Business leaders struggle to develop statement of work (SOW) that supports agile engagements. Lawyers and procurement groups have a difficult time writing SOWs that support iterative development without having a large set of requirements documented. The webinar will explore steps to establish agile SOWs that support frequent delivery without upfront well known requirements.

# Topics

- SOW Types
- Benefits of Agile SOW
- Develop Working Agreements
- Supplier and Customer Responsibilities
- Anatomy of an Agile SOW

# Learning Objectives

- Develop SOW agreements to enable agile engagements
- Discover the power of the vertical slice
- Learn how to increase customer engagements

# Why do we need a SOW?

- Document agreements in the event of a law suit
- Minimize risks
- Maximize profits
- Establish outcomes that are beneficial to customers

# My SOW Experiences with Agile Engagements

- Supplier – Maximize profits and minimize risks
- Customer – Maximize outcomes and minimize risks

## Supplier

- Developed & presented agreements
- Negotiated rates
- Time and material focused
- Minimize risks
- Established exit clause

## Customer

- Received agreements
- Negotiated rates
- Identified outcomes
- Minimize risks
- Established exit clause

# Types of SOW

## ■ Four types of well known SOW contracts

### 1) Firm Fixed Price

- Fixed specs.
- Fixed price and date
- Changes for a fee
- Risk to supplier

### 2) Target price

- Fixed specs. & date
- Target price
- Supplier negotiated target price
- Shared risk

### 3) Time and Material

- Open specs.
- Price based on rate
- End specified by customer
- Customer shoulders risk

### 4) Cost Plus

- Target specs. & date
- Customers pays cost plus profit margins
- Customer shoulders risks

# Group Interaction #1

Select the SOW type with the highest risk to customers.

- A. Time and material
- B. Target price
- C. Firm fixed price
- D. Cost plus

## Conversations with Legal, Controllers, & Procurement

- We must list every feature in the SOW
- Every feature must have a specified end date
- How do we know when Done is achieved?
- We have to protect ourselves against litigation

# Traditional vs Agile SOW

## **Traditional Engagements:**

- Fixed and based on milestones
- Priority changes need an approved change order
- Require higher customer trusts
- Final outcomes are defined upfront
- Large and often longer terms (9 to 18 months)

## **Agile Engagements:**

- Fluid based on prioritized backlogs
- Priority can change
- Require higher customer trusts
- Final outcomes not always specified
- Iterative and shorter terms (2 to 3 months)

# Challenges of Agile SOW

- Suppliers avoid fixed price agreements
- Suppliers assume higher risks with fixed SOW
- Time and material is common to reduce risks
- Customer legal representatives want specific details

# Develop Working Agreements

- Agree to establish working agreements to establish trust
- Acknowledge change is a constant
  - Apply inspect and adapt thinking
- Focus on beneficial value outcomes
- Harmonize to achieve complimentary economic interest

# Group Interaction #2

Working agreements help to establish trust and boundaries.

- A. True
- B. False

## Benefits of Agile SOW of Agile SOW

- Pivot or shift based on customer demands
- Risks limited to shorter terms (1 to 3 months)
- Customers and suppliers share risks and rewards
- Use Value streams to define, organize, and deliver value
- Articulate cost of delay

A black and white photograph of three business professionals in an office setting. A man in a suit is on the left, a woman in a checkered scarf is in the center, and another woman is on the right. They are gathered around a desk with a laptop and papers. An orange semi-transparent rectangle is overlaid on the center of the image, containing text.

# Customer Responsibilities

- Define concise vision and roadmap
- Communicate vision and roadmap with supplier
- Share desired path for a successful partnership
- Request definition of fixed and variable intent
- Accept a shared responsibility for success

# Supplier Responsibilities

- Understand customer vision and roadmap
- Analyze potential feasibility of solution intent
- Evaluate resource needs and duration requirements
- Establish objective evidence of fitness for use
- Define customer investment timelines
- Establish a prioritized backlog

# Anatomy of an Agile SOW

- Use a sprint “0” to determine product backlog priority
- Set appropriate expectations
  - 2 to 3 two-week sprints to know team’s velocity
- Measure relentlessly – value focused metrics
- Partner to define realistic goals
- Educate customers - lean thinking and agile practices

# Group Interaction #3

How would a Sprint “0” help define an Agile SOW?

- A. Create a prioritized product backlog
- B. Ensure “0” impediments
- C. Synchronize multiple teams
- D. Guarantees a successful Agile project

# Summary

- Agile SOW limits risks - shorter durations (1 – 3 months)
- Customers and suppliers share risks and rewards
- Customers and suppliers have responsibilities for success
- Share desired path for a successful partnership
