

Tatshenshini Simmentals

Complete Herd Dispersal

Monday, April 4th, 2011

Grande Prairie Livestock Market

Grande Prairie, Alberta

Welcome to the Tatshenshini Simmental Dispersal

I would like to thank everyone for attending our dispersal sale. I would also like to thank all our past customers who have purchased bulls from us over the years. Without your support, it would all have been for naught. All of the cattle that we are selling are good sound, quiet animals with good feet and good udders. We have always had a strict set of guidelines that we follow. We don't tolerate attitude at all. You have a good udder and good feet and calve unassisted and raise a big calf. If you do all of these things you stay, if not, you go to town. No exceptions. Color has never been a priority. When looking for herd bulls, we are very fussy. Jay Good can attest to this as he has looked at a number of bulls for us that didn't measure up. All of the herd bulls that are to be sold all have good dispositions, produce good daughters, have good feet (we don't trim feet, just once right behind the ears) and are all performance bulls that calve ease. The polled 16U is a virgin 2 year old so is unproven, but I feel he will be a performance bull that should calve well.

All of the calves will have their first Ivomec Gold shot and Ivomec and age verified. Cows will have their spring shots and Ivomec again as they were done in the fall for lice. Bulls and bull calves will have their shots and Ivomec. All of the bull calves are intact and a lot of the calves will be in the 300 – 400 lb range by sale day. The cows will not be fat as we don't feed grain to our cows or herd bulls. The heifers are normally grained for about 6 weeks, 4 lbs/day after weaning, then on baled silage – nothing else.

We sell all our calves the third Thursday of September every year and our steer calves have always been in the 800 – 900 lb weight class. After a 4% shrink, heifers are in that 750 – 800 lb range. A 4% shrink included in last year's sale receipt. We kept all the heifers last fall so it is just steer calves. I would also like to thank the Transcon team for their patience in doing this sale as it is not a typical time to do a dispersal.

Good luck with your purchases as I am sure they will work for you. They have worked for us year in and year out.

John and Lynne Smith

The last market report for Tatshenshini calves sold.

Sales Management Comments

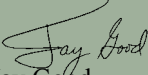

This event will be unique to the registered cattle world as far as the concept of dispersing a cowherd. Traditionally, a dispersal would be held in the fall so the calves could be harvested from their pregnant mothers. This time they are selling as a unit with the cows open, ready to re-breed by their new owners. Selling registered "pairs" allows the buyer to access 2 new animals with papers with one bid! If John and Lynne weren't re-locating and didn't have a farm sale booked already, these wouldn't be selling until fall either.

To think that John Smith approached genetics "lightly" would be a huge error. The base cows to the Fleckvieh herd were purchased from MFL, Richmond, Marralyn, Van Ankum, JB Livestock and Fleckvieh Fest. While analyzing the catalog, you will see in the backgrounds of the pedigrees influential bulls of the breed like King Arthur, Solway Adonis, Texas Lonestar and Romulus. It's one thing to buy top cows to build a herd from, but without accessing a bull battery to breed them to, it won't advance. That's where the LaBatte bred herdsires come in. Firstly, came "Journeyman", who will still sell at 10 years of age and is as sound as a 3 year old. Of course he, being mothered by MFL Satin 31S, is a maternal brother to Bar 5 Sir Arnold 414C as well as being a paternal brother to IPU Bronson 19K. Pretty nice company close in the family tree! The homegrown Journeyman son, "Napoleon", also now has many daughters in the sale. The second bull to show up from "Gladmar" was "Warrior 26S" and was directed to anchor the expansion side of the new Red Purebred herd. This son of the famous "Red Chief" was the high selling bull in his own respective year. Semen was retained for in herd use by the LaBatte's and consequently the "lead-off" bulls recently at their 2011 bull sale were sons of "26S" as well as siring top selling heifer calves.

