

PWA | GEN2

ANSI / ASME B73.1

PROCESS PUMP

PWA | GEN2

**5 Year Unconditional
Power Frame
Warranty is Standard.**

Innovative Power Frame Features

- All new patent pending frame design for enhanced reliability.
- 25% more cooling surface than PWA GEN 1.
- Sealed lubrication chamber.
- ISOMAG™ magnetic seals IP65 rated Power Frame sealing.
- Sloped and segregated drain for contaminant isolation.
- Predict Plus™ GEN2 proactive pump monitor.
- Zero oil maintenance required for up to 3 years.*

Carbon Steel vs. Ductile Iron

- High strength, impact resistant Carbon Steel liquid ends for improved durability and pressure containment.
- Replaces non-repairable, ductile iron casing and impellers, with repairable carbon steel, for extended component life.
- 30% Higher Thermal conductivity than Cast Iron for improved heat dissipation, lower oil temperature and longer bearing life.

Shaft and Bearing Assembly

- Upgraded 316L SS vs. 4140 steel pump shaft is standard at no additional cost.
- Proven flinger disk lubrication device to ensure effective bearing lubrication. Provides 30% increased bearing L-10 life and minimum 15°F lower bearing operating temperatures compared to flood oil design.

DESIGN FEATURES AND BENEFITS

● Casing Gasket

- Fully confined to maximize liquid sealing
- Protects casing fits from corrosion, therefore increase maintenance ease and proper alignment during reassembly

● Seal Chamber / Sealing Options

- Multiple seal chambers for maximum sealing flexibility for all process applications
- Accommodates all mechanical seal manufacturer's component and ANSI cartridge seal configurations
- Supports the full array of CPI seal support system options
- Ensures superior leak protection with maximum heat dissipation, maximizing seal life and pump reliability

● Predict Plus™ GEN2 Proactive Pump Monitor

- Temperature and 3 axis vibration monitoring
- IP66 and Class 1, Div. 2 compliant

● Casing

- Carbon Steel ASTM A216 material standard for improved durability and pressure containment
- Precision serrated flange face finish for optimum gasket retention and sealing
- Class 150# standard and 300# option
- Self venting, centerline mounted discharge flange
- Casing thickness exceeds ASME B73.1 specification for increased casing life
- Back pull out design for easy maintenance
- Full line of corrosive resistant materials

● Quality

- Manufactured and tested in the USA

● Impeller

- Fully open for increased corrosion, abrasion and solids wear resistance
- Back pump out vanes for reduced thrust loading and seal chamber operating pressure

● Delivery

- Pump components strategically inventoried for rapid shipment in a variety of material options

● Casing Drain

- Optional casing drain and drain piping

● Foot Mounted Casing

- Maximum casing stability and support for back pull out maintenance feature
- Reduced vibration

ePOD Pump Selector

- Access to end users and specifiers to select your pump application online at www.pumpworks.com

Sealed Fill/Filter Cap

- Oversized for easier oil changes
- Internal filter, protecting against foreign object contamination when filling

Bearing Housing

- 25% additional cooling surface area than PWA GEN 1
- Sealed lubrication chamber
- Sloped and segregated drain for isolation of contaminants
- Standard flinger disk design with optional purge or pure oil mist lubrication
- Optional finned tube cooler for process temperatures above 450° F
- Internal surfaces cleaned, rust preventative applied, and enamel coated assuring internal casting cleanliness

ISOMAG Magnetic Seals

- IP 66 rated Power Frame sealing (patent pending)

Thrust Bearing

- Heavy duty double row standard
- Optional duplex angular contact thrust bearing

Externally Adjustable Shaft and Impeller System

- Easily adjust impeller to front casing clearance without removal of pump from piping
- Restoration to factory efficiencies

Two Oil Level Sight Glasses

- 1" sight glass located on each side of bearing housing for flexible viewing

Oil Sump Drain Plug (Opposite Side)

- Magnetic plug to maintain bearing housing cleanliness and increased protection
- All PWA drain plugs located on side of frames for easy access

Shaft and Bearing System

- Rigid, heavy duty design for minimal shaft deflection at seal area and increased reliability
- Exceeds ASME B73.1 bearing life specification requirements
- 316L SS Shaft material is standard with optional material upgrades available

PredictPlus®

YOUR PUMP WANTS TO TALK TO YOU™

Predict Plus is the Only Wireless and Cloud Connected Machinery Health Monitor Designed Specifically for Proactive Pump Monitoring

- 24/7 online vibration and temperature monitoring device.
- Automatic device registration on the cloud via cellular interface.
- Proactive alerts from the Predict-Cloud.
- Long term storage of trend data including Fast Fourier Transform (FFT).
- Affordable and available as as standard option on all PumpWorks products.
- External or battery powered.

