Preface

- Purpose of this Book
- Our Approach
- Organization of Book
- Our Appreciation

Chapter 1 A Brief History of Game Theory

Why Study Games?.....	1
Rapid Discoveries in the Twentieth Century	2
Key Conceptual Developments in Early Years	2
Pioneers of Game Theory and Advancement of the Field	3
Game Theory's Evolution during the Last Three Decades.....	6
Recognition	7

Chapter 2 Strategy and Game Theory Concepts

Game Theory, Strategy, and Strategic Behavior	10
More on Strategic Behavior and Strategy.....	10
Game Theory and Strategic Behavior in Business	11
Consumer Behavior, Utility Theory, and Game Theory	12
Cardinal Utility	13
Choice Behavior and Game Theory	13
Utility Functions and Game-Theoretic Models	13
Utility Theory and Payoffs	14
Game-Theoretic Models and Illustration.....	14
The Payoff Matrix and Tree Diagram.....	14
Strategic Thinking and Simultaneous- and Sequential-Move Games	16
Rules of the Game	16
Players	17
Information	17
Perfect vs. Imperfect Information	18
Complete vs. Incomplete Information	18
Symmetric vs. Asymmetric Information	18
Set of Actions and Strategies	18
Payoffs	19
Strategy and Equilibrium	19
Dominant and Dominated Strategies.....	19
Dominated Strategies	20
Equilibrium	20
Nash Equilibrium	22
Note on Dominant Strategy Equilibrium and Nash Equilibrium	23

Subgame Perfect Nash Equilibrium	23
Mixed Strategies; Repeated Games	23
Maximin Strategy	24
Sequential Games and Problem Solving.....	25
Complex Games and Games by Categories	27
n-Person Games	27
Different Categories of Games	29
Zero-Sum Games vs. Non-Zero-Sum Games	29
Static vs. Dynamic Games; Repeated Games	30
Cooperative vs. Non-Cooperative Games	30
Other Key Game Theory Concepts	31
Threats and Rewards (Promises)	31
Credibility	31
Sample Game with Threats	31
The Threat as a Strategy	32
Games of Chance: Uncertainty and Risk.....	32

Chapter 3 Modeling Games with Computer Software and Experimenting Games

Prisoner's Dilemma.....	36
Analysis.....	36
Notes	37
Modeling the Game with MATLAB	38
Tit for Tat and the Repeated Game.....	40
Famous Experiment.....	40
Another Prisoner's Dilemma Experiment.....	41
Even More Experiments	42
Battle of the Sexes	43
Analysis.....	43
Mixed Strategy	44
Modeling the Original Battle of the Sexes Game with MATLAB	45
A Battle of the Sexes Experiment.....	47
Assumptions of the Researchers	48
Additional Experiments	50
A Sample Game of Dominated Strategies with MATLAB	50

Chapter 4 A Theory of Strategic Value

Introduction: The Game of Business.....	57
Strategic Value for a Business	58
Important Concepts	58
Advanced Topics	59
Strategy and Value	60
Accounting Net Worth.....	60
Current Income	60

Portfolio Investment	61
Real Options	61
States of Nature and Strategy	61
The State of Nature	62
A Short Revolutionary Example	62
A Revolutionary Game: The State of Affairs in 1775	63
State Variables in 1775 Colonial America	63
State Variables for Business; Control Variables	65
How Many Ships in Your Navy?	65
The Event Tree and Dynamic Payoffs	67
The Event Tree	67
The Extensive Form and the Event Tree	68
State and Control Variables in the Event Tree	68
Encoding History in the State	68
Additional Examples	69
Payoffs and Business Value	69
Static “Payoffs” vs. Strategic Value	69
Value Changes	69
Dynamic Payoffs	70
The Firm	70
Equity in a Firm	71
Note on Limited-Liability Companies	72
Markets	72
Real Options and Management Flexibility	72
The Ubiquity of Uncertainty	72
The Inherent Value of Management Flexibility	73
The Investment Decision	74
What is “Value” for a Firm?	75
Earnings and Capital Gains	75
Strategy and the Pursuit of “Total Return”	75
Available Principles of Valuation	76
Practical Models	78
Example: Strategic Valuation for the Damaged Business	80
Appendix 4.A Stochastic Processes, Diffusions, and Expectations	82
A. Introduction	82
Use of Stochastic Processes in Study of Strategic Behavior	82
B. Brownian Motion and Random Events	82
The Markov Property	83
C. Geometric Brownian Motion and Stock Prices	83
D. Expected Value	84
Expected Value of a Strategy	84
Appendix 4.B Dynamic Programming	85
A. Optimization over Time	85
B. A Prototype “Bellman Equation” for a Private Firm	85
C. Recursive Decisions	85
D. Existence Theory	86