To think that John's cattle are "wild" would also be a huge error. As Leanne Zukowski, who took the pictures commented, "I have pictured a lot of cattle over the years but I have never pictured a herd as quiet as this before. Even the open heifers were quiet and would come right to me with my camera in hand - that is amazing!"

With the strong genetics and unique buying opportunities available, we hope to see you in Grande Prairie in early April. As I always like to point out, if you can't personally attend but would still like to bid on cattle, allow us to handle the responsibility for you with our trusted, industry leading, order buying abilities.

For John and Lynne Smith,

Jay Good,
T.L.C.

Leanne Zukowski in the open heifer pen.

What do you say about a bull that you have built a cow herd around? He may be getting up in years, but is still sound as a dollar. He has never had his feet touched, never gone lame. His daughters are about 1400 lbs mature, have really good udders, calve easily, good feet, mother up good, are quiet and raise big soggy calves. We sell the third Thursday in September and steer calves will be 800 – 900 lbs and heifers up to 800 lbs. The first year we sold his calves we gained 156 lbs over Anchor "T" Titanic calves from the year before. Some people may think it is wrong to keep a bull this long, but I will take all the daughters I can get. As first calvers, most will raise a male calf that will weigh 800+ lbs by the third Thursday in September because calves are still sold by the pound. Semen bank of 150+/-.

1N is a Journeyman son that we at first, kept back as a spare bull in case our 1L bull went down in breeding season. First we gave him the bottom end cows because he has some birth weight. His first calf crop was no problem. All were born unassisted and the calves looked pretty good. By 2007 he had earned the number 1 spot in our bull pen. About 90% of his calves are solid colored with double goggles. He has just as much performance as his sire. A little more I think. The only time we touch a calf is if it is a mal-presentation. His daughters are really good and as a group are our best young cows. They all have really good feet, good udders and are really quiet. He is a bull that I feel could be used on heifers. We have had two accidents with him on heifers and both calved unassisted. He is the best bull that we have ever used, natural or AI. He has more performance than Great Guns Karl but without the calving problems. He also comes with a large semen bank 500+/- and U.S. Qualified.

26S was purchased out of Barry LaBatte's sale for \$26,000 as the lead off bull. He was purchased to breed some of our 1L and 1N daughters and follow our 68R bull in developing a red program. He is a very quiet bull who is an easy calver. We have used him on heifers with no problems. His calves have good performance and his daughters look like they are going to make good cows. They are quiet, good udders, good feet, calve easily and mother up good. He is just coming into his prime. He is also homozygous polled. Most of his calves are that deep red color. He also has a small semen bank. At the recent LaBatte Simmentals Bull Sale, four 26S sons sold for an average of \$8310, and five heifers averaged \$2840.

5T was purchased from Robb Farms for \$22,000. He was shown at Farm Fair and Agribition where he was Reserve Champion. Barry LaBatte also thought he was a good bull because he was runner up. I had a good laugh over that. I looked long and hard for quite a few years for a Fleckvieh bull to follow our 1L and 1N bulls. His pedigree, I felt, would be a good match to our 1L and 1N bloodline. So we decided he was coming here after the sale. The first year we only got 5 calves because our bull went out February 12 – 15 and it was March 17th before we got him home. At first I was a little disappointed in these calves, but by fall they looked okay. We didn't use him the second year because of a broken underground water line to two pens. This year's calves look good. They are a dark red color, come easily and are double goggled. Quite a few have red feet. His calves, whether male or female, will be easy to sell to other breeders or commercial buyers because of the color. He is a bull that is just coming into his prime.

Gunner is a bull we bought last spring from Bar None in Westlock to use on heifers. As soon as I saw him I liked the look of him. He profiled like our other herd bulls and I thought he would fit right in. The dark red color and pedigree were a bonus. Paul said that if he didn't sell, they would have used him themselves. So I figured if they would use him on their heifers, he would work for me. I also liked that he was not too fat and seemed quiet. He has continued to grow and mature. And at two, he is a bull I really like the look of. His calves come easily and are up in no time.