Always On

Predict Plus is CONTINUOUSLY monitoring and logging your pump's health.

Vibration

Self-Calibrating Tri-Axial Accelerometer to capture FFT and RMS vibration data.

Bearing Temperature

Integrated thrust bearing temperature monitoring.

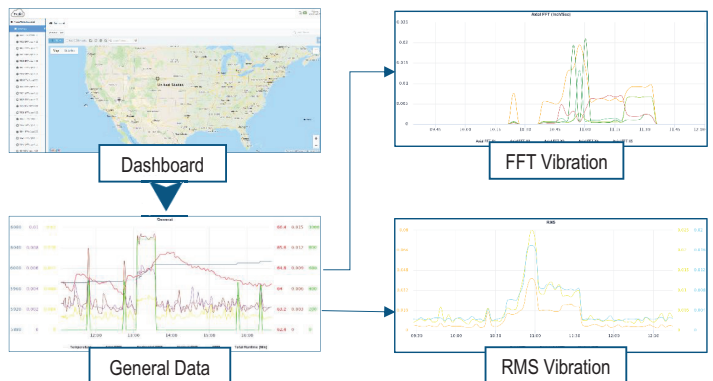

Alerts

Proactive alerts via email and SMS from the Predict-Cloud.

Predict-Cloud is a powerful tool in attaining the goal of reducing maintenance spending and increasing MTBR (Mean Time Between Repairs). By proactively identifying detrimental system conditions prior to catastrophic machine failure.

HYDRAULIC PERFORMANCE COVERAGE

60 Hz Performance Coverage

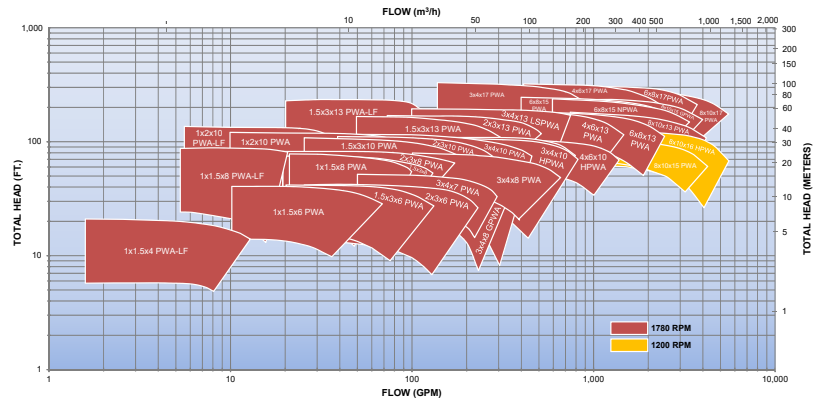

Visit our web site at www.pumpworks.com and specify flow and performance needs and obtain pump selection and performance curve.

Performances shown are nominal and are to be used for preliminary selection only.

Capabilities

- Capacities to 1,364 m³/h | 7,000 GPM
- Heads to 223 m | 730 ft
- Temperatures to 371° C | 700° F
- Pressures to 26 bar | 375 PSIG

50 Hz Performance Coverage

Visit our web site at www.pumpworks.com and specify flow and performance needs and obtain pump selection and performance curve.

NOTES:

- 17 inch pump sizes - Shaft diameter at Stuffing Box / Seal Chamber is 2.25 inches (57) with sleeve. Shaft Sleeve Outside Diameter is 2.75 inches (70) for packing and 2.5 inches (64) for mechanical seals. Seal chamber bore is 4.75 inches (121). Stuffing box bore is 3.625 inches (92).
- 17 inch pump sizes power limitation per 100 RPM is 20HP (15kW).
- Hydro-static test pressure equal to 1.5 times Maximum Allowable Working Pressure.
- Pressure ratings to 740 PSI (5137 kPa) – consult factory.
- Tube Finned Cooler, Jacketed Seal Chamber, Graphite Impeller O-ring and Casing Gasket for temperatures between 450° F (232° C) to 700° F (370° C).

Test Facilities

- Test flows up to 7,500 GPM.
- Discharge test pressures up to 740 PSI.
- Supply tank rated from full vacuum to 65 psi.
- 460 volt through 500 HP, 3600 RPM.
- Variable Frequency Drive for precise speed control through 500 HP @ 460 volt.

See our Test Facilities Brochure for more information.

Typical Industries

- Chemical/Petrochemical
- Pulp and Paper
- Food and Beverage
- Oil and Gas
- Primary Metals Manufacturing
- Mining
- Power Generation
- Waste Treatment
- General Industrial
