SureFit® – Pediatrics Collection

SureFit

SureFit Shoes LLC, the Podiatric division of Hanger Orthopedics, is a dedicated supplier of ancillary products and services enhancing patient care and driving practice revenue. The company was founded by Bob Shor, DPM with the simple vision to help other Podiatrists be more successful in their practices. Over the last 20 years SureFit has kept that same simple vision but greatly expanded our product and service scope. Today our three main categories are; therapeutic shoes and inserts, bracing and vascular testing. Our Pediatric catalog has been developed with the American College of Foot and Ankle pediatrics. Our joint goal is to have a simple resource for all your pediatric products.

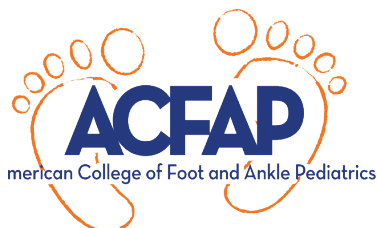

Therapeutic Shoes

SureFit has become one of the largest suppliers of therapeutic shoes and inserts in the United States. We have availability of pediatric shoes from Apis, Answer2 and New Balance. In addition, our trained service staff is able to help pick the right shoe for even the hardest to fit patient.

Bracing

SureFit offers the largest Pediatric selection of custom and OTS bracing. Our 5 warehouses and 6 manufacturing sites allow us to provide any bracing product in a timely fashion. Our pediatric products cover everything from a basic night splint to the most advanced custom bracing solutions. Items presented in this catalog are just a general overview from our complete offering.