16U is a polled bull that we raised out of a 16M cow that was purchased out of Fleckfest from Chris Havener. With Emperor sire and the 8M Baltimore C&B bloodline, he would be something that was new to our bloodline. If we decided to use him ourselves or if we decided to sell him, he would be an outcross to most polled bloodlines being used. He has lots of performance and is going to be a performance bull that will calve okay with the color of 8M Baltimore C&B. If he is used on dark red cows, I think his calves will be dark red. He has good feet and is quiet. Also, a virgin 2 year old.

BW: 106.

2T is a 1N son out of our 10J cow who is a Solway Adonis daughter. She is our best cow and has always raised our best calf every year. 2T is out of our Napoleon bull and I feel he is a better bull than his sire. He is a bull that has it all. He is long, deep, thick, good disposition, good feet, nice bone structure and is easy keeping. His pedigree is really deep in tried and proven ancestors. From Houston/Journeyman/Napoleon on the male side to 10J - 73F (who has over 20 daughters, grand daughters and great grand daughters in our herd) and Napoleon's mother, 20C (a 8M/Bold/Bavarian/Neff cow) who was one of our best cows and one of Ross Marra's flush cows. I feel his daughters will be really good. So if you are looking to raise some first class females, he is just coming into his prime and should have a long career ahead of him. His bull calves will be good also. He will be a performance bull that will calve easily. If we were staying in the cattle industry, he would take our 1L bull's place and 1L would become our spare bull. 2T is just too good to be a spare bull and deserves to be more than a spare bull. I feel 2T is our best bull.

50W is a dark red polled bull that is near the top of the pen. He is long, thick and has a good top and good hip. He is also quiet with good feet. His mother is one of our up and coming young cows. He is going to be a good, sound, trouble free bull that will calve easily and have good performance.

18. JLS 39W

1/2 Angus 1/2 Simmental 12 December 2009

BW: 88.

39W is 1/2 Black Angus – Simmental cross. 39W is long, deep and thick. He will make a good choice to use on black based cows. He will increase weaning weight and provide more milk because of the Simmental genetics. This bull is quiet with good feet and looks more Simmental than Angus. Heifer bull.

19. JLS 29W

1/2 Angus 1/2 Simmental 17 November 2009

BW: 82.

JLS 29W is 1/2 Black Angus – Simmental cross. His dad was a bull we bought from Gumbo Gulch to use on our heifers. He was a Mighty in Focus son and all his calves were small at birth, but grew big time. 29W's mother is a full Fleck heifer so 29W will increase milk and add pounds to his calves in the fall. 29W's calves will calve easily since he was 13 days early. Heifer bull.

20. JLS 93W

1/2 Angus 1/2 Simmental 16 November 2009

BW: 80.

93W is 1/2 Black Angus – Simmental cross. His mother is full Fleckvieh. 93W will increase milk production in his daughters. He will also calve easily being 14 days early. He looks more Angus than Simmental and is the spitting image of his dad. A bullet proof heifer bull candidate.

MFL Fiesta 73F Cow Family

FULLBLOOD FEMALE 358778 MFL 73F 13 April 1996

BW: 95; 205 day: 721; 365 day: 1019.

MFL 73F was purchased out of the MFL dispersal. She was the most prolific cow we ever owned. She had tremendous feet, lots of milk and a really good udder. We never touched any of her calves at birth and she never had a bad calf. She was one of the cornerstones in our herd. She was shipped last year.

