

# WHAT TO LOOK FOR IN AN AKASHIC RECORDS GUIDE

# WHAT TO LOOK FOR IN AN AKASHIC RECORDS GUIDE

---

## **Why is everyone having an Akashic Records Reading?**

Having an Akashic Records reading is not just a craze related to many of Hollywood's stars having them, or hearing about it from a friend. It is akin to having an insider look at your full potential, your family and your relationships and getting the best possible scenarios as you make choices for yourself.

Joining the ranks of those who have had a reading puts you in good company. Many individuals tell us they already *knew* much of what the Record Keepers said, but it was *validating* to know they weren't crazy. They weren't making it up and could now move forward with it.

Akashic Records readings are a part of life – just look at the number of individuals giving readings and at all price ranges! Everywhere you look on the web you will find guides and readers.

The easiest way to explain your Akashic Records reading is to say that it is **not** a psychic reading. The Akashic Record Keepers are here for your soul growth. For that reason alone you can ask just about any question you wish.

## **How will you know which one to choose?**

There's no doubt that the demand for Akashic Records Guides is there. What follows demand? Supply. You're going to see a lot more Akashic Records readers and guides spring up over the next decade, which means your choices will get tougher and more complicated. But navigating this sea of possibilities won't be as difficult after you follow a few solid tips and some excellent, discerning strategies that will help you find the best match for you. But what is an Akashic Records Reading exactly? In this context, it can refer to any person who tells you that they can open your Akashic records. It is a spiritual service that has the goal of making you more knowledgeable about your life, your mission, your purpose, your relationships and more.

There are many readers out there- how will you choose?

## How does spiritual information work?

The first question is a very fundamental: just how the heck do people open your records? The way each “person” who opens the records is essentially similar. They allow themselves to petition the Lords of the Akashic Records on behalf of themselves or another. They do this through a specific process.

Some readers allow any and all information to come through them. Our “guides” are different in that we only accept information from the beneficent beings. We are likely to identify past lives where you were the bad guy only if this information is useful to you to help you understand what is going on now— then the information will flow.

Each of our guides has different interests and offer slightly different ways of providing information to the client. We have all worked together, for each other and on each other so our work is consistent in the records.

## What are the Akashic Records anyway?

The Akashic Records consist of a field of information from this life and all of your lives. A trademark of Akashic Records is that they are like accessing library information. Your guide may stop, pause, collect, and center the information that is provided through her. Most guides work with their guides who then make a space for YOUR GUIDES to channel through them. A guide moves her awareness into the background while your guides move into the foreground. Most readers/guides do not remember the reading. If you remind her, or ask a question then she may remember what she heard. This information is not moving through her conscious mind, so she might not remember it her mind, since the information wasn’t formed cognitively. It is stored in her “hearing memory” rather than cognitive memory.

We recommend that you do your research and work with guides that will help you find your way through the intricacies of your needs. Many readers/guides call themselves *consultants*. Akashic Records International (ARI) was guided by the Ascended Master sponsors of this lineage; *The Great Divine Director, Goddess of Liberty and Sanat Kumara* to be addressed as guides. ARI members are NOT consultants. ARI members do not consider themselves expert at interpreting your messages. They are the messengers, and together you will understand the visuals, sensations and messages. Many times information will come through that makes no sense to the guide, yet will make perfect sense to you!

Persons working in the Akashic Records are of service to you and are committed to assisting you with accurate information coming through the 11<sup>th</sup> dimension, Certified Akashic Records Guides begin their process in the 5<sup>th</sup> Dimension, a place of non-polarity. They then move from this place of non-duality into the 11<sup>th</sup> Dimension where the Akashic Records are identified.

**Access to your information-** There are certain kinds of information most guides won't give you – even if they could. They are not likely to tell you your death date. They won't provide information on issues about other people, outside of how it relates to you and your interaction with them.

**Access in general-** Each Akashic Records Guide will differ in the types of session they will offer, of course. In every Akashic Records Guide session world-wide will benefit you in some way. In fact, you will come away with a greater sense of well being from your session. In addition, depending on your individual tastes and goals, the kind of Akashic Records Guide you decide to work with may be a decision maker for you when deciding which Akashic Records Guide to hire.

