NOTE:

Caterpillar's obligations under this Service Letter are subject to, and shall not apply in contravention of, the laws, rules, regulations, directives, ordinances, orders, or statutes of the United States, or of any other applicable jurisdiction, without recourse or liability with respect to Caterpillar.

NOTE:

This Program must be administered either before or after failure. In either case the decision whether to apply the Program is made by the dealer. When reporting the repair, use "PS45529" as the Part Number and "7755" as the Group Number. If administered before failure, use "56" as the Warranty Claim Description Code and "T" as the SIMS Description code. If administered after failure, use "96" as the Warranty Claim Description Code, and "Z" as the SIMS Description Code.

NOTE:

The information supplied in this service letter may not be valid after the termination date of this program. Do not perform the work outlined in this Service Letter after the termination date without first contacting your Caterpillar product analyst.

TERMINATION DATE

30Jun2018

PROBLEM

There is a problem which relates to engine emissions on certain CT660, CT680, and CT681 On Highway Trucks that were built with 2016 model year compliant CT13 Engines. This recall will require recalibration of the engine ECM. Certain On Board Diagnostic (OBD) issues will be corrected which will aid in engine malfunction identification and proper diagnosis.

ACTION REQUIRED

Recalibrate the engine ECM and ACM to the latest file using CAT CT660 programming software. Refer to UENR7751 Engine Calibration Software User Guide.

Recalibrate the Quality Level Sensor (QLS) if applicable per the following Rework Procedure. Obtain a QLS Reflash Cable from the area District Service Rep.

PARTS DISPOSITION

Handle the parts in accordance with your Warranty Bulletin on warranty parts handling.

Rework Procedure

- 1. Park vehicle on flat surface.
- 2. Shift transmission to Park or Neutral and set parking brake.
- 3. Install wheel chocks.
- 4. Obtain Vehicle Health Report and verify DEF QLS fault codes.

5. If applicable, diagnose any possible DEF QLS related fault codes before proceeding.

Image 1.3.1 QLS-CABLE Quality Level Sensor Reflash Cable - Vehicle Connection 1. Sensor harness 2. Vehicle harness

8. Connect reflash cable between DQS / QLS harness (Image 1.3.1, Item 1) and vehicle harness (Image 1.3.1, Item 2).

CAUTION! To prevent component / vehicle damage, NEVER attempt to connect QLS-CABLE banana jack plugs to any other / additional power source. ONLY connect these cables to the QLS-SWITCH.

Image1.4.1

9. Connect reflash cable to DQS / QLS power switch. Connect USB cable to EST.

10. Connect reflash cable 9-pin connector to 9-pin connector of approved USB communication interface. Connect approved USB communication interface to EST.

11. Open reflash software on EST.

12. Turn ignition key to ON position, engine OFF.

```

Do you w	ant to try again?
0	The update has failed for the following reason: An unexpected error occured while trying to update the device.
	You can perform another try by clicking on 'Yes'. It is recommended to ensure cables are all properly connected then try again to update this device.
	Do you want to try again to update this device? CLICKING ON 'No' WILL LEAD TO NON-FUNCTIONNAL PART!
2	Yes (recommended) No

Image1.7.1

Image 1.7.1 QLS Updater - Error Message

```
14. Click button marked UPDATE:
a) If successful, a green checkmark will be shown (Image 1.6.1).
b) If unsuccessful, an error message will display (Image 1.7.1). Verify all cable / harness connections are properly connected and click YES to lanets caterpillar.
```

15. Once successfully completed turn ignition key to engine OFF position.

16. Disconnect USB cable from EST.

17. Disconnect reflash cable from QLS power switch.

18. Disconnect approved USB communication interface 9-pin connector from 9-pin connector of reflash cable.

- 19. Disconnect reflash cable from DQS / QLS harness and vehicle harness.
- 20. Connect DQS / QLS harness to vehicle harness.

Image1.9.1

Figure 1.9.1 Marked Sensor 1. Paint mark

22. Using a yellow paint marker, mark successfully updated sensor with a paint mark (Figure 1.9.1, Item 1).

23. Connect ED (Engine Diagnostics) to vehicle.

24. Turn ignition to key ON, engine OFF position.

25. Verify that ECM has latest software.

Caterpillar: Confidential Yellow

https://sisweb.cat.com/sisweb/sisweb/techdoc/techdoc_print_page.jsp?returnurl=/sisweb/sis... 7/5/2017

26. Program ECM.

27. Once ECM is successfully programed clear any inactive / previously active fault codes. Only perform diagnostics or procedures on active faults.

28. Remove wheel chocks

29. Rework is now complete.
