MICRO FOCUS®

Welcome

I would like to personally invite you to our Application Delivery Management (ADM) customer forum at Micro Focus Universe 2019.

We are designing an experience specifically for our customers to give your business a competitive edge as you accelerate application delivery and ensure quality at every stage of the application lifecycle. My team is all set to share our latest innovations and we're bringing in multiple customer speakers to deliver 360-degree product insight and invaluable usage tips.

The ADM breakout sessions and demos will dive deep into the latest product releases and proven best practices for addressing the market shifts of Agile and DevOps. As always, the ADM leadership team will be available to address your questions 1:1 in the Meeting Center or during the numerous networking opportunities.

NEW for 2019 is our instructor-led workshop program, where you will have the opportunity to get hands-on with our products in a classroom environment. Make sure you sign up when you register, as spaces are limited and we expect them to fill quickly.

I look forward to seeing you in Vienna!

Raffi Margaliot
SVP and General Manager, Application Delivery Management

Overview

Micro Focus Universe is our largest customer event of the year, targeted at enabling delegates to run and transform their businesses. Attend to gain the knowledge and assistance you need to innovate faster, with less risk, in the race to digital transformation.

Mainstage keynote

Experienced Micro Focus leaders and compelling industry experts will share their insight on digital transformation – and what it means to organizations like yours. Hear in-person our strategic product plans, and learn about emerging technologies and trends that will shape the future of business.

Customer Forum keynote

Attend the Application Delivery Management (ADM) keynote to hear directly from senior leaders on emerging trends, as well as our high-level product strategy, plans and business initiatives.

Customer forum keynotes run 90 minutes.

Breakout sessions

These customer- and Micro Focus-led sessions will enhance your skills and address your organization's most pressing needs in today's digital world.

You'll learn about the critical tools you need to build, operate, secure, and analyze your entire enterprise. And, you'll hear straight from the experts on bridging the gap between existing and emerging technologies.

Breakout sessions vary in length from 30 to 120 minutes.

Workshops

Workshops are interactive, instructor-led, hands-on sessions covering a range of software technologies. They are a perfect opportunity for you to extend your skills and deepen your knowledge on a specific topic or solution. Learn from industry experts and bring your toughest questions.

You may wish to reserve your seat in a workshop session as part of the registration process for the event.

Seats will be held until 5 mins prior to workshop start

Workshops run 60 minutes.

Meeting Center

Onsite, you'll be able to meet in personalized briefings with Micro Focus executives and product experts. In a 1:1 setting, you'll benefit from our undivided attention and a conversation targeted at your specific needs.

Tell us what's happening in your world – what keeps you up at night – and we'll discuss the best options to build, optimize, and transform the way you do business.

To request a meeting, please contact your Micro Focus sales representative.

Evening Programs

Enjoy your evenings in Vienna after days filled with invaluable content. Socialize with Micro Focus leaders, meet global peers, build your networks, and connect with customers who will share their business-transforming experiences.

Dine around

Tuesday, 26 March 2019

Customize your dining experience! Delegates receive a dinner voucher that can be redeemed at a variety of selected restaurants, bars, or cafes throughout Vienna. With a pre-set cash value, the voucher takes the guesswork out of "where to eat" and gives you flexibility to choose the spot that best suits your expectations, favored cuisine, and dietary requirements.

All relevant information, a map of participating eateries, and the vouchers will be provided to delegates at onsite check-in.

Customer Forum Dinners

Wednesday, 27 March 2019

Join a group of Micro Focus leaders and other delegates for the ADM dinner. This is a unique opportunity to ask product/usage questions, get tips from other users, and generate ideas for how your organization can further benefit from technology. Or, simply relax and enjoy a gourmet meal surrounded by peers from around the world.

MICRO FOCUS®

Session Details

Tuesday, 26 March 2019

10:00 - 11:00
Functional Test Automation workshop
(This workshop is repeated on Wednesday 15:00 - 16:00)

The world demands today's applications be delivered on an ever-increasing variety of smartphones, tablets, laptops, and wearables. Test automation is a critical factor for continuous testing in order to make fast delivery happen. Join this hands-on workshop to learn how do to cross-browser and device testing at scale using the cloud.