But there's another category here: what you can usually expect from an Akashic Records Guide without being guaranteed that they *all* offer it. What should you look for as a bottom line in your Akashic Records Guide?

**Wisdom-** Problem solving is usually enough to keep your mind busy and maybe even the cause for sleeplessness. How does the session begin? Do you start asking questions first, meaning, does the client need to ask the first question? What if YOUR guide/reader could tune to your guides, with *opening remarks* that will reassure you and she are on the same channel, and they know your issues? ARI certified guides all begin with *Opening Remarks*.

**Classes-** Some Akashic Records Guides won't hold individual personal instruction but will offer classes you can take - these aren't only great excuses to learn something, but they should focus on the areas of your life you are most concerned with. Opening your own records is a very popular coursework, as are various study groups and sharing.

**Variety of services-** Maybe you don't want to learn how to read for others, but you want to know how to open your own Akashic Records. If you're not sure, the best thing to do is to start with a beginners class, and then make sure that the Akashic Records Instructor you're considering working with has a wide variety of resources to go along with training. You want to see tools such as meditations, books, essential oils, and even a network of Guides you could join for camaraderie and support. ARI organization has tools that can help you grow as a human being, and supports your ascension work. Naturally, the better the services, the more you can generally expect to pay in terms of

your fee.

You're probably already giving your ideal Akashic Records Guide a great deal of thought - and that's a good thing. You want to think about hiring an Akashic Records Guide in terms of what they can offer for you and how your life can improve for your investment.

## What makes an Akashic Records Guide *good*?

It's an old adage: you get what you pay for. But when it comes to the world of Akashic Records Guides International, what does that really mean? What makes a good Akashic Records Guide good?

You can start with the characteristics of an Akashic Records Guide mentioned in the preceding section. The higher the quality and quantity, the more you can expect to pay. But what makes a good Akashic Records Guide good isn't necessarily how much they've paid for their training, but what they can offer you. Here are a few variables to consider in your own search for an Akashic Records Guide:

**“Good,” after all**, - is a very relative term. The ideal Akashic Records Guide for you might have something that no other Akashic Records Guide can offer - like better access, because they use their 5<sup>th</sup> Dimensional connection to launch into the Akashic Records – a place of non-duality.

**Location** – Can you have your reading in person? Can you have your reading via Skype or face time? Each of those characteristics can entirely depend on your individual taste. If you want a guide you can meet with face to face, the choice is limited. If you are willing to have a phone or Skype session your circle of available guides increases dramatically.

**How long should a session be?** - We find that 50 minutes usually is ideal. After about 1 hour the client usually starts to repeat themselves. There is the possibility of longer sessions, but we urge you to do some prep work first, writing out the questions that you want to ask. Some Akashic Records Guides will even provide you with a list of sample questions – that may be helpful to get you started.

**Some Akashic Guides use a pendulum-** to determine answers. A pendulum can be useful, but do you want to work with someone who is so unsure of the message that is coming from the Akashic Records that she needs a pendulum?

**Some Akashic Guides talk about Karma-** Akashic Records Guides International knows there is no more Karma. You do not need an Akashic Records Guide to unhook you from karma. All you need is acceptance of this knowing and you are off the wheel of karma for good! This is a new era, and the weight of sins of the past can no longer hold you back. Announce this to yourself. Do it in prayer.

**Price and packages** – Some Guides will offer multiple sessions which are a savings and can be useful as you use the information to shift and change. Also, some guides offer a recording. Most will charge extra for the recording. (This is in case the recording equipment fails for any reason; a refund for the *recording* can be given.)

**Apprentice Guides** – Some organizations require extensive training and client work before getting certified. Some of these “apprentice” Akashic Guides will offer sessions, which are a savings from their regular fee. They can be just as helpful to you as you use the information and shift and change.

**Availability** – Many guides will provide you with scheduling software that will allow you to choose your appointment time – any time of day that is convenient for you.