Chapter 5 A Dynamic Game of Asymmetric Information in the Beer Industry

A Game between a Global Brewer and a National Importer	87
Background.....	87
Motivation and Incentives of Companies: Maximizing Business Value	88
Examples	89
Business Value Depends on a Strategic Course of Action	89
Implications of Value, Risk, and Strategic Decisions to the Game	89
Regulated Alcoholic Beverages Industry and Three-Tier System in the U.S.	90
Sales Performance of Gambrinus; General Import Market	91
Incentives at the Time of the 1996 Decision	91
Incentives for Grupo Modelo	92
Objectives of Gambrinus	92
Matching and Conflicting Objectives.....	93
Matching Objectives	93
Conflicting Objectives	93
Concluding Remarks on Incentives.....	94
Strategic Options Available in 1996 and the Game.....	94
Introduction of Strategic Options.....	94
Strategic Options at Two Stages	95
Potential Outcomes.....	95
Game-Theoretic Model	96
Description.....	96
Information	96
Analysis of the Game	99
Stage I (1996)	99
Stage I (1996-2001)	101
Stage II	102
Outcomes of the Game and Conclusion	103
Appendix 5.A	104

Chapter 6 Consolidation in the Wine and Spirits Industry

Introduction	109
Economic Structure of the Industry.....	110
Distribution Arrangements in the Industry	110
The Wine and Spirits Industry and Consolidation.....	111
Consolidation at Wholesaler Level	112
Recent M&As and Business Ventures in Major Markets at Wholesaler Level	113
A Hypothetical Consolidation.....	114

Description of the Consolidation Game	116
Market Share and Power.....	116
The New Market and Strategic Issues.....	117
Players' Strategies and Information	119
Analysis of the Game	120
Simultaneous-Move Game between Wholesalers iii and iv	122
Sequential Move Game between Supplier III and Wholesalers iii and iv	122
Conclusion.....	124
Appendix 6.A	125

Chapter 7 A Regulatory Game: CAFE Standards and Competing Automakers

Introduction	129
Lobbying and Game Theory.....	130
Lobbying as Part of the Game	130
History of Corporate Average Fuel Economy (CAFE).....	131
Future Standards: Energy Independence and Security Act of 2007, 2011-2015 Targets.....	135
Current Debates.....	137
Strategic and Game Theoretical Motivation behind CAFE.....	138
Building the Game and Players, Strategies, Payoffs, and Solution	140
Game Stage 1.....	140
Game Stage 2.....	141
Outcomes of Game Stages 1 and 2.....	142
Game Stage 3.....	143
Solving the Problem and Nash Equilibrium	144
Conclusion.....	146
Appendix 7.A	147

Chapter 8 Business Strategy and Crisis: The U.S. Auto Industry

Introduction and Cause of the 2008 Auto Industry Crisis.....	149
Likely Scenarios for the Automotive Industry.....	150
Economic and Industry Conditions	152
Sales Trends by Automaker	153
Car Sales	153
Truck Sales	154
Long-Term Sales Trends	154
Investor Confidence in Domestic Automakers and Suppliers	155
Key Events to Date (December 2, 2008)	155
Discussion of Potential Scenarios.....	158

The Most-Likely Scenario.....	159
Scenario 1: A GM-Chrysler Merger with Federal Financial Aid ...	159
Other Likely Scenarios	160
Scenario 2: Federal Financial Aid and Radical Restructuring outside of Bankruptcy	160
Scenario 3: Federal Financial Aid and Radical Restructuring outside of Bankruptcy; Chrysler Assets Purchased by Competitors	160
Scenario 4: Chrysler Files for Chapter 11 Bankruptcy; GM and Ford Restructure outside Bankruptcy	160
Scenario 5: Both GM and Chrysler File for Chapter 11 Bankruptcy	161
Strategic Approach to a Potential Merger: Strategies of Key Players	161
Players and Incentives	162
Incentives of the Players	162
Strategies	163
Sample Tree Diagrams Illustrating Players' Moves and Their Strategies.....	164
Strategic Analysis and Conclusion.....	167

Chapter 9 Game Theory and the Law

Introduction	169
Classic Game Theory Applications in Litigation.....	170
Incentives to Settle	170
Example: Litigation or Settlement in a Commercial Damages Case	170
Optimal Sanctions	172
Example: "Punitive" Damages	172
Properly Constructing the Payoff Matrix.....	173
Examples: The Actual Payoff Elements	173
Commercial Damages	174
Overview of Commercial Damages	174
Events in a Typical Commercial Damages Case	175
Evaluating Commercial Damages Using Game Theory.....	175
The Value of Investments under Uncertainty.....	176
Game Theory and Real Options	177

Extensive Form Modeling of an Investment Outcome	177
A Simulation Model for Real Options and Game Theory	
Valuation	178
Results of Experiment Using Simulation Model	179
Game Theory and Antitrust Law	181
Market Entry and Collusion	181
Example	181
Antitrust Case Study: United States of America,	
et al., v. Microsoft Corporation	182
History of Investigations Leading up to the Antitrust Suit	183
Market Power: Windows and Internet Explorer	184
Major Competitors	184
A Game-Theoretic Model of the Microsoft Antitrust Case	185
Key Incentives	186
Analysis of Microsoft's Decision Tree	186
The Trial and Conclusions of Law	187
The Appeal	188
The Settlement	188
Appendix 9.A	190
Bibliography	193
Index	199