10J is our Solway Adonis daughter that is out of MFL 73F, who was bought out of the MFL dispersal. 10J was the first calf 73F had here. 10J is by far our best cow and was flushed to Titanic producing 8 freezable embryos. She has never had a bad calf and each year her calf is by far our best, be it male or female. The quality of her offspring is evident by her 3 daughters; JLS 48P, JLS 42N and JLS 125W. 125W I feel, is the best heifer that we have ever raised. Jay tried to get me to bring 42N to Fleck Select as an open, but she stayed here. 125W he said was good enough to bring to National Trust this year and her son, 2T, speaks for himself. She has only had one broken colored calf, an Eisenherz calf that was half white. If I was the new owner I would flush her to a homozygous polled bull because she would sure give you a bunch of calves that would bring some attention and money. There is also 2 embryos that would be full siblings to her Solway Adonis - 73F that are U.S. qualified. Unfortunately, she had stillborn twins this year. Full Fleck and comes with 10 straws 1N semen.

125W is a 1N – 10J cross. Here is a heifer that I am sure is going to be as good as her mother. She even looks like her at a young age. I feel she is definitely good enough to be in a flush program and if we weren't dispersing, she would be flushed this year for sure. I am sure that she is the best heifer that we have ever had on the place and I would highly recommend her as a cornerstone in any herd. Her black heifer is the last one born and is as good as any heifer we have this year. She has a really good quiet disposition and has good feet and a really good udder with lots of milk. She is my pick of all the 1N or 1L females in the sale.

65R is out of 51N and our heifer bull 6N. She is the only daughter out of 6N, a Metro son that we used with great success on our heifers. 6N was the best heifer bull we ever used, but one night at 1:30 he ticked me off, so I shot him, problem solved. Back to 65R – she is a small framed cow that raises really good calves. Her 1N daughter is one of our best and she has a good Karl open in the pen. She has a heifer at side by our 1N. A December born calf, so on paper one year older.

102U is a 1L – 39N combination. She is 39N's only heifer and is going to be a smaller framed cow. She has good feet and a good udder and is very docile and easy to handle. She has a good black bull that has heifer bull stamped all over him (Lot 18) and a good 26S bull calf at side. Again, a little thin with good reason.

85T is a 1N - MFL 73F cross. 73F was one of the best cows to ever walk our place and was shipped last year when she came open. 85T is a full sister to 93U and a half sister to 10J, 37L, 36M and 39N. She is as good a daughter, except for 10J, as 73F has ever produced. Her full sister 93U is a close second. 85T is really quiet and her first two calves have been good. 85T has good feet and a good udder. She has a heifer at side by our 26S bull.

A Lot: JLS ___Y, Female, by IPU Red Warrior 26S -PG663829-
6 January 2011, BW: 94.

93U is a full sister to 85T and is a 1N - MFL 73F combo. She is going to be a really good cow and will be like her full sister 85T. She is really quiet and has good feet and a really good udder. Unfortunately, she does not have a calf at side. Her calf is being raised by 39N. I screwed up putting her calf in with another heifer that let the calf suck and by the next morning I realized what had happened, but by then 93U would not take her calf back. 39N lost her calf at birth so I got 39N's dead calf out and she took 93's instead.

25L is our Romulus daughter that was purchased from Chris Havener. 25L and her sister were lead off opens that year. She has been an excellent cow that has never had a bad calf. Her bull calves have always been near the top of the pen and her daughters are all good cows. Two of her daughters take after her in that she was always skinny until she got to 6 years old before she put on any condition. I feel that she is our number 2 cow and is also worthy to be flushed. Full Fleck and comes with 10 straws of 1N semen. She has a heifer calf at side.

98U is a full sister to 8S, 21S and 81T. She is a lot like her sister 21S; both tend to be a little thin. 98U is extremely quiet. She was one of the last to calve last year so her black heifer is a little smaller than the rest, but I feel it is as good a quality as there is. She has an excellent 26S bull calf at side. She is another of the second calvers that is a little thin, so don't judge her by her condition. Judge her after you see her calf and you will see why.

57R is another of those good 8M - 1L cross cows. She is out of 18C, who we shipped last year because we had a feed shortage and at 18, I felt she was near her end. 57R is really quiet, has good feet and a good udder. She is a full sister to 80S and 92U and a ¾ sister to 40N, 61R, 67S and 83T. She produces good calves that are quiet. She has a Ribeye daughter and a good 26S open heifer in the sale and a 5T bull at side.

