GIS Professional Development

The Plan

- Introduction
- Presenter Backgrounds
- Professional Development
- Business Analysis
- Technology
- Project Management
- Audience Engagement
- Takeaway Messages
- Final Thoughts

The Plan

- Introduction what we'll do
- Presenter Backgrounds about us
- Professional Development the bigger picture and our growth
- Business Analysis figuring out the needs
- Technology creating solutions
- Project Management keeping organized
- Audience Engagement questions and thoughts
- Takeaway Messages positive action items
- Final Thoughts words of wisdom to close

Presenter Backgrounds

Professional Development Framework

Professional Development Framework

Professional Development Framework

- Is this sort of framework useful?
- Where do your interests/responsibilities fit?
- What do you know about different parts of the framework?

Communicating Our World - Deliverables

Act on what we came up with together at the 2014 Washington GIS Conference

- Walk a mile in their shoes
- Create an inspiring teachable moment
- Be a mentor to the education community

Eliminate turf wars

See *Background to the 2014 Washington GIS Conference – Communicating Our World* and other related articles

GISPD.com blog - <http://www.gisped.com/blog>

Collaboration

- **Look closely at professional organizations and gatherings**
 - URISA Chapters
 - Regional GIS user groups - proprietary and open source
 - MapTime
- **How effective are they?**
- **Learn from the open source model of collaboration and innovation**

David Wallis, GISP, CMS
IT/GIS Director

Cowlitz County
<http://www.co.cowlitz.wa.us/>

Listen

- **Communication skills**
 - The foundation of interaction
 - Verbal and written
- **Seek first to understand**
 - Repeat back for clarity
 - Have empathy and sincere interest
 - Minimize distractions
- **Be trustworthy**
 - Walk the talk - always
 - Speak truth

EAR

EYES

UNDIVIDED
ATTENTION

HEART

Grow Relationships

- Do what you say you will do
 - Build trust
- Show competence
 - Do it well
- Deliver “plus 1”
 - Give ‘em the pickle

Learn

- **Seek opportunities**
 - Don't wait
- **Support training**
 - Say yes
- **Act**
 - Put new knowledge to work

Bridget Brown
West Region GIS Coordinator

HDR Inc.

