

Buyer's Guide

Looking for supplies and equipment? You've come to the right place. This Buyer's Guide provides a comprehensive list of suppliers of the products and services used by precast concrete manufacturers. This listing, current as of Oct. 7, 2011, is an excerpt from the NPCA 2011-2012 Membership Directory and Buyer's Guide, and includes the key products and services used by producers.

An alphabetical listing of NPCA Associate Members begins on the facing page. Use this section to view all products and services offered by each company. To search by product, please turn to page 88 to find the companies that offer that product.

Many of these companies will be exhibiting at The Precast Show 2012 March 1-3 in Orlando, Fla. Whether or not you plan to attend The Precast Show, you can also find a complete list of products and services on NPCA's website at www.precast.org. Just click on the link labeled "Find a Producer or Company Now" and select a product in the search field for an Associate. Then click "Search" and you'll be presented with a complete list of NPCA Associate Members offering that particular product along with contact information and website addresses.

Take Your Career to a New Level with Precast University

Now you can take charge of your career with a clear path to NPCA's Master Precaster designation. NPCA's Precast University offers precast-specific training with comprehensive programs for production, safety, technical, quality control and leadership.

The following courses will be offered at The Precast Show in Orlando.

To register, visit www.theprecastshow.org.

Production and Quality School Level I

Production and Quality School Level II-Technical

Production and Quality School Level II-Safety

Production and Quality School Level III-Leadership

For more information on Precast University, visit www.precast.org/education.

60 years of proven performance without a failure! That's 60 years and still counting! No other sewer protection system can match that record. Not plastic pipe. Not coatings or mastics. Not chemical treatment. T-Lock is an extra -tough, specially formulated polyvinyl chloride sheeting that locks mechanically into the interior wall of concrete sewer pipes, tunnels or manholes during manufacture or rehabilitation, providing a flexible corrosion barrier that will withstand decades of severe service. It's an unbeatable, cost-effective combination: the corrosive resistance of Ameron T-Lock and the strength and durability of concrete. Around the world, over 200 million square feet of T-Lock lined sewer pipe are in the ground. Install Ameron T-Lock and forget it!

A legacy of excellence is unstoppable.

If you just needed a crane, you would be admitting that the lift and its related safety, financial, and productivity considerations don't matter. If you think about it, you need more.

Prevention. There is no such thing as reactive safety. Our comprehensive Safety Management System and dedication to continuing education together form the foundation of our corporate culture.

Preparation. If baseball is 90 percent mental and the rest physical, you can say the same of every lift. 3D lift planning, decades of experience, full-service branches that form a supply chain across North America, and our mandate for regular fleet maintenance that allows us to always hit the ground running — these are the bedrock of our every lift.

Performance. Just like a stacked team, ALL Crane is where the best want to apply their skill. They come for the challenge and the unshakable code of conduct. They come for our legacy of continually reinvesting in our business with the best equipment, training, and technology.

CONCRETE ANYWHERE YOU WANT, ANY TIME YOU NEED IT!

- 4-wheel-drive, self-contained mobile batching plant mixers and off-road dumpers
- Offices and warehouses in Kentucky and New Jersey
- Distributed in over 130 different countries among five continents
- Used by the US Army overseas and the German Army in Afghanistan

Our units can load and weigh the materials to be processed – water included – and produce concrete directly at the work site. The units are versatile enough for jobs from residential and industrial to road maintenance, dams, tunnels and precast. The units can climb more than 30 percent gradient fully loaded, making them particularly useful in inaccessible areas.

Testimonials:

"I am using a Carmix mixer and I love it! I am considering buying one more!"
– Conrad Stonetree
Fence System, FL

"I bought a 3.5 Carmix model and I am very happy about the unit and the customer service!"
– Continental Transport Corp.
American Samoa

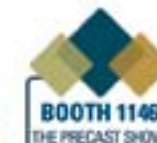

"Carmix is very versatile and perfect for our jobs!"
– Dixon Contracting & Supply, PA

LIKE REBAR AND CONCRETE

GOOD PARTNERS ARE STRONGER TOGETHER.

www.cna.com

CNA AND NPCA: A STRONG PARTNERSHIP

CNA knows the precast concrete industry and understands what precasters look for in an insurance partner. We offer coverages not readily available from other carriers and work with you to craft the most responsive program for your business. Our risk control services help mitigate your chance of loss, while our claim specialists stand ready to steer you through the claim process. We help you control direct and indirect costs and improve productivity, while benefiting from the strength of an A-rated national carrier with local industry expertise. If you're looking for a partner who can help reinforce your path to success ... **we can show you more.®**

For more information, contact your independent insurance agent or visit www.cna.com.

Service,
Innovation
Proven Performance**

There's only one way

to Seal the Deal!

It's called ConSeal.

Concrete Sealants leads the industry through innovation, technical expertise and customer support.

- First to develop sealants specifically for the precast and concrete pipe industries.
- Non-Toxic Sealants certified under NSF Std. 61 for drinking water
- Gasoline, diesel, jet fuel and glycol resistant sealants for use at airports, truck stops, oil refineries and secondary fuel containment.
- External membrane wraps ranging from 2" to the new 36" and 48" wide; perfect for saving time when applied as a waterproofing membrane.
- Geotextile fabric wraps capable of withstanding the high temperatures of asphalt paving
- Custom lengths in numerous geometrical configurations
- Rubber based hydrophilic waterstops
- Water based polymer/acrylic coatings for damproofing protection
- Water based polymer mastics
- Water based gasket lubricants meeting NSF's standard 61 as safe for drinking water.
- Polypropylene based hot melt Elastomeric rubber sealant.