Antonina Sesti, EMEA Presales Consultant, Micro Focus

11:30 - 12:30
Continuous Performance Testing workshop
(This workshop is repeated on Wednesday 16:30 - 17:30)

The pressure to ship quickly often leads teams to skip important performance testing steps and release without complete verification and validation. Join this hands-on workshop to learn how you can connect performance tests to your pipelines with Micro Focus LoadRunner solutions.

Antonina Sesti, EMEA Presales Consultant, Micro Focus

16:00 - 17:30
Forum keynote: Boost velocity with insights, integration, and intelligence

While moving fast is a business necessity, a "too fast, too furious" approach can create cracks in the foundation that lead to slow application delivery, poor quality, or worse: bad customer experiences. According to industry research, development velocity has not improved; in fact, it has largely flatlined for the past four years. To break through the barriers, you need enterprise-ready solutions that provide better insights, tighter tool integration, and advanced intelligence. Join this session to hear about our latest innovations and get a sneak peek into the future of application delivery.

Raffi Margaliot, SVP and General Manager, Application Delivery Management, Micro Focus

Tali Levi-Joseph, Head of Product Management, Portfolio and Lifecycle Management, Micro Focus

Archie Roboostoff, Head of Product Management, Performance and Functional Test, Micro Focus

Wednesday, 27 March 2019

09:30 - 10:30
ALM Octane migration tips and tricks workshop
(This workshop is repeated on Thursday 11:00 - 12:00)

ALM Octane offers numerous capabilities and features that accelerate Agile transformations for high-quality application delivery. For existing ALM/QC users ready to make the move, join this hands-on workshop to learn how to plan your migration and listen to our experts share tips that will help make it a success.

Spencer Bruce, Solutions Architect, Micro Focus

09:30 - 10:30
Testing roadmap: Innovation to evolve automation

As organizations increasingly accelerate their time to market for new applications and services, they are under increased pressure to quickly test while maintaining higher levels of quality. To meet this frenetic pace, you need greater automation and visibility. Join us for an exclusive preview of what's ahead in the Micro Focus Functional and Performance Testing portfolios. Hear how we're carving out the future of relentless automation – whether on-premises or in the cloud–by employing advanced capabilities such as artificial intelligence, machine learning, and predictive analytics. See how you can shift left with QA built in to

ensure the best user experience across any platform, device, or network, even during heavy utilization.

Archie Roboostoff, Head of Product Management, Performance and Functional Test, Micro Focus

Renato Quedas, Director of Product Management, Micro Focus

Vicky Giavelli, Director of Product Management, Micro Focus

09:30 - 12:00
Project and Portfolio Management (PPM) deep dive

▪ **09:30 - 10:00**
Value stream management

Join the product team as they discuss industry trends, such as value stream management, and how they will impact the PMO. This interactive session offers a unique opportunity to meet the people behind Project and Portfolio Management (PPM).

Victoria Voinigescu, Product Manager, Micro Focus

▪ **10:00 - 10:30**
Effective IT governance across projects
presented by a customer

The word "governance" is often viewed as a constraint that impedes faster delivery. At Enel, we strive to enable our agile project teams while ensuring proper governance across all our agile and waterfall projects. In this session, Enel will explain how it deals with the challenge.

Paolo Notazio, IT4IT Tool Management, Enel

▪ **11:00 - 11:30**
Project and Portfolio Management roadmap

Join the product team as they showcase the recent improvements in Project and Portfolio Management (PPM) and provide an outlook into future capabilities. This interactive session offers a unique opportunity to meet the people behind PPM. You will get first-hand insights into the overall direction, and have an opportunity to provide direct feedback to the product team.

Victoria Voinigescu, Product Manager, Micro Focus

▪ **11:30 - 12:00**
Transitioning to Project & Portfolio Management in the cloud **presented by a customer**

Vodafone is undergoing a digital transformation. Cloud adoption and agile ways of working are critical components of that journey. This session will describe how and why Vodafone migrated its Project & Portfolio Management environment from on-premises to the cloud. During the talk, we will highlight the primary business drivers, challenges, and post-migration experience.

