206-3050	LED MINI 3 , 3 Watt	€ 82.95
206-3050-01	LED MINI 3 , pack of 6	€ 82.95
206-3020	LED 3X , 3 Watt, adjustable beam	€ 115.00

H-160

Torque, speed, and endurance...

We have raised the bar in manufacturing with the H-160. This new innovative DPV sets the standard for tow behind vehicles. With 45lbs of thrust and a depth rating of 656ft / 200m the H-160 is the DPV of choice. With removable trim weights you have the perfect trim for salt or fresh water diving.

The H-160 is operable with one hand and has a trigger switch that allows divers to vary between power settings of 50%, 75% or 100%. Select the power setting and use the thumb lock to set the underwater cruise control. All of these features make the H-160 the DPV of choice for cave, wreck, technical, and recreational diving.

- 6061 T6 aluminum construction, hard anodized, with a marine finish
- 9 point adjustable propeller pitch
- 3 power settings: 50%, 75% and 100% with shift on the fly capability
- Redundant seals in all compartments
- Redundant electronic and mechanical clutch
- Graduated start for smooth and controlled speeds
- Smart electronics to protect the motor and battery
- Magnetic Reed switch
- Integrated 3x3W High Intensity LED Bulbs with optimized reflector design (optional)

EXPLORER

recreationally ready //

The Hollis Explorer Sport is a true recreational Rebreather. Compact, lightweight and extremely easy to use. The Explorer is unique in using a single gas, Nitrox, and is electronically controlled to achieve an optimal balance of PPO2 and dive time.

The unit uses pre-packed absorbent cartridges; easy setup; has CO2 tracking; 2 hour dive duration.

The Explorer's design make it a dream for the recreational diver looking for a safe and easy way to explore the bottom at leisure and without disturbing the sealife with bubbles.

The Explorer Sport ESCR is designed to meet the requirements of all training agencies recreational Rebreather requirement.

PRISM 2

Technically focused //

- electronically or manually controlled, constant PO2, modular, closed circuit diving system
- breathing loop ensure uni-directional flow
- With electronics switched on, the secondary also provides a status check for the battery and displays the set point selected for the dive along with other critical information
- radial flow scrubber canister mounted vertically on a backplate attached to the integrated BC, between twin supply cylinders (one each, oxygen and diluent)
- electronics, sensors and batteries mounted in the electronics head assembly at the top of the scrubber
- supply hoses feeding over the diver's shoulders into the top of the counterlungs.
- An analog LED primary display offers a quick reference of unit performance with status and alarm indicators while an independent digital OLED secondary display verifies the unit's performance.

Sidemount Test Dive, Puerto Aventuras, Mexico

Chief Operating Officer of Oceanic Mike Hollis, Founder and Chief Executive Officer of Oceanic Bob Hollis, PADI Tec Consultant Jeff Loflin and President of Hollis Gear Nick Hollis spent three days in Puerto Aventuras test diving Hollis' sidemount gear. Bob Hollis is an influential dive industry pioneer and has been diving since the 1950s. Pictured [L-R] Mike Hollis, Jeff Loflin and Bob Hollis.
