## APPENDIX C Pictures for Sorts and Games

You can use the pictures that follow in a number of ways. For example, you can use them like clip art to create picture sorts. Refer to Chapters 4 and 5 for suggested contrasts for picture sorts, or create your own. Simply make copies of the pictures you need (combining two, three, or four sounds) and glue them randomly onto a template, such as the one in Appendix F on page 400 . You will probably want to enlarge the pictures about 50 percent, and insert labels from the sound board boxes as headers. You may also want to make a complete set of pictures for modeling, small-group work, or centers. Glue or copy pictures to card stock, and perhaps color them, and laminate the card stock for durability. Use the pictures for games and other activities as well.

Pictures are grouped by beginning consonants, digraphs, blends, short vowels, and long vowels. The following list will help you find pictures for rhyme sorts, word families, additional short vowels, and long vowels. The picture names in bold type are in either the short or long vowel picture section, while the others can be found by their beginning sounds.

## Long Vowel Picture Rhymes

Note: More long vowel pictures can be found among initial sounds: paint, vase, shave, blade, flame, grapes, braid, leaf, leash, steam, seal, key, wheel, sleeve, teeth, queen, dream, bike, dice, dime, kite, smile, prize, climb, price, globe, snow, comb, ghost, smoke, toast, flute.