A Lot: JLS ___ Y, Male, by LRX Jiro 5T -675594- 26 February 2011, BW: 100.

107U is a Ribeye – 57R daughter. She is a cow that is going to be small in stature, but will deliver big time results. She is very docile just like her mother as she comes from that 1L – 18C line on the female side. She will have really good feet and udder. Again, a little on the thin side but with good reason.

80S is another of those 1L - 18C daughters. 18C was an 8M daughter who we shipped at 18. Even at 18 years her udder was in really good shape and she never had her feet touched. She is my pick of the seven sisters. I feel she is good enough to flush. She should have built in longevity with her mother being 18 and in calf when we shipped her. 1L is still going strong at 10 years. 80S has excellent feet and an excellent udder. She has my pick of the red bulls in the pen this year. She has an excellent 5T bull at side that is definitely colored right and breeder quality.

92U is an 18C - 1L daughter. She is a full sister to 80S, 57R and a ¼ sister to 40N, 61R, 67S and 83T. She is going to be a lot like her sister 57R when she matures. Her calf last year was one of the best black calves we had and made the top cut as far as weight went (834 lbs). She might be a little thin, but she has a good excuse as she has a good 26S heifer calf at side. So judge her by her calf, not by her body condition. Again, she has good feet and a good udder. She is one of my picks from last year's heifers.

13G was purchased from Riverbend's first dispersal sale. She has been a good, solid, trouble free producer that has a good udder and good feet. She has two daughters in this sale as well as a heifer at side. Even though she is up in years, she will be around for a few more years.

94U is a 1N - 13G combination. She is going to be a good cow with really good feet and a good udder. She is a smaller framed cow that came in poor condition. Her mother was a lot like this when she was young, but as she got older, became an easy keeper. I expect 94U to be like this also.

A Lot: JLS ___ Y, Female, by IPU Red Warrior 26S -PG663829- 15 February 2011, BW: 80.

40N is a 1L - Arnie 8M cross and the oldest 1L cow we have. She is a full sister to 61R and ¾ sister to 57R, 80S, 42N, 67S and 83T. This is a combination that has really worked well for us. 40N's mother was an 8M daughter out of a Romulus - Great Guns Rachel cow, add in the 1L pedigree and it is a win win combination. 40N's mother came from Ross Small in Ontario. 40N has good feet and lots of milk, as do all the 1L daughters. She is easy to handle and is really quiet, again as are all the 1L daughters. She has one daughter in the sale and a bull calf by 26S in the sale.

61R is a 1L and 8M combination and a full sister to 40N and 3/4 sister to 57R, 80S, 42N and 83T. 61R's mother was a dark red 8M daughter out of a Romulus/Great Guns Rachel daughter. 61R is a little bigger than 40N and always raises a really good calf. She has a really good udder and good feet and is really quiet as are all of the sisters. She has a good bull calf in the pen and a really good full Fleck, solid dark red with a small blaze on face bull calf by 5T. This bull calf is worth a lot to breeders; you won't find any better marked or with a better pedigree, plus he is 100% Fleckvieh.

99U is a Romulus 53R - 12L combination. She calved last July to our 1N bull on pasture. She came in open the previous fall so I put her with the heifers for the winter, then in with 26S when we turned the bulls out. In July when Jay came to look at the cows we had three new calves. Surprise, surprise! Her bull calf from last July is keeping up to 60J's bull calf so I know she will be a good cow because 60J is a real old work horse. Open.

53R is a 1N - 13K cow. She is a really good cow that is really quiet and always raised one of our top calves every year. Her first calf heifer by 26S is one of the best red heifer I have ever seen and her open will be just as good. 53R has good feet and a good udder with lots of milk. Her bull calf by 5T at side is good at this stage. I feel she is one of our top young cows and is another one I feel should be flushed. She has had three good calves by three different bulls and all have been the top of the pen, so the consistency is there.

