

Accounting for Governmental and Nonprofit Entities, 18e (Reck)

Chapter 2 Principles of Accounting and Financial Reporting for State and Local Governments

- 1) According to the guidance of GASB *Concepts Statement 3*, financial information can be communicated by recognition in the financial statements, disclosure in the notes to the financial statements, presentation as required supplementary information, or presentation as supplementary information.
- 2) According to GASB *Concepts Statement 1* a primary objective of financial reports is to provide information useful in determining the accountability of the government.
- 3) Activities a local government can engage in are classified as governmental, business-type, or fiduciary.
- 4) Governmental funds are identical to governmental activities, proprietary funds are identical to business-type activities, and fiduciary funds are identical to fiduciary activities of a government.
- 5) Only those governmental and proprietary funds that meet the GASB size criteria for major funds are reported in separate columns of the governmental and proprietary fund financial statements.
- 6) Economic resources are cash or items expected to be converted into cash during the current period, or soon enough thereafter to pay current period liabilities.
- 7) Governmental funds account for assets but not the liabilities.
- 8) The types of funds that may be used in governmental accounting are classified into the three categories of governmental, proprietary, and fiduciary.
- 9) The governmental funds category includes the General Fund, special revenue funds, debt service funds, capital projects funds, and internal service funds.
- 10) Governments can, in part, demonstrate operational accountability by reporting proprietary and fiduciary fund financial information, as well as all government-wide financial information, using an economic resources measurement focus and the accrual basis of accounting.
- 11) All capital assets acquired by or used by a fund should be reported in the fund balance sheet or statement of net position.
- 12) Because budgetary accounts are used by governments, government financial statements can never be said to be in accord with generally accepted accounting principles.
- 13) The maximum sets of fund financial statements a government would present are three.
- 14) When revenues are legally restricted by external resource providers or committed by enabling legislation for particular operating purposes, a private purpose trust fund is created.

- 15) A debt service fund is used to account for financial resources segregated for the purpose of making principal and interest payments on general long-term debt.
- 16) A deferred inflow of resources is defined as "an acquisition of net assets by the government that is applicable to a future reporting period."
- 17) Expenditures are never recorded in governmental funds.
- 18) Deferred outflow of resources is a type of asset that is unique to government.
- 19) Revenues is an example of what the GASB terms an inflow of resources.
- 20) An expenditure is an example of what the GASB terms an outflow of resources.
- 21) Deferred inflow of resources and deferred outflow of resources would be shown in separate sections of a government's statement of net position.
- 22) In accordance with GASB standards, a deferred inflow of resources is reported on the financial statements the same as an unearned revenue.
- 23) The GASB concept statements indicate that an asset that is going to be converted to cash should be reported at a remeasured amount at the financial statement date.
- 24) Proprietary funds primarily provide services to the general public for a fee.
- 25) A permanent endowment is an example of a nonspendable fund balance.
- 26) Assigned fund balances can be either positive or negative.
- 27) The General Fund is the only fund that can have a positive unassigned fund balance.
- 28) The positive fund balance in a special revenue fund must at a minimum be reported as assigned.
- 29) Nonmajor funds are *not* reported on the fund financial statements.
- 30) There are four major activity categories reported by state and local governments: governmental, government-wide, proprietary, and fiduciary.
- 31) Governmental activities include the core services provided by a government, such as public safety.
