ABSTRACT

Figurative language exists to depict a beauty of words and give a vivid description of implicit messages. It is used in many literary works since a long time ago, including in children literature. The aims of the research are to describe about kinds of figurative language often used in Cinderella, Rumpeltstiltskin, The Fisherman and His Wife and The Sleeping Beauty in the Woods By Charles Perrault and the Brothers Grimm and also give a description the conceptual meaning of figurative language used in Cinderella, Rumpeltstiltskin, The Fisherman and His Wife and The Sleeping Beauty in the Woods By Charles Perrault and the Brothers Grimm. The writer uses a descriptive qualitative method in this research.

Keywords: Analysis, Figurative Language, Children.

1. INTRODUCTION

1.1 Background of the Research

Human beings tend to communicate each other through language. Likewise they use language as well as nonverbal communication, to express their thoughts, needs, culture, etc. Furthermore, language plays major role to transfer even influence in a humankind matter. However, language more than merely for communicating and influencing, there is something hidden to see a language as a function perspective.

As we know, language consists of each words, sentences, structures, phrases, and style. One of English language style is figurative language. Figurative language exists to define a beauty of word and give a vivid description of implicit messages. Figurative language is used in many

forms of communication, however some children's literature, explicitly story employed to add more sensuous to children.

Referring to the explanation above, the writer was interested to analyze figurative language used on Charles Perrault and The Brothers Grimm's short stories, therefore the writer chooses this research entitled 'An Analysis of Figurative Language on Cinderella, Rumpelstiltskin, The Fisherman and His Wife and The Sleeping Beauty in the Woods'. This research tries to give more information about kinds of figurative language that is employed in fable stories and the conceptual meaning of each figurative language employed.

1.2 Previous Research

1.2.1 Bustanil Arifin (2008)

Bustanil wrote the research entitled "The Usage of Figures of Speech in The Titles of Tempo Articles."

1.2.2 Fitri Iryanti (2010)

Fitri wrote the research entitled "A Figurative Language Analysis on Sylvia Plath Poems"

1.2.3 Emilija A. Sakadolskis (2003)

Emilija wrote the dissertation entitled "The Use of Figurative Language in The Construction Musical meaning: A Case Study of Three Sixth Grade General Music Classes."

1.3 Position of Research

According to the previous research above, the position of this research develops the research. From Bustanil's research the position of this research is close to the position of his research. However, Bustanil employed Tempo magazine title as a source of the data, this research employed children's fable as a source of the data in order to figure out about figurative language. This research only conducted about kinds of figurative language employed in Charless Perrault and The Brothers Grimm, try to figure out the conceptual meaning in each figurative language included.

2. LITERATURE REVIEW

2.1 Definition of Children Literature

Katherine Paterson pointed out in her articles that a book becomes a children's book when succeeding generations of young readers claim it for themselves (1982: 325), which is true that the content of children literature must be limited to children's experience and knowledge. In line with Katherin (1982), Burhan believes that children literature is a literary works having psychological emotionally can be understood and responded based on the true fact and can be imagined easily. (2005:6).

2.2 Definition of Figurative Language

Based on Perrine (1982) through her explanation about the effectiveness of figurative language in four main reasons,

- Figurative language affords readers imaginative pleasure of literary works.
- It is a way of bringing additional imagery into verse, making the abstract concrete, making literary works more sensuous.
- 3. Figurative is a way of adding emotional intensity to otherwise merely informative statements and conveying attitudes along with information.
- 4. And the last, it is a way of saying much in brief compass.

Some books named denotation and connotation meaning, the others said literal and nonliteral meaning. The basic distinction seems a common -sense one: distinguishing between instances where the speaker speaks in a neutral, factually accurate way, and instances where the speaker deliberately describes something in untrue or impossible terms in order to achieve special effects. Non literal uses of language are traditionally called figurative and are described by a host of rhetorical terms.

RESEARCH METHODOLOGY

3.1 Research Method

In this research, descriptive qualitative method were applied. Since the research do not employ a statistical procedure, the result are in words not in numerical. By description, the data will be interpreted with words and explanation

3.2 Source of the Data

The source of data in this research are taken from Charles Perrault and The Brothers Grimm containing about twenty two short stories. The writer only used four children's short stories. The sources of the data are as follows:

- Cinderella by Charles Perrault and The Brothers Grimm
- 2. Rumpelstiltskin by Charles Perrault and The Brothers Grimm
- 3. The Fisherman and His Wife by Charles Perrault and The Brothers Grimm

The Sleeping Beauty in the Woods by Charles Perrault and The Brothers Grimm.

3.3 Technique of Collecting Data

- 1. Reading the English children short story from Charles Perrault and The Brothers Grimm.
- 2. Giving a limitation of the data
- 3. Underlining the sentences that contain each figurative language
- 4. Classifying the data according to the theory
- 5. Dividing them from one kind of figurative language to another.
- Analyzing the data based on the theory
- 7. Finding out the conceptual meaning of each figurative language.

3.4 Source of the Data

After collecting the data, the writer analyzes the data by doing:

- 1. Classifying the data
- 2. Analyzing the data

4. RESULT AND DISCUSSION

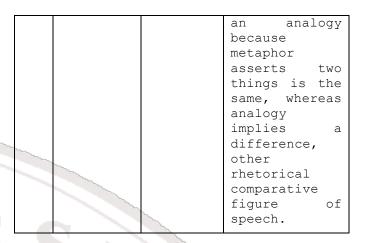

4.1 Kinds of Figurative Language

4.1.1 Simile

No.	Simile	Short	Description

5. CONCLUSION AND FUTURE RESEARCH

5.1 Conclusion

Referring to the aim and the result of the research, the writer draws the conclusion as follows;

- 1. There are nine kinds of figurative language used on Charles Perrault and The Brothers Grimm Fables. The sum of the data is about twenty eight consisted of
- 2. In order to make the reader consistently understand about each figurative language that hide in each stories, the writer tries to describe the meaning based on the context and dictionaries.

5.2 Future Research

The writer suggests to the next researcher to research other kinds of figurative language or figurative language expression. If the next researcher wants to make a research about English Children Short Story, it will be better to make an analysis from other side like translation aspect, or moral value aspect. For the next generations who want intrigued the children to read, the figures of speech can be solution to make fun of the stories.