**Waiting times** – The more well known a guide is, the longer the wait and also the higher the prices. Many will hold back session times in order to offer “emergency” sessions based upon your need. If you find a guide you want to work with – don’t hesitate to let them know if you have a special need, or emergency. Some will be able to accommodate you – and can fit you into their schedule.

**Classes offered** – Many organizations offer coursework to learn how to read your own records, and how to read for others. Does your guide belong to an organization? Does she support fellowship of other guides?

(Of course, so far we've been assuming that you want to have a private session. It's a safe assumption if you've read this far, but just in case, let's address the potential reasons you might want to choose to have your Akashic Records opened.)

**Having relationship or family issues-** Obviously, the first reason to have an Akashic Records Guide is simply to be a better person. Being in a difficult situation, with family or co-workers is painful enough, but what if there were some understanding or wisdom you could gain from such a session?

**ARI Guarantee-** Not all guides are perfect or will be a perfect match for you - but that doesn't necessarily have to be your outcome. In the rare circumstance that your guide is not a good match for you – Akashic Records International will happily refund your money provided you cancel in the first 10 minutes, or trade your payment to another guide. Interestingly enough, our experience suggest that many come away from a session with valuable insight into the drama they are dealing with.

**Focusing on long-term mental, emotional and spiritual health-** You don't have to have multiple readings to transform your circumstances or who you are. Choosing that first step, to have a private session, can be enough to really overhaul the way you have been dealing with your situation or your life. One of the benefits of working in the Akashic Records with a guide, no matter what information is given, is that your overall sense of well-being will increase after your session.

**Growing in Wisdom-** Some people are seekers and time with an Akashic Records Guide will support their spiritual growth. You might just be looking for a specific answer to why your Mother treats you poorly, or why your relationship with your brother never healed. Or why you married your husband! There are other things you can learn in the Akashic Records. You might ask whom your guides are, or where are you from? Your soul's purpose is important to know along with soul contracts

# Why it might be a good idea to have an Akashic Records Reading

## **Questions for specific situations and activities like business decisions-**

Some people are seeking guidance on a business partner or a purchase. They already know what they plan to do – and confirming information in the Akashic Records along with insights can really make much easier to move forward with confidence. A client recently ran through the names of the proposed board members of her new corporation – and received insight on their strengths and weaknesses as it pertains to her company!

**Self-defense-** Understanding your situation empowers you to operate in a proactive way, instead of reactive. This is truly the new reality, the 5<sup>th</sup> dimensional way of interacting. Imagine difficult situations can improve with knowledge and understanding to help you build self-confidence and inner wisdom.

Do any of these reasons resonate with you? If so, you probably have a much better clue as to what you're looking for out of your Akashic Records Session.

Even if you don't think signing up with an Akashic Records Guide for a session will automatically accomplish these goals for you - and it won't - it helps to recognize the value of a reasonably-priced session which gives you consistent information, and availability of reviewing your session (an MP3 of your recording may be purchased from most guides.) Motivation and growth will always come from within, but an Akashic Records session can be a great bargain for what you need at this time in your life.

**Your good intentions-** Your good intentions may have a way of slipping away from you without resources to support you. Maybe you want to be a better person, see others in a more kindly way, and get along with your family and co-workers better. When you have an Akashic Records Session, something happens, you shift, it's easier to keep your resolve and it's easier to understand others and yourself. The Miami Herald reported in 2010 that some 97% of New Year's resolutions go unfulfilled. Let's make this year your year that you join in the three percent who do fulfill them by having an Akashic Records Reading.

# Keys to picking the right Akashic Records Guide

Keeping in mind some of the variables we've already talked about, it's time to actually explore the characteristics you're looking for in a guide. To do that, let's look at the variables present in each one and explain how they might be useful (or useless) to you.

**24-hour accessibility:** An Akashic Records Guide setting that allows you to make an appointment at any time of day. For sure, you have to match your schedule to theirs, but that's what scheduling software is for.

**Your needs:** You can fit the Guide around your individual needs. Maybe you are attracted to the fact that they are an angel communicator, or that they are in your city, or that they work with animals. Akashic Records Guides International is a organization of like minded Akashic Records Guides who are committed to growth: of their clients and themselves!