Chris Wood, Senior Programme Delivery Manager, Vodafone Group

Wednesday, 27 March 2019

11:00 - 11:30
Five years with Performance Center: A journey of a thousand miles
`presented by a customer`

All craftsmanship is founded on skill developed to a high degree. By one commonly used measure, about 10,000 hours of experience are required to produce a master carpenter or musician. This year, Sberbank celebrated its fifth anniversary using Performance Center, and we are clearly now master users. Join this session and let us share our journey on how the team has matured and grown since 2014. We will also highlight best practices we've developed and implemented, and how we overcame challenges along the way.

Fedor Radzievskiy, Senior Expert, Sberbank

11:00 - 12:00
Deployment Automation and Governance workshop

Managing, prioritizing, and measuring value of the delivery pipeline is difficult due to the disconnect between the tools and teams that plan, build, deliver, and operate applications. Join this hands-on workshop for a deep dive into Micro Focus' release management solutions that help you accelerate your CD practices and orchestrate at speed.

Julian Fish, Director of Product Management, Micro Focus

11:30 - 12:00
The journey to DevOps: Performance engineering and the future
`presented by a customer`

Follow the journey to DevOps continuous integration/continuous performance testing within Sky and how we see the future of performance engineering evolving. During this session, we will discuss how Sky leverages the latest DevOps tools and techniques, which enables us to meet the demands of fast-paced, large-scale Agile delivery. See how we are able to design and build a truly dynamic and flexible solution that allows users to define test volumes, build the test configuration, and run the test automatically in a container. Join this session to experience the future of performance engineering.

Colin Griffiths, Performance Engineering Manager, Sky

12:30 - 13:30
Securing DevOps workshop
(This workshop is repeated Wednesday 14:00 - 14:45 and Thursday 09:30 - 10:30)

DevOps practices accelerate the delivery of applications, but not building good security practices in from the start can increase the delivery of vulnerabilities to internal and external threats. Join this hands-on workshop to learn how to create a single pipeline for continuous application security and provide a single source of truth to manage all software defects and related code changes as part of the SDLC.

Andreas Widmann, Technical Consultant, Micro Focus

14:00 - 14:45
Securing DevOps workshop
(Repeat of the above workshop)

15:00 - 16:00
Functional Test Automation workshop
(This is a repeat workshop)

The world demands today's applications be delivered on an ever-increasing variety of smartphones, tablets, laptops, and wearables. Test automation is a critical factor for continuous testing in order to make fast delivery happen. Join this hands-on workshop to learn how do to cross-browser and device testing at scale using the cloud.

Antonina Sesti, EMEA Presales Consultant, Micro Focus

Wednesday, 27 March 2019

15:00 - 16:00
Lifecycle roadmap: From screaming to streaming

Digital transformation changes the way people do business, and accelerates the delivery of high-quality, innovative solutions that delight customers and outpace competitors. This shift puts greater emphasis on business value over individual releases, and connecting and measuring end-to-end activities. Join us for an interactive session that illustrates common "screaming" moments and how the Micro Focus Lifecycle and Product Management portfolio converts them to "streaming" activities. Gain insight into application delivery trends, how to align value how the Micro Focus Lifecycle and Product Management portfolio converts them to "streaming" activities. Gain insight into application delivery trends, how to align value streams with strategy, and the integrated roadmap across our Lifecycle, Project and Portfolio, Requirements, Source Code, and Release Management solutions.

Tali Levi-Joseph, Head of Product Management, Portfolio and Lifecycle Management, Micro Focus

Omer Felder, Director of Product Management, Micro Focus

Julian Fish, Director of Product Management, Micro Focus

15:00 - 17:30
Silk deep dive

- **15:00 - 15:30**
  Silk Performer deep dive

  Join the product team as they showcase the recent improvements in Silk Performer and provide an outlook into future capabilities. This interactive session offers a unique opportunity to meet the people behind Silk Performer. You will get first-hand insights into the overall direction, and have an opportunity to provide direct feedback to the product team.

  Ralph Mayr, Product Manager, Micro Focus

- **15:30 - 16:00**
  Silk Test deep dive

  Join the product team as they showcase the recent improvements in Silk Test and provide an outlook into future capabilities. This interactive session offers a unique opportunity to meet the people behind Silk Test. You will get first-hand insights into the overall direction, and have an opportunity to provide direct feedback to the product team.