Transcon's "Sight Unseen" Purchasing Service

We always appreciate your attendance at our sales however, we realize you can't be everywhere we are. We are also very aware that because of the volume of bulls that we market, we are in a position to find you that bull (or bulls) for the best value and quality, in your budget.

Our service is conflict free as we don't own the cattle we sell and we are never paid incentive buying commissions or bonuses by the sellers. Your confidentiality is guaranteed and this service is at absolutely no cost to you.

**In 2010 Transcon purchased 300 head on order
for absentee buyers for over \$1,000,000
including 150 bulls for \$565,000!**

Thank you to the 150 cattlemen who placed their confidence in Transcon to purchase animals on their behalf in 2010. To see the list, please look at the "Order Buying" page at:

www.transconlivestock.com

To take advantage of this order buying service to purchase bulls at this sale, please contact any of the Transcon sale day phone numbers.

Terms & Conditions

TERMS - The terms of the sale are cash or cheque payable at par at sale location unless satisfactory credit arrangements have been made previous to the sale. The right of property shall not pass until after settlement is made. Transcon Livestock Corp. reserves the right to require a certified cheque as settlement before releasing any sale cattle. Should any purchaser fail to settle for his purchase Transcon Livestock Corp. reserves full power to resell the animal to the best advantage either publicly or privately, without further notice. Any loss arising from such resale together with keep and all other expenses shall be payable by the defaulter. All settlements must be made with the clerks of the sale before any cattle will be released.

BID - Every animal consigned to the sale must be sold by auction. No private sales will be allowed except as otherwise provided for in the terms and conditions. No by-bidding will be permitted. Each animal will be sold to the highest bidder.

DISPUTES - In cases of disputes, bidding will be reopened between the parties involved. If no further bid is made the buyer will be the person from whom the auctioneer accepted the last bid. The auctioneer's decision in such matters will be final.

PURCHASER'S RISK - Each animal becomes the risk of the purchaser as soon as sold. Animals will be cared for at the purchaser's risk for a reasonable length of time.

INFORMATION SUPPLIED - The information contained in this catalog is believed to be true and accurate. However, the information has been supplied by the seller and neither Transcon Livestock Corp. or Jamesway Enterprises Ltd. assume any responsibility if the information supplied is not accurate.

CATTLE PICTURES - The images in this catalog are believed to be accurate representations of the individual animals. Transcon Livestock Corp. and Jamesway Enterprises Ltd. assume no responsibility if the images as received have been altered.

ANNOUNCEMENTS from the auction block will take precedence over the printed matter in the catalog. Buyers are therefore cautioned to pay attention to any such announcements.

CERTIFICATE OF REGISTRY - The proper Registration or Recordation paper, as the case may be, will be duly transferred and furnished to the buyer for each animal after settlement has been made.

SHIPPING - Assistance will be given in making shipment after the sale but no risk is assumed by the Sales Management or Seller. Expenses incurred are the responsibility of the purchaser. Purchasers are requested to furnish shipping instructions when making settlement.

GUARANTEE - As this is a dispersal sale all cattle will be selling as is with no further guarantee. However, bred females will be pregnancy tested and results along with any pertinent information known to the owners will be announced from the auction block

EXCEPTION TO GUARANTEE - In cases where the animal is subjected to any hormonal or surgical reproduction techniques after the sale, the guarantee shall be null and void.

HEALTH - All animals will have passed the required tests as determined by Agriculture Canada at sale location. It is the buyer's responsibility to determine health requirements for importing any animal into his province or state. Transcon Livestock Corp. assumes no responsibility for the health status of any animal in the sale.

ACCIDENTS - Although every precaution will be taken to protect the safety and comfort of buyers, neither the Sales Management, auctioneer, or Association assumes any responsibility in this matter and disclaims any liability legal or otherwise in the event of accident or loss of property.
