## *Searching for 'Lost Sharks'*

Sure, the Great White gets all the attention. But most sharks are unknown to the public and even the scientific community.

[Cabrillo Marine Aquarium](http://www.cabrillomarineaquarium.org) will present Dr. David A. Ebert of the Pacific Shark Research Center/Moss Landing Marine Laboratories on these "lost sharks" in a virtual Discovery Lecture Series talk Friday, June 4 from 7 to 8:30 p.m.

Sharks and their relatives the rays (flat sharks) and chimaeras (ghost sharks) come in a variety of sizes, shapes, and colors, and can be informative of the health of the marine environment.

Dr. Ebert has devoted his life to studying the ocean's most elusive, dangerous and yet fascinating predator. And he has stories that span the world.

Registration for this presentation is available at <https://june2021discoverylecture.eventbrite.com>. And teacher resources are available at <http://www.cabrillomarineaquarium.org/education/learning-resources.asp>.