Scientist & Owner

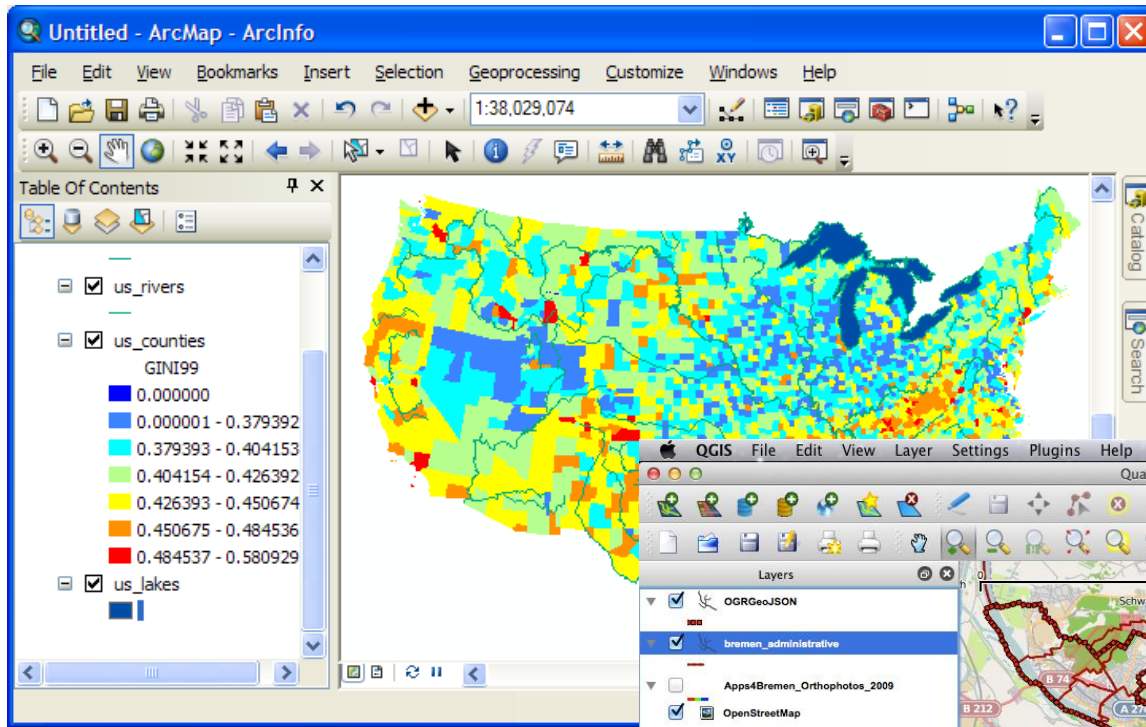

David Howes, LLC
<http://www.dhowes.com/>

The Value of Coding

- **Learn to code**
- **Learn how to leverage the GIS investment**
- **Some form of coding may become a standard requirement for any GIS positions**

“software tools expose less than 10% of their full capability through their default interfaces”

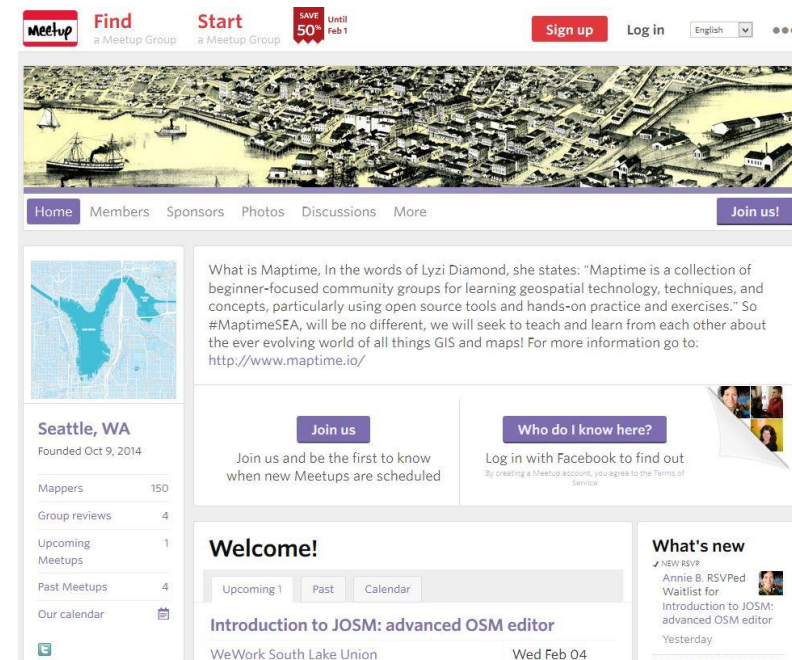

Bill Dollins, geoMusings - *Yes, You Need to Code*

Being able to take advantage of extensibility options can really set you apart as a GIS professional

Technology Trend

- Coding has always been valuable for GIS
- Increasing emphasis on coding
- Local example: MapTime Seattle (Meetup group)
 - Making a web page and a web map (HTML5, CSS, JavaScript, Leaflet.js)
 - Git & GeoJSON
 - Mapping with D3.js

The screenshot shows the Meetup page for MapTime Seattle. The page features a header with navigation links (Home, Members, Sponsors, Photos, Discussions, More) and a 'Join us!' button. A large aerial photograph of Seattle is displayed at the top. Below the photo, there is a section titled 'Seattle, WA' with statistics: 150 Mappers, 4 Group reviews, 1 Upcoming Meetups, and 4 Past Meetups. A 'Welcome!' section includes a 'Join us' button and a 'Who do I know here?' button. A 'What's new' section lists an upcoming event: 'Introduction to JOSM: advanced OSM editor' by Annie B. RSVPeD, scheduled for Wednesday, February 4th.

Why Should Coding Be Important?

- Personal development perspective

Why should coding be important to you?

- Professional growth
- Expanded toolbox
- Streamline workflows

- Policy perspective

Why should coding be important to your employer?

