All parts shown in this catalog are aftermarket products and are not manufactured by the original equipment manufacturers. Any OEM part numbers shown are for reference only.

While every effort was made to ensure that the information compiled in this catalog is correct, we cannot be held responsible for any errors. Illustrations and technical information is for guidance only and we reserve the right to make modifications and substitutions without prior notice. We request that customers verify that the correct part has been purchased before fitting to a tractor. Normally a visual check against the part removed is all that is necessary. The need to carry out these checks is because of the on-going upgrades and modifications which are carried out by the original tractor manufacturer. If the component is a gear or a shaft, then check the number of teeth or splines. If a clutch assembly, check the dimensions and whether the clutch is a dual or split torque. These simple and quick checks may save many hours of frustration and expense.
