Mobile Fall Protection System
Móvil Sistema de Protección Contra Caídas
Système de Protection Mobile Antichute

Instruction Manual ***Manual de Instrucción*** ***Manuel d'Instructions***

WARNING

Serious injury or death may result if this product is used for purposes other than designed. The manufacturer provides the following instructions for the use and care of this equipment. It is the responsibility of the purchaser to understand and convey explicit instruction to each user. The SAFETY GATOR™ complies with the requirements of the Federal Occupational Safety and Health Administration (OSHA) when set up and used according to the manufacturers' instructions.

ADVERTENCIA

Si este producto se utiliza para otros fines que no son el de su diseño podría ocasionar daños graves o hasta la muerte. El fabricante provee las siguientes instrucciones para el uso y cuidado de este equipo. Es responsabilidad del comprador comprender y transmitir instrucciones explícitas a cada usuario. El SAFETY GATOR™ cumple con los requerimientos de la Federal Occupational Safety and Health Administration (OSHA) cuando se instala y se utiliza de acuerdo con las instrucciones del fabricante.

*** AVERTISSEMENT ***

L'utilisation de ce produit à d'autres fins que celles pour lesquelles il est conçu peut entraîner des blessures graves, voire mortelles. Le fabricant fournit les instructions suivantes pour l'utilisation et l'entretien de cet équipement. Il relève de la responsabilité de l'acheteur de comprendre et de transmettre les instructions explicites à chaque utilisateur. Le système SAFETY GATOR™ est conforme aux exigences de l'OSHA (Agence pour la sécurité et la santé au travail) lorsqu'il est installé et utilisé conformément aux instructions du fabricant.

DIAGRAM OF PARTS

Ridge Safety Line Guide

1.0 ASSEMBLY

After unpacking the Safety Gator, bolt the cart handle to the yoke with the provided 5/8 x 2" bolts and 5/8" nylon locking nuts. Refer to the Illustration below:

AES SAFETY GATOR™ INSTRUCTION MANUAL

2.0 APPLICATIONS

- 2.1 The Safety Gator Mobile Fall Protection cart is to be used as an anchorage point for a personal fall restraint system. The Safety Gator may be used where worker mobility and fall protection are required.
- 2.2 The Safety Gator is used as a part of a complete mobile fall protection system. Personal fall restraint systems typically include a full body harness, anchorage point, connectors, lifelines and rope grabs. See WWW.OSHA.GOV for all regulations and standards.
- 2.3 When set up properly the Safety Gator allows up to six workers to be tied off for fall restraint.

DEFINITIONS:

- A. **Fall Restraint System** – A fall protection system that prevents the user from falling any distance. The system is comprised of a body harness along with an anchorage, connectors and other necessary equipment. The components typically include a harness, lifeline and rope grab and also may include other devices.

3.0 USE AND LIMITATIONS

3.1 USE ON BUILDING GRADE ONLY

3.2 RECOMMENDED SURFACES INCLUDE:

1. Bare ground
2. Grass and lawns
3. Gravel
3. Concrete

3.3 DO NOT USE THE SAFETY GATOR ON THE FOLLOWING SURFACES:

1. Sloped roof
2. Flat roof
3. Unstable hillsides
4. Ice
5. Snow

**** BEFORE A SAFETY GATOR IS USED ****

**THE CONTRACTOR MUST VERIFY THAT THE SAFETY GATOR IS STABLE AND
WILL NOT ROLL OUT OF POSITION OR TURN OVER.**

- 3.4 **CAPACITY:** The Safety Gator Mobile Fall Protection System is designed for a maximum of six persons for fall restraint with a combined weight (clothing, tools) of no more than 310 lbs. per person. No more than six persons may be connected to the Safety Gator at any time.

AES SAFETY GATOR™ INSTRUCTION MANUAL

3.5 SET-UP

- A. First, determine the placement of the Safety Gator by pulling a line off the edge of the roof on a 30-45 degree angle to the tie-off rings on the unit.
- B. Make sure the Safety Lifeline Tie-off Rings are pointing toward the leading edge and the cart is set to parallel to the leading edge. Refer to the Illustration Below:

- C. Check to insure that the Safety Gator can be set as level as possible..
- D. Set both brake pins located on the rear axel. To set both pins it maybe necessary to tip the unit slightly and rotate a wheel to engage the Brake Lock Pin into each brake disk . Refer to the Illustration Below:

Spring Locking Brake Pins

- E. Remove the pins that attach the outrigger jacks to the unit.
- F. Swing the outrigger bars out and pin them in position towards the structure.
- G. Pin the jacks to the outrigger arms and set the jack base to touch the ground solidly.
- H. Verify that the units is positioned correctly and adjust if needed.