**Personal services and coaching-** Some Akashic Records Guides may offer other services. For example Akashic Records International has Spanish speakers, specialists in past life regression and Quantum Matrix Healing (a powerful transformative session that clears recalcitrant negative behavior patterns) or specialist that can bring order out of disarray! Sessions can be purchased as an individual session, or can be purchased in multiples with significant discounts.

**Location-** Nothing beats a good location. Yet, if you are comfortable with FaceTime or Skype sessions you can work with anyone from around the world.

**Akashic Records Guides culture-** Admittedly, this one is a little less quantitative and a little more qualitative, but if you really want an inspiring environment, it's worth it to check several Akashic Records organizations and see which "environment" you like best. Akashic Records International builds relationships with each other as well as their clients. Look for shared values or similar interests, Find the best answer for you and then go with what feels right. Whatever feels right is your best first choice.

# Qualifying your Akashic Records Guide

Now that you know what you want out of an Akashic Records Guide, it's time to start the next round: qualifying it. You want to actually go in to their website and view their information. Read their endorsements. See if you like what they say about themselves to find out what they're all about. If you've been keeping track of which variables are most important for you, you should have a good idea of the kind of questions you'll be ready to ask once you decide to move forward with an Akashic Records Session.

Remember: you're the customer here. Don't be afraid to exercise your customer radar and really dig in and find out what kind of benefits each Akashic Records Guide has to offer. Read their online blogs. AkashicRecordsGuidesBlog.com is one blog to look at. If there are web sites to visit, check them out - maybe even print them out for a more thorough review. The more information you have, the better your decision will be.

Of course, you'll actually have to check out the Akashic Records Guide with your own feelings. We recommend you take a little time to find someone you really resonate with, and then have a session. If you still have questions, do they have a phone number you can call for more help?

Here are some good examples of questions you might want to ask:

- **Do you have a deal breaker: if you absolutely need a recording, ask if that's available?**
- **What does a purchase of a basic session get me?**
- **What kind of services or accessibility will I have to pay extra for?**
- **Do you offer any instructions, preparatory information, or any support sessions or referrals?**

## **Crossing potential Akashic Records Guides off of your list**

(Clearing work, Past life regression etc.)

There are plenty more questions you can ask - and you don't have to use all of our suggestions - but you get the point. If you want to find out something, just ask. You'd be amazed at the accommodations Akashic Records Guide can be willing to make simply because you asked for them.

When it's time to make a decision, how do you know when it's time to cross one off of your list? After all, it's going to be important that you don't end up having a session you weren't really ready for.

A good way to handle this is to keep an eye on your deal breakers. Write them down. What are your must-haves in the world of Akashic Records Guides? If you find more than one guide that suits you but one violates one of your deal breakers, cross it off and choose the other one.

Akashic Records International will never try to sell a certain Akashic Records Guide to you, You might feel your emotions sway. Staying true to your deal breakers, your feelings will help ensure you don't make a rash sign-up that you may regret in a few weeks.

It might not sound like a big deal now, but having a profound Akashic Records session might be so transformative you'll realize just how important your needs and feelings really can be.

## **Enjoy!**

Following all of the instructions in this brief walk-through should give you a far better idea at the kinds of issues you'll want to focus on when you're deciding which Akashic Records Guide to work with. There are a lot of variables that go into decisions like these. Since it's your money that's on the line, it's a good idea to take some time and really figure out where you want to put that money.

With that out of the way, however, the focus will again turn to you. What can you do to make your Akashic Records Guide session worth the investment? Will you follow through on the suggestions and insight that you receive? You might resist at first, but after re-listening to the session, you might be surprised. You very often will find enough energy and support to really have a positive change on your life. Just like going to the gym, sometimes when you work out, you really work up a sweat. So don't be afraid to work up a sweat to tackle the difficult situations in your life, and be ready for positive change!

Once you choose, your goals and desires should all become much easier to achieve. After all, that's why you're going to a Akashic Records Guide in the first place!
