

Adobe Photoshop CS2 Keyboard Shortcuts

There are many times when our workflow could be improved, one of those things is the accessibility to commands and features of Photoshop. Though you may find a whole bunch of tutorials and articles in the Internet with list of shortcuts, sometimes you need to set your own or look for ones, which you don't quite remember. Playing with some of the shortcuts I bumped into a dialog that allows us to set those shortcuts and see what is already there:

To access this dialog - press Shift-Ctrl-Alt-K. And the keyboard shortcuts of Photoshop are at your fingertips.

Do you see this button "Summarize"? This button allows you to export all those shortcuts as an HTML page. I included here the sample of my shortcuts (default in Adobe Photoshop CS2).

Application Menus

How to Create Web Images>

- To create a gallery of images for the web
- To create a rollover button
- To create a web animation
- To optimize an image for the web
- To save a file to e-mail

How to Customize and Automate>

- To automate a task
- To customize palettes
- To customize tool presets

How to Fix and Enhance Photos>

- To add contrast to a photo
- To crop and straighten a photo
- To fix red eyes
- To lighten or darken photos using dodge or burn
- To make a photo frame
- To remove a color cast with Auto Color
- To sharpen a photo
- To touch up spots, scratches, and wrinkles

How to Paint and Draw>

- To create a custom brush from an image
- To create transparency with a clipping path
- To customize a brush
- To draw a circle or square
- To draw a curve
- To draw a custom shape
- To draw a wheel shape
- To draw in shape layers, paths, and fill pixels mode
- To draw straight segments
- To get the brush cursor back
- To set brush pressure sensitivity for digitizing tablets
- To stroke a path

How to Prepare Art for Other Applications>

- To export to Macromedia® Flash™ (SWF)
- To place Adobe Illustrator artwork in Photoshop
- To prepare images for page-layout programs
- To use Photoshop artwork in Adobe Illustrator

How to Print Photos>

- To change print dimensions
- To print multiple photos on a page

How to Work with Color>

- To convert a color photo to black and white
- To replace a color in an image

How to Work with Layers and Selections>

- To align objects on different layers
- To create a temporary mask
- To feather the edge of a selection

- To hide and show layers
- To mask part of a layer
- To organize layers into groups
- To remove (cut) an object from a photo
- To unlock the background layer
- How to Work with Type>
 - To add a drop shadow to text
 - To bend or warp type
 - To change the color of individual letters
 - To change the font on multiple layers
 - To fill type with an image
 - To put type on a path
- How to Create How Tos>
 - Create your own How To tips