- Return on investment
- Standard operating procedures
- Leveraging/freeing up resources

Resources

See *The Value of Coding for GIS*

Business Analysis

Investigate

Implement

Analyze

Business

Process

Identify

Test

Develop

Design

Call the Meetings

- **ANYTHING** with a spatial component should be considered
 - Imagine GIS everywhere
- **Reach out**
 - Make appointments
 - Make connections
- **Provide simple business analysis procedure**
 - One page

Ask the Questions

- **Strategic planning**
 - Identify issues
 - Make goals
- **Could we ...?**
 - Explore all options/possibilities
- **Why not us?**
 - No limits

Blair Deaver
Software Product Manager
SmartMine

GeoEngineers Inc.
<http://www.geoengineers.com>

Build > Measure > Learn

Metrics

- Define product metrics up front
- Incorporate metrics into your products
- Be able to measure ROI and TCO at your solution/product level
- Learn from your metrics and **adjust**

Technology

Start With a Clean Slate

Align Your Tools With the Business

- You have MORE technology options than ever
- You don't need to master them all but be aware of the options
- You can increase delivery and quality by matching the right tools with the business problem

Platform to Deliver

Ways to Deliver Faster

- **Use the cloud**
 - Software as a Service (ArcGIS.com, CartoDB, MapBox)
 - Infrastructure as a Service (Amazon, Azure, and others)
 - Platforms as a Service (Amazon Relational Database Service (RDS), Elastic Beanstalk)
 - Hybrid Architectures
- **Transition your staff to support the cloud**
 - From Sys Admin to Developer Operations (DevOps)

Become Fascinated With the Problem Not the Technology

Design Matters

- **Provide rich user experiences**
 - Less is more
- **Prepare for new experiences**
 - Vector Tiling
 - WebGL – 3D experiences
- **Get in the trenches with your customer**
 - Usability labs
 - Can you child or parent use your product?
- **Invest in UI/UX**
 - It matters