  Stefan Untereichner, Product Manager, Micro Focus

- **16:30 - 17:00**
  RPA: All your clients' questions answered

  `presented by a customer`

  As consumers become more demanding, organizations face mounting challenges to satisfy the prevailing culture among clients of instant gratification driven by the increased availability of smart phones and emerging consumer reliance on the data. Ocorian, a global financial services provider, utilizes advanced technologies – such as smart use of robotics combined with powerful end-to-end automation technology – to support the increasing demands of clients in a digitally centric, data-driven market. Join this session to understand how we are offering ever-increasing degrees of automation and transparency, and using RPA as a means of predicting answers to the questions that our clients have yet to ask.

  David Brown, Director - Client Solutions, Ocorian

- **17:00 - 17:30**
  Ensuring quality with a Testing Competency Center

  `presented by a customer`

  Over the past few years, Credito Emiliano created a Testing Competency Center that provides critical services, which ensure quality for every IT project. The concept developed out of a strong technological partnership with Micro Focus. In this session, Credito Emiliano will share how the company's testing tools were adapted to the bank's specific needs, how the joint collaboration impacted the design, and the key results.

  Gianluca Tonti, Responsabile Centro Competenza Test, Credito Emiliano

MICRO FOCUS®

Wednesday, 27 March 2019

16:30 - 17:00
Hastings Direct: Our world, our Octane

presented by a customer

Hastings Direct adopted the Scaled Agile Framework (SAFe) to reshape our development processes and redefine our toolset. Proponents of SAFe claim that it provides a significant increase in employee engagement, productivity, faster times to market, and overall higher quality. While the framework helped us map our Agile journey, ALM Octane became the tool that enabled our success. Join this session to better understand how SAFe and ALM Octane helped us apply Agile best practices and eased our transition to a continuous integration model.

Steven Tompsett, CDA Engineer, Hastings Direct

16:30 - 17:30
Continuous Performance Testing workshop
(This is a repeat workshop)

The pressure to ship quickly often leads teams to skip important performance testing steps and release without complete verification and validation. Join this hands-on workshop to learn how you can connect performance tests to your pipelines with Micro Focus LoadRunner solutions.

Antonina Sesti, EMEA Presales Consultant, Micro Focus

17:00 - 17:30
Evolving Quality Engineering beyond testing

presented by a customer

Quality Engineering is facing a point of inflection with several disruptions across customer experience and the internal IT intake and execution processes. With a strong history of engagements with all Tier 1 and several Tier 2 telecom service providers, Amdocs developed a strong viewpoint into the evolution required for Quality Engineering transformations. Join this session to understand how quality assurance processes need to change, and how the introduction of smart automation platforms driven by Natural Language Processing (NLP) and Artificial Intelligence (AI) are key to the evolution of quality organizations.

Dror Avrilingi, Amdocs Quality Engineer CTO, Amdocs

MICRO FOCUS®

Thursday, 28 March 2019

09:30 - 10:00
Test management for avionic systems using Quality Center
presented by a customer

Avionic systems are the electronics of aircrafts, and successful integration is a challenging task given these environments are complex real-time systems with strict standards and certifications. To tackle these challenges, Airbus Defence and Space leverages Quality Center (QC) as one factor of success. Join this session to understand how we used QC in two unmanned aerial vehicle technology projects. This presentation provides an overview of avionic systems I&T, how we tailored QC to our project needs and integrated it into our development toolset. We'll end the session with the resulting advantages and insight into further improvements and projects.

Frank Westerbuhr, Expert System Test and Test Tools, Airbus Defence and Space

09:30 - 10:30
Securing DevOps workshop
(This is a repeat workshop)

DevOps practices accelerate the delivery of applications, but not building good security practices in from the start can increase the delivery of vulnerabilities to internal and external threats. Join this hands-on workshop to learn how to create a single pipeline for continuous application security and provide a single source of truth to manage all software defects and related code changes as part of the SDLC.

Andreas Widmann, Technical Consultant, Micro Focus

09:30 - 12:30
ADM Alliances: Stronger together (by invitation only)

Our customers demand innovative solutions that address their critical challenges, and together we have the answer. Micro Focus recognizes that our partner ecosystem is not only a strong differentiator, but is also the key to a successful DevOps implementation. Join us for this exclusive, invitation-only partner event to understand the Micro Focus Application Delivery Management (ADM) strategic roadmap and how it will positively impact your ability to provide unique, differentiated services. During the session, we will reinforce our commitment to strategic partnerships and celebrate our joint successes with a partner award ceremony.