S
H

- I. Make sure the water drain valve is closed on the bottom of the unit and proceed to fill with water.
- J. Filling the unit usually takes 10-20 minutes. Fill times may vary depending on water pressures and volumes coming from different sources.
- K. Before proceeding make certain that the unit is filled to the appropriate level. Water level with in 2" of the top is sufficient.
- L. Install the Ridge Safety line Guide and pass the safety lines, NO MORE THAN 6, thru the guide down to the Safety Gator and attach the lines to the Safety Tie-off Rings.

4.0 MAKING CONNECTIONS:

- 4.1 Only connect the Safety Tie-Off lines to the Tie-off Rings provided on the top of the Safety Gator. If the safety Tie-off rings are broken or damaged, remove from service immediately and contact AES Raptor, LLC at 1-888-990-2990.
- 4.2 DO NOT hook lifelines to any other locations on the cart – lifelines should only be hooked to the Safety Lifeline Tie-off Rings.
- 4.3 When making connections, only use self-locking snap hooks and self-locking carabiners with this equipment. Only use connectors that are suitable to each application. Ensure all connections are compatible in size, shape and strength. Do not use equipment that is not compatible. Ensure that all connectors are fully closed and locked.

5.0 BEFORE EACH USE:

- 5.1 OSHA 1926.502 requires that before operating the system there must be an inspection for damaged equipment.

INSPECTION STEPS

- STEP 1: Check for loose, bent or damaged parts.
- STEP 2: Check welded connections for distortion, cracks, or other damage.
- STEP 3: Check Tie-off-Rings for distortion or damage.
- STEP 4: Check Handle brake, and rear wheel Brake Pins, brackets and disks for any damage.

AES SAFETY GATOR™ INSTRUCTION MANUAL

S

TEP 5: All labels must be present and fully legible. (Copies of all labels are attached at the back of this section for accurate inspection.)

STEP 6: Check for corrosion on entire unit.

STEP 7: Check for any holes that could cause water loss.

STEP 8: Check Outrigger assembly to ensure it is not bent or damaged and all pins are installed correctly.

DO NOT OPERATE DAMAGED EQUIPMENT. DO NOT OPERATE EQUIPMENT THAT HAS BEEN MODIFIED.
(Please use the Inspection and Maintenance Log on page 10.)

6.0 MAINTENANCE AND CARE:

- A. Inspect all AES Raptor equipment and parts before and after each use.
- B. Keep wheels free from roofing debris.
- B. Regularly inspect all bolts and pins. Damaged or missing pins can severely hinder the safety factor of the Safety Gator.
- C. Maintain paint finish to prevent corrosion.

7.0 GENERAL SAFETY

- 7.1 USE COMMON SENSE! Most accidents can be avoided by using common sense and concentrating on the job to be done.
- 7.2 The AES Safety Gator should not be used by persons whose ability or alertness is impaired by fatigue, intoxicating beverages, illegal or prescription drugs, or any other physical cause that exposes the user or others to injury.
- 7.3 Always wear proper safety attire.
- 7.4 Keep hands and feet clear of moving parts. DO NOT stick hands or fingers in the equipment when operating.
- 7.5 Do not operate the equipment near electrical power lines.
- 7.6 Maintain proper and even tire pressure on cart tires if equipped with pneumatic tires.
- 7.7 Do not allow passengers to ride on safety cart.
- 7.8 Allow handle to drop and set brake when not in use.
- 7.9 Ensure that the out riggers and jacks work properly. Make sure that all areas directly underneath, and in front of the cart, are clear and free of debris.
- 7.10 Do not use on icy conditions.
- 7.11 Only use the cart in a manner for which it has been tested.
- 7.12 Do not set cart on a steep sloped grade where the cart may slide or roll out of position.