ArcGIS Online Overview: Perfectly clear and/or overwhelming

**Current day GIS
(for many of us)**

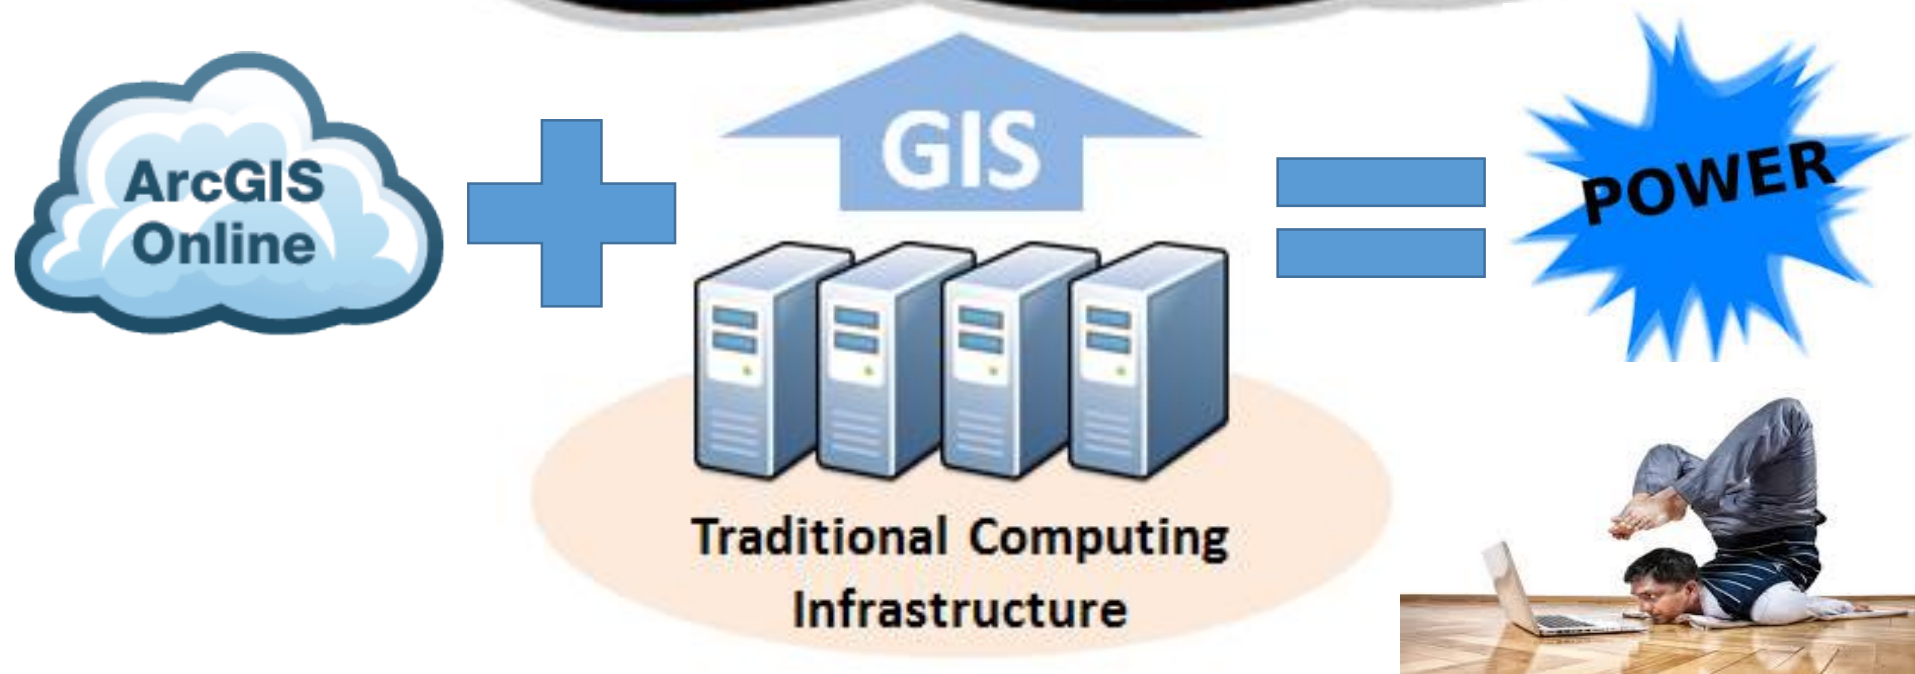

ArcGIS Online: Comes with high performance ArcGIS Server(s)

ArcGIS Server and ArcGIS Online Hybrid Approach

Cloud Infrastructure

ArcGIS Server VS. ArcGIS Online

http://servicesbeta7.esri.com/ArcGIS/rest/services

ArcGIS REST Services Directory

Home > services

JSON | SOAP

Folder: /

Current Version: 10.1

View Footprints | Help | API Reference

Folders:

- San Diego
- Utilities

Services:

- Census (MapServer)
- GDBVersions (GPSServer)
- Geometry (GeometryServer)
- Military (FeatureServer)
- Military (MapServer)
- MontgomeryQuarters (MapServer)
- Notes (FeatureServer)
- Notes (MapServer)
- PoolPermits (FeatureServer)
- PoolPermits (MapServer)
- SF311 (FeatureServer)
- SF311 (MapServer)
- Water_Network_Base_Map (MapServer)
- Water_Network (FeatureServer)
- Water_Network (MapServer)
- Wildfire (FeatureServer)
- Wildfire (MapServer)

Supported Interfaces: REST | API | SOAP

The typical syntax for the ArcGIS Server Home Url is: `http://[EnterYourServerNameHere]/ArcGIS/rest/services`

This is useful to explore the ArcGIS Server's metadata via the ArcGIS REST Services Directory.

FeatureLayers are found within map services that have the words "(MapServer)" or "(FeatureServer)" appended to the end of the map service name. You must then click on the hyperlink for the map service name to drill deeper into the documentation to find ID number(s) of the individual FeatureLayer(s) that can be accessed from the map service.

Project Management

www.woynapshot.com

Understand Your Customer

Habit 1: Be Proactive

Habit 2: Begin with the End in Mind

Habit 3: Put First Things First

Habit 4: Think Win-Win

Habit 5: Seek First to Understand, Then to be Understood

Habit 6: Synergize

Habit 7: Sharpen the Saw

Based on Customer Understanding

- **Scope**
 - What are we trying to accomplish?
 - Manage expectations
- **Schedule**
 - When is it due?
- **Budget**
 - How much will it cost?
 - How much funding is available?

Feature Creep

Adapt and Evolve

How to be flexible (agile) within rigid contracts?