Raffi Margaliot, SVP and General Manager, Application Delivery Management, Micro Focus

Amichai Lesser, Global Director of Market Development – DevOps, Micro Focus

10:00 - 10:30
Optimize quality using actionable insights and analytics

Collecting, analyzing, and acting on too much data may become time-consuming and overwhelming. Without clear visibility and defined metrics, it is difficult to get a handle on all aspects of software quality. Join this session for an in-depth look at the advanced analytics, flexible KPIs, and hundreds of dashboards and reports already in Micro Focus application lifecycle management solutions. Micro Focus application lifecycle management solutions. You'll see how easy it is to focus on what is essential, and improve speed and quality in the software delivery value stream.

Omer Felder, Director of Product Management, Micro Focus

Liran Levy, Product Manager, Micro Focus

10:30 - 11:00
The Test Factory journey
presented by a customer

In large-scale systems integrations projects, managing the application delivery processes is key to success. Join this session to gain insight into one company's creation of a Test Factory designed to structure and guide everything related to testing.
The Test Factory consists of a dedicated team that creates the test context, such as the test strategy and approach. It also industrializes all deliverables–from templates to test data management. Yet more importantly, the Test Factory includes a help desk that serves as first-line support for testing related issues, both on project content and tool access and setup.

Wout Jacobs, Test Lead, Accenture

11:00 - 12:00
ALM Octane migration tips and tricks workshop
(This is a repeat workshop)

ALM Octane offers numerous capabilities and features that accelerate Agile transformations for high-quality application delivery. For existing ALM/QC users ready to make the move, join this hands-on workshop to learn how to plan your migration and listen to our experts share tips that will help make it a success.

Spencer Bruce, Solutions Architect, Micro Focus

MICRO FOCUS®

Thursday, 28 March 2019

11:30 - 12:00
Debunking the myths of Artificial Intelligence and Machine Learning

The test automation space is flooded with claims of products using Artificial Intelligence (AI) to improve the efficiency and resiliency of functional testing. Do you believe the hype or is the market confusing AI with other intelligent automation capabilities, such as Optical Character Recognition (OCR)? Join this session to learn what AI is, what it is not, and how Micro Focus is leveraging AI to deliver major advances in functional testing. You will see how the innovations will enable testers and reduce the cost of building and maintaining automation assets.

Renato Quedas, Director of Product Management, Micro Focus

12:00 - 12:30
Ask ADM anything, hosted by Vivit

Join Raffi Margaliot and a panel of ADM leaders as they answer questions on a host of topics from market trends, product insights, and how application delivery works in R&D. Our Vivit host will compile questions based on feedback from the Vivit community and onsite submissions during the event. Even if you don't have a specific question, attend this session to hear what others are asking.

Raffi Margaliot, SVP and General Manager, Application Delivery Management, Micro Focus

Why attend Micro Focus Universe?

Gain valuable tips from customers and partners.

Explore our entire portfolio and see product demos.

Grow your skills via in-depth workshops.

Ask our experts all your questions and benefit from in-person conversations and guidance.

Build your global network.

Why leverage the onsite Meeting Center?

Get personalized recommendations based on your specific business needs.

Take advantage of Micro Focus executive insight and strategic guidance.

Ask product experts your questions.

Determine the best technology to help your organization transform.

Your Micro Focus sales representative can discuss your meeting goals now, and submit the meeting request early next year.

What can you experience in the Digital Transformation Zone?

Explore the family of Micro Focus products in hands-on demos.

Ask our gurus your product usage questions.

Benefit from exhibiting partners' complementary solutions and services.

Determine the best technology to help your organization transform.

Take a break at the coffee and juice bar.

How do you benefit from so many customer-led sessions?

Hear about real-world implementations and best practices.

Avoid pitfalls so you can move quickly, with quality and security.

Enjoy informative business use case stories.

Get ideas to take back to the office.

In addition to ADM, what other transformational topics can I discover at Micro Focus Universe?

Application Modernization and Connectivity

End User Productivity

IT Operations Management

Security, Risk, and Governance