Call today, or visit us on the web.

Have a problem? **Don't just seal it, ConSeal it!**

StudLiner

The Concrete Solution.

The Concrete Protection Liner that extends the service life of concrete structures.

- Made from the highest quality High Density Polyethylene (HDPE).
- Superior chemical resistance (Greenbook Pickle Jar Test).
- Highest pullout strength.
- Withstands extreme head pressure.
- Used in a wide variety of concrete protection applications.
- Available in fabricated panels or shapes to reduce installation time and costs.

gseworld.com/custom-fabrication

Learn how StudLiner is setting the standard for manhole, sump, lift station and pipe applications.

For over 40 years, customers have been calling on Hamilton Form for custom, high quality, architectural and structural steel forms, but that's just the beginning. Our form cleaning machines, utility/casting machines, magnetic side-rails, vibrators and screeds, curing blankets and blanket rollers, steel chamfer and stressing equipment are just as impressive.

Our formwork and equipment can be modified and multi-purposed to help you get the most from your investment. No matter what the size of your project – or budget – Hamilton Form can help get the job done.

Pour after pour, project after project, call on Hamilton Form for custom forms and a whole lot more. Call 817 590-2111 or visit www.hamiltonform.com

Solutions

for Concrete Pipe and Precast

HawkeyePedershaab is the world leader in providing innovative solutions to producers of concrete pipes and precast products. We pioneered and refined many of the machines that today have redefined productivity, flexibility, and performance. From simple machines to fully automated plants incorporating the latest in robotics, HawkeyePedershaab furnishes a total family of solutions with technology appropriate to the application. And it's all backed by a global network to efficiently bring products and services right to your plant.

Taylor Machine Works manufactures lift trucks to handle all types of concrete products with lift capacities between 16,000 and 110,000-Pounds and 24, 36, and 48-Inch load centers.

”THE RIGHT CHOICE – MBKEEN”

Simply strong:

- Wire-Cage Machines
round - elliptical - egg-shaped
- Concrete pipe processing
Round - Oval - Egg-shaped -
Mouth shaped - Square - Meshes

- Quality assurance
measuring - testing - labelling
- Cage-handling
jointing - tipping - transporting

THE EVOLUTION CONTINUES

And it comes with no compromises

The **NEW DB Series**, double-beam gantry crane is ideally suited to today's marketplace in which plant managers are looking for a more cost-effective way to do business. Through our legendary quality, impressive maneuverability, precision handling and user-friendly operation it is evident that Shuttlelift is dedicated to innovation and customer inspired lifting solutions. Let Shuttlelift deliver the crane that's right for you. Join the evolution.

BUILDING A BETTER WORLD.

Simem offers *concept to completion* for new or existing plants.

When you are considering to invest in a new plant, or to re-configure your existing plant and equipment, Simem is your supplier of:

Horisontal and Vertical Batching and Mixing Plants, Planetary and Twin Shaft mixers, Conveying equipment, Concrete transport equipment, Concrete recycling and slurry water treatment, Controls, Lay-out, process and design engineering services, Structural, Mechanical and Electrical installation services.

Simem also supply continious mixers and plants for RCC and backfilling applications.

Simem is your one stop on the road to increased efficiency and high product quality.

Innovative Systems

It's what you know us for.
 Now Tricon brings you the
Alfabloc® Wall System.

ADVANTAGES	USES
<ul style="list-style-type: none"> • Quick and easy installation • Freestanding • No protruding toe • Bay configuration can be changed as needed 	<ul style="list-style-type: none"> • Can be ground fixed for permanent installations • Threaded inserts for lifting and connecting • A range of unique accessories are available • Recycle processing facilities • Bulk material storage yards • Industrial security applications • And much, much more

Alfabloc® the most versatile precast concrete walling system available today.

Call Robert May to learn more.

APOLLO – The Safest Mixer in the World

It's NOT a Confined Space

Quicker Cleaner Safer

BUYER'S GUIDE

1. Quicker:

Unique shovel and discharge gate design increases mixing action and dramatically decreases discharge time.

2. Cleaner:

The automatic **RETRACTING** self-cleaning unit blasts 20 GPM of water at 2,700 PSI to remove concrete build-up.

3. Safer:

Double-doors, placed in opposite walls of the mixer, allow replacement of wear parts without stepping into the mixer pan.

The new APOLLO mixer features SKAKO's front runner technology, so that productivity increases, just like safety, to give you peace of mind.

For increased concrete production:

- New shovel design accelerates mixing of high quality, homogeneous concrete.
- The design and placement of hydraulic discharge gate means 23% faster discharging.

For faster, more thorough cleaning and longer mixer life:

- Automatic self-cleaning cuts cleaning time by 50%.
- The rounded, smooth interior surface, counter sunk bolts and differential speed mixer stars eliminate dead zones and reduce build-up of concrete.

For a high level of safety:

- All wear part replacements are performed from outside the mixer- not in the mixer pan.
- Safety interlocks for all mixer pan access doors and discharge gate covers.