- Evolving ways to manage scope, schedule & budget to allow for changes in project
- Evolving contract mechanisms to handle Agile projects
- Customer involvement and ownership
- Document decisions

Project Management Tools Have Evolved

How we manage Scope, Schedule, Budget and Feature creep has changed

- Dizzying array of tools available
 - (Base camp, Excel, Smartsheet, MS Project, sharepoint)
- Pick the one that works for you and your team and just be consistent
 - no tool is perfect
- Pick a communication style that works for your and your team (emails, regular phone calls)

Your Turn

Takeaway Messages

Professional Development

1. Grow within your wider professional development framework
2. Learn to code
3. Eliminate turf wars

Business Analysis

1. Call the meetings
2. Ask the questions
3. Implement solutions

Technology

1. Begin to utilize the cloud to improve time to market
2. Align your tools with the business – hybrid is OK
3. Transition your maps to apps

Project Management

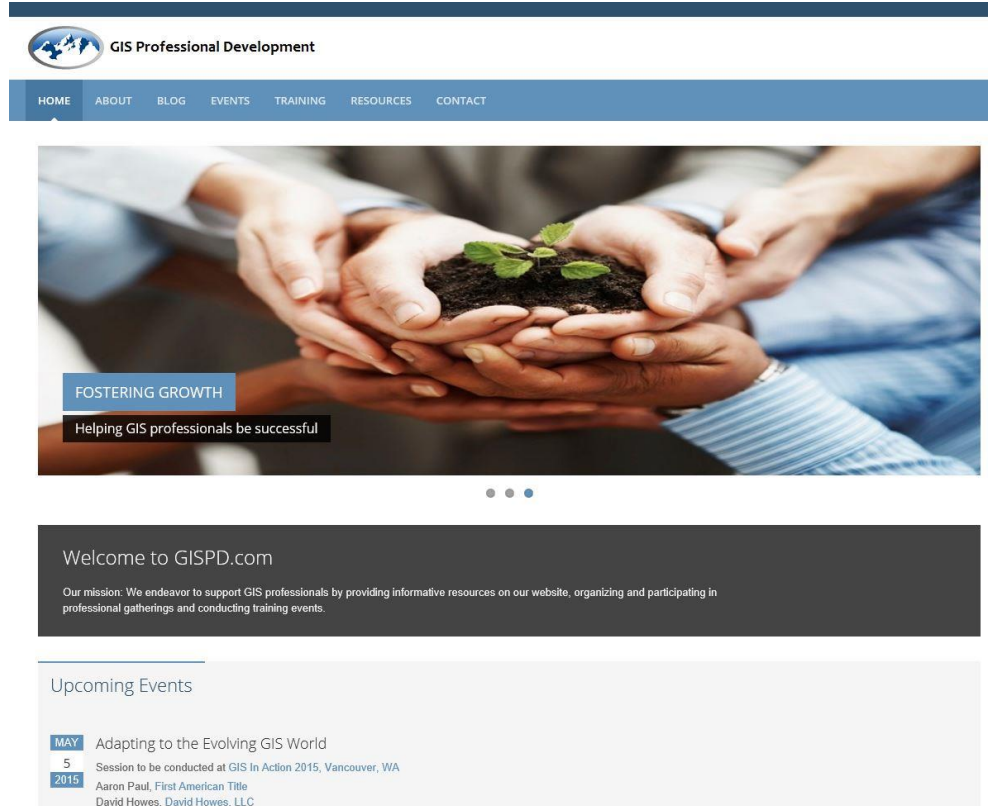

1. Understand your customers
2. Adapt and evolve PM techniques (feature creep)
3. Communicate and collaborate

Final Thoughts

Thanks for Coming

The screenshot shows the top portion of the GISPD.com website. At the top is a dark blue navigation bar with the GISPD logo (a globe with mountains) and the text "GIS Professional Development". Below this is a lighter blue navigation menu with links for HOME, ABOUT, BLOG, EVENTS, TRAINING, RESOURCES, and CONTACT. The main content area features a large image of several hands holding a small globe with a green sprout growing from it. Overlaid on the bottom left of this image is a blue box with the text "FOSTERING GROWTH" and a black box with the text "Helping GIS professionals be successful". Below the image are three small grey dots. Further down is a dark grey section with the text "Welcome to GISPD.com" and a paragraph: "Our mission: We endeavor to support GIS professionals by providing informative resources on our website, organizing and participating in professional gatherings and conducting training events." Below that is a light grey section titled "Upcoming Events" which lists an event for May 5, 2015: "Adapting to the Evolving GIS World", noting it is a session at GIS In Action 2015 in Vancouver, WA, presented by Aaron Paul, First American Title, and David Howes, David Howes, LLC.
