Dermatology Treatments

AT CALIFORNIA HEALTH &
LONGEVITY INSTITUTE

Cosmetic Consultation & Evaluation

A facial analysis to determine best non-surgical methods to look younger including the use of skin tightening and DNA repair creams, fillers, injectables, or lasers to resurface and tighten skin. An appointment with our dermatologist is required for any dermatological service.

Skin Cancer Screening & Prevention

It is important to have a yearly check-up by a dermatologist trained to look for skin cancers. Both cumulative damage and sunburns can eventually lead to skin cancer.

Radiesse

A cosmetic filler perfect for improving smile lines and lines between the nose and mouth. The advantage of this product is the long-lasting effects compared to other fillers.

Sculptra

Sculptra works by filling in lines and stimulating the body to naturally produce new collagen. Sculptra thickens aging skin and creates a fuller, more youthful appearance by volume-lifting the skin.

Voluma

Voluma works by lifting the cheek skin by injection over the cheek bone and improving the lower eyelid area. Voluma lasts for more than 2 years.

Botox/Dysport

A cosmetic enhancer that dramatically reduces wrinkles and fine lines on the face.

Juvederm/Restylane/Belotero

A cosmetic filler designed to reduce wrinkles and lines in the skin of the face and lips. You will see the results as soon as your treatment is complete and for up to eight months.

KYBELLA™ (deoxycholic acid) Injection

The first and only FDA-approved injectable drug that contours and improves the appearance of submental fullness, commonly known as “double chin”. KYBELLA™ is a non-invasive treatment, when injected into subcutaneous fat, it eliminates the fat cells in the treatment area. Depending on the severity of the submental fullness, patients can expect to have 2-4 treatments to achieve individual aesthetic outcome.

Sclerotherapy

Reduce or eliminate the appearance of spider veins just below the surface of the skin. In most cases, multiple treatments are needed four to six weeks apart.

Fractional Erbium Laser Treatment

This is an effective laser to treat wrinkles, photo damage and skin discolorations while helping to thicken skin and prevent skin cancer. This laser can also stimulate collagen production resulting in your skin appearing more supple and full. The treatment is painless and takes about 3 days to heal.

Fractional CO2

New technology for wrinkle removal including lines around the mouth and eyes. This exciting medical breakthrough gently removes unappealing skin surfaces to expose underlying healthy skin, tightens skin, and makes skin appear years younger. The skin-tightening is significant enough that the laser is used to tighten the skin around the upper and lower eyelids without any surgery.

Target Heart Rate Assessment

(VO2) 50 MINUTES

Considered the “gold standard” in cardio respiratory fitness testing, VO2 determines the amount of oxygen a person utilizes during exercise. Using this value and your heart rate, precise caloric expenditures can be determined at different training intensity levels. With this information, a custom program can be designed to achieve personal goals, allowing you to train smarter, not harder.

Posture and Movement
