### SHORT PAINT PASSAGE

The gravity fed airbrushes have a very short fluid passage, easy to clean and simple to maintain.

### ANTI CORROSIVE PROTECTIVE EXTERIOR

The exterior is nickel and chrome plated. External clean up is easy as paint will not readily stick to the chrome surface.

### MAIN LEVER

Incredibly smooth feel.

### NICKEL PLATED INTERIOR PARTS

The internal parts last longer and resist corrosion. Nickel plated parts will not stick together and can be taken apart manually.

### STAINLESS STEEL NEEDLES

The long gradual taper of the stainless steel needle offers the ultimate in spray control. The extremely sharp tip ensures fine line consistency.

### STAINLESS STEEL NOZZLES

Each nozzle is made with extreme precision using the industry's most sophisticated machinery. They are tested one by one to ensure accurate control and excellent atomization. They are self sealing to eliminate the need for messy sealers. Stainless steel nozzles are more durable than conventional brass nozzles and resist chemical corrosion.

## Stipple Patterns

A stippling effect can be achieved by removing the nozzle cap and regulating the air pressure.

An entire range of stippling effects can be sprayed, from very fine to coarse textures.

## MODULAR PAINT HOLDERS

Modular display stands for 1 oz (28 ml) colours are perfect for displaying the complete range of ACRYLIC PAINTS and MEDEA NAIL ART PAINTS in any shop or retail outlet

The stands are available as single rack, capable of holding up to 70 colours ( 14 rows), and can be stocked up ( maximum of 6 racks) to create a display stand with a total capacity of 420 colours.

The stands are finished in powder metal, which means that they are particularly resistant and hard wearing.

They are available with a full supply of colours included, upon request.
